LIGHTSHIP NEAR TIMANDRA BUOY.

Discontinuance of North Light, Little Sea Hill, and alteration of Lights at Pilot Station and Little Sea Hill, Keppel Bay.

ON and after 15th April, a Lightship, painted red and carrying a white fixed light visible at a distance of 11 miles, will be moored in 7 fathoms at low water, 3 cables N.E. $\frac{1}{2}$ N. from the position of the Timandra Buoy, as shown on the chart.

During the flood tide a red flag will be shown by day and a white light by night from a staff on the lantern gallery.

The northern light at Little Sea Hill and the two leading lights at the Pilot Station will be discontinued after the above date; but a light will be shown from the Pilot Station, visible between the bearings of S.W. by W. $\frac{1}{2}$ W. and S.W. by S., that is, between the Cottier Buoy and the Keppel Rocks.

The high light at Little Sea Hill will, after this date, show red when bearing northward of N.E. $\frac{1}{2}$ E.

The Timandra Buoy will be shifted from its present position into 3 fathoms, off the N.W. extremity of the Timandra Bank.

Directions by Night.—When entering lights in line, and when abreast the Cape Capricorn leading lights in line, and when abreast the Cottier Buoy, which will be denoted by opening the light at the Pilot Station on a S.W. by W. $\frac{1}{2}$ W. bearing, steer for the Lightship, being careful not to bring it to the northward of a West bearing.

When abreast the Keppel Rocks, the light at the Pilot Station will be shut out. Continue a westerly course for 34 cables past the Lightship, when the Balaklava Lights will be brought into line, and the usual directions may be followed.

Vessels arriving requiring Pilots—whether or not they have made the usual signal, when off the Cape—should, if not already boarded by a Pilot, make the signal for a Pilot when approaching the Lightship, which will be answered as follows:—

By a white flare up, when the Pilot will be put on board from the Lightship.

By two white lights vertical, when the Pilot is coming off from the Station and the boat is to be looked out for.

By a white light over red, when vessels are to proceed, keeping Balaklava Lights in line, and to look out for the Pilot on the line of lights.

By a red light over white, when a Pilot will be obtained at Sea Hill.

By two red lights vertical, when there is no Pilot available and the vessel is to anchor, or proceed on with Balaklava Lights in line, for better shelter.

By day the foregoing signals will be made by flags of similar colors.

Pilots may be put on board the Lightship by outward-bound vessels not further requiring their services.

UNITED ECHUCA AND WARANGA WATERWORKS TRUST.—
REGULATION NO. 3.

In pursuance of the powers conferred by *The Victorian Water Conservation Act 1881*, the Chairman and Commissioners of the United Echuca and Waranga Waterworks Trust make the Regulation following, that is to say:—

1. All water supplied from the works of the Trust for the irrigation of land shall be paid for by measure. All measurements of water shall be by gauges of form and pattern approved by the Trust, and fixed under the direction and to the satisfaction of the officer appointed by the Trust for that purpose. The registration of the quantities of water delivered shall be made by the Trust's officers.

2. No irrigation-outlet or other outlet from any of the Trust's channels or works shall be constructed until the occupier of the land to be supplied from such outlet has entered into an agreement with the Trust for the purchase of water, and has received authority in writing from the Trust to construct such outlet.

3. Every outlet for the supply of water for irrigation shall be constructed under the supervision and to the satisfaction of the Trust, or of its duly authorized officer; and shall have a proper gauge fixed therein to indicate the quantity of water passing through such outlet.

4. One outlet only will be allowed for each property having a frontage not exceeding a mile, measured in a straight line, to any channel, and one additional outlet for each additional mile or fraction thereof. Before constructing any outlet, the owner of the land to be supplied therefrom shall give notice to the Trust's superintending officer, and receive his authority in writing to construct such outlet.

5. No person shall construct any outlet from the works of the Trust without its written authority or otherwise than under the supervision and to the satisfaction of its authorized officer. And any person who shall construct any such outlet without the authority of the Trust, or without the supervision of its authorized officer, or in any manner other than that authorized by such officer, shall be deemed to have committed a breach of this regulation, and shall be liable to a penalty of Five pounds for every such breach.

6. The rate or price to be paid for water delivered from the works of the Trust shall be One shilling per inch per acre for the first four inches, and Sixpence for every additional inch. One inch on an acre shall be deemed to be 4,000 cubic feet of water measured by the gauge.

7. All persons agreeing to take water from the works of the Trust shall take delivery thereof through their respective outlets at such times, in such order, and in such manner as the Trust shall direct. No person shall be supplied with a lesser quantity of water than is equal to the value of Four pounds; and the delivery of water shall be continued on Sundays as well as on ordinary working days.

8. Every person agreeing to take water from the works of the Trust shall receive notification of the dates and quantities in which it will be delivered to him.

