SHIRE OF DANDENONG.

By-law 32.

IN pursuance of all or any of the powers conferred by the *Health Act* 1890, and by the *Local Government Act* 1903, the President, Councillors, and Ratepayers of the Shire of Dandenong order as follows, that is to say:—

1. This By-law shall apply to and have operation in the following portions of the Shire of Dandenong, that is to say:—

SPRINGVALE.

Commencing at the south-east corner of Crown allotment 2, section 12, parish of Mordialloc; thence along Springvale-road to Sandown-road west; thence along Sandown-road west to the south-east corner of lodged plan 5825; thence northerly along the eastern boundary of lodged plan 5825; thence westerly along the northern boundary of lodged plan 5825 to Springvale-road; thence along Springvale-road to the north-east boundary of Crown allotment 2, section 12, parish of Mordialloc; thence along the northern boundary of Crown allotment 2, section 12, parish of Mordialloc; thence along Railway-avenue to Regent-avenue; thence southerly along Regent-avenue to a point directly opposite St. James'-road; thence along St. James'-road for a distance of 10 chains; thence southerly in a direct line to Osborne-avenue; thence along Osborne-avenue to Regent-avenue; thence along Regent-avenue to St. James'-avenue; thence along St. James'-avenue to the commencing point.

2. Every occupier and every person having the management and control of any house or premises within the aforesaid area or portions of the said shire, and to which house or premises this By-law is applicable, shall construct or cause to be constructed thereon a proper privy in the form of an earth-closet, which shall consist of a suitable privy building, the floor of which is at no point less than 3 inches above the surrounding ground surface, and shall have requisite apparatus for the application of dry earth or other deodorizing material to the contents thereof, and shall be constructed and placed so as to afford easy means of access for the purpose of removing the pan, and emptying and cleansing the same. Every privy attached to any school, licensed public-house, hotel, factory, work-room, or common lodging-house, shall be paved with some non-absorbent material, having a fall or inclination from the rise of the seat towards the back of the building of half an inch to the foot. All privies shall be constructed with proper openings or flues to provide sufficient means of ventilation, and shall be prepared and permitted to be used for the double-pan service herein provided for.

3. The Council shall cause every closet and privy to be supplied and kept supplied with two pans for the reception of night-soil, and a lid to closely fit the same, and shall cause one or other of such pans to be kept under the seat aforesaid.

4. The Council shall at least once a week cause the pan in use to be closed with a close-fitting lid, and removed with its contents from the premises in the day-time, and the other pan to be left in its place, and the night-soil removed, rendered inoffensive.

5. Before leaving any pan in a closet or privy, the Council shall cause the same to be cleansed by super-heated steam, and tar-painted inside, or by some equally efficient means.

6. The occupier or person as aforesaid shall not contract for the providing of pans for or removal of night-soil from such premises except such supply and removal be in accordance with this By-law.

7. No occupier or such person as aforesaid shall use a closet pan for depositing any yard or house rubbish or any other material in (except for deodorizing) other than night-soil, or shall damage such pan or lids in any manner whatsoever.

8. Every such occupier or person shall cause to be kept in closet a proper supply of dry earth, ashes, lime, sawdust, charcoal, or some other effective deodorant for effectually deodorizing night-soil, and shall cause all night-soil which may be deposited in the pan placed in such closet to be immediately on such deposit covered with a quantity of such deodorizing material sufficient to thoroughly disinfect the contents of such pan.

9. The Council shall have power, in lieu of making a rate, to make an annual charge on each occupier or other person as aforesaid for the pans supplied, and for the removal of night-soil and the other work herein directed, the amount in default of payment to be recovered in any Court of Petty Sessions.

10. This By-law shall not apply or be deemed applicable to any holding within the said area which, according to the rate-book of the Shire of Dandenong, exceeds 5 acres in area, and as to which the health officer or sanitary inspector of the said shire shall in writing have certified in manner hereinafter appearing, that in his opinion such holding need not be included in the operation of the said By-law. The owner or occupier of such a holding may at any time, at his or her own expense, apply for and obtain (if thought fit) such a certificate, and shall pay all expense caused to the shire or the Council thereby, and such certificate shall be directed and sent to the secretary of the said shire by the health officer or sanitary inspector, and shall not have any effect until so sent.

11. Every person who shall by any wilful act or default be guilty of any breach of this By-law shall be liable to a penalty, at the discretion of the Court or Justices, either of Five pounds for every such breach, or Two pounds for every day during which such breach shall be committed or continued, unless the Justices before whom the penalty is sought to be recovered shall order any portion only of either of the said penalties, such portion being not less than Five shillings, to be paid; and any person committing any such breach as aforesaid shall be liable to the panalty, notwithstanding that the Council may be empowered by this By-law or otherwise to remedy such breach, and whether such Council has or has not taken advantage of such powers.

Resolution for passing this By-law agreed to by the Council on the 30th day of March, 1914, and confirmed on the 1st day of June, 1914.

(SEAL)
E. HARRIS, President.
G. W. BURDEN, Councillor.
K. G. McALPIN, Shire Secretary.

The foregoing By-law was allowed and confirmed by the Board of Public Health in and for the State of Victoria (it having been first certified that notice of the intention to apply for such confirmation had been given in the Shire for which the same has been made in the manner required by law) this nineteenth day of August, in the year of our Lord One thousand nine hundred and fourteen.

By order of the Board,

T. W. H. HOLMES,
Secretary.

11. Candidates producing satisfactory evidence of having passed the matriculation or senior examination at a University, or of having completed a course of the degree of Bachelor in Engineering at any University recognised by an Australasian University, may be exempted from working out papers in elementary geometry, trigonometry, and algebra, and will be credited with 60 per centum of the maximum marks allotted those papers. Candidates holding satisfactory certificates or diplomas from any University recognised by an Australasian University or from recognised public technical schools may be exempted from working out papers in physics and geology, and will be credited with 60 per centum of the maximum marks allotted those papers.

Candidates admitted under clause 5(*d*) may be exempted from working out papers other than those prescribed in clause 10(*c*), and from such portion of the practical examination as the Board may determine.

CERTIFICATES OF COMPETENCY.

12. A candidate qualifying and passing the examination held under these regulations shall be entitled to a certificate that he is qualified for the position of a land surveyor in Victoria.

13. A surveyor applying to the Board for a certificate of competency without examination on the grounds of his holding a licence and certificate entitling him to practise in any of the other Australian States or in the Dominion of New Zealand, shall produce such licence or certificate of competency from the Board of the State or Dominion in which he is licensed or authorized to survey, together with satisfactory evidence as to character; provided that, should such licence or certificate have been issued upon examination held prior to September, 1895, or in virtue of a certificate issued prior to September, 1895, he shall further produce a written recommendation or a certificate, dated not more than twelve months previously, from such Board; provided also, that any surveyor prevented by absence from the State or Dominion in which he obtained his licence or certificate from obtaining the recommendation of the Board of that State or Dominion, may be granted a certificate on passing such examination under these regulations as the Board may require. Each application shall be accompanied by a fee of £2 2s.

14. The Board may grant a certificate of competency or a letter of recommendation to any surveyor holding a Victorian certificate dated prior to September, 1895, and desiring to be registered in another State or the Dominion of New Zealand, either without examination or on such *viva voce* examination as in the opinion of the Board may be necessary. Application for such certificate shall be accompanied by a fee of £2 2s.

REGISTRATION OF ARTICLES OF INDENTURE.

15. Articles of indenture or other similar agreement for the tuition of surveying by a qualified surveyor shall be forwarded to the secretary for registration within three months of the date of commencement of service thereunder. Applications for registration shall be accompanied by evidence of the pupil having passed at any University recognised by an Australasian University the matriculation examination or such other examination as shall, in the opinion of the Board, be equivalent thereto. The fee for each registration shall be Five shillings. Transfers of articles or agreements shall be registered within three months of such transfers.

16. On and after March, 1913 (except as hereinafter provided), no candidate shall be eligible for examination unless he shall have passed the University or other examination as set forth in the preceding clause; provided that, subject to his passing a special examination prescribed by the Board which shall include English, arithmetic, geometry, and algebra, a candidate who has not passed the University or other examination as set forth in the preceding clause may be admitted to examination if—

(*a*) He failed at an examination held prior to March, 1913; or

(*b*) He produces certificates of six years' satisfactory field service.

LICENCES TO SURVEY.

17. The Board may issue a licence to any person to whom it has issued a certificate of competency, or who holds a certificate of competency issued by any reciprocating Board of Examiners for land surveyors in Australasia subsequent to 1st January, 1896, and who is still entitled to practise as a land surveyor in the State or Colony where he obtained his certificate, or to any surveyor holding a certificate of competency issued by the Department of Land and Survey prior to 1st January, 1896, or who holds a licence to practise as surveyor under the Transfer of Land Act issued by the Surveyor-General prior to 1st January, 1896. Each application shall be accompanied by the fee (£1 1s.), the declaration as prescribed by the *Land Surveyors Act* 1895, and satisfactory evidence as to character.

Adopted at a meeting of the Surveyors Board, held on the 6th November, 1912.

CAVENDISH TO TOOLONDO RAILWAY CONSTRUCTION TRUST.

REGULATION NO. 1.

FOR CONVENING MEETINGS OF THE TRUST, AND GENERALLY FOR REGULATING THE CONDUCT OF THE BUSINESS OF THE TRUST.

At the Executive Council Chamber, Melbourne, the twenty-fourth day of August, 1914.

PRESENT:

His Excellency the Governor of Victoria.

Sir A. J. Peacock	Mr. Hagelthorn
Mr. Murray	Mr. Hutchinson
Mr. Brown	Mr. Gray.

WHEREAS by section 25 of the *Railway Lands Acquisition Act* 1893 (No. 1288) it is enacted that the Governor in Council may from time to time make Regulations relating to any Railway Construction Trust appointed and created under Part I. of the said Act for the purposes following:—

"(*a*) The mode in which meetings of the members of Trusts under the said Part of the said Act are to be convened;

"(*b*) The form of any notice or order which may be required to be given by any Trustees under the said Act; and

"(*c*) Generally for regulating the conduct of the business and the proceedings of such Trusts and the numbers of members to form quorums thereof, and the appointment of the Chairman of each Trust, and for carrying into effect the provisions of the said Part of the said Act."

Now therefore His Excellency the Governor of the State of Victoria in the Commonwealth of Australia, acting by and with the advice of the Executive Council of the said State, and in pursuance of the said provisions of the now in part recited Act, doth for the purposes aforesaid, so far as these may relate to a certain Railway Construction Trust duly appointed and created under the Railway Lands Acquisition Acts, and known as the Cavendish to Toolondo Railway Construction Trust, make the Regulation following, viz.:—

1. First meeting.—The first meeting of the Trust shall be convened by the Minister, at such time and place as he may direct.

2. Time and place of meeting.—The subsequent meetings of the Trust shall be held at such time and place as the Trustees may from time to time appoint, or, in default of such appointment, as the Minister may direct.

3. Quorums of meetings.—There shall be present at least three members at such first meeting in order to constitute a quorum, and all future quorums shall consist of two members, exclusive of the Chairman.

4. Chairman.—The Chairman shall be elected at the first meeting of the Trust, or at any adjournment thereof, and thereafter annually, by a majority of votes of those present, and he shall hold office as Chairman for one year if he remain a member of the municipal council of his district, and may be willing to act.

5. Vacancy of Chairman, how filled.—Any vacancy in the position of Chairman shall be filled at the next meeting of the Trust after such vacancy has occurred, or at any adjournment thereof, in the same manner as aforesaid, and such election shall be the first business on the notice-paper for such meeting.

6. Appointment by Minister.—In the event of the Trust failing or neglecting to elect a Chairman the Minister may, by writing under his hand, appoint one of the members of the Trust to be Chairman, who shall hold office for one year if he remain a member of the municipal council of his district, and be willing to act.

7. Vice-Chairman.—In the absence of the Chairman, through illness or otherwise, at any meeting the members shall elect a Vice-Chairman to conduct the business of that meeting.

8. Special meetings.—The Trust may hold special meetings, which may be called upon the requisition of the Chairman, or upon the requisition, in writing under their hands, of any three members, addressed to the Chairman; but no such special meeting shall be held unless three clear days' notice thereof at least be given.

9. General conduct of business.—In all cases not herein provided for resort shall be had to the rules, forms, and usages of Parliament, which shall be followed so far as the same are applicable to the proceedings of the Trust.

10. Meetings, notice of.—A notice of every meeting of the Trust shall be, by the Secretary, delivered or sent by the post, addressed to the usual or last-known place of abode of each member, three clear days at least prior to the day upon which such intended meeting is to be held.

11. Minutes of meeting to be read at subsequent meeting.—At every meeting of the Trust the first business thereof shall be the reading and putting of a question for the confirmation of the minutes of the proceedings at the preceding meeting, and the reading of the minutes of the proceedings of any Committee presented at any such preceding meeting, and no discussion shall be permitted thereon except as to their accuracy as a record of the proceedings; and the said minutes of the proceedings at the preceding meeting shall then be signed by the Chairman.

12. Order of business of meetings.—After the signing of the minutes, as aforesaid, the order of business of any ordinary meeting shall be as follows, or as near thereto as may be practicable, but, for the greater convenience of the Trust at any particular meeting thereof, it may be altered by resolution to that effect:—

(I.) Reading of copies of letters set by authority of the Trust.
(II.) Reading letters received, and considering and ordering thereon.
(III.) Reception and reading of petitions and memorials.
(IV.) Presentation of reports of Committees.
(V.) Payments.
(VI.) Ordinary business, including dealing with tenders.
(VII.) Orders of the day, including subjects continued from proceedings of former meetings.
(VIII.) Extraordinary business, new rules and regulations.
(IX.) Other motions of which previous notice has been given.
(X.) Notices of motion.

And the order of business at a special meeting shall be the order in which such business stands in the notice thereof.

13. Addresses to the Governor in Council.—All addresses and applications to the Governor shall be presented by the Chairman and Secretary of the Trust, unless otherwise ordered by the Trust.

14. Motions.—All notices of motion shall be given in writing to the Secretary at least ten clear days before the meeting at which the motion is intended to be moved, and the Secretary shall, seven clear days at least before such meeting, cause notice of such intended motion to be sent to each Trustee, or notice of motion may be handed to the Secretary at any meeting, and, on being read to the meeting, may be dealt with at the next meeting.

15. Notice of motion to be given.—No member shall make any motion initiating a subject for discussion, but in pursuance of notice given, as prescribed in the last preceding clause.

16. Petitions.—No motion, except that for receiving the same, shall, unless under most urgent circumstances, and then only by leave being granted by a two-thirds majority of those present at the meeting, be made on any petition, memorial, or other like application until the next ordinary meeting of the Trust after that at which it has been presented.

17. Motions to be moved in order.—Except by leave of a majority of the Trustees present, motions shall be moved in the order in which they have been received, and if not so moved shall be struck out.

18. Motion to be moved by member giving notice.—No motion shall be proceeded with in the absence of the member who gave notice of the same, unless by some other member producing written authority from him to that effect.

19. Mover of motion appointing committee to be a member.—The mover of every motion appointing a committee shall be a member of such committee.

20. Draft of address or petition to be submitted at previous meeting.—No motion for any address or petition shall be entertained unless the mover shall at some previous meeting have submitted a draft of the same.

21. Order, &c., of debate.—Any member desirous of making a motion or amendment, or taking part in discussion thereon, shall rise and address the Chairman, and shall not be interrupted unless called to order, when he shall sit down until the member calling to order shall have been heard thereon, and the question of order disposed of, when the member in possession of the Chair may proceed with his subject.

22. Nature of motion to be stated.—Any member desirous of proposing an original motion or amendment must state the nature of the same before he addresses the Trust thereon.

No. 130.—August 26, 1914.—10950.—3.

23. No motion to be withdrawn without leave.—No motion or amendment shall be withdrawn without the leave of a majority of the Trustees present.

24. Motion to be seconded.—No motion or amendment shall be discussed or put to the vote of the Trust unless it be seconded; but a member may, however, require the enforcement of any standing order of the Trust by directing the Chairman's attention to the infraction thereof.

25. Mover of motion.—A member moving a motion shall be held to have spoken thereon, but a member merely seconding a motion shall not be held to have spoken upon it.

26. Motions, &c., how decided.—All questions shall be decided in accordance with the terms of section 21, clause 1, of Act No. 1288.

27. Resolutions, how revoked or altered.—No resolution shall be revoked or altered except in accordance with clause 2 of section 21 of the same Act.

28. Priority of members.—If two or more members rise to speak at the same time, the Chairman shall decide, by naming the member, who is entitled to priority.

29. Members to stand while addressing the Trust.—Every member, including the Chairman, shall stand while addressing the Trust.

30. Points of order.—The Chairman, when called upon to decide on points of order or practice, shall state the provision, rule, or practice which he deems applicable to the case, without discussion or commenting on the same; and his decision as to order or practice in each case shall be final.

31. Member not to digress.—No member shall digress from the subject-matter of the question under discussion, or comment upon the words used by any other member in a previous debate; and all imputations of improper motives, and all personal reflections on members, shall be deemed highly disorderly.

32. Members to apologize for disorderly or offensive expressions.—Whenever any member shall make use of any expression disorderly, or capable of being applied offensively to any other member, the member so offending shall be required by the Chairman to withdraw the expression, and to make a satisfactory apology to the Trust.

33. Members called to order to sit down.—A member called to order shall sit down, unless permitted by the Trust to explain.

34. Members twice offending to be liable to a penalty.—Any member using disorderly or offensive language, and having been twice called to order, or to withdraw, and to apologize for such conduct, and refusing to do so, shall be liable to a penalty for a breach of this Regulation.

35. Strangers.—Any person, not being a member of the Trust, who shall, having been admitted to any meeting of the Trust, be guilty thereat of any improper or disorderly conduct, or who shall not leave when requested by the Chairman to do so, may, on his order, be forthwith removed, and shall be liable to a penalty for a breach of this Regulation.

36. Members may demand documents.—Any member may of right demand the production of any of the documents of the Trust applying to the question under discussion.

37. No second amendment until previous one disposed of.—No second or subsequent amendment, whether upon an original proposition or on an amendment, shall be taken into consideration until the previous amendment is disposed of.

38. Mover of motion to have right of reply.—The mover of every original proposition, but not of any amendment, shall have a right of reply, immediately after which the question shall be put from the Chair; but no other member shall be allowed to speak more than once on the same question unless permission be given to explain, or the attention of the Chair be called to a point of order.

39. No discussion on motion for adjournment of Trust.—No discussion shall be allowed on any motion for an adjournment of the Trust; but if, on the question being put, the motion be negatived, the subject then under consideration, or the next on the notice-paper, shall be discussed, or any other that may be allowed precedence, before any subsequent motion for adjournment shall be entertained; but if the motion for adjournment be carried, the debates on motions moved and seconded, or any other order of the day, may be resumed at the next adjourned meeting of the Trust at the point at which it was so interrupted.

40. Protests.—Any member may protest against any resolution of the Trust, and notice of intention to protest shall in every case be given forthwith on the adoption of the resolution protested against; and the protest shall specify the reasons for protesting, and shall be entered three days at least before the next ordinary meeting of the Trust by the protesting member, in a book to be kept for that purpose in the office of the Secretary, and signed by such member, and shall

also be entered in the minutes of the meeting at which notice of the intention to protest shall have been given previously to the confirmation thereof; but such protest may be expunged from the minutes if declared by a majority of the Trust to be not in accordance with truth, or in its terms disrespectful to the Trust.

41. Lapsed questions.—If a debate on any motion moved and seconded be interrupted by the number of members present becoming insufficient for the transaction of business, such debate may be resumed at the point where it was so interrupted.

42. Lapsed order of the day may be restored.—If a debate on any order of the day be interrupted by such insufficiency of number as aforesaid happening, such order may be restored to the notice-paper for a future day on motion upon notice, and then such debate shall be resumed at the point where it was so interrupted.

43. Committees.—Minutes of all proceedings of Committee shall be entered in the Committee's minute-book, and, being signed by the Chairman of the Committee, shall be presented to the Trust.

44. Meetings of Committees.—The Secretary shall convene every Committee within ten days of its first appointment, or at any other time by order of the Trust, or on the written order of the Chairman, or of any two members of the Committee.

45. Petitions.—No petition shall be presented after the Trust shall have proceeded to the orders of the day; and every member presenting a petition to the Trust shall acquaint himself with its contents, and ascertain that it does not contain language disrespectful to the Trust, and that its contents do not violate any Regulation herein contained, and shall write his name at the beginning of the said petition.

46. No debate shall take place upon petitions.—No debate shall take place upon any petition or memorial, except as to its being received and taken into consideration as an order of the day at any future meeting, or, if necessary, that it be referred to a Committee.

47. Secretary.—The Secretary shall keep all minutes of meetings of the Trust, or of any Committee of the same; he shall also keep all accounts, books, and documents, conduct all correspondence, and perform all clerical work required to be performed for the Trust; and shall attend all meetings of the Trust or Committees when required, and at the office for the transaction of business as provided for under this Regulation; and shall perform all other acts which shall be deemed by the Trust incumbent upon the Secretary to discharge; he shall also have the receipt and disbursement of all moneys, and shall provide a guarantee for such amount for his fidelity and due fulfilment of his duties, and for the proper management and disposal of the funds of the Trust, as they may direct. All moneys received by him shall, as soon as possible thereafter, be paid into the account of the Trust to the bank wherein the same is kept. That he shall at no time hold in his hands more than Twenty pounds (£20) for 72 hours without banking the same. That all payments of the Trust shall be made by cheque, signed by the Chairman or Vice-Chairman and two members, and countersigned by the Secretary. That he shall take account of all moneys received by the Collector, and supervise his accounts as provided for under these Regulations.

48. Treasurer.—The Treasurer shall provide a guarantee for such amount for his fidelity and due fulfilment of his duties, and for the proper management and disposal of the funds of the Trust, as they may direct.

49. Collector.—The Collector shall give security for his fidelity and due fulfilment of his duties, and for the proper management and disposal of the funds of the Trust, for such amount as they may determine. He shall give no receipts except upon the printed forms provided for the same; and every receipt shall have a butt filled in by him, containing all particulars of moneys received and from whom. He shall pay the Treasurer or Secretary all moneys received by him at least once a week, and he shall at no time hold more moneys of the Trust than Twenty pounds (£20) for 72 hours without paying the same to the Treasurer or Secretary. He shall, at the close of each month at least, submit his books and butts, with a statement of all amounts collected, to the Secretary, and render to him a full account then, or whenever demanded by him, of all moneys received by him on account of the said Trust.

50. Appointment, &c., of officers.—No appointment to any office at the disposal of the Trust shall take place until seven clear days' notice shall have been given, by advertisement in one or more newspapers circulating in the Construction District, inviting applications from qualified candidates for the same. Where the number of candidates are in excess of the number required, the Trust may reduce the same by ballot.

51. Salaries of officers, &c.—The salary or allowance attached to all offices and places at the disposal of the Trust shall in all cases be fixed before they proceed to appoint any person to fill the same, and before the advertisement inviting applications as aforesaid, and shall be specified in such advertisement.

52. Expense of preparing security.—In all cases of security being given for the faithful performance of any duty, the expense of such security shall be borne by the Trust.

53. Common seal.—The Secretary of the Trust shall have the custody of the common seal, and shall be responsible for the same; and impressions shall only be made by order of the Trust, verified by the signatures of the Chairman, a member, and Secretary.

54. Suspension of rules.—With the exception of clauses 25 and 26, any one or more of the clauses of this Regulation may be suspended *pro tem.* in cases of emergency, and with the consent of a majority of the whole Trust.

55. Penalty.—Any person guilty of a breach of this Regulation shall be liable to a penalty not exceeding Five pounds (£5).

And the Honorable Donald Mackinnon, His Majesty's Minister of Railways for the State of Victoria, shall give the necessary directions herein accordingly.

VILLAGE COMMUNITIES.—PROCLAMATIONS PARTLY REVOKED.

PROCLAMATION

By His Excellency the Honorable Sir Arthur Lyulph Stanley, Knight Commander of the Most Distinguished Order of Saint Michael and Saint George; Governor of the State of Victoria and its Dependencies in the Commonwealth of Australia, &c., &c., &c.

WHEREAS by certain Proclamations as hereunder set forth, made in pursuance of the provisions of the *Settlement on Lands Act* 1893, certain lands described in such Proclamations were set apart and appropriated for the purposes of "village community allotments" under the said Act: And whereas it is expedient to revoke in part such Proclamations: Now therefore I, the Governor of the State of Victoria in the Commonwealth of Australia, by and with the advice of

the Executive Council of the said State, and in pursuance of provisions contained in Division 1 of Part III. of the *Land Act* 1901 (1 Edw. VII. No. 1749), do hereby order as follows, viz. :—

Settlement on Lands Act 1893.

NEWHAM.—The Proclamation bearing date the 23rd October, 1893, by which certain lands situate in the parish of Newham, and comprising an area of seven hundred acres, more or less, were, amongst others, set apart and appropriated for the purposes of village community allotments, is hereby revoked so far only as it relates to the portion of the said lands hereinafter described, viz. :—

Twenty-nine acres two roods one perch, county of Dalhousie, parish of Newham, being allotments 9, 20, and 21 of section B.—(14.W.35469.)

Settlement on Lands Act 1893.

WOODEND.—The Proclamation bearing date the 26th September, 1893, by which certain lands situate in the parishes of Macedon, Newham, and Woodend, and comprising an area of 6,300 acres, more or less, were, amongst others, set apart and appropriated for the purposes of village community allotments, is hereby revoked so far only as it relates to the portion of the said lands hereinafter described, viz. :—

Nineteen acres two roods three perches, county of Dalhousie, parish of Woodend, being allotment 21 of section F.—(787/5.10.)

Given under my Hand and the Seal of the State of Victoria aforesaid, at Melbourne, this seventeenth day of August, in the year of our Lord One thousand nine hundred and fourteen, and in the fifth year of the reign of His Majesty King George V.

Land Act 1911. Section 8.

LANDS AVAILABLE AS SELECTION PURCHASE ALLOTMENTS.

COUNTY OF LOWAN, PARISHES OF DINYARRAK, LEEOR, DING-A-DING, NEUARPUR, TALLAGEIRA, BENAYEO, AND BOIKERBERT.

Border Territory.—Horsham District.

APPLICATIONS will be received from the date hereof for the undermentioned lands. All applications lodged on or before 2nd September, 1914, will be deemed to have been simultaneously made.

Applicants may obtain from any Local Land Officer, or the Enquiry Office, Lands Department, Melbourne, a certificate authorizing the issue by the Railway Department of a ticket at concession fares to enable them to inspect the land, or to attend the Local Land Board.

Specially reduced rates are also allowed for removal of a selector's family and belongings to the land.

Applications, accompanied by a duty stamp for 5s., fee for registration, must be made on usual form, and delivered or forwarded by post to any Local Land Office as undermentioned.

Not more than one allotment can be included in any application, but any number of applications may be lodged without payment of more than one registration fee.

The applications received will be dealt with by a Local Land Board, the place and date of sitting of which will be hereafter notified.

The term for payments may extend over a period of either 20 or 40 years at option.

Successful applicants will be granted a selection purchase lease, during the first six years of which conditions of residence and improvements must be fulfilled.

These allotments are made available subject to valuation of the existing improvements.

Present occupiers will receive preferential consideration, provided :—

(*a*) They have been satisfactory tenants during the period of permissive occupancy, and
(*b*) They are eligible under the limiting conditions of the Land Acts to hold this land.
(*c*) No area in excess of 640 acres can be granted to any one person.

Plans and any further information, also pamphlet for intending settlers, may be obtained at the Enquiry Office, Lands Department, Melbourne, and Land Offices, Alexandra, Ararat, Bairnsdale, Ballarat, Beechworth, Benalla, Bendigo, Geelong, Hamilton, Horsham, Omeo, St. Arnaud, Stawell, Seymour, Sale, and Warracknabeal.

Plans may also be inspected at the Post Offices at Hamilton, Apsley, Edenhope, Harrow, Dergholm, Chetwynd, Casterton, Serviceton, Leeor, Goroke, Minimay, Benayeo, Horsham, Dimboola, Nhill, and Kaniva, and local Railway Stations.

Closer Settlement Acts.

SWAN HILL ESTATE (IRRIGABLE AREA).

ALLOTMENTS IN THE SWAN HILL ESTATE (BURTON'S LAND) AVAILABLE FOR APPLICATION UNDER CONDITIONAL PURCHASE LEASE.

THE several allotments included in the Schedule hereunder are declared available as Farm Allotments until Friday, 28th August, 1914. Applications must be made on the prescribed forms, and lodged with the Secretary, Closer Settlement Branch, Lands Department, accompanied by the deposit, as shown in Schedule hereunder, for the most valuable allotment applied for. The deposit includes registration fee of 5s. and lease fee of £1.

A Local Land Board to deal with the applications will be held at the Court House, Swan Hill, on Friday, 4th September, 1914, at 10 a.m.

Terms, Conditions, &c.

The leases issued to successful applicants may be for such a term of years, not exceeding 31½, as may be agreed upon between the lessee and the State Rivers and Water Supply Commission.

An applicant may apply for more than one allotment, but will only be required to lodge one deposit, being the amount chargeable on the most valuable allotment applied for. Applicants must be at least 18 years of age.

No conditional purchase lease of a Farm Allotment can be granted to any person who is already the holder of land of the value of £2,500 (township land excepted), or who would thereby become the holder of land exceeding such value. This does not apply to Homestead Allotments.

Improvements to the value of at least two instalments of the purchase money must be effected on each farm allotment before the end of the first year from the date of the lease, and 10 per cent. of the purchase money before the end of the third year, and a further 10 per cent. before the end of the sixth year. Unless sooner called upon under the provisions of the Fences Act the allotment must be fenced within one year.

The lessee must reside on the estate. (Personal residence by the lessee's wife, or any child not less than 18 years of age of lessee, may be considered personal residence by the lessee, with the approval of the Commission.) In special cases the Commission has power to allow persons other than those above mentioned to reside for a limited period in lieu of lessee.

The lessee cannot transfer, assign, mortgage, or sublet the whole or any part of his allotment within the first six years of the lease.

Leases will be subject to a condition providing for resumption of land required for necessary drains or channels through any allotment.

Lessees are not permitted to destroy or remove timber from the land unless by written consent of the Commission.

The amount of deposit (less £1 5s.) will be deducted from the capital value, and the half-yearly instalments calculated on the balance of purchase money.

Payments in advance may be made at any time at the option of the lessee, and proportionate reduction of interest secured thereby.

The balance of purchase money, with interest at 4½ per cent., must be paid by 63 or a lesser number of half-yearly instalments, calculated according to any of the tables under Division 3 of Part I. of the *Savings Banks' Act* 1890 *Amendment Act* 1896, the first of such instalments being payable six months after the date of the lease. Each instalment will include interest upon the balance of the purchase money remaining unpaid.

The Crown grant may be issued to the lessee at the end of any half-year after the first twelve years have expired, on payment of the balance of the purchase money, and will be subject to a condition that the owner for the time being of the land or a member of his family over eighteen years of age, or any person approved by the Governor in Council, shall reside thereon for at least eight months in every year, and that a breach of this condition may lead to the forfeiture of the land to the Crown.

Plans and further information may be obtained from the Inquiry Branch, Crown Lands Office, Melbourne.

Commissioner for Crown Lands and Survey.

Printed forms of tender, showing estimates of requirements and conditions of contract, may be obtained from the Secretary, Tender Board, Treasury, Melbourne, or from the officer in charge of police at any of the above-mentioned places, by whom also any information or explanation will be afforded to persons tendering.

The price, which must be expressed in words as well as in figures, and without alterations, erasures, or discrepancies, must be per ton of 40 cubic feet for firewood, including delivery at the offices and all charges. Prices should only be quoted for requirements where estimates are shown above.

Tenders, which must be upon the printed form, will be received for either one or more of the above-mentioned places, and tenders for such places may be accepted or rejected separately; but if all lengths of firewood be included in one tender it may be accepted for one length only, if advisable.

Where the kind or kinds of wood is not mentioned in the tender form, tenderers must specify the kind or kinds of firewood they offer to supply.

Telegrams, or tenders not complying with the terms of advertisement, will not be entertained.

The successful tenderer will be required to enter into a bond for £10, with two approved sureties for the due performance of the contract, within ten days after the acceptance is notified.

Tenderers failing to take up their accepted tenders, or failing to carry out their contract satisfactorily, will be ineligible to again hold contracts for Government supplies.

Tenders must be enclosed in an envelope, marked "Tender for Firewood at ," as the case may be, and deposited in the Tender-Box, Pay Office, Treasury, Melbourne; or, if sent by post, they must be addressed to the Chairman of the Tender Board, Treasury, Melbourne.

The Government will not necessarily accept the lowest or any tender.

The decision of the Government will be made known by *Gazette* notice and by letter to accepted tenderers.

CONDITIONS OF CONTRACT.

1. As the exact quantity of firewood which may be required cannot be stated, the estimate being approximate only, the Government will not be bound by the quantity stated, but will be at liberty to order more or less, according to circumstances, and the contractor will be bound to supply the same at contract rates.

2. All the firewood supplied under these contracts must be split out of large timber, and must be perfectly sound, dry, and of the kind or kinds specified in the tender; neither burnt wood, heartwood, small branches, nor outside pieces of bark will be received. The billets must be not less than 4 inches nor more than 6 inches in diameter. The long wood to be not less than 9 inches nor more than 18 inches in diameter. Delivery to be made on the written order of the chief officer of the Department requiring the supply. The ton of firewood consists of 40 cubic feet. If the firewood is obtained from a State forest timber reserve, or ordinary Crown lands, persons cutting or removing same must be provided with a licence or permit from the State Forests Department.

3. Orders will be issued half-yearly (except in cases where the storage is small, when they will be issued quarterly); but the contractor must have 24 hours' notice before purchases are made at his risk.

4. The contractor will be bound to place the firewood in stacks for measurement on such ground as may be pointed out. The stacks are to be 2 feet wide (or 4 feet 6 inches for long wood) by 5 feet high, with space between each stack for measuring; and the billets (or lengths) are all to lie the same way, viz., crossways of the stacks in the form of a cord, and are to be laid as closely and solidly as possible in the stack and to the satisfaction of the officer receiving the supply. In the event of any inconvenience being felt, either through delay in delivery or of stacking the wood, the Department concerned will purchase the same or re-stack that delivered, at the risk of the contractor, from whose account any expense incurred thereby will be deducted.

5. The officer receiving the supply shall have full power to reject any wood which he may consider not in accordance with the contract, notice of which will be given to the contractor in writing, stating the reason. The contractor may, however, claim a survey; but in that case he must, within 48 hours after objection is made, give notice thereof in writing to the officer rejecting the wood.

6. The board of survey will be composed of persons appointed by the Honorable the Treasurer, and the decision of the board of survey is to be considered as final.

7. If the board of survey shall decide that the supply is not of proper quality, it must be immediately replaced by the contractor; failing which, it will be procured elsewhere, and the extra expense, if any, will be charged as in clause 4.

8. Accounts for firewood to be rendered to the Department receiving the supply immediately upon completion of the order which must be attached to the account. Payment will be made at the receipt and pay office of the district, or at the Treasury Melbourne, as the contractor may desire.

9. In the event of any irregularity on the part of the contractor being repeated, it will be competent for the Government, case such irregularity should be established to the satisfaction of the Tender Board, to cancel the contract forthwith.

10. Contractors are not at liberty to transfer their contracts under cover of power of attorney, coupled with an interest or otherwise; and no such transfer will be recognised by the Government.

11. Under no circumstances will a contractor be permitted to abandon his contract.

12. No subletting will be allowed; all work must be carried out by the contractor, and the hours of employment of any person engaged in any business or occupation connected with the preparation of the firewood for sale or connected with the sale or distribution of the firewood tendered for in this schedule shall not exceed 48 per week, and every such person shall be paid such wages and employed subject to such conditions as are or may be determined by the Wood, Hay, Chaff, and Coal Board under the Factories and Shops Acts; and a copy of these conditions shall be kept conspicuously and continually posted, in legible Roman characters, on the premises of the contractor. Any infringement of these conditions, in the opinion of the Treasurer, will subject the contractor, upon report from the Tender Board, to such mulct, not exceeding Fifty pounds (£50), as the Treasurer may direct, and the amount will be deducted from any accounts which are or may be due to the contractor, and the Treasurer's decision shall be binding, final, and conclusive as to the fact of infringement and in all other respects.

13. The Contractor shall, before any account is passed for payment for supplies made, furnish a statutory declaration that all the workmen under this contract have been employed in accordance with clause 12 of these Conditions, and have been paid not less than the minimum rate of wages for such workmen as is provided for under that clause.

CITY OF PRAHRAN.

BY-LAW No. 137.

A By-law of the City of Prahran, made under section 198 of the *Local Government Act* 1903, and number 137, for—

(*a*) regulating and restraining the erection and construction of buildings, erections, or hoardings;
(*b*) requiring the pulling down and removal of buildings, erections, or hoardings;
(*c*) authorizing the Council to pull down and remove buildings, erections, or hoardings erected or constructed contrary to this By-law, or not pulled down or removed as required by or under this By-law, and to sell the materials and apply the proceeds in reimbursing the expenses of pulling down and removing such buildings, erections, or hoardings, and in paying into the municipal fund any fees or penalties due by the owner thereof;
(*d*) appointing fees which may be charged and received by the Council for any act done, or to be done, by any of the officers under such By-law and for any permit or licence to be issued by the Council.

IN pursuance of the powers conferred by the *Local Government Act* 1903, the Mayor, Councillors, and Citizens of the City of Prahran, with the approval of the Governor in Council, order as follows:—

Regulation No. 29 of the City of Prahran, made and passed the 22nd day of January, 1894, and confirmed on the 5th day of March, 1894, is hereby repealed.

The following By-laws and Regulations of the City of Prahran are hereby repealed, viz.:—

Regulations Nos. 34, 36, 37, 38, 39, 40, 43, 45, 46, 47, 52, and 53; and By-law No. 131, Regulation No. 54, By-law No. 133, Regulations No. 55 and 56.

INTRODUCTORY.

1. This By-law shall have force and effect throughout the whole municipality.

2. This By-law shall come into operation on its confirmation by the Governor in Council and immediately after its publication in the *Victorian Government Gazette*.

PART I.

DEFINITIONS.

1. In this By-law, unless inconsistent with the context or subject-matter—

"Approved" means approved by the surveyor.

"Area" applied to a building means the superficies of a horizontal section thereof, made at the point of its greatest surface inclusive of the external walls and of such portions of the party walls as belong to the building.

"Basement story" means any story of a building which is under the ground story.

"Bressummer" means a beam of reinforced concrete, or a wrought-iron or steel girder which carries a wall.

"Builder" means the master builder or other person employed to execute any work, or if there is no master builder or other person so employed then the owner of the building or other person for whom or by whose orders such work is to be done.

"Building" means any structure capable of affording protection or shelter either roofed or intended or adapted to be roofed and whether enclosed by walls or not; but does not include any greenhouse, aviary, fence, or other similar building or erection.

"Cement concrete" means an approved mixture of high-grade Portland cement, clean sharp sand, and aggregates consisting of fragments or particles of hard stone or gravel thoroughly clean and entirely free from combustible matter and from volcanic scoriæ, furnace slag, coke, breeze, or any material containing any trace of sulphur.

"Concrete-cased steel" means a form of construction in which the steel is designed to support or resist the whole of the loads and stresses, of whatever kind, arising in the structure, such steel being encased in and entirely covered with cement concrete as hereinafter provided, such concrete being designed as taking no part in the support of and resistance to the loads and stresses.

"Cross wall" means any internal wall (partitions excepted) not being less than two-thirds the thickness of the external or party walls, and in no case

less than nine inches in thickness, built in connexion with any external or party wall and bonding them together.

"Cubical content" applied to the measurement of a building means the space contained within the external surface of its walls, the upper surface of the floor of its lowest story, and the ceiling or tie of its topmost story.

"External wall" means an outer wall or vertical enclosure of any building not being a party wall.

"Fire resisting" used with reference to any materials includes:—

(a) Brickwork constructed of good bricks, well burnt, hard, and sound, properly bonded and solidly put together with good lime or cement mortar; and

(b) Any stone suitable for building purposes by reason of its solidity and durability; and

(c) Sheet metals when used for roof coverings; and

(d) Iron and steel and (when used for columns, girders, or wall-framing), encased in cement concrete or other incombustible or non-conducting external coating as hereinafter provided; and

(e) Slate, tiles, brick, and terra-cotta when used for covering or corbels; and

(f) Concrete composed of broken bricks, stone, chippings, or ballast and lime, cement or calcined gypsum.

"Foundation" applied to a wall having footings means the solid ground or artificially-formed support on which the footings of the wall rest.

"Frame-building construction" means the form of construction in which the design provides that the whole of the vertical forces due to the weight of the structure itself, the whole of its structural contents, and the whole of the added loads hereinafter stipulated, are carried down to the foundations solely by means of columns (comprising wall columns and where requisite interior columns) in such a manner that neither the external nor the internal walls, if any, are required to assist in supporting such loads.

