NOTICE TO MARINERS.

HIS Excellency the GOVERNOR has been pleased to direct the re-publication from the *London Gazette,* of the following Notices to Mariners, respecting the Lighthouses, erected respectively on the Skerryvore Rock, (Scotland,) and on St. John's Point, (Ireland.)

By His Excellency's Command,
E. DEAS THOMSON.

NOTICE TO MARINERS.
SKERRYVORE LIGHTHOUSE.

Edingburgh, 23rd December, 1843.

THE Commissioners of the Northern Lighthouses hereby give notice, that a lighthouse has been erected upon the Skerryvore Rock, which lies off the island of Tyree, in the county of Argyle, the light of which will be exhibited on the night of the 1st February 1844, and every night thereafter, from sun-set to sun-rise.

The following is a specification of the position of the Lighthouse, and the appearance of the Light, by Mr. Alan Stevenson, Engineer to the Commissioners.

The Skerryvore Rock lies off the island of Tyree, in lat., 56° 19' 22" N.; long., 7° 6' 32" W.

By compass, the Lighthouse bears from Barrahead Lighthouse, S. ¼ E. distant 33 nautic miles; from Hynish Point, in Tyree, W. S. W. ½ W. distant 10½ miles; from Iona Island, W. N. W. ¾ N. distant 20 miles; from Rhinns of Islay Lighthouse, N. ¼ E. distant 44 miles; and from Innistrahull Lighthouse, in Ireland, N. E. by N. distant 53½ miles.

Owing to the distance to which the foul ground extends on every side of the rock on which the Lighthouse is placed, and the weight of sea which breaks on the shallow ground all round it, it is necessary to give the light a wide berth. The better to enable seamen to judge of this, their attention is called to a chart, prefixed to a separately printed notice, which exhibits the relative position of the Skerryvore Rock, and the various dangers around it. In particular, it is necessary to notice the position of those rocks which lie seaward of the Lighthouse, viz, Mackenzie's Rock, about 3 miles W. by S. ¼ S. from the lighthouse; Stevenson's, 2¼ miles W. ½ N.; and Fresnel's, which lies between these two rocks. Copies of the notice, with the chart prefixed, will be extensively circulated to all the Custom-houses of the United Kingdom, and will be seen by any mariner on application.

The Skerryvore Light will be known to mariners as a revolving light, producing a bright flash once every minute. The lantern, which is open all round, is elevated 150 feet above the level of the sea. In clear weather, the flashes of the light will be seen at the distance of six leagues, and at lesser distances, according to the state of the atmosphere; and to a near observer, in favourable circumstances, the light will not wholly disappear between the flashes.

And the Commissioners hereby further give notice, that by virtue of a Warrant from the Queen in Council, of date 13th December, 1843, the following tolls will be levied for voyages in respect of which benefit will be derived from this light, viz. from every British vessel (the same not belonging to Her Majesty; or being navigated wholly in ballast,) and for every foreign vessel which, by any Act of Parliament, Order in Council, Convention, or Treaty, shall be privileged to enter the ports of the United Kingdom of Great Britain and Ireland, upon paying the same duties of tonnage as are paid by British vessels, (the same not being navigated wholly in ballast), the toll of one penny per ton of the burden of every such vessel; and for every foreign vessel, not so privileged, the toll of two-pence per ton.

By order of the Commissioners;
(Signed) C. CUNNINGHAM,
A. CUNNINGHAM,
Joint Secretaries.

NOTICE TO MARINERS.

ST. JOHN'S POINT LIGHT-HOUSE, EAST COAST OF IRELAND.

Ballast-Office, Dublin, November 30, 1843.

THE Corporation for preserving and improving the port of Dublin hereby give notice, that a Lighthouse has been erected on St. John's Point, county Down, from which a light will be shewn on the evening of the 1st of May, 1844, and which will thereafter be lighted every night from sun-set to sun-rise.

Specification given of the position and appearance of the light, by Mr. Halpin, Inspector of Light-houses.

The tower is built on St. John's Point, at the east side of Dundrum Bay, in latitude 54° 13' 24" N. and longitude 5° 39' 50" W. and bears

From Newcastle Pier (Dundrum Bay), E. by S. ½ S. distant 7½ sea miles.

From Helly Hunter Rock (off the entrance of Carlingford Lough), E. by N. ½ N. distant 18 sea miles.

From Rock-a-bill, N. E. distant 40 sea miles.

From Calf of Man (revolving lights), N. W. ¼ N. distant 31 sea miles.

The light will be an intermitting light, appearing of its full brightness during 45 seconds, and obscured for 15 seconds; the periods of light and eclipse succeeding regularly, it will be shewn from W. by N. ½ N. seaward, to E. ½ N., and at an elevation of 62 feet over the level of high water of spring tides.

This light, kept open, will lead clear of Gun's Island, and of the St. Patrick's Rock, off the entrance of Strangford Lough. Mariners are cautioned to avoid the well known indraft of Dundrum Bay.

The tower is circular, coloured white. The projecting gallery and blocking over it are coloured brown.

The bearings stated are magnetic, var. 28° W.

By order,

H. VEREKER, Secretary.
