MELBOURNE AND METROPOLITAN BOARD OF WORKS.

BY-LAW No. 5.

REGULATIONS for the construction and use of Sewers and Drains within the area under the control of the Melbourne and Metropolitan Board of Works.

NOTE.—The sections quoted are those contained in the "Melbourne and Metropolitan Board of Works Act 1894."

Preamble.—Whereas by the Melbourne and Metropolitan Board of Works Act 1890 (hereinafter called "the Act") it is amongst other things enacted—that, subject to the provisions of the Act, and in order to secure the efficient maintenance of the main and general sewerage of the metropolis, the Board created by the Act, and hereinafter called "the Board," may from time to time make by-laws in relation to the levels, dimensions, construction, maintenance, ventilation, and cleansing of sewers; subject, however, to the approval of the Governor in Council before any by-law as to the construction, ventilation, or cleansing of sewers shall be of force or effect, and that the Board may by any such by-laws prescribe the form of any notices or orders under the Act, which notices or orders may be used in the form so prescribed or to the like effect, varied as the circumstances may require, and shall be sufficient in law, and that by such by-laws the Board, with the approval of the Governor in Council, may impose reasonable penalties, not in any case exceeding the sum of Twenty pounds, for the violation of any such by-laws or regulations:

And whereas by Part III. of the Act provision is made with regard to main sewerage and drainage, and the sewerage and drainage of private premises, and by section 100 thereof it is provided that every person intending to make or branch any sewer or drain into a sewer vested in the Board shall, seven clear days before commencing any works for that purpose, make written application to the Board, accompanied by a plan showing such particulars as may be required by any by-law or resolution of the Board, and that no such work shall be commenced until the sanction in writing of the Board has been given:

And whereas it is expedient that regulations with regard to the construction of sewers and drains in the metropolis, more especially in relation to their connexion with the main sewers and to water-closets, sinks, traps, and other house sewerage fittings, appliances, and apparatus, should be prescribed; and that the same, and also the terms and conditions upon which the sanctions, permissions, authorities, and consents which the Board is empowered to give for connecting private sewers and drains with the sewers and drains of the Board and otherwise will be accorded and given, should be declared and known:

Now, therefore, the Board doth hereby, pursuant to and in exercise of the power and authority conferred upon it as aforesaid, make the following by-law (that is to say):—

GENERAL.

1. The sewerage system of the metropolis consists of main and lateral conduits of salt-glazed vitrified stoneware, Portland cement concrete, brickwork in cement, wrought iron, cast iron, or of these materials combined in various ways.—[Section 79.]

They are designed to carry off all the water passing through water-closets, lavatories, baths, and urinals; all chamber slops; water used in cooking, washing food, clothes, floors, &c., and generally from sinks in kitchens, cellars, and sculleries, from stables, cow-houses, and other out-offices, together with all liquid refuse which in the opinion of the Board will not prejudicially affect the sewers, sewerage machinery, or the sewage farm.

Washings from paved yards will only be admitted as hereinafter provided.

2. All connexions of plumbing work, drains, or sewers with the sewerage system of the metropolis, and all work connected in any way with the drainage of any premises, shall be executed in accordance with these rules and regulations.—[Section 100.]

CONSTRUCTION OF SEWERS AND DRAINS.

3. The Board will construct, maintain, and repair all the main and lateral sewers. The drains must be constructed, maintained, repaired, and cleansed by or at the cost of the owners.—[Section 79.]

All the works of sewerage and drainage will be carried out in accordance with the provisions of Part III. of the Act, being sections 76 to 119 thereof, both inclusive.

In case of any obstruction taking place in a combined drain, draining two or more premises, the Board will determine between the respective owners of the premises so drained by whom and in what proportion the cost of removing any such obstruction shall be paid; and the proportion so determined must be paid by and will be recoverable from each such owner at the instance of such one or more of the other owners as shall have paid for the work, or of the Board if the work shall have been done by it.