"Ground story" means the story of the building to which there is an entrance from the outside on or near the level of the ground, and where there are two such stories then the higher of the two: Provided that no story of which the upper surface of the floor is more than six feet below the level of the adjoining pavement shall be deemed to be the ground story.

"Height" in relation to any building means measurement taken from the level of the footway (if any) immediately in front of the centre of the face of the building or, when there is no such footway, from the level of the ground before excavation to the level of the ceiling or tie of the topmost story.

"Hoarding" includes any erection or structure erected, built, or constructed or used for the purpose of writing, printing, painting, pasting, or posting thereon notices, advertisements, placards, or other printed, painted, or written matter, or any erection or structure being of a height greater than six feet measured from the level of the ground to the highest point of such erection or structure upon which notices, advertisements, placard, or other printed, painted, or written matter are printed, written, painted, pasted, or posted, but does not include a hoarding erected in a street for the purpose of carrying on building operations only, or dwelling house, or shop, or any fence seven feet or under in height.

"Isolated" used with reference to a building means that the building is distant from the boundary of the land of any adjoining owner for a space of not less than ten feet.

"Level of the ground" means the mean level of the ground as determined by the surveyor.

"New building" includes—

(a) Any building erected or commenced to be erected after the date of this By-law coming into force; and

(b) Any building which for more than half its cubical content has been taken down or destroyed by fire, tempest, or otherwise, and is re-erected, or commenced to be re-erected, wholly or partially on the same site; and

(c) Any space between wall and buildings which is roofed, or commenced to be roofed, after the date of this By-law coming into force; and

(d) Any building or erection removed or transported wholly or in sections into the municipal district, or from one part of the municipal district to another part of the same, after the date of this By-law coming into force.

"Party wall" means a wall built to be used as a separation of two or more buildings or a wall forming part of a building built upon the dividing line between adjoining premises for their common use.

"Prescribed" means prescribed by this By-law.

"Reinforced concrete" means a form of construction in which cement concrete is reinforced with steel, these materials being so combined that the steel will take up and resist substantially the whole of the tensional stresses and assist in the resistance to sheer, while the concrete will take up and resist substantially the whole of the compressional stresses and assist in resistance to sheer.

"Square" applied to the measurement of any area means the space of one hundred square feet.

"Steel" means "mild steel" of a standard equal to that prescribed by the British Board of Trade.

"Surveyor" means the city surveyor, building surveyor, or other proper officer for the time being of the municipality.

"Topmost story" means the uppermost story in a building whether constructed partly in the roof or not.

"Treasurer" means the treasurer for the time being of the municipality.

2. For the purpose of this By-law buildings shall be divided into three classes—

Class A.—"Domestic class," which includes all buildings subject to small vibration and light loading of floors, such as residences, residential shops, offices, hotels, hospitals, private schools, club-houses, and studios.

Class B.—"Warehouse class," which includes all buildings subject to vibration and heavy loading of floors, such as warehouses, emporiums, factories, mills, and places for the storage and manufacture of goods.

Class C.—"Public building class," which includes all buildings designed to accommodate an assemblage of people, such as theatres, churches, chapels, assembly halls, museums, libraries, and public schools, the large assembly rooms of hotels, offices, exceeding eight hundred square feet in area, and hospital and school lecture theatres, but not the residential and office portion of such last-mentioned buildings.

PART II.

(1) Notice of Intention to Build and Lodgment of Plans.

1. No builder shall commence any building, erection, or structure, or any addition or alteration to any building, erection, or structure without first delivering at the office of the surveyor a written notice of such intention three days before so commencing, and producing to the surveyor properly prepared plans and specifications of such building, erection, structure, addition, or alteration, together with a tracing or copy of the floor plans of such building, erection, structure, addition, or alteration, and also details of dimensions, sizes, and qualities of all materials, and enumerating any old materials proposed to be used in the construction of same. Such plans and details may be inspected at the discretion of the surveyor on payment of the fee set forth in Schedule A to this By-law.

2. The original plans and specifications, when approved, shall be returned to the owner or his agent, but the tracing or copy of the plans and details of materials shall be retained by the surveyor.

(2) Payment of Fees and Permit.

3. No builder shall commence any building, erection, structure, or any addition or alteration to any building, erection, or structure, without having first obtained from the surveyor a written permit for the commencement of same, and without having first paid to the treasurer the fees in respect thereof set forth in Schedule A to this By-law, having regard to the class of building, erection, or structure, or any addition or alteration proposed to be built or erected. In the event of the sum so paid being found to exceed the total amount of fees finally payable at or before the completion of such building, erection, structure, addition, or alteration, the amount paid in excess of such final sum shall be refunded to the person paying the same. Such permit shall only remain in force and effect for twelve months from date of issue of same.

(3) Duties of Surveyor.

4. The surveyor shall, upon the receipt of any such notice as aforesaid, and also upon any work being observed by or made known to him which is affected by the provisions of this By-law, but in respect of which no notice has been given from time to time during the progress of any work affected by such provisions, as often as may be necessary for securing the due observance of such provisions, survey any such building, structure, erection, or work; and cause all such provisions to be duly observed.

5. The surveyor, at all reasonable times before or after the completion of any building, structure, erection, or work affected by any of the provisions of this By-law, or by any terms or conditions on which the observance of any such provisions may have been dispensed with, may enter and inspect such building, structure, or work.

6. The surveyor may, for the purpose of ascertaining whether any building, structure, or erection is in such a situation, or possesses such characteristics as are required in order to exempt it from the operation of any of the provisions of this By-law, at all reasonable times enter any premises, and he may do therein all such things as are reasonably necessary for that purpose.

(4) General Provisions as to Buildings.

7. No building used or intended to be used as a dwelling house shall be erected, the front of which would be nearer at any point than *twenty feet* to any street, the width of which is less than *thirty-three feet*. Nothing in this clause shall apply to any building or structure built or constructed fronting any of the streets set forth in Schedule C to this By-law.

8. No builder shall erect, build, or construct, or cause to be erected, built, or constructed, any building or structure the external walls of which shall be other than brick, stone, or concrete, on land abutting on any of the streets set out in Schedule B.

9. As to streets set out in Schedule C, wooden buildings may be erected at a distance of not less than eight feet from the building line of such streets and five feet at the least from the side boundaries of the land upon which such wooden building or erection is being built, but if one external side wall is built of brick, stone, or concrete, having a parapet eighteen inches above its own adjoining roof or gutter, then such limited distance of five feet may as to such brick, stone or concrete external wall be reduced, provided that the distance from the wall (unless the same be of brick, stone, concrete, or other fire-proof material) of any other building not in the same occupation be not less than five feet, but in all other respects such buildings must conform to provisions of this By-law as to wooden buildings.

10. No person shall erect or construct, or cause to be erected or constructed, any building or erection upon or within a distance of 20 feet from the building line of Dandenong-road. Such distance of 20 feet shall in every case be measured to the front of the verandah or any other projection.

11. No person shall erect or construct, or cause to be erected or constructed, any building or erection upon or within a distance of 200 feet from the building line of Dandenong-road unless such building or erection is intended to be used wholly or principally for human habitation, or unless such building is appurtenant to a building intended to be used for human habitation. Nothing in this or the next preceding clause shall apply to any building which may be erected on land situate within a distance of 112 feet west of Closeburn-avenue, and on land fronting Dandenong-road between Closeburn-avenue and Chomley-street, nor to any building which may be erected or constructed in the place of a building already erected or constructed at this date, except that such new building shall be similar in character to the present building, and the distance between such new building and the building line of Dandenong-road shall not be less than the distance existing at this date.

12. The last two preceding clauses shall not apply to any portion of Dandenong-road situate between Chapel-street and the bridge over the Brighton railway line.

13. No builder shall erect, build, or construct, or cause to be erected, built, or constructed, any building or structure which is intended to be used, or which shall or may be used as a shop, office, public building, or warehouse, unless the external walls thereof shall be brick, masonry, or concrete.

14. The following buildings and works shall be exempt from the operation of this By-law:—

(*a*) All buildings on land the property of His Majesty or the Victorian Railways Commissioners.

(*b*) All buildings on land the property of the Mayor, Councillors, and Citizens of the City of Prahran.

(*c*) All temporary offices and sheds used by builders exclusively for the purpose and only during the erection of any new building at or about the site of such new building for a period not exceeding twelve months.

15. All distances stipulated for any building from any boundary or other building shall be measured as from the nearest part or projection of such building or structure to such boundary or nearest part or projection of the other building or structure.

16. If at any time any building erected or constructed at or prior to this By-law coming into force shall, by reason of any alteration or alterations thereto as to any boundary made subsequent to this By-law, contravene any of the provisions, such building shall in all respects be subject to the provisions hereof as fully as if it had been erected in contravention thereof.

(5) Outbuildings.

17. Workshops and outbuildings (except stables) of not more than one and a half squares in area, and not exceeding eight feet in height and not containing a fireplace or a wooden floor, may be erected on any boundary if the roof and walls thereof are covered with galvanized corrugated sheet-iron, or other approved fire-resisting material, provided that such outbuildings are distant at least ten feet from any building used as a dwelling-house on the same allotment or any allotment adjoining, save and except that such workshops and outbuildings may not be erected within a distance of eighty feet of the frontage to any road or street being a public highway.

18. Outbuildings, if constructed in wood or partly in wood and partly in iron, and not exceeding one and one-half squares in area, may be erected at a distance of not less than five feet from a boundary and not less than eighty feet from any street set out in Schedule B.

19. Outbuildings exceeding one and a half squares in area, including roofed structures or erections for storage of timber or other materials, shall be subject to all the conditions and limitations in regard to wooden buildings.

20. Stables shall only be constructed of brick, masonry, or concrete, and shall not be erected within a distance of eighty feet of any road or street, and shall be distant at least twenty feet from a living room. All manure pits shall be suitably covered to the satisfaction of the surveyor.

PART III.

Materials.

1. Brick used in any building shall be good, hard, and well burnt. When old bricks are used in any wall they shall be thoroughly cleaned before being so used, and shall be whole and good, hard, well-burnt bricks.

2. Sand used for mortar in any building shall be clean and sharp, free from loam, dirt, and salt or organic matter.

3. Lime mortar shall be composed of freshly-burnt lime and sand in the proportions of at least one part by measure of lime and not more than three parts by measure of sand. All lime intended to be used for mortar shall be thoroughly burnt, of good quality, and be properly slacked before being mixed with the sand.

4. Cement mortar shall be composed of good Portland cement or other cement of equal quality approved of by the surveyor, mixed with clean, sharp sand in the proportions of at least one part by measure of cement and not more than four parts by measure of sand.

5. Concrete for foundations shall be composed of clean broken stone or other hard material approved by the surveyor broken to a gauge not exceeding two inches, and sand well mixed on a wooden floor with freshly-burnt lime, hydraulic lime, or cement in the proportions of one part, by measure, of lime to not more than five parts, or one part of cement to not more than six parts of the other materials.

6. All timbers and wooden beams used in any building shall be good, sound material, free from rot, large or loose knots, shakes, or any other imperfections whereby the strength may be impaired, and shall be of such sizes, dimensions, and spacings as set forth in Schedule D of this By-law.

PART IV.

Excavations, Foundations, and Footings.

1. All excavations for footings of buildings, other than wood, shall be taken down to a solid bottom, to be approved by the surveyor, but not less than an average of eighteen inches in depth below the natural surface of the ground, except in the case of special construction of footing approved by the surveyor, and no footing or foundation shall, except with the written consent of the surveyor, be of less width than eight inches wider than the wall standing thereon. Should the excavation for foundation finish on a clay bottom, the excavated trenches shall be covered with a layer of three inches of approved sand before the concrete is put in. No footing or foundation shall be commenced to be placed in position until at least twenty-four hours' notice shall have been given to the surveyor that the trenches are ready for inspection.

2. The surface of the ground between all walls of buildings shall be levelled up higher than the finished surface outside and evenly graded to prevent any accumulation of water or drainage beneath the floors.

3. Every pier and story post, as well as every external wall and every party wall, shall have footings.

4. Every building must have a footing which, by itself or with a foundation, is at least twenty-one inches in height.

5. In the case of wooden buildings where wooden stumps are used for the foundations, such stumps shall consist of redgum or jarrah, and be not less than four inches by four inches, spaced not more than four feet apart, sunk not less than eighteen inches below the natural surface of the ground, and shall rest on sole plates of a size and upon a bottom approved by the surveyor.

PART V.

Thickness of External and Party Walls for all Brick, Stone, or Concrete Buildings.

1. The external and party wall of buildings of the domestic and warehouse classes respectively shall not be built if in lime mortar of less thickness than as set forth in Schedule E to this By-law for their several grades, which grades are determined according to the heights and lengths of such external and party walls, such lengths being measured from the centre of one return wall to another or from the centre of a return wall to a cross wall.

2. No cellar wall shall be less than nine inches in thickness. But where a cellar wall is, in the opinion of the surveyor, too great in length for such thickness, it shall be increased up to eighteen inches or be strengthened by piers.

3. When the piers between the openings in any wall are less in area than one-third of the area of such wall, if there were no openings, the piers shall be increased in thickness to an extent determined by the surveyor, or the piers built in cement mortar, in which latter case the area of the piers need not exceed one-fourth of such area of the wall. This provision shall not apply to shop fronts or show windows approved by the surveyor.

4. Where piers are specified for any story of a wall that story shall be strengthened by building piers projecting four and a half inches; such piers shall not be spaced further apart than twelve times the thickness of the wall, and in no case more than twelve feet apart, and shall not be less in width than one-fourth of their distance apart.

5. In the domestic and warehouse classes of buildings no story shall be of greater height from floor to lowest part of ceiling or from floor to roof plate than fourteen feet, except with the permission of the surveyor.

7. Where it is not desired to have projecting piers the wall may be built flush, if built four and a half inches thicker than specified in Schedule E to this By-law without altering the rating of the stories below it.

