COAST AND HARBOR LIGHTS, VICTORIA.

The accompanying "Notice to Mariners," intimating that on and after the dates severally mentioned, Lights will be exhibited at the Lighthouses at Wilson's Promontory, Cape Schanck, Portland, Port Fairy, Warrnambool, and Port Albert, is hereby published for general information.

By His Excellency's Command,
HENRY MILLER.

Department of Ports and Harbors,
Williamstown, 28th May, 1859.

NOTICE TO MARINERS.

SEVEN NEW LIGHTHOUSES ON THE COAST OF VICTORIA.
In accordance with a Notice to Mariners issued from this office on the 7th of May, 1858, masters of vessels and others navigating the coast and harbors of Victoria, are hereby informed that on and after the dates herein specified, Lights will be exhibited from the undermentioned New Lighthouses:—

(1.) CAPE SCHANCK.

The approximate position of the Cape Schanck Lighthouse is in latitude 38° 30' S., longitude 144° 54' E.; it stands upon the highest part of that Cape about half a mile N.N.W. of the Pulpit Rock.

The light will be a catadioptric, first class, *fixed and flashing white light*, showing a *bright flash every two minutes*.

The light at a distance of eight (8) miles and upwards, according to the state of the atmosphere, will appear as a steady light for the space of one minute, be suddenly eclipsed for twenty-five seconds, then exhibit a bright flash for about ten seconds, and be again eclipsed for twenty-five seconds, when the steady light will re-appear.

When a vessel is within about six (6) miles from the light, the eclipses will be scarcely observable, a continued faint light being at that distance, in clear weather, visible between the intervals of the bright flashes.

The light will be three hundred and twenty-eight (328) feet above the mean level of the sea, and be visible to seaward from E. $\frac{1}{2}$ S. round southerly to N.W. $\frac{1}{2}$ W. at the distance of twenty-three (23) nautical miles, allowing ten feet for the height of the eye, and at lesser distances according to the state of the atmosphere.

The lighthouse tower is circular, built of stone, and painted red.

Mariners are reminded that the reef to the southward of the Pulpit Rock lies S.S.E. about seven (7) cables length from the site of the lighthouse, vessels in passing the light must therefore give it a wide berth.

The Cape Schanck light will be exhibited on the evening of the 30th day of June, 1859, and every night thereafter from sunset to sunrise.

(2.) WILSON'S PROMONTORY.

The Wilson's Promontory Lighthouse is situated on the south-eastern part of that headland; its approximate position is latitude 39° 9' S., longitude 146° 23' E.

The light will be a catoptric, first class, *fixed white light*; it is elevated three hundred and forty-two (342) feet above the mean level of the sea, and will be seen in clear weather at the distance of about twenty-four (24) nautical miles, allowing ten feet for the height of the eye, and at lesser distances according to the state of the atmosphere.

The lighthouse tower is circular, built of stone, and painted white.

No. 83.—MAY 31st, 1859.—I.

The Wilson's Promontory light will be exhibited on the evening of the 16th day of July next, and on every night thereafter from sunset to sunrise.

Note.—The actual arc to be illuminated not having yet been tested by observation, a further notice containing the necessary information will be published before the exhibition of the light.

(3.) PORT ALBERT LIGHT.

The Port Albert Lighthouse is situated on the eastern end of La Trobe Island; its approximate position is in latitude 38° 46' S., longitude 146° 39' E.

The light will be a catadioptric, fourth class, *fixed and flashing red light*, showing a flash every three minutes.

(4.) PORTLAND BAY LIGHT.

Portland Bay Lighthouse is situated on Battery Hill, near the Flagstaff; its approximate position is in latitude 38° 22' S., longitude 141° 39' E. longitude. The light will be a catadioptric, fourth class, *fixed red light*.

When this light is exhibited, the one now shown at the seaward end of the jetty will be altered in color from red to green.

(5.) PORT FAIRY LIGHT.

Port Fairy Lighthouse is situated on the south-eastern part of Rabbit Island, about ten yards from high water mark; its approximate position is latitude 38° 24' S., longitude 142° 19' E.

The light will be a fourth class catadioptric *fixed and flashing red light*, showing a flash every three minutes.

N.B.—Mariners are particularly requested to note the distinctive feature between this and the Cape Otway light, the latter being white, and attaining its greatest brilliancy once every minute.

(6.) WARRNAMBOOL LIGHT.

The seaward Warrnambool light is situated on Middle Island; its approximate position is in latitude 38° 26' S., longitude 142° 32' E. The light will be a fourth class catadioptric *fixed white light*.

(7.) A small leading light, colored red, will be exhibited on the 1st of January, 1860, from a tower situated a little above high water mark, in a line with two (2) stone obelisks, which kept in one on a bearing of due north leads into the anchorage.

The leading light will be marked so as to show a light from S.E. round southerly to S., to guide vessels in clear of the outer reefs.

These four (4) harbor lights, viz., Port Albert, Portland Bay, Port Fairy, and Warrnambool, will be exhibited on the evening of the 1st day of September next, and on every night thereafter from sunset to sunrise.

A further notice will appear giving the range and other particulars of these four harbor lights before they are exhibited.

The bearings used in the above notice are magnetic.