Every person who by a notice from the Board issued in accordance with the Act shall be required to do or not to do anything, including therefore a requirement to make any sewer or drain, or branches, works, or arrangements for the better sewerage or draining of his house, building, or ground, and who fails to comply with such notice, will, under the provisions of section 165 of the Act, become guilty of an offence against the Act, and for every such offence he will be liable, unless other penalty be prescribed, besides any costs or expenses which may be incurred in taking proceedings against him, as well as any costs or expenses which may be incurred in remedying any default of his, to a penalty not exceeding Twenty pounds, and to a penalty not exceeding Five pounds, nor less than One pound, for each day during which such offence is continued by him, and such penalty will be recoverable, notwithstanding that the Board may not have chosen to exercise any power given to it by the Act to remedy such default.—[Section 165.]

With a view to obviate the incurring of liability to such penalties, and to insure uniformity and efficiency of work by reason of its being done by skilled and experienced workmen, supervised by the Board's inspectors, and for economy, because of the cheaper price at which fittings and apparatus can be obtained under contracts for large quantities thereof by the Board, the Board will, in exercise of its powers, contract and agree with the owners of houses, buildings, or ground that the constructing, altering, or enlarging any sewer or drain connected with such premises shall be done by the Board on payment of the cost of the same by the owners; and the Board will, in like manner, on payment of all expenses and cost, undertake to perform any work which may be required to be done by any notice issued by the Board to any owner.—[Section 105.]

LICENSED PLUMBERS.

4. No consent will be given to any person, firm, or corporation to do any kind of work connected with the laying of house drains or plumbing, or making any repairs, additions to, or alterations of any drain or plumbing work connected or designed to be connected with the sewerage system, unless through an employer or working plumber licensed by the Board.—[Section 99.]

The conditions upon which the Board will consent to the making or branching, or the causing to be made or branched, any sewer, or to the making or causing to be made any opening into any sewer, vested in the Board, or to the fixing of any fittings or apparatus, or to the doing of any other work in connexion with the sewers or drains within the metropolis, are and shall be:—

- (1) That every person contracting or undertaking to do any such work by the agency of workmen employed by or under him must himself be the holder of a licence from the Board called an "Employer's Licence," or of a licence from the Board called a "Working Plumber's Licence."
- (2) That no person shall be engaged or employed as a workman in the actual performance of any such work unless he is the holder of a "Working Plumber's Licence" from the Board.

The conditions upon which "Employers' Licences" and "Working Plumbers' Licences" will be issued by the Board are—

- (1) That every such licence will be subject to suspension or cancellation at the will of the Board; and that all such licences will be granted to expire on the 30th day of June of each year.
- (2) "Employers' Licences" will qualify their holders to carry out work under the Board's Regulations, by the agency of licensed working plumbers; but such licences will not authorize their holders to do practical work under the said Regulations, unless they be also themselves holders of "Working Plumbers' Licences."
- (3) A special condition of every licence issued to an employer shall be that, if a licensed workman in his employment upon any such work prove, according to the judgment of the Board's inspecting officer, to be incapable as a workman, or transgress the Regulations of the Board, and the "Working Plumber's Licence" of such workman be for any such cause suspended or cancelled by the Board, and notice of such suspension or cancellation, in the Form A to this By-law annexed, or to the like effect, be given by the Board in writing, by registered letter, addressed in accordance with the registered address in the licence issued to the said employer, the employer shall cease to employ such workman upon any such work immediately after and during the continuance of such suspension or cancellation. And any holder of an "Employer's Licence" who shall neglect or fail to comply with this condition shall be liable to a penalty not exceeding Ten pounds, and to a continuing penalty of not more than Two pounds nor less than One pound for every day during which such neglect or failure shall continue after service of the hereinbefore mentioned notice upon such employer. And the "Employer's Licence" of such employer shall thereupon become liable to suspension or cancellation by the Board. [Form A.]

"Working Plumbers' Licences" will be issued to candidates who shall have successfully passed an examination by examiners appointed by the Board in the following subjects (that is to say):—

Materials.—The use of lead, tin, copper, and their alloys, wrought and cast iron, stoneware, bricks, tiles, Portland cement, and other materials used by the plumber and drainer.

Plumbing Practice.—As to solder and soldering, lead burning, lead laying, pipe and joint making, pipe bending, and general plumbers' practice.

Water Supply Work.—Knowledge of the Board's Water Supply By-laws, general water supply work, water supply fittings, hot-water connexions.

Sewerage Work.—Knowledge of the Board's Sewerage Regulations, construction and use of traps, soil, waste and vent pipes, house fittings, water-closets, kitchen sinks, baths, lavatories, housemaids' sinks, urinals, latrines, and other sewerage apparatus and appliances.

