SOUTH ENTRANCE, MORETON BAY.

IN consequence of further changes in the Bar at the South Entrance, Masters of Vessels are cautioned against crossing it with the beacons in line as formerly. The Bar should now be taken to the southward of the line of beacons, and with the Inner Beacon open about five times its own width to the southward of the Outward Beacon. A direct course may then be steered, with the beacons in that position, from the outer edge of the Bar until the North Break is passed, when a course should be shaped so as to cross the line of beacons before reaching the South Break.

By following these directions a vessel will cross the Bar in not less than thirteen feet at low water springs.

Though the channel across the Bar has considerably improved, and has regained much of its original character, it cannot yet be considered permanent, but must still be used with due caution, and only in fine weather.

THE PATENT'S STATUTE 1865.—SCHEDULE 7.

PATENT FOR "AN INVENTION OF AN EARTH-CLOSET, TO BE CALLED 'EVERYBODY'S EARTH-CLOSET.'"

THIS is to notify to all to whom it may concern, that Isaac Swan, of East Collingwood, has applied to me for leave to enter a memorandum of alteration of the said invention, the particulars whereof are stated below: I do therefore appoint Monday the twenty-fifth day of April next, at Eleven o'clock in the forenoon, to hear and consider the said application, and all objections to the same: And I do hereby require all persons having an interest in opposing the said application to leave, on or before the twenty-first day of April, at my chambers, in Melbourne, particulars in writing of their objections to the same, otherwise they will be precluded from urging such objections.

Given under my hand this twenty-first day of March A.D. 1870.

M. A. McDONNELL,
Attorney-General.

The following is the memorandum of alteration which I desire to make in my specification deposited on the 2nd November A.D. 1869.

"A urinarius is formed in this closet, by fixing inside of the receiver a piece of wood or iron four and a half inches wide along the front part of the seat. This forms a gutter for urine under the seat-hole about one foot beneath the person sitting, which, without allowing it to mix with the *feces*, carries it off to the outside, where a pipe is connected communicating with the street or yard-channel. If there be no water-channel near the closet, a movable galvanized iron vessel is fixed inside of the side door to receive the urine, which may be emptied when convenient."

ISAAC SWAN,
No. 720 18 Smith street, East Collingwood.

PATENT FOR "AN IMPROVED STEAM PUMP OR WATER LIFTER."