9. The outlets for the delivery of water shall be opened only by the authorized officers of the Trust, and no person other than such officers shall under any circumstances open any such outlet, or otherwise do any act that may permit of the escape of water from the channels or works.

10. Any person not being a duly authorized officer of the Trust who shall open any irrigation-outlets or do any act that may cause the escape of water from the Trust's channels or works shall be guilty of a breach of this regulation, and shall be liable to a penalty of Five pounds for every such breach.

11. No person shall injure or damage any of the works of the Trust, or waste or defile the water contained therein; and any person who shall injure or damage such works or any part thereof, or waste or defile the water contained therein, shall be deemed to be guilty of a breach of this regulation, and shall be liable to a penalty of Five pounds for every such breach.

12. In the event of the Trust being unable, from failure of the works, or from any other cause, to deliver or supply water to persons whom it shall have agreed to supply, such persons shall be entitled to a rebate of the price agreed to be paid for such water. But the Trust shall not be answerable for any damage which may have been sustained by any person by reason of such non-delivery.

13. The foregoing regulations shall not apply to gardens of less than five acres in extent.

Made and adopted by the Commissioners of the United Echuca and Waranga Waterworks Trust on the thirty-first day of March, One thousand eight hundred and eighty-six.

CONDITIONS OF SALE OF THE RIGHT TO LEASE FOR PASTORAL ALLOTMENTS.

1. The occupation of the pastoral allotments will be offered for sale at the annual rents respectively stated and annexed to the description thereof, and the bidder of the highest sum by way of premium will be declared the purchaser, provided he shall immediately pay down such sum and sign the description hereunto annexed, of the pastoral allotment of the occupation of which he shall have become the purchaser, thereby binding himself to the observance of the above and following conditions; and in default of such payment being immediately made the pastoral allotment shall again be forthwith put up to auction.

2. CONDITIONS OF CONTRACT.

1. The Government will not be bound to order from the contractor all the articles enumerated in the schedules, but only those articles, and such quantities of those articles, as it may be found necessary to order. Should the Government, however, require a larger supply of any article than the quantity stated in the schedules, the contractor will nevertheless be bound to supply the same at contract rates.

2. The supplies are to be according to sample and of the particular manufacture indicated in the schedule of tenders. In the case of different makers' goods, the contractor will be required to supply the kind ordered. In other cases the supplies are to be the best quality of their several kinds or manufacture. A preference will, however, be given to goods of Victorian manufacture, provided the quality is equal to the particular manufacture indicated in the schedule.

3. All orders for supplies will emanate from the departments requiring the goods, and be transmitted through the Stores and Transport Department, except in the case of supplies for the Local Military Department, the Naval Forces, the Harbor Department, and for Works and Buildings. From these departments the order will be sent direct to the contractor. All orders must accompany the goods on delivery, otherwise the goods will not be received. Delivery, as a rule, is to be of the full quantity ordered.

4. Supplies ordered for delivery in Melbourne and Williamstown districts are to be delivered free of all charges (whether cartage, freight, &c.), and, for the purposes of these contracts, Melbourne district will include a radius of six miles from the General Post Office; and Williamstown district will include the town of Williamstown, Hobson's Bay, and the River Yarra.

5. Arrangements as to time of delivery and inspection of goods will be made by the officers ordering the goods.

6. Orders must receive prompt execution; and, in the event of the goods not being delivered within forty-eight hours after the contractor shall have received the order, or within such other time as the order may specify for delivery, it will be competent for the officers named in condition 5, or the head of the department to whom the goods are to be supplied, on giving the contractor twenty-four hours' notice, to purchase the supplies at the contractor's risk, and the extra expense incurred over and above the contract price (if any) will be deducted from the contractor's account.

7. The contractor will be required to furnish his account in the prescribed form simultaneously with delivery of the full quantities of goods ordered, the account being rendered with the order to which it relates. The prices quoted in the orders cannot be increased.

8. The acceptance of the supplies shall be subject to the approval of the officers issuing the orders. The contractor may, however, claim a survey on any goods objected to; but in that case he must, within twenty-four hours after objection is made, give notice thereof in writing to the officer rejecting the goods.

9. Delivery will not be deemed to have been made until the goods have been approved of. All articles rejected must be immediately replaced by the contractor, otherwise purchases will be effected at the contractor's risk, and the extra expense deducted as in condition 6.

10. The members of boards of survey will be appointed by the Treasurer of the colony for the time being, and the decision of the board is to be considered as final. If the board shall decide that the article is not of proper quality, it must be immediately replaced by the contractor, failing which it will be procured elsewhere, and the survey fees and extra expense (if any) will be charged as in condition 6.

