SAILING DIRECTIONS—CAPE TOWN.

IN compliance with the desire of the Government of the Cape of Good Hope, His Excellency the GOVERNOR has been pleased to direct the publication of the following amended instructions for entering, during the Night, the port of Cape Town, rendered necessary by the erection of a new Light House on the MOUILLE POINT.

*By His Excellency's Command,
E. DEAS THOMSON.*

INSTRUCTIONS for entering Table Bay by Night, by the Plan constructed on the observations made by H. M. S. *Leven*, November, 1825. The Bearings mentioned in these Instructions are all by Compass, or Magnetic.

1st.—To enter Table Bay from the northward, meaning to pass outside of Robben Island, a Ship should keep the Light to eastward of south—9 degrees east, or about south and by east, until she get soundings under 20 fathoms, at a little more than a mile from the Light House; she may then steer east south-east, or east and by south, not to come under 10 or 12 fathoms until the Light bears west south-west, she may then steer for the Anchorage, and may anchor in from 7 to 6 fathoms, as soon as the Lights are shutting in behind the Lion's Tail. This track leads about a mile clear of danger on Green Point; but a Ship need not

approach it so near, if she have, by seeing Robben Island, ascertained by its bearings, that she is clear of the Whale Rock, in which case she may round it at a greater distance from Green Point, if desirable, but the soundings in that case will not alone be a sure guide.

2nd.—In coming from the south-west, a Ship should not get less than 40 fathoms before the Light bears south-east, or east south-east, nor less than 20 fathoms before it bears south and by east, when the preceding directions may be followed.

From the northward—inside of Robben Island—the Light should be kept about south-west and by south, until a Ship have passed that Island; in doing which she may have some casts from 8 to 6 fathoms; and when on that course the Water deepens to 11 or 12 fathoms, she may steer for the Anchorage by the Plan as before directed.

In beating round Green Point, a Ship should never shoal her water under 11 or 12 fathoms, until she have brought the Light to bear west south-west as before stated.

In beating between Robben Island and the Main, to enter Table Bay, the soundings may be taken from the Island as it shoals to very regularly. In standing towards the Main, it appears prudent to tack at the first cast of the Lead after the Water shoalens.

In these directions it is taken for granted, that a Ship will always keep her Leads going.

By Day, or when the Shores or Surf can be seen, or indeed under any circumstances, the Plan ought to be a sufficient guide.

There are two Lights at the Light House, which are in one about S.W. and by W.; these appear to be of no other use than to assure the Navigator which is the Light House, if he should see other Lights. We have seen Lights clearly off deck at 16 miles distance; but they will not make clear as two Lights until within 6 or 7 miles to the Westward of them; and from the Northward one Light only will be seen.

(Signed) W. F. W. OWEN,
Captain of H. M. Ship Leven.

A Light House having been erected on the

Mouille Point, with a Lenticular Light of the 4th class, for the better guidance of Vessels entering Table Bay during the Night, the following Instructions are appended to the Instructions by Captain Owen, R. N. :—

In standing in from the S. W., a Ship should not pass the Lights on Green Point nearer than a mile—nor should the course be altered from the eastward to the southward, with the intention of steering for the anchorage,—nor should the Ship be brought into less than 14 or 15 fathoms water, before the Lights on Green Point bear S. W. by W. $\frac{1}{2}$ W. (they will then be in one,) when the Light on the Mouille Point will instantly be seen, (and not before) bearing nearly S. by W. A Ship may then alter the course from the eastward, and steer S. S. E. for the centre of the anchorage, and anchor whenever the lights on Green Point are shut in, (by Sand-hills, near the Mouille) and the Light on the Mouille Point bears N. W. distant about a mile, in from 6 to 8 fathoms water. Vessels of light draft of water may steer S. by E. $\frac{1}{2}$ E. for the anchorage, and anchor with the Mouille Light, bearing N. W. by N. in from 4 to 5 fathoms of water.

The Ship's distance from the Shore, when the Light on Mouille appears, may be readily ascertained by the bearings of the two Light Houses, and the distance between them, which is 1,215 yards—the perpendicular height of the Mouille Light above high water mark is 40 feet.

In coming in from the northward (inside Robben Island,) the Lights on Green Point will appear in one, (or nearly so,) and the Light on the Mouille Point will also be seen—the distance between the Light Houses being as above mentioned. The directions by Captain Owen, and the appended directions, will be a sufficient guide to the anchorage.

It is earnestly recommended to strangers not to attempt to beat into Table Bay at night, in squally or thick weather. The strictest attention should be paid to the soundings, and the leads kept constantly going. The plan of the Bay by Captain Owen, (upon which the instructions are founded,) should also be at hand for reference.

(Signed) J. BANCE, Port Captain.

By Command of His Excellency Sir GEORGE T. NAPIER, K. C. B., Governor, Vice-Admiral, and Commander in Chief of the Colony of the Cape of Good Hope and its Dependencies, &c.

(Signed) J. MOORE CRAIG,

Acting Secretary to Government.

N.B.—The Light on the Mouille Point will be lighted from and after the 1st day of July next. Cape Town, 1st March, 1842.

* * * A Plan of Table Bay may be seen at the Port Office.