8. In the case of a party wall any projecting piers required by Schedule E to this By-law shall be built on both sides of the wall, or the whole wall shall be built four and a half inches thicker than specified in the tables in the said Schedule E appropriate to the class of building to which it belongs. In either case the wall shall be built central on the wall below.

9. If walls are built of cement mortar instead of lime mortar they may be of thickness one grade lower than those set forth in Schedule E to this By-law.

10. Where it is desired to alter or raise or increase the size of an old building if the walls are, in the opinion of the surveyor, sound and well consolidated for the purpose, and are approved by the surveyor, and the new work is to be built in cement mortar, the surveyor shall have power to treat the whole building as if built in cement mortar and approve of walls of thickness one grade lower than those given in Schedule E to this By-law.

11. When any building is raised in accordance with the last preceding clause a steel bond shall be built in on top of the old wall, such bond to be three-sixteenths of an inch in thickness and hooked together at all intersections, the width to be equal to one and a half inches for every four and a half inches in thickness of the wall built upon it if so directed by the surveyor.

12. In buildings within Class C of several stories the external or surrounding walls shall not be of less thickness than those specified in Table B in Schedule E to this By-law for similar heights and lengths, and if the span of the floor-girders or roof-girders or trusses exceed thirty feet, piers of an extra thickness of at least four and a half inches shall be provided in number and width to the satisfaction of the surveyor.

13. In buildings within Class C—

(*a*) Where the ceilings or roofs are carried on trusses or girders or otherwise the thickness of the surrounding walls shall not be less than those specified in Table C in Schedule E to this By-law.

(*b*) Where the length of the wall exceeds one hundred feet, or in case there shall be one or more stories built above such hall, theatre or like building, the thickness of the walls shall be increased four and a half inches or the wall must be strengthened by piers or buttresses to the satisfaction of the surveyor.

(*c*) Where solid masonry or brick-in-cement buttresses are employed and placed sixteen feet or less apart, and extended to the foot of the trusses or girders above, or if iron or steel pillars are inserted in the walls in lieu of masonry and at distances not exceeding eighteen feet apart, the thickness may be reduced in proportion to the increase of strength afforded by such buttresses or pillars, but in no case shall any wall be less than thirteen and a half inches thick in the topmost portion and four and a half inches shall be added going downwards for each story or for each gallery or for each twenty-five feet in height of wall. Where iron or steel pillars are introduced in such walls the brick work round the pillar shall be bonded into that of the connecting walls, and each of such pillars shall have not less than nine inches of brick wall around its extreme dimension.

(*d*) In the case of buildings divided into naves and aisles by walls of which the upper portions are external and the lower portions internal and pierced by arched openings carried on piers or columns the thickness of the nave walls shall not be less than that specified in Table C in Schedule E to this By-law for external and surrounding walls of similar heights, lengths, and spans, and the external walls of the aisles shall be of the same thickness unless strengthened by buttresses or piers to the satisfaction of the surveyor, in which case the walls may be four and a half inches less in thickness.

14. Where a wall is built in cement mortar or with projecting piers the height may be one-fifth greater than shown in Schedule E to this By-law.

15. Where it is proposed to convert or alter any building erected for a purpose other than a public purpose into a public building such conversion or alteration shall be carried into effect in such manner as may be approved by the surveyor, and the provisions of this By-law shall apply to the public buildings thereby formed.

16. Except where otherwise provided in this By-law all external party and cross walls shall be constructed of brick, masonry, or concrete, and shall be subject to all the provisions of this By-law.

17. Where a cross wall becomes in any part an external wall such cross wall shall be of the thickness required for an external wall of the same height and length and belonging to the same class of building.

18. No building of the warehouse class shall extend to more than four hundred and fifty thousand cubic feet unless divided by party walls in such manner that no division thereof extends to more than four hundred thousand cubic feet.

19. No addition shall be made to any building of the warehouse class or to any division thereof so that the cubical content of any such building or division shall exceed four hundred thousand cubic feet, unless the whole construction thereof is of fireproof material and the thickness of the walls is of the extra first rating.

20. Buildings of more than two stories to be used as large business emporiums must be provided with sufficient staircases made fireproof to the satisfaction of the surveyor.

PART VI.

Construction of Buildings.

Unless where otherwise sanctioned in this By-law all buildings and structures shall comply with the following conditions:—

(1) *Walls.*

1. Every external party and cross wall constructed of brick, stone, concrete, or reinforced concrete or other similar material approved of by the surveyor shall be properly bonded and solidly put together with mortar, and shall contain not less than two rows of hoop iron or other approved bond.

2. In the case of walls that are built as hollow walls the same quantity of stone, brick, or concrete shall be used in their construction as is provided in this By-law for solid walls, and no hollow walls shall be built unless the parts of the same are connected by proper ties either of brick, stone, or iron placed not more than three feet apart in every fourth course. No hollow wall shall be greater in superficial extent than two squares in any one story unless strengthened by a cross wall, fireplace, or projecting pier in each such area, and to the satisfaction of the surveyor.

3. All hollow walls shall be bonded longitudinally by the inlaying of hoop-iron or other approved reinforcing material one strand to each half brick in thickness of wall. The strands shall be laid for the full length of the wall and turned up and down at ends and openings and interlaced at angles. The cavity separating the inner and outer parts of a hollow wall shall in no case be of a width greater than two and a half inches, nor less than one and a half inches.

4. Hollow concrete blocks may be used for the construction of walls of buildings of one story, provided that such walls are not required by these regulations to exceed nine inches in thickness.

The thickness of the concrete at face and back of such blocks shall be not less than two and a half inches with four-inch cavity between and the thickness of the cross ties shall be not less than two inches for the full height of the block.

Ties shall be spaced not more than fifteen inches apart. Blocks requiring to be built up of special sections shall be rebated, dove-tailed, or tongued together to the satisfaction of the surveyor.

Concrete blocks shall not be used green, and unless special permission is obtained no block shall be used within fourteen days from date of construction. The blocks shall be bedded and jointed in cement mortar.

Joists and beams shall not be let into hollow concrete walls.

5. Where the external wall of any building is erected on the boundary of the land on which the same stands, or where the overhanging eaves or gutter of such building would be within two feet of such boundary, then the external wall of such building shall be carried up to form a parapet fifteen inches at least in height above the roof or above the highest part of any flat or gutter as the case may be.

6. In buildings of the warehouse class the thickness of such parapet shall be equal to the thickness of such wall in the topmost story, and in any other building of a thickness of eight and a half inches at the least.

7. Every party wall shall be carried up for a height of fifteen inches above the roof measured at right angles to the slope thereof, or fifteen inches above the highest part of any flat or gutter as the case may be, and of a thickness (in buildings of the warehouse class) equal to the thickness of such wall in the topmost story, and in any other building of a thickness of eight and a half inches at the least. Except that in the case of domestic buildings, where not more than two buildings are erected under one roof, it shall be sufficient if the party wall is carried up to the underside of the roof covering and of a thickness of eight and a half inches at the least.

8. No verandah shall approach nearer than three feet to any adjoining property, unless built wholly of fire-resisting material or separated from any adjoining verandah or premises by a wall eight and a half inches at least in thickness and projecting four inches at least beyond the face of the woodwork.

9. Every party wall shall be carried up of the thickness aforesaid above any turret, dormer, lantern, light or other erection of combustible materials fixed upon the roof or flat of any building within four feet from such party wall, and shall extend at the least fifteen inches higher and wider on each side than such erection, and every party wall shall be carried up above any part of any roof opposite thereto and within four feet therefrom.

10. Every wall and fireplace constructed of brick, stone, or other similar materials except reinforced concrete construction shall have a damp-proof course of asphalt or other impervious material laid throughout its entire length and thickness in a position to be approved by the surveyor, but such damp course may be turned vertically upwards within the thickness of the wall to a higher level on the outside.

Where, owing to a change of level, it is not practicable to lay the same on a level plane throughout the walls of a building, the same may be laid on two or more level planes.

Where a damp-proof course is laid on more than one level plane the ends of the damp-proof courses on each level shall overlap the ends of the damp-proof course on the next level, and each of such layers shall be connected by vertical connexions of the same material.

(2) *Recesses and Chases.*

11. Recesses may be made in external walls provided—

(a) That the backs of such recesses shall not be of less thickness than eight and a half inches.

(b) That over every recess so formed there shall be an arch of at least two rings of brickwork or an approved lintel extending in each case through the whole thickness of the wall. Every such lintel shall have a bearing on each side of such recess of at least four and a half inches if the width of the recess do not exceed three feet and otherwise of at least nine inches.

(c) That the area of such recesses and openings shall not, taken together, exceed one-third of the whole area of the wall of the story in which they are made. No recesses shall be made under girders or points of special pressure. The word "area" as used in this clause means the area of the vertical face or elevation of the wall or recess to which it refers.

12. Recesses in party walls shall not come within thirteen and a half inches of the inner face of the external walls.

13. In an external or party wall a chase shall not be made wider than thirteen and a half inches nor more than four and a half inches deep from the face of the wall nor so as to leave less than eight and a half inches in thickness at the back or opposite side thereof, and a chase shall not be made within a distance of seven feet from any other chase on the same side of the wall nor within thirteen and a half inches from the nearest external wall.

(3) *Projections from Buildings.*

14. No coping, cornice, string-course, fascia, window, window-dressing, portico, balcony, balconette, bridge connecting buildings, balustrade and architectural projection or decoration shall project beyond the building line of any street or alley unless it be of brick, tile, stone, artificial stone, slate, cement, or fire-resisting material other than wood.

15. No projection shall extend more than three inches beyond the building line at any height less than ten feet from the level of the public footpath.

16. Every porch, gangway, outside landing and outside steps shall be of fire-resisting material, and shall not project beyond the building line of any street or alley.

17. Every balcony, cornice, or other projection of or from any external wall shall be tailed into the wall of the building, and weighted or tied down to the satisfaction of the surveyor, and no cornice, window, or balcony shall, without special permission of the council, exceed four feet in projection over the public way in streets over thirty-three feet in width or more than two feet in streets of thirty-three feet or less in width.

18. No shop front shall exceed two stories in height above the level of the pavement of the public footpath in front of the shop. No part of the woodwork of any shop front shall be fixed nearer than four inches to the centre of the party wall where the adjoining premises are separated by a party wall, or nearer than four inches to the face of the wall of the adjoining premises where the adjoining premises have a separate wall, unless a pier or corbel of stone, brick, or other incombustible material, four inches wide at the least, be placed as high as such woodwork, and projecting throughout an inch at the least in front thereof between such woodwork and the centre of the party wall or the separate wall as the case may be. Woodwork wholly encased with metal not less than twenty-two gauge may be fixed flush with the face of the wall.

(4) *Wood-work in External Walls.*

19. All wood-work fixed in any external wall except bressummers and story posts under the same and frames of doors and windows of shops on the ground story of any building shall be set back four inches at the least from the external face of such wall, but frames of doors and windows of redgum or other approved hardwood may be fixed flush with the face of any external wall.

(5) *Bressummers.*

20. Every bressummer shall have a bearing in the direction of its length of four inches at least at each end upon a sufficient wall, pier of brick or stone, or upon an iron story post fixed on a solid foundation, and the surveyor shall have power in his discretion to require that every bressummer shall have such story-posts, iron columns, stanchions, or piers of brick or stone or corbels as may be sufficient to carry any superstructure. Every bressummer bearing upon a party wall shall be borne by a templet or corbel of stone or iron tailed through at least half the thickness of the wall and of the full breadth of the bressummer.

21. At each end of every metallic bressummer a space shall be left equal to a quarter inch for every ten feet and also for any fractional part of the length of such bressummer to allow for expansion.

22. The ends of wooden beams, wood plates, or joists bearing on party walls shall be at least one and a half inches distant from the centre line of such party walls.

(6) *Flats and Roofs.*

23. The flat gutter and roof of every building and every turret, dormer, lantern light, skylight, or other erection placed on the flat or roof thereof, except wooden cornices and barge boards to dormers not exceeding twelve inches in depth, and doors, door-frames, windows, and window-frames in such dormers, lantern lights, skylights, or other erections, shall be externally covered with slates, tiles, metal, or other fire-resisting materials.

(7) *Lighting of Cellars, &c.*

24. Where the lowermost rooms or cellars in any building (being rooms of which the surface of the floor is more than four feet below the level of the nearest footpath, street, or lane) cannot be otherwise lighted the same may be lighted by means of apertures or areas extending under the footway. Such apertures or areas shall be enclosed by solid masonry, concrete, or brickwork surmounted by a proper stone or metal kerb and covered with an immovable horizontal iron frame with glass cubes or prisms level with the surface of such footway and secured to the kerbing by being run thereto with lead or zinc to the satisfaction of the surveyor. No such aperture area or grating shall extend from the line of building under the footway more than two feet, nor shall they be more than four feet in length except with the written permission of the surveyor.

(8) *Closets and Urinals.*

25. No closet or urinal shall be erected or remain in front of any dwelling or building facing a public highway or at a less distance than ten feet from any street or lane or from the door or window of any dwelling or at a less distance than two feet from the boundary of land not in the same occupation unless the wall on the boundary be built of brick or stone, but such closets or urinals may be built abutting on any lane of a less width than sixteen feet.

Nothing in this clause shall apply to any closet or urinal forming part of a main building and connected to an underground sewerage system.

(9) *United Buildings.*

26. Buildings shall not be united if, when so united as to form one building, they would not be in conformity with this By-law.

27. An opening shall not be made in any party wall or in two external walls dividing buildings which, if taken together, would extend to more than four hundred thousand cubic feet, except with the approval of the surveyor; and proper fire-resisting doors shall be provided.

28. Whenever any buildings which have been united cease to be in the same occupation all openings made for the purpose of uniting the same in any party wall between the buildings or in any external wall shall be stopped up with brick or stone work not less in thickness than the party wall or the external wall (as the case may be) in which such openings were made, and any timber not in conformity with this By-law placed in the wall shall be removed.

