[1887.

ACT OF PARLIAMENT.

PROCLAMATION

By His Excellency Sir HENRY BROUGHAM LOCH, Knight Commander of the Most Honorable Order of the Bath, Governor and Commander-in-Chief in and over the Colony of Victoria and its Dependencies, &c., &c., &c.

I, THE Governor of Victoria, do hereby declare that I have this day assented, in Her Majesty's name, to the Bill passed by the Parliament of Victoria, the title whereof is hereinafter set forth, that is to say:—

“An Act to provide for the payment by the Colony of Victoria of a Proportional Part of the Cost of the Establishment and Maintenance of an Additional Naval Force to be employed for the Protection of the Floating Trade in Australasian Waters.”

Given under my Hand and the Seal of the Colony, at Melbourne, this twenty-fifth day of November, in the year of our Lord One thousand eight hundred and eighty-seven, and in the fifty-first year of Her Majesty's reign.

(L.S.)

HENRY B. LOCH.

By His Excellency's Command,
D. GILLIES,
Premier.

GOD SAVE THE QUEEN!

The first part of the document discusses the importance of maintaining accurate records. It emphasizes that proper record-keeping is essential for ensuring the integrity and reliability of the data collected. This section also outlines the various methods used to collect and analyze the data, highlighting the challenges faced during the process.

The second part of the document provides a detailed description of the experimental setup. It includes information about the equipment used, the procedures followed, and the conditions under which the data was collected. This section is crucial for understanding the context and limitations of the study.

RESULTS AND DISCUSSION

The results of the study are presented in this section. The data shows a clear trend, indicating that the variables studied are significantly related. The discussion section interprets these findings, comparing them with previous research and providing insights into the underlying mechanisms. It also addresses the limitations of the study and suggests areas for future research.

The analysis of the data reveals that the observed patterns are consistent with the theoretical models proposed. This suggests that the experimental conditions were well-controlled and that the data collected is reliable. The discussion further explores the implications of these findings for the field of study.

In conclusion, the study has successfully demonstrated the relationship between the variables investigated. The findings provide valuable insights into the complex interactions between these factors. The authors express their appreciation to the funding agencies and the participants who made this study possible.

The authors are grateful to the following individuals for their assistance and support during the course of the study:
