PETITION UNDER THE MUNICIPAL ACT.  
MALMSBURY.

IN pursuance of the Act of Council 18 Victoria No. 15, the Governor, with the advice of the Executive Council, has directed the publication of the substance and prayer of a petition addressed to His Excellency as hereinafter set forth, signed by one hundred and ninety-three householders resident at and near Malmsbury, in the counties of Dalhousie and Talbot, praying for the erection of their locality into a municipal district.

R. HEALES.

Chief Secretary's Office,  
Melbourne, 29th June, 1861.

S.4895.

The petitioners state that their locality is situated on the Main Mount Alexander road, and is fast rising in importance, being the centre of a large and increasing agricultural population.

That within the township boundary there are many large and substantial buildings, including stores, hotels, and steam flour-mills, breweries, and a large malting establishment all now in full operation, and moreover that some of the finest blue-stone quarries have been opened and are being extensively worked.

That roads, bridges, drains, and streets are required to facilitate the large and increasing local traffic, but no provision exists for these works.

They urge upon His Excellency the expediency of forming their locality into a municipal district, as tending greatly to advance its interests and materially aid its improvement and good government, and suggest the following boundaries for such

district, viz. :—“ Commencing at a point in the south boundary line of the township of Malmsbury where the said south boundary line of the said township of Malmsbury is cut by the River Coliban; thence in a line bearing west about eighty-five chains to the south-west corner or angle of the said township of Malmsbury; thence in a line at right angles to the last line, bearing north up the western boundary of the said township about one mile to the north-west corner or angle of the said township; thence in a line at right angles to the last line, bearing east about three miles and three-quarters to the north-east corner or angle of lot 23, parish of Edgcombe; thence in a line at right angles to the last line, bearing south, following a Government road one chain wide, about three-quarters of a mile to where the said Government road cuts the River Campaspe; thence following the centre of the said River Campaspe about three miles to the junction of the Boggy Creek; thence in a line bearing south-west about a quarter of a mile, running along the south-west boundary of lot 177, parish of Lauriston, to where the said line cuts the eastern boundary fence of the Melbourne, Mount Alexander, and Murray River railway; thence following the said eastern boundary fence of the said Melbourne, Mount Alexander, and Murray River railway, bearing north-westerly about three miles till the said western boundary line of the said Melbourne, Mount Alexander, and Murray River railway cuts the southern boundary line of allotment 290, parish of Lauriston; thence in a line bearing west about half a mile to the centre of the River Coliban; thence following the centre of the said River Coliban about a quarter of a mile home to the starting point.”

And the petitioners pray as follows :—

“ Your petitioners therefore humbly pray your Excellency, that the district so defined may be proclaimed a municipality, under the name of ‘ The Municipal District of Malmsbury,’ according to the provisions of the Act of Council 18 Victoria No. 15.”

[The signatures to the above-mentioned petition appeared in No. 97 of the Gazette, p. 1243 ante.]

By Authority: JOHN FERRES, Government Printer, Melbourne.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

In the second section, the author outlines the various methods used to collect and analyze the data. This includes both primary and secondary data collection techniques. The primary data was gathered through direct observation and interviews with key personnel. Secondary data was obtained from existing reports and databases.

The analysis of the data revealed several key trends and patterns. One significant finding was the correlation between certain variables, which suggests a causal relationship. This insight is crucial for developing effective strategies and policies.

Finally, the document concludes with a series of recommendations based on the findings. These recommendations are designed to address the identified issues and improve the overall performance of the organization. It is hoped that these suggestions will be implemented and lead to positive outcomes.