General Principles of Sanitary Work.—Flushing, ventilation, disconnection.

Candidates for examination in plumbing practice must provide themselves with their own tools, and must submit samples of work done by themselves, and also make any pipe, bend, joint, or other plumbing appliance which may be required to satisfy the examiners.

Candidates for "Working Plumbers' Licences" must give notice in writing to the Secretary of the Board of their intention to submit themselves to examination at such time as shall be appointed for the same by the Board's examiners.

Every candidate who shall have successfully passed the before-mentioned examination, and given proof to the satisfaction of the examiners of practical ability as a plumber, will be furnished with a licence from the Board to do practical work as a plumber upon and in connexion with the sewers, drains, and all necessary fittings, appliances, and apparatus appurtenant thereto within the metropolis, subject to and in accordance with the Board's Regulations. And he will likewise be furnished with a certificate from the Board that he is duly qualified to do work in connexion with the water supply and sewerage systems under the control of the Board, and in accordance with the Board's Regulations.

"Working Plumbers' Licences" will, at the discretion of the Board, be issued without previous examination to any practical plumber who shall be the holder of and shall produce a licence from any other sewerage or water supply authority equal in value to the standard established by the Board's examination according to the judgment of the Board's examiners, which shall be final, subject only to review by the Board.

Prior to the issue of any "Employer's Licence" or "Working Plumber's Licence," the person to whom the same is to be issued must sign a register containing a declaration that he accepts such licence subject to and in conformity with the conditions thereof and with the Regulations of the Board, and that he will conform to and comply therewith.

The holder of an "Employer's Licence," or of a "Working Plumber's Licence," is hereinafter called a "licensee."

CONSENTS.

5. Application for the Board's consent to connect with the sewerage system, or to do plumbing work connected therewith, must be made in writing by a licensee for the owner of the property to be drained or his authorized agent. Such application shall give the precise location of the property, the name of the owner, and the name of the person employed to do the work, and shall be made in Form B hereto attached, or to the like effect. No consent shall be deemed to authorize anything not stated in the application, and for any misrepresentation in such application the licence of the applicant may be suspended for such time as the Board shall order; and if such misrepresentation appears to be wilful his licence shall be cancelled.—[Section 99. Form B.]

Consents to make connexions with the sewerage system will be issued only when the plumbing in the property to be connected is in accordance with the rules for plumbing, hereinafter prescribed, and has been inspected and approved of by an inspector of plumbing appointed by the Board for the purpose, or, in case of new buildings, when a proper plan of the plumbing has been approved of in writing by the Board, which shall define the position of the Y branch in the sewer to which the work must be connected. All connexions with the drains or sewers, and all plumbing connected therewith, shall be made under the direction of the Engineer-in-Chief or other superintending officer of the Board.—[Section 100.]

PLAN OF PLUMBING.

6. Seven days before a consent is issued for doing plumbing work in a property, or before any alterations or additions are made, excepting necessary repairs, a plan and description of the work, signed by a licensee on forms to be furnished for the purpose, shall be filed in the office of the Board; and no such work shall be commenced until such plan and description shall be sanctioned, and no alterations shall be made in any way in the plan or any work without a special consent in writing from the Board. Such plan will be furnished by the Board upon application and payment for the same as follows:—

Plan of drainage, including survey,	
&c., for every house	5s. 0d.
Plan of any alterations or additions	2s. 6d.
Copy of drainage plan	2s. 6d.

—[Sections 100 and 101.]

Where the work is done by the Board, a plan of the work done, when it is completed, will be forwarded to the owner for his information, and the cost of making such plan shall be included in and form part of the cost of the work which shall be paid for to the Board by the owner.

INSPECTION.

7. The plumber is to give notice to the Board when any work is ready for inspection, and all work must be left uncovered and convenient for examination until inspected and approved of by an inspector appointed by the Board. Such inspection shall be made within twenty-four hours of such notification being received at the office of the Board, except on Saturday, when forty-eight hours must be allowed. The inspecting officer may apply the ether, peppermint, water, or smoke test, and the plumber shall furnish all the necessary tools, labour, and assistance for such tests. The plumber shall remove or repair any defective material or labour when so ordered by the inspecting officer.—[Section 107.]

Any drain pipe, soil pipe, trap, water closet, urinal, sink, or other fitting laid, used, or constructed otherwise than in accordance with these regulations, or which shall, in the opinion of the Board, be or become of bad or defective quality, shall, upon notice in writing from the Board, be removed or repaired in the

manner determined and within the time fixed by the Board; and the Board will, if it think fit, remove or repair the said defective fitting, and charge the owner or occupier of the premises with the cost incurred.—[Section 111.]

STATEMENT OF WORK DONE.

8. The plumber shall, on the completion of the work, file in the office of the Board, on forms furnished for the purpose, a correct statement of the work done under the consent furnished for the same.—[Section 99.]

INJURY TO SEWERS.

9. No municipal council, corporation, firm, or person shall interfere with, break up, or remove any gully, ventilating shaft, man-hole, lamp-hole, flush-tank, catch-basin, or any part of the sewerage system, except by a special permit in writing of the Board, or throw or deposit, or cause to be thrown or deposited, in any drain or sewer, opening or receptacle connected with the sewerage system, any garbage, offal, dead animals, vegetable parings, ashes, cinders, rags, or any other matter or thing except the materials which, according to section 1 of these Regulations, the sewers and drains are designed to receive.—[Sections 92, 93, and 98.]

SUB-SOIL DRAINAGE.

10. Every person who shall erect a new building shall cause the sub-soil of the site of such building to be effectually drained by means of suitable earthenware pipes properly laid to a suitable out-fall, whenever the dampness of the site renders such a precaution necessary in the opinion of the Board.

He shall not lay any such pipes in such a manner or in such a position as to connect directly with any drain or sewer, but shall discharge into an open shaft made of earthenware pipes, and fitted with a dirt box which shall communicate with the sewer by a proper trap with a ventilating pipe on the sewer side.

CELLAR DRAINAGE.

11. Where any house heretofore built shall have its lowest floor at a lower level than the sewer of the Board into which such house would otherwise drain, pending pulling down or alteration of such house, the owner shall cause the drainage from such lowest floor to be raised by means of a siphon, or some automatic method approved by the Board, so that it shall discharge into a drain communicating with the sewer of the Board. The water seal of the trap in the drain pipe leading from the cellar shall be constantly maintained by means of an automatic flushing cistern.—[Sections 107 and 109.]

PLUMBING RULES.—GENERAL.

12. All materials used must be of good quality and free from all defects. The work must be executed in a thorough and workmanlike manner, and to the satisfaction of the Board.

The drain outside of the house or building, or from isolated water-closets, to the street sewer, shall be of first-quality salt-glazed vitrified stoneware pipes, unless laid less than 2 feet from the surface of the centre line of the pipe, in yards or places liable to heavy traffic, when it shall be of heavy cast or wrought iron. Heavy cast-iron pipes must be used if the ground has been made up or filled in, or adjoins a cellar.

PIPES.

13. All drain pipes are to be at least 4 inches in diameter, except where otherwise ordered by the Board. Where the drain pipes are laid more than 10 feet from the surface, the pipes must be taken to one of the Board's store yards, unless obtained from there, to be there tested by an officer appointed by the Board in the machines provided for the purpose.

All cast-iron pipes must be sound, free from holes or cracks, and coated with tar or asphaltum.

The following weights will be accepted as standards:—

2 inch diameter	5½ lbs. per lineal foot.
3 " "	9½ " " "
4 " "	13 " " "
5 " "	17 " " "
6 " "	20 " " "

All wrought-iron pipes must be of approved standard weight and quality, and galvanized or coated to the satisfaction of the Board.

All fittings used in connexion with such pipe shall correspond with it in weight and quality. All junctions must be curved; right-angled junctions must not be made. Where lead pipe is used to connect fixtures with vertical soil or waste pipes, or to connect traps with vertical vent pipes, such pipes must not be lighter than of 7-lb. lead, but where, in the opinion of the Board, a heavier weight may be required, its instructions shall be complied with.

The arrangements of soil and waste pipes must be as direct as possible.

The drain pipes shall be laid on an even grade of not less than 1 in 40 if a 4-in. pipe be used, or of 1 in 60 if a 6-in. pipe be used, unless by special permission of the Board, in which case special provision must be made for regular and efficient flushing. As far as possible, all drains shall be laid in straight lines; where changes of direction occur, they shall be made either by suitably curved pipes or in man-holes.