29. Whenever any buildings which have been united cease to be in the same occupation, the owner thereof shall forthwith give notice thereof to the surveyor, and shall cause any openings made in the party wall to be stopped up as aforesaid.

(10) *Set of Chambers.*

30. Separate sets of chambers or rooms tenanted by different persons shall, if contained in a building exceeding 3,600 square feet in area, be deemed to be separate buildings, and be divided accordingly as far as they adjoin vertically by party walls, and so far as they adjoin horizontally, each alternate floor shall be of fire-resisting material.

(11) *Alterations and Additions.*

31. Where a party or external wall not in conformity with this By-law has been taken down, burnt, or destroyed to the extent of one-half thereof (measured in superficial feet) every remaining portion of the old wall not in conformity with this By-law shall either be made to conform therewith or be taken down.

32. Whenever any addition to or alteration of or other work for any purpose in to or upon any building (except that of necessary repairs not affecting the construction of any external cross or party wall) shall be made or done such consequential alterations shall be made in such building as to make it when completed conform with the provisions of this By-law relating to new buildings.

PART VII.

Ventilation, Lighting, and Open Spaces.

1. Every person who builds or erects a new building shall so construct every room in the lowest story having a boarded floor that there shall be for the purposes of ventilation between the under side of every joist on which such floor is laid and the upper surface of the tarpaving or concrete with which the ground surface or site of the building is covered, a clear space of two inches at the least in every part and not less than four inches between such undersides and the ground where the site is not tarpaved or concreted, and shall cause such space to be thoroughly ventilated by means of suitable and sufficient airbricks or by some other effectual method so arranged as to cause a through current of air to pass beneath the flooring. The surveyor may require the surface under the floor of any building or any part thereof to be tarpaved or concreted to his satisfaction.

2. Every building used or intended to be used as a dwelling-house shall have an enclosed back yard or open space of four hundred square feet at the least, apart from passages under three feet in width, exclusive of any building thereon. This provision shall not apply to buildings used as boarding or lodging-houses, hotels, or flats.

3. Every habitable room shall be of an average height of not less than nine feet from the floor to the ceiling, and shall contain not less than 700 cubic feet of space.

4. Every habitable room shall have one or more windows opening directly into the external air with a total superficies clear of the sash frames free from any obstruction to light equal to at least one-tenth of the floor area of the room and so constructed that a portion equal to at least one-twentieth of such floor area can be opened and the opening in such case shall extend to at least seven feet above the floor level. But a room having no external wall or a room constructed wholly or partially in the roof may be lighted through the roof by a dormer window with a total superficies clear of such frames free from any obstruction to the light equal to at least one-twelfth of the floor area of the room, and so constructed that a portion of such window equal to at least one-thirtieth of such floor area can be opened, and the opening in each case shall extend to at least five feet above the floor level of such room, or such room may be lighted by a lantern light or skylight of which a portion equal to at least one-thirtieth of the floor area can be opened.

5. Every habitable room constructed over a stable shall be separated from such stable by a floor rendered impervious to foul air.

PART VIII.

Chimneys, Flues, Fireplaces, and Heating Apparatus.

1. Chimneys built on corbels or brick, stone, or other fire-resisting materials may be erected if the work so corbelled out does not project from the wall more than one and a half times the thickness of the wall measured immediately below the corbel, but all other chimneys shall be built on solid foundations and with footings similar to the footing required in the case of external and party walls, unless they are carried upon iron girders with direct bearings upon party external or cross walls to the satisfaction of the surveyor.

2. Chimneys and flues having proper soot doors of not less than forty square inches may be constructed at any angle, but in no other case shall any flue be inclined at a less angle than forty-five degrees to the horizon, and every angle shall be properly rounded.

3. All soot doors shall be at least thirteen inches distant from any woodwork.

4. An arch of brick or stone or a reinforced concrete lintel or a bar of wrought iron of sufficient strength shall be built over the opening of every chimney to support the breast thereof, and where the breast projects more than four inches from the face of the wall and the jamb on either side is of less width than nine inches the abutments shall be tied in by an iron bar or bars of sufficient strength turned up and down at the ends and built into the jambs for at least eight and a half inches on each side.

5. A flue shall not be adapted to or used for any oven, furnace, cockle, steam boiler, or close fire used for any purpose of trade or business or to or for the range or cooking apparatus of any hotel or eating house unless the flue is surrounded with brickwork at least eight and a half inches thick from the floor on which such oven, furnace, cockle, steam boiler, or close fire is situated to the level of the ceiling of the room next above the same.

6. A flue used in connexion with a steam boiler shall be at least fifty feet in height measured from the level of the floor on which the boiler is placed.

7. The inside of every flue and also the outside thereof where passing through any floor or roof or behind or against any woodwork shall be rendered pargeted or lined with fire-resisting stoneware.

8. The jambs of every fireplace opening shall be at least eight and a half inches wide on each side of the opening thereof. Kitchen ranges may be built without side jambs.

9. The back of every fireplace opening from the hearth up to the height of twelve inches above the mantel shall be at least eight and a half inches thick.

10. The thickness of the upper side of every flue when its course makes with the horizon an angle of less than forty-five degrees shall be at least eight and a half inches.

11. Every chimney shaft or smoke flue shall be carried up in brick or stonework at least four and a half inches thick throughout to a height of not less than three feet above the roof, flat, or gutter adjoining thereto measured at the highest point in the line of junction with such roof, flat, or gutter.

12. The brickwork or stonework of any chimney shaft except that of the furnace of any steam engine, mill, brewery, distillery, bakehouse, or manufactory shall not be built higher above the roof, flat, or gutter adjoining thereto than a height equal to six times the least width of such chimney shaft at the level of such highest point in the line of junction unless such chimney shaft is built of increased thickness or otherwise rendered secure to the satisfaction of the surveyor.

13. There shall be laid level with the floor of every story before the opening of every chimney a slab or stone, slate, or other fire-resisting substance at the least six inches longer on each side than the width of such opening and at the least twelve inches wide in front of the breast thereof.

14. On every floor except the lowest floor such slab shall be laid wholly upon stone or iron bearers or upon brick trimmers or other fire-resisting materials, but on the lowest floor it may be bedded on concrete covering the site or on solid materials placed on such concrete.

15. The hearth or slab of every chimney shall be bedded wholly on brick, stone, or other fire-resisting substance, and shall, together with such substance, be solid for a thickness of four inches at least beneath the upper surface of such hearth or slab.

16. A flue shall not be built in nor against any party structure unless it be surrounded with new brickwork at least four and a half inches in thickness properly bonded. No flue shall be used for a smoke-flue which is of a less internal diameter than eight and a half inches except in cases of copper or scullery flues, which may be of any size allowed by the surveyor.

17. A chimney breast or shaft built with or in any party wall shall not be cut away unless the surveyor certifies that it can be done without injuriously affecting the stability of any building.

18. A chimney shaft, jamb, breast, or flue shall not be cut into except for the purpose of repair or doing some one or more of the following things:—

(a) Letting in or removing or altering flues, pipes, or funnels for the conveyance of smoke or steam or letting in, removing, or altering smoke jacks.

(b) Forming openings for soot doors, such openings to be fitted with a close iron door and frame.

(c) Making openings for the insertion of ventilating valves subject to the following restriction:—That an opening shall not be made nearer than thirteen inches to any timber or combustible substance.

19. Timber or woodwork shall not be placed—

(a) In any wall or chimney breast nearer than nine inches to the inside of any flue or chimney opening.

(b) Under any chimney opening within six inches from the upper surface of the hearth of such chimney opening.

(c) Within two inches from the face of the brickwork or stonework about any chimney or flue where the substance of such brickwork or stonework is less than eight and a half inches thick.

20. Every chimney shaft for the furnace of a steam engine, mill, brewery, distillery, bakehouse, or manufactory shall be constructed in conformity with the following rules:—

(a) Every shaft shall be at least fifty feet in height from the natural surface of the ground at the base of the said shaft, except otherwise expressly permitted by the Council.

(b) Every shaft shall be carried up throughout in brickwork and mortar of the best quality and if detached shall taper gradually from the base to the top of the shaft at the rate of at least two and a half inches in every ten feet of height. If approved by the surveyor flues to small steam boilers or forges may be constructed in metal if properly stayed, but such flues shall not be fixed in front of any building in any street or nearer than eighteen inches to any combustible material.

(c) The thickness of the brickwork of every such chimney shaft shall be nine inches at the least at the top of the shaft, and shall increase by at least half a brick for every section of such shaft of twenty feet in length or less down to a point seventy-five feet above the bed of the shaft's foundation, and thereafter such thickness shall increase by half a brick for every section of twenty-five feet.

(d) Every cap, cornice, pedestal, plinth, string-course, or other variation from plain brickwork shall be provided as additional to the thickness of brickwork required under this clause, and every cap shall be constructed and secured to the satisfaction of the surveyor.

(e) The foundation of the shaft shall always be made to the satisfaction of the surveyor on concrete or other sufficient foundation.

(f) The footings shall be spread all round the base by regular offsets to a projection equal to the thickness of the enclosing brickwork at the base of the shaft and the space enclosed by the footings shall be filled in solid as the work progresses.

(g) The width of the base of the shaft shall be at least one-tenth of the proposed height of the shaft.

(h) Fire bricks shall be built inside the lower portion of the shaft when considered necessary by the Surveyor, shall be provided as additional to and independent of the thickness of brickwork prescribed by these rules, and shall not be bonded therewith.

(i) Notwithstanding anything herein contained shafts may with the approval of the council be constructed of other material or design.

21. (a) The floor under and for a space of eighteen inches in front of every oven, copper, steam boiler, or stove which is not heated by gas shall be formed of materials of fire-resisting and non-conducting nature not less than six inches thick.

(b) No boiler used for generating steam at a gauge pressure exceeding fifteen pounds per square inch shall be set or fixed inside any dwelling-house nor within a distance of two feet six inches from the external wall of any dwelling-house nor within five feet of any land not in the same occupation, the said distances being in every case measured from the external face of the boiler or its setting.

(c) No metal pipe for conveying smoke or other product of combustion shall be fixed nearer than eighteen inches to any combustible materials.

(d) A pipe for conveying steam at a gauge pressure exceeding fifteen pounds per square inch shall not be fixed nearer than six inches to any combustible materials.

(e) A pipe for conveying hot water shall not be placed nearer than three inches to any combustible materials unless such pipe is provided with a free blow-off.

(f) The floor over any room or enclosed space in which a furnace is fixed, and any floor within eighteen inches from the crown of an oven shall be constructed of fire-resisting materials.

PART IX.

(1) BUILDINGS, WHOLLY OR PARTLY IN WOOD, INCLUDING REMOVAL AND RE-ERECTION OF SUCH BUILDINGS.

1. Subject to the provisions of this By-law buildings may be built or erected in wood or partly in wood and partly in other materials in the streets specified in Schedule C to this By-law: Provided that—

(a) The external walls of such buildings shall not exceed in height fifteen feet, measured from the floor level to the top of the wall plates.

(b) Every such building shall be wholly in one occupation or be constructed or adapted so to be.

(c) All such buildings shall be detached and shall be distant from the building line of any street or road as hereinbefore provided, and ten feet from any other building, and shall be and continue to be five feet from the boundaries of the land of any adjoining owner or from the boundaries of land not in the same occupation; but in no case shall the distance between any two buildings be less than ten feet, but if one external side wall is built of brick, stone, or concrete, having a parapet eighteen inches above its own adjoining roof or gutter, then such limited distance of five feet may as to such brick, stone, or concrete external wall be reduced, provided that the distance from the wall (unless the same be of brick, stone, concrete, or other fire-proof material) of any other building not in the same occupation be not less than five feet, but in all other respects such buildings must conform to the provisions of this By-law as wooden buildings.

2. Wooden buildings erected prior to this by-law coming into force may be added to in wood subject to the conditions and limitations of this by-law.

3. Wooden buildings transported or removed either whole or in part into the municipal district or from one part of the municipal district to another part shall only be erected whole or in part in compliance with all the provisions of this by-law in regard to the erection of new buildings and such buildings either whole or in sections shall not be brought into the municipal district without the special consent of the council and until the same have been inspected and approved by the surveyor and the fees for such inspection have been paid.

4. Except in the case of an isolated building the interior surface of all walls and ceilings of wooden buildings other than outbuildings shall be finished in hardwood lath and plaster, metal or other approved fire-resisting materials but in the discretion of the surveyor a wooden dado not exceeding five feet in height may be allowed and also the undersides of rafters in skillion roofs may be lined with tongued and grooved boards.

5. Roofs shall be covered with tiles slates metal or other fire-resisting materials approved by the surveyor.

6. In the construction of all wooden buildings except sheds vermin plates shall be used.

7. Stucco or rough cast work will not be allowed in walls and gables unless such walls and gables are first covered with waterproof material to the satisfaction of the surveyor.

PART X.

(1) Fireproof Construction.

1. None of the provisions contained in any other Part of this by-law as to the materials and mode of construction of external party and cross walls or the thickness of same shall apply to any building erected or constructed in accordance with the provisions of this Part of this by-law.

2. Wherever in this Part of this by-law it is provided that buildings or specified portions of buildings shall be fire-resisting or fire-proof the employment for columns or girders of steel alone unprotected by a casing of concrete in the manner hereinafter provided will not be permitted.

(2) Frame-building Construction.

3. The adoption of frame-building construction will be permitted for all classes of buildings whether required by this by-law to be fire-proof or otherwise subject to the employment in combination of cement concrete and of steel, as the sole component materials for the frames of such buildings and provided that the conditions and stipulations hereinafter contained are complied with.

4. Provided that all subordinate or appurtenant parts such as walls, partitions, stairways, bulkheads, lift wells and the like not necessarily forming part of the structural frame may be carried out in other materials unless prohibited by other provisions of this Part of this by-law.

