COUNCIL.

THE Legislative Council having met this day pursuant to Summons, His Excellency the Governor took the Chair, and read the following Address.

WILLIAM MACPHERSON,
Clerk of Councils.

Gentlemen of the Legislative Council,

In meeting you for the dispatch of the ordinary business of the year, I am happy to be able to congratulate you on the improved prospects which are opened to us, by the termination of the calamitous drought, under which the Colony was laboring during the whole of our late extraordinary sitting; by the abundant rains which have fallen in most parts of the Territory, the hopes of the Colonists have been revived; and though grain of every description will probably yet for some months retain a high price, I trust all fears of an afflictive scarcity have passed away.

Acting on the advice of my Executive Council, I adopted measures in the month of April last, to insure an importation of corn from the markets of India, or South America, before the supplies which are now fast flowing in from our Sister Colony, shall be exhausted. My arrangements on the occasion were so made, as not in all probability to lead to any charge upon the Public Purse of the Colony; should, however, the contrary prove to be the case, I shall trust confidently to the wisdom and liberality of this Council, to enable the Government to make good its engagements.

I am happy, Gentlemen, to have it in my power to inform you, that the measure which was adopted by this Council, at the commencement of our last year's Session, for admitting the public to our

No. 423. June 12, 1839.

debates, has met the approval of Her Majesty's Government: the Despatch which I have received from the Secretary of State on this subject, I shall lay before you.

I shall also lay before you a despatch which I have received from the Secretary of State, announcing the early intention of Her Majesty's Government to appoint an Officer, who will be vested with the powers, and will assume the character of British Consul at New Zealand. Upon this appointment being made, the Office of British Resident will be discontinued.

Papers and returns, shewing the progress of Immigration during the course of the last year, are in preparation, and will be speedily presented to you. I shall then propose to refer these papers to a Committee of the Council—as has been the practice in respect to papers on this most interesting subject, in each of the last few years.

I also propose to revive the Committee, which sat during the last year, on two bills, which I then presented to you for effecting an alteration in the insolvent laws of the Colony, and for the abolition of imprisonment for debt on mesne process. I sincerely hope some satisfactory measure may be adopted on each of these important subjects.

Among the public establishments of the Colony there is not, it seems to me, one of more vital importance than that of the Police, or one to which the attention of this Council can be more profitably directed. Notwithstanding the extent of these establishments, and the enormous expense of them, I continue to receive complaints of their insufficiency; and demands are so frequently made upon me for extensions in them, that I feel it desirable, before I proceed to any further executive measures, to seek the advice and assistance of such members of this Council, as are most conversant with the actual state of the Police, and with the wants of the Colony. I therefore propose to refer the whole subject of our Police establishment to a Committee, similar to that which sat upon them in the year 1835.

Among the bills which will be laid before you, there is one for the regulation of the Customs, by which however, it is not so much proposed to make an alteration in the law, as to collect into one Act all existing regulations, and to adopt certain improvements which have already been introduced into the law of the Customs in Great Britain.

Upon the important subject of the Education of the people, it is my intention to submit to you a proposal when I bring forward my financial statement for the year: the basis of the arrangement I shall then propose will be, that the schools under the immediate control, either of Government, or of a Board of Education, shall be established on the principle of the British and Foreign School Society—leaving to every religious community the option of continuing their own schools, or of founding new ones, on the understanding that they will still receive from Government pecuniary assistance towards the support of them, equal in amount to what they derive from private contributions.

The rise in the price of almost every prime necessary of life, consequent upon the late drought, and augmented perhaps by the increase in our population, has, I regret to say, caused all our existing contracts, and particularly those for forage and provisions, to be made at a rate vastly exceeding that of the last year—had it not been for this

circumstance, which was in a great measure unforeseen, I have reason to believe that the expenditure of the current year, would have been within the estimates already sanctioned by the Council.

The accounts of the receipt and expenditure of the last year, will be laid before you with as little delay as possible, as well as the estimates for 1840—I shall also, according to directions received from the Secretary of State, lay before you a copy of the official documents for 1837, contained in what is generally denominated the "Blue Book."

I am happy to be able to state, that the Revenue of the Colony continues to improve; and though our expenditure for the present year, must greatly exceed the gross amount of it, I see no reason to doubt, that, by wise and economical measures, we may yet avoid any pecuniary embarrassments; and even devote, to the important object of Immigration, the amount of net revenue which we derive from the sale of the unimproved lands of the Crown.

"GEORGE GIPPS."