PIPE TRENCHES.

14. The trenches for the drains from all properties shall be dug so as to meet the public sewers at the position of the Y branches indicated by the Board. The material thrown from the trench shall be placed so as not to obstruct and so as to cause the least inconvenience to the public. Proper barriers and lights must be maintained on the banks of the trench to guard the public against accident during the progress of the

work. In refilling the trench the earth shall be carefully rammed or flooded, so as to keep the pipe in position and avoid settling. No stone shall be used in refilling until there has been a depth of at least 2 feet of earth or gravel placed over the pipe.

PIPE LAYING.

15. The cover of the Y branch on the sewer shall be carefully removed so as not to injure the socket.

The first length of the pipe attached to the Y branch shall be curved and set so as to give a good fall into the sewer.

The joints of the stoneware pipes shall be made with Stamford joints, or cement joints with gaskets.

Joints of iron pipes shall be made with gasket and lead if cast-iron pipes be used, or screwed joints with white lead if wrought-iron be used.

The ends of all private drains not immediately connected with the plumbing fixtures shall be securely closed with water-tight imperishable materials. If lead pipe, the end must be soldered; if wrought-iron pipe, a plug must be screwed on the end; if cast-iron pipe, a cast-iron plug must be caulked in with lead.

All pipes shall be carefully bedded in the solid ground. If the ground, in the opinion of the Board, is not sufficiently solid, cast-iron pipes must be used, or stone-ware pipes embedded in concrete composed of 1 of Portland cement, 2 of clean sand, and 5 of stone of 1½-in. gauge or gravel approved by the inspector.

Where there is a sewer in a street or right-of-way adjoining, every property must be separately and independently connected with it.

Whenever possible, such connexion must be made directly at the rear of, or in the front of, the house.

Where there is no sewer in the street, or it is necessary to construct a private drain to connect either one or several properties with a sewer in an adjoining street, the drain must be laid under the roadway or right-of-way, and not through the yards or under the houses if possible to avoid it.

Sub-soil drains shall be of earthenware field pipes.

CESSPOOLS, OVERFLOWS.

16. No cesspool, overflow, or privy vault shall be connected with any drain or sewer.

DRAINS, SOIL AND WASTE PIPES.

17. At the head of every connecting drain, at or near the boundary of the premises or building, a boundary trap must be fixed, with or without a man-hole. All the drains must, wherever considered necessary by the Board, join in a man-hole at least 3 feet long and 2 feet wide, fitted with an open grating. The portions of the drains crossing the floor of the man-hole must be connected with the boundary trap, either in a straight line or by curved junctions in the floor of the man-hole. The boundary trap must be provided with a seal 2½ inches deep, and an inspection cap on the sewer side of the trap.

All soil pipes shall be at least 4 inches diameter.

The soil and waste pipes and traps must, where practicable, be exposed to the view at all times, where necessary, for ready inspection and for convenience of repairing. When unavoidably placed within partitions, or recesses of walls, soil and waste pipes must be covered with woodwork so fastened with screws as to be readily removed.

No soil or waste pipe shall be fixed within any building or tenement unless the special authority of the Board has been previously obtained.

No material may be used within the building for soil or waste pipes other than wrought or cast iron pipes with securely screwed or leaded joints, or lead pipes with soldered or wiped joints. Cement or putty joints, tin or sheet iron pipes, whether galvanized or not, shall not be used.

In all cases the upward extension from the soil pipe for ventilation must pass in as direct a manner as possible above, and if necessary through, the roof.

Traps must be ventilated, and waste and soil pipes must have an approved fall.

Where an open grating is inadvisable, the man-hole must be provided with a fresh-air inlet, fitted with a mica flap valve, and the man-hole must be fitted with an iron air-tight cover. A ventilation pipe of such size and materials, and so placed as the Board may desire, shall be provided and fixed wherever considered necessary.—[Section 79.]

Separate internal wastes shall be provided for each of the following classes of polluted waters, viz.:—

- (1) Dirty water from baths, pantry and china closet sinks, lavatories, and wash troughs, and other waters with a small proportion of soap and dirt.
- (2) Greasy water from kitchen and scullery sinks.
- (3) Sludge waters from manufactures, stables, cow-houses, cab-stands, and other specially polluted surfaces for which consents have been granted by the Board.
- (4) Urinal water from housemaids' slop sinks, public and private urinals.
- (5) Soil water from closets, and other water containing fecal matter.