5. The supporting columns shall be spaced so that the distance in plan to the nearest adjacent column shall in no case be more than twenty feet in one direction nor more than thirty feet in a direction at right angles thereto these distances being measured from face to face of the columns.

6. Every column shall be rigidly connected to the floor systems at every floor level, in a manner to satisfactorily resist wind or other lateral pressure.

7. The external walls of frame-buildings may be carried out as curtain-walls designed to support only their own weight and to resist only wind or other lateral pressure provided that—

(a) If carried out in brickwork or stonework or terra-cotta they shall be not less than nine inches thick exclusive of any surface treatment where the least free span does not exceed fifteen feet; and not less than fourteen inches thick exclusive of any surface treatment where the least free span exceeds fifteen feet.

(b) If carried out in reinforced concrete they shall be not less than four and a half inches thick exclusive of any surface treatment where the least free span does not exceed fifteen feet; and not less than six inches thick exclusive of any surface treatment where the least free span does exceed fifteen feet.

8. In frame-buildings internal walls required to be fire-resisting may be carried out in reinforced concrete provided they shall be not less than three inches thick exclusive of surface treatment if the span does not exceed fifteen feet and otherwise than four and a half inches thick exclusive of any surface treatment.

9. In all frame-buildings there shall be provided at every floor level a complete system of wall girders so designed as to wholly relieve the underlying external walls or curtain walls of any vertical load other than the weight of such walls.

(3) Stress Calculations.

10. For all forms or modes of construction dealt with in this Part of this by-law all designs shall be based upon the following loadings being added loadings over and above the full actual structural or dead loads, viz.:—

For residential or office buildings a minimum of eighty-four pounds per square foot of floor area.

For shops stores and warehouses a minimum of one hundred and twenty pounds per square foot of floor area.

For public buildings and all areas in any building subject to the load of moving crowds, a minimum of one hundred and fifty pounds per square foot of floor area.

11. The bending moments of all girders shall be computed as being one-eighth part of the product of the total equivalent distributed load and the net span, but where the girders are satisfactorily "fixed" at their ends by reason of continuity or appropriate attachment to columns such calculated bending moments may be reduced by twenty per cent. Beyond this allowance, however, no further reduction of bending moments by reason of continuity of girders will be permitted.

12. In computing columns any column which exceeds in unbraced height fifteen times its least diameter or least width shall be regarded as a long column subject to flexure and shall be designed accordingly.

13. In buildings comprising a plurality of stories the total loading of the columns shall be computed as follows:—

(a) For any number of stories up to three stories upon the assumption that all the floors will be simultaneously loaded with the full dead and full live load.

(b) For a greater number than three stories upon the assumption that the three uppermost floors will be simultaneously loaded with the full dead and full live loads; while the remaining floors will be at the same time loaded with the full dead and one-half the live loads.

(4) Concrete-cased Steel.

14. Whenever concrete-cased steel is employed the work shall be so designed that the steel alone shall support and resist the whole of the loads and stresses without any assistance from the concrete.

15. The following stress-intensities upon the steel will be permitted as a maximum provided that the calculation of external forces has been made in accordance with the rules hereinbefore provided, viz.:—

For all joists beams bars or members—

In direct compression direct tension or cross bending fifteen thousand pounds per square inch of net section.

In shear, fifteen thousand pounds per square inch of net section.

16. The cement concrete employed in casing the steel shall be so proportioned that there shall be used not less than one cask of Portland cement weighing three hundred and seventy-five pounds net for each twenty-two cubic feet of net finished concrete measured in place.

17. The steel shall be encased with approved bonding and then wholly embedded in and surrounded with concrete upon all sides in such manner that there shall be in the case of girders a thickness of not less than one inch of concrete upon the exposed sides or edges of the steel, and in the case of columns a thickness of not less than two inches of concrete upon the exposed sides or edges of the steel such respective thickness of protecting concrete being exclusive of any plastering veneer or other surface treatment.

18. All steel employed in and in combination with cement concrete shall be clean and free from paint oil grease or tar of any kind and shall also be free from scaly rust.

(5) Reinforced Concrete.

19. In all cases where reinforced concrete is employed whether in buildings as a whole or specified portions of buildings required or not required by this Part of this by-law to be fire-proof or fire-resisting the reinforced concrete work shall be designed in accordance with the rules and carried out under the conditions hereinafter contained.

20. Before the actual carrying out of the work or any portion thereof complete drawings of such work or portion shall be filed with the surveyor showing all details of the construction and the size spacing and arrangement of all the reinforcing members.

21. The surveyor shall have power to require that loading tests provided for in this by-law be actually applied in his presence by the builder in such cases as the surveyor may think fit.

22. The cement concrete employed in reinforced concrete work shall be so proportioned that there shall be used not less than one cask of Portland cement weighing three hundred and seventy-five pounds net for each eighteen cubic feet of net finished concrete measured in place.

23. The steel employed in reinforced concrete work shall be clean and free from paint oil grease or tar of any kind and shall also be free from scaly rust.

24. The following stress intensities upon the several materials will be permitted as a maximum, provided that the calculation of external forces has been made in accordance with the rules hereinbefore provided, viz.:—

(*a*) For all steel reinforcing members employed substantially as they come from the rolls—
In tension or compression, fifteen thousand pounds per square inch.
In shear, ten thousand pounds per square inch.

(*b*) For all steel reinforcing members where forged or welded—
In tension or compression, fifteen thousand pounds per square inch.
In shear, ten thousand pounds per square inch.

(*c*) For the adhesion between the concrete and the steel, seventy pounds per square inch.

(*d*) For concrete—
In compression, five hundred pounds per square inch.
In shear, seventy pounds per square inch.
In tension, nil.

25. The detailed design of all parts of the reinforced concrete work subject to cross bending or direct stresses shall proceed upon the basis of the latest methods subject however to the following requirements:—

(*a*) The steel shall take all the tensile stresses.
(*b*) The ratio of the modulus of elasticity of steel to that of concrete shall be taken as fifteen.
(*c*) Where the concrete is of insufficient section to take up the shearing stresses sufficient steel shear bars shall be provided to take up the residue of the shearing stresses.
(*d*) In columns all main reinforcing bars shall be held together by horizontal steel ligatures spaced not further apart than twenty diameters of the main bars.
(*e*) The extremities of all tension bars employed in all girders shall be cogged or swelled in all cases where such bars exceed half an inch in diameter.

26. In the execution of reinforced concrete work no concrete in any column or main girder shall be left uncompleted at the end of the day. Whenever concreting operations are resumed the surfaces of completed work against which fresh concrete is to be placed must be thoroughly washed cleaned and grouted with neat cement. No concrete work shall be carried out during any period when the shade temperature is higher than one hundred degrees Fahrenheit nor lower than thirty-five degrees Fahrenheit.

27. The steel reinforcements shall be wholly embedded in and surrounded with cement concrete. The following shall be the minimum thickness of concrete upon the exposed sides or edges of all steel reinforcements, viz.:—
In floor, slabs or plates—Three-quarters of an inch.
In girders and ribs—One inch.
In columns—One and a half inches.
Such thickness being exclusive of any plastering, veneer or other surface treatment.

28. The following shall be the minimum thickness of concrete in any portions of the work required by this by-law to be fire-resisting, viz.:—
In floor plates not exceeding six feet net span—Three inches.
In floor plates not exceeding eight feet net span—Four inches.
In floor plates not exceeding ten feet net span—Five inches.
In floor plates exceeding ten feet net span—Six inches.
In external walls not exceeding fifteen feet net span—Four and a half inches.
In external walls exceeding fifteen feet net span—Six inches.
In partitions—Two and a half inches.
No internal wall shall be deemed to be fire resisting unless four and a half inches in thickness. Such respective thicknesses shall be exclusive of any plastering veneer or other surface treatment.

PART XI.

Insanitary, Ruinous and Dangerous Buildings.

1. When it is made known to the council that any building or structure is in an insanitary, ruinous or dangerous state the council may inspect the same and may require a survey or such buildings or structure to be made by the surveyor who shall have power to enter any premises for the purpose of making such survey, and if the surveyor reports that such building or structure is in an insanitary, ruinous or dangerous state the council may cause the same to be shored up or otherwise secured to the satisfaction of the surveyor and shall cause a notice in writing to be served on the owner of such building or structure requiring such owner forthwith to take down secure or repair such building or structure as the council may require.

2. If such owner does not begin to take down repair or secure such building or structure within three days after service of such notice and complete such taking down repairs or securing as speedily as the nature of the case will admit the council may with all convenient speed cause all or so much of the building or structure as is in an insanitary, ruinous or dangerous condition to be taken down repaired or otherwise secured in such manner as may be requisite and may recover from the owner in any court of competent jurisdiction the cost incurred in so doing.

PART XII.

Verandahs, Signs and Hoardings.

1. No person shall erect or cause to be erected any portico or verandah over the footway of any street in the municipal district without first obtaining the consent of the council and save as hereinafter provided such portico or verandah shall be of the shape figure dimensions and materials set forth in the specification following, but the lowest part of the frieze or rail of such portico or verandah shall in no case be of less height than eight feet above the level of the outer edge of the footway.

Specification.

Specification in accordance with which, and the accompanying drawing, all verandahs to be erected over the footways of the City of Prahran are to be executed, save as hereinafter provided.

All verandahs are to be composed entirely of iron, and are to be of the design shown on the accompanying drawing, and constructed as described in this specification.

In the event of any portion of the kerb, which will carry the verandah posts, being sunk or out of the proper line, it will be lifted and relaid by the council on application at the office of the surveyor. In the event of there being no kerb at the place where any verandah is to be erected, the council will lay a proper bluestone kerb along the whole length of such verandah, and half the amount of the expense thereof will be deducted from the amount deposited. Any piece of kerb that may be broken by the erection of the verandah will be replaced by the council, and the cost deducted from the amount deposited.

The pillars are to be cast from the best iron, clean, sharp, free from surface scale, shell, cold shuts, blow holes, honeycomb, cinder and other defects, the caps, neckings, quirks, angles, flutings, mouldings, panels,

ornaments, and other parts being accurately made, and not less than three-eighths of an inch thick at any part. After casting they are to be properly cleaned off, and they must in all cases be cast perfectly straight in their axes; and they shall, as soon as brought on the ground, and before being fixed, be submitted to the surveyor, who will either approve or reject the same, as he may think proper. In the event of the pillars being rejected, they must be at once broken up and removed from the ground. Each pillar to have two lugs at bottom, with holes for bolts, and the pillars are to be cast in such lengths as will keep the frieze perfectly horizontal, the shafts being of such lengths as will allow for the gradient of the street. Inside of each pillar is to be fixed a length of one-and-a-half inch (1½ in.) standard galvanized wrought iron water tubing, with bend at outlet to height shown in drawing, the space between the tubing and the shell of the column to be well filled in with cement grout, composed of one part of approved cement, and three parts of clean, coarse, sharp sand. The pillars are to be fixed perfectly upright, and secured to kerb by two bolts to each pillar; these bolts are to be of the shape shown on drawing, let into the stone, and run with lead; and the pillars to be fastened thereto with proper nuts. Each pillar is to have a sheet of at least 5 lb. lead between it and the stone as bed. No posts shall be fixed at a greater distance than 12 feet apart, or nearer than 5 feet to any other post, unless specially authorized by the surveyor, at street corners, or elsewhere.

The frieze is to be formed of wrought iron lattice girders, the bottom flange and ends to be of 1½in. x 1½in. x ¼in. angle iron, thoroughly secured together at their junctions by angle plates, properly riveted on, the bars to be of 1½in. x ¼in. wrought iron, securely riveted to top and bottom flanges, and at their intersections. In all cases the top flange is to be of 2in. x 2in. x ¼in. angle iron, and in one piece from end to end of verandah; or, where this is impracticable, they must be connected over the pillars by 2in. x ¼in. junction plates, 4½in. long, which with the top flange are to be secured together and to the head of each post, with two bolts through the holes shown on the detail drawing. The bedmould, architrave, scroll work and brackets to be properly cast to the pattern shown on the drawing, the scroll work in such lengths as may be necessary to cause the same to properly work in; the lengths to be neatly fitted together, and the whole to be cleaned off and secured to girder and pillars in such manner as the surveyor may direct. The frieze between the pillars at street corners, where the footways are 11 feet or more in width, are in all cases to have two intermediate rafters.

The roof is to have rafters of 2½in. x 2½in. x ¼in. T iron, one at each column and one intermediate unless the distance between the columns be less than 7 feet. They are to be bolted to lugs at each post, and intermediates secured to cast iron shoe riveted to girders, the upper ends to be shaped and each to be secured to 2½in. x 2½in. x ¼in. wall angle iron with two bolts, the wall angle iron to be secured with ⅝in. bolts running through the wall or bressummer not more than 6 feet apart; or, in the case of a wooden bressummer, with ⅝in. coach screws not less than 6in. long, or at the end of a party wall, or where masonry occurs, the wall must be drilled to a depth of 9 inches, and the bolts jagged and properly leaded into the holes. The purlins to be of 2in. x 2in. x¼in. angle iron, fixed to rafters by bolt through the turned ends of vertical web, and the horizontal web meeting over rafters as shown. The roof is to be covered with the best corrugated galvanized iron, No. 24 Birmingham wire gauge, the sheets properly riveted together with galvanized iron rivets and washers, with an end lap of 6 inches and a side lap of two corrugations, and to be secured to wall iron, purlins and top flange of frieze, with hooks and bolts not more than 12 inches apart, the wall iron and top flange to have holes for this purpose. Fix proper lead flashing, wedged into groove in wall, or otherwise properly secured so as to be watertight, and turned down at least 6 inches over the iron of roof, and dressed into the corrugations.

The eaves gutter is to be of cast iron of the size and shape shown on the drawing, properly secured to top flange of frieze, with watertight joints and so fixed as to cause the water from the roof to be conveyed down each column and discharged into the channel by a chase in the stone kerb to be cut under each column for the purpose.