11. A repetition of irregularity in the quantity or quality of the supplies, or of delay in delivering or replacing them when required, will subject the contractor, upon report from the Tender Board, to such mulct, not exceeding Fifty pounds, as the said Treasurer may direct, and the amount may be deducted as in condition 6, or from the contractor's security. It will also be in the power of the said Treasurer, upon such repetition, to terminate the contract forthwith.

12. In the event of the contractor failing to carry on the contract, the contract security money will in that case be absolutely forfeited, and in addition the contractor will be held liable for any loss which the Government may sustain in consequence of such failure.

13. Contractors are not at liberty to transfer their contracts under cover of power-of-attorney, coupled with an interest or otherwise, and no such transfer will be recognized by the Government.

14. It will be competent either for the contractor on his own behalf, or for the Secretary of the Tender Board on behalf of the Government, to terminate the contract, by giving notice, in writing, of three full calendar months to the opposite party, it being understood that such notice can only be given from the first day of the month, and within the period for which the contract is made, and under no other circumstances will a contractor be permitted to abandon his contract.

15. The contracts entered into under this notice are not to be considered as being broken, infringed, or vitiated by the importation of stores for the Government service, or by any contracts made by the Imperial Commissariat or the Agent-General for Victoria, or by any contracts or agreements made for any works or supplies by the Department of Public Works and Defence Department, or on account of other Governments; or by any article being made at and supplied for the use of any Government establishment; or by the consumption of the surplus stock of any Government establishment.

16. In the event of any alteration in the tariff affecting any of the items included in these contracts, the Government, or the contractor, as may be the case, will make a proportionate allowance by way of deduction from or increase of the price of the item so affected.

In Parliament.—Session 1886.

A BILL TO CONFER ON WILLIAM LOCKHART MORTON, OF SOUTH YARRA, NEAR MELBOURNE, GENTLEMAN, THE SOLE PRIVILEGE AND AUTHORITY OF MAKING, USING, EXERCISING, AND VENDING HIS INVENTIONS, KNOWN AS THE SHEEP-DIP AND THE SWING-GATE.

NOTICE is hereby given that application is intended to be made in the ensuing Session of the Parliament of Victoria for leave to bring in a Bill to confer on William Lockhart Morton, of South Yarra, near Melbourne, gentleman, his executors, administrators, and assigns, the sole privilege and authority during the term of fourteen years of making, using, exercising, and vending the inventions hereunder described.

THE SHEEP-DIP.

This invention consists of a water-tight tank, of any convenient length, depth, and width. It may be thirty feet long, eight feet deep, and four feet wide, more or less. The sheep yards are at one end of the tank, and at the other end there is a battened inclined plane, at an easy gradient, from the bottom of the tank up to the surface of the ground where the sheep land. Opposite to the end where the sheep land there are one or more yards with a water-tight floor so constructed that as the surplus liquid drains from the sheep it flows back into the tank. The sheep are thrown into the tank at the other end, are dipped under the surface of the liquid, are retained in the tank for any convenient time, and are then allowed to land. When the surplus liquid has drained from the sheep they are turned out. The special principle claimed for dressing sheep in large numbers in a given time is in a water-tight tank, a battened sloping landing enabling the sheep to land without handling, and a water-tight draining yard from which all surplus liquid flows back into the tank.

THE SWING-GATE.

This invention consists in providing a lane of any convenient length and width—say twenty feet by sixteen inches, more or less—sufficient to let the sheep pass along singly. A small yard connects the lane with the main receiving yard into which the sheep to be drafted are mustered. At the other end of the lane and opposite to the centre of it a post is fixed in the ground, and on it is hung a light gate of any convenient width—say five feet, more or less. This gate extends within the open side of the narrow lane, and it can be moved only from one side to the other within the end of the lane. The post on which the gate is hung is the end of a fence dividing two enclosures. As the sheep to be drafted come along the lane towards the gate the operator stands with his hand on the gate and his eye fixed on the approaching sheep at a point from six to eight feet or more distant in the lane. He thus sees both sorts as they approach him, and by moving the gate from side to side with a gentle movement he divides the one sort from the other, and each sort enters one of the two enclosures. Three or more sorts may be drafted at one operation by providing gates opening into the lane from either side of it. Sheep are drafted without being caught or touched by hand, and as they run through at the rate of about from fifty to one hundred per minute, twenty thousand may be drafted in a morning before breakfast. The special principle claimed for drafting sheep without handling or touching them consists in providing a gateway so narrow as to allow sheep egress only in single file, with a moveable gate to divide the running single file of sheep into two sorts, whilst a long narrow lane or race regulates the approach of the sheep and enables the man moving the gate to perceive to which sort each sheep belongs.

And at least one day before the assembling of Parliament copies of the Bill will be deposited with the Clerk of the Legislative Assembly.

Dated this seventh day of April One thousand eight hundred and eighty-six.