Paint the whole of the verandah, both inside and outside, except the upper side of the corrugated iron of roof, with three coats of the best oil, white lead and colour. The cast iron work to be finished in bronzed green, or gold bronze, and the other parts such tints as the surveyor may approve.

The frieze shall be carried along the several frontages in true horizontal line, the lower rail or architrave at a minimum height of eight feet above the kerbing, and carried along at that level until the height of ten feet above the kerbing shall have been attained, when the line shall be discontinued and shall recommence at the minimum height. Provided that in case such height of ten feet shall be attained elsewhere than exactly at the party wall or dividing line between any two houses, then the height may be reduced to the minimum height at the party wall next before the height of ten feet may be attained.

The design on the accompanying drawing and the hereinbefore specified details of construction are for a verandah over a footway 11 feet wide; verandahs over footways or other widths must be of similar construction in all respects, with the following exceptions.

OVER FOOTWAY 15 FEET WIDE.

Rise of roof from eaves gutter to building, 2ft. 6in.; camber of rafter, 4½ inches.

OVER FOOTWAY 12 FEET WIDE.

Rise of roof from eaves gutter to building, 2ft. 2in.; camber of rafter, 3½ inches.

OVER FOOTWAY 9 FEET WIDE.

Rise of roof from eaves gutter to building, 1ft. 7in.; camber of rafter, 2¾ inches; size of rafter, 2in. x 2in. x ¼in.; size of wall iron, 2in. x 2½in.

OVER FOOTWAY 7 FEET WIDE.

Rise of roof from eaves gutter to building, 1ft. 4in.; camber of rafter, 2½ inches; size of rafter, 1½in. x 1½in. x ¼in.; size of wall iron, 1½in. x 1½in. x ¼in.

OVER FOOTWAY 4 FEET 6 INCHES WIDE.

Rise of roof from eaves gutter to building, 1ft. 1in.; camber of rafter, 2¼ inches; size of rafter, 1¼in. x 1¼in. x ¼in.; size of wall iron, 1¼in. x 1¼in. x ¼in.

Footways of intermediate widths are to have verandahs with roofs of the rise, camber and sizes of iron, similar to the footways of the widths next smaller on the above list.

The whole of the works shall be executed in accordance with such instructions as may be given from time to time by the surveyor, and should the person erecting the verandah fail to carry out the work as herein specified, it shall be in the power of the surveyor to order the removal of such objectionable work. It must, however, be distinctly understood by owners, agents, architects, and others erecting verandahs in front of their properties, that the surveyor does not guarantee to hold himself responsible, by passing the work, for unsound material which may be used, or any faulty workmanship in the same.

2. No opening shall be made in the roof of any verandah for the purpose of affording light unless such opening be properly framed and glazed with rough rolled plate glass protected underneath with fine mesh wire netting to the satisfaction of the surveyor.

VERANDAHS IN CHAPEL STREET.

3. As to verandahs or porticos to be constructed over any portion of Chapel-street, in the City of Prahran, on the frontage of any new building, they shall be constructed so and in such manner and form as that the lowest part thereof shall be and remain at a height of not less than twelve feet above the surface of the kerb and supported otherwise than by columns on the footway.

Every verandah or portico to be constructed over any portion of Chapel-street in the said city, on the frontage of any new building, shall be of the shape, figure, dimensions, materials and strength set forth in the plan and specification following.

Specification.

Specification in accordance with which and the accompanying drawing all verandahs to be erected over the footways in Chapel-street of the City of Prahran are to be executed.

All verandahs to be composed of materials and design as shown on the accompanying drawing, and constructed as described in this specification.

The roof is to have main rafters of 7in. x 4in. x 16 lbs. rolled steel joists, let into cross walls at least 5 feet. Each rafter is to have a sheet of 5 lb. lead extending at least 12in. along the rafter between it and the bedstone, which is to be 9in. x 9in. x 6in. bluestone. No rafters shall be fixed at a greater distance than 16 feet apart, unless specially authorized by the Surveyor. Intermediate rafters to be 8in. x 1½in. oregon, the best of its kind, dry, well seasoned, sawn square, free from sap, cracks, loose knots or other defects. These are to cut at end to fit into face girder and bolted up to top flange of same with ¾in. timber bolts. Rafters to be at 2ft. centres. Other ends to rest on 2½in. x 2½in. x ¼in. wall angle iron, and be bolted thereto with ¾in.

timber bolts. Wall angle iron to be secured with ⅝in. bolts running through wall or bressummers not more than 4 feet apart, or in the case of a wooden bressummer, with ⅝in. coach screws not less than 6in. long or at the end of a party wall of where masonry occurs the wall must be drilled to a depth of 9in., and the bolts jagged and properly leaded into the holes. The purlins to be of oregon of quality as before specified. Purlin nearest wall to be 3in. x 2in., as shown, others to taper off as required to give slope shown on plan. All to be securely nailed to rafters. The roof is to be covered with the best corrugated galvanised iron, No. 24 gauge, the shuts properly riveted together with galvanised iron rivets and washers with an end lap of 6in. and a side lap of two corrugations, and to be secured to purlins with proper roofing nails through every second corrugation. Fix proper lead flashing wedged into groove in wall or otherwise properly secured so as to be watertight and turned down at least six (6) inches over the iron of roof, and dressed into the corrugations.

The eaves gutter to be of cast iron 4½in. O.G. as shown on drawing, bolted through web of face girder with ½in. bolts. Where 2in. drainpipe is taken down, a boss is to be cast on eaves gutter and screwed for pipe to be fitted in. All drain pipes to be 2in. wrought iron, with elbows, sockets, and bends of proper size, all to be screwed together making watertight joints. These must be arranged as shown on plan, with down-pipe let into wall or other method approved by the Surveyor.

Face girder to be as shown of 9in. x 3in. x 19 lbs. rolled steel channel. Holes are to be drilled through flanges, but may be punched through web for any necessary bolts. On outside face of this at proper level a 7in. x 1in. oregon or red pine facia plate is to be bolted as shown and firmly secured.

Along the bottom faces of intermediate joists 1½in. x 1½in. oregon battens are to be securely nailed, making up piece as shown to be put in position between facia plate and last batten. To these the metal ceiling of approved type is to be fixed. Cornices, mouldings, and cornice-mouldings of approved type are to be fixed where shown in a proper manner and finished off in a neat and workmanlike way to the satisfaction of the Surveyor.

Paint the whole of the verandah both inside and outside, except the corrugated iron of roof, with three coats of best oil and white lead paint.

The face girder shall be carried along the several frontages in true horizontal line, the lowest point at a minimum height of 12 feet above the kerbing and carried along in that manner until the height of 14 feet above the kerbing shall have been attained, when the line shall be discontinued, and shall recommence at the minimum height.

Where a new verandah is to be added to an old building, or where no party wall occurs that the main rafter can be built into, the verandah must be constructed as in cross section "B" on plan. A 7in. x 4in. x 16 lbs. rolled steel joist is to be built into a chase left or cut in wall (as case may be) with a footing piece of similar section firmly riveted to it. End of footing piece to rest on a concrete block at least 18in. x 12in. x 12in. Main rafter of verandah is to be riveted to top of rolled steel joist in wall. All rivets to be ¾in. diameter and all cleats 4in. x 3in. x ⅝in. All riveting to be done in an approved manner and all joists made tight and secure.

In places where party walls are more than 16 feet centres, larger main rafters will have to be used of a size and section approved by the Surveyor.

The whole of the works shall be executed in accordance with such instruction as may be given from time to time by the Surveyor, and should the person erecting the verandah fail to carry out the work as herein specified, it shall be in the power of the Surveyor to order the removal of such objectionable work. It must, however, be distinctly understood by owners, agents, architects and others erecting verandahs in front of their properties that the Surveyor does not guarantee or hold himself responsible, by passing the work, for unsound material which may have been used or any faulty workmanship in the same.

Hoardings, Signboards, &c.

4. Save as hereinafter provided no person shall erect build or construct or alter or add to or cause to be erected built or constructed or altered or added to any hoarding signboard or erection for advertising purposes without first obtaining the consent of the Council and unless such hoarding signboard or erection is erected built or constructed altered or added to in accordance with the plan and specification prepared by such person and previously approved by the Council. No hoarding, signboard or erection shall be within a distance from the building line of any street or road equal to the greatest height of such hoarding, signboard or erection; nor the lowest part of such hoarding other than the main supports thereof be nearer than three feet from the level of the footpath or the ground adjoining whichever is the higher.

5. The material of which such hoarding or erection is to be built or constructed or with which it is to be altered or added to shall be such as may be approved by the City Surveyor, having due regard to the height, position and site of such hoarding or erection.

6. If any person erects, builds, alters, adds to, constructs or fixes or causes to be erected, built, altered, added to, constructed or fixed, any hoarding or erection for advertising purposes contrary to the provisions of this By-law it shall be lawful for the Council or City Surveyor to serve on the owner or occupier of the premises to which the same is affixed a notice to pull down and remove such hoarding or erection by giving such notice to such owner or occupier or by affixing such notice on the hoarding or erection; and in the event of such owner or occupier thereof refusing or neglecting to pull down and remove such hoarding or erection for seven days from and after the service of such notice it shall be lawful for the Council to pull down and remove or cause to be pulled down or removed any hoarding or erection constructed, erected, altered, added to or fixed contrary to this By-law; and the Council may recover from such owner or occupier the cost of so doing in any court of competent jurisdiction, and in addition may sell the materials thereof and apply the proceeds of such sale in reimbursing the expenses of pulling down and removing such hoarding or erection and in paying any fees and penalties due by such owner or occupier.

7. If the Surveyor shall certify in writing that any hoarding or erection is in such a state as to be dangerous to public or private safety the owner of such hoarding or erection upon receiving notice from the Council requiring him to pull down or remove the said hoarding or erection shall pull down or remove such hoarding or erection within the time limited by such notice not being less than three days from the service thereof.

8. In default of compliance with any such notice to pull down or remove any hoarding or erection the Council may immediately on the expiration of the time therein limited pull down or remove such hoarding or erection and may sell any of the materials thereof and apply the proceeds of such sale in reimbursing the expenses of pulling down removing and selling such hoarding erection or materials and in paying into the Municipal Fund any fees or penalties due by the owner thereof.

9. A signboard hanging-lamp or gaspipe fixture may be erected or attached to any building or verandah provided it be of material construction and design approved by the Surveyor, to be in no part less than eight feet six inches above the level of the footpath beneath, and the written permission of the Council thereto be first obtained. But no signboard shall exceed in depth two feet six inches nor unless attached to a verandah project over the footpath. Signboards within a verandah shall not exceed nine inches in width and no part shall be less than eight feet six inches above the level of the footpath beneath.

PART XIII.

Enforcement of By-law and Penalties.

1. In the case of any building erection or construction contrary to the provisions of this by-law either in whole or in part—

(*a*) the council may give to the owner or builder or leave upon the site of such building erection or construction fourteen days' notice in writing (which notice may be signed by the municipal clerk on behalf of the council) to bring the same into conformity with the said provisions or requiring the pulling down or removal of such building erection or construction; and

(*b*) if default is made in complying with such notice and notwithstanding the imposition or recovery of any penalty it shall be lawful for the council through its surveyor to with a sufficient number of workmen demolish and pull down the said building erection or construction, or any part or parts thereof and to do any other act that may be necessary for the purposes and to remove the materials thereof to some convenient place and the council in its discretion may sell the same in such manner as it thinks fit; and

(*c*) all expenses incurred by the council or surveyor in demolishing and pulling down the said building or erection or construction or any part or parts thereof or in removing the materials thereof and selling the same and in doing such other acts as aforesaid and all fees or penalties due by the owner or builder thereof may be deducted and retained by the council out of the proceeds of such sale; and

(*d*) the council shall pay over any surplus arising from such sale on application being made by the person entitled thereto.

2. ALBERT J. MULLETT,
Government Printer.

THE "VICTORIA GOVERNMENT GAZETTE."

SUBSCRIPTIONS.—*The Subscription, including Postage, is* £1 8s. 4d. *per annum, or* 7s. 1d. *per quarter, payable in advance.*

Subscriptions are required to commence and terminate with a month.

A lesser period than three months cannot be subscribed for.

Subscribers do not receive the Acts of Parliament with the Gazette.

ADVERTISEMENTS *are charged at the rate of* SEVENPENCE *per line throughout.*

The Title (£5 *Reward, Dissolution of Partnership, &c.*) *forms one or more lines, as a heading.*

On an average, ten words make a line, but for the description of a brand consisting of more than one letter, &c., placed perpendicularly, thus, B, *each additional* B *letter under the first is charged as a line.*

Every signature must likewise be counted as a line.

The final words of a paragraph, though only a portion of a line, must be counted as one line.

Signatures (in particular) and proper names must be written very plainly in the text; ONE SIDE ONLY *of each slip of paper should be* WRITTEN UPON.

ALL DOCUMENTS *illegibly written will be returned unpublished, and, where brands occur unprovided for by the ordinary letters of the alphabet, a bordered explanatory description must be furnished.*

The GOVERNMENT GAZETTE *is published on* WEDNESDAY EVENING *in each week, and Notices for insertion must be received by the Government Printer on or before* TWO *o'clock of the day preceding the day of publication.*

Single copies of the GOVERNMENT GAZETTE *are Sixpence, posted Sixpence halfpenny, each.*

N.B.—*All Gazettes prior to 1st January,* 1872, *are One shilling and sixpence, posted One shilling and sixpence halfpenny each.*

*** ALL PAYMENTS ARE REQUIRED IN ADVANCE. *Remittances should be made by postal note, money order, or draft in favour of the Government Printer. Advertisements unaccompanied by a remittance sufficient to cover the cost of insertion will be returned unpublished.*

All communications should be addressed to "The Government Printer, Melbourne."