Each one of these separate waste pipes, except for soil water, must be connected with the drains through a gully or disconnector trap.

A main waste pipe, into which lavatories, baths, or kitchen sinks discharge, must be at least 2 inches in diameter, with at least 1½-in. branches.

JOINTS.

18. All joints in iron drain pipes, soil pipes, and waste pipes, except where screw joints are used, must be so filled with gasket and lead and caulked as to make them gas tight.

All connexions of lead pipes with iron pipes must be made with a brass sleeve or ferrule of the same size as the lead pipe put in the socket of the branch of the iron pipe and caulked with lead.

The lead pipe must be attached to the ferrule by a wiped joint.

All connexions of lead waste and vent pipes shall be made by means of wiped joints.

INSPECTION.

19. Before the fixtures are placed in connexion with the plumbing of any house or building, and before the soil pipe is connected with the sewer, the outlet of the soil pipe and all openings into it below the top shall be hermetically sealed, the pipe shall then be filled with water to the top, and every joint carefully examined for leaks. Work already in place will be examined by the peppermint or other test. Defective pipes must be removed and replaced by sound ones, and all defective joints made tight, and every part of the work made to conform to these Rules and Regulations, and subject to the approval of an inspector of plumbing appointed by the Board.

TRAPS.

20. Every water-closet, urinal, lavatory, slop sink, kitchen sink, bath, and every tub or set of tubs, must be separately and effectively trapped.

Traps must be placed as near the fixtures as possible, and in no case shall a trap be more than 2 feet from a fixture.

All lead traps must be drawn.

Traps of three (3) classes will be used—

- (a) "Traps," for intercepting gases only, to be of round section and self-cleansing form, but not so easy as to empty by momentum or suction.
- (b) "Silt traps," for intercepting both gases and solids, to have slightly tapered sides, flat bottoms, and rounded not sharp angles, and provided with trays fitted with handles for catching and removing solids.
- (c) "Grease traps," for solidifying and collecting grease or other semi-fluid matter liable to foul the pipes, must be of such form as may from time be approved.

The term "gully" will be applied to traps (a) and (b) in cases where they are to be used externally, and fitted with dished tops and gratings. In such cases the dish must be in one piece with the trap or jointed thereto spigot and flange, and the depth of the dish from the top to the grating must not be less than half the diameter of the pipe, and the grating must be removable.

The term "disconnector" will be applied to traps in cases where provision has to be made for inlet ventilation to the pipe or pipes discharging therein.

Where soil pipes from pedestal or other closets are to be disconnected from the house drain, a Y piece for the air inlet must be fixed, and the term "Y disconnector trap" will be used.

All traps must have a water seal of at least half the diameter of the outlet pipe, but in no case less than 2½ inches.

The P form of traps, with wastes above the floor, and joints visible and accessible all round, must be used in all internal fittings where possible.

The S form of trap or waste under floors must not be used, except with special permission and facilities for periodical inspection.

In detached closets and urinals, approved S forms in earthenware, with joints visible and accessible all round, may be used.

Sinks in all food-packing houses, butchers' shops, lard-rendering establishments, hotels, restaurants, boarding-houses, and laundries, or wherever ordered by the Board, shall be provided with suitable approved grease traps. Wash-rooms for carriages must have silt traps provided, with proper means of intercepting mud.

Stables, dairies, cab-stands, markets, &c., and paved back yards for which drainage consents have been granted, must be provided with suitable approved silt traps.

VENT PIPES.

21. Every vent pipe extending upwards from a soil or waste pipe must extend, to such a height as may be deemed necessary by the Board, at least 2 feet above the highest part of the roof or coping. It must be of undiminished size without return bend, with basket end or educt or induct cowls as ordered. It must not open near a window, a chimney, nor an air shaft which ventilates living rooms.

All vent pipes, in an extension of a main building, must be extended, to such a height as may be deemed necessary by the Board, above the roof of the main building, when otherwise they would open within 30 feet of the windows of the main house or of the adjoining house.

The main drain leading to the boundary trap is to be vented at its upper end by a pipe or shaft erected vertically to such a height that the mouth of the pipe or shaft shall be at least 6 feet higher than any window or door situated within a distance of 30 feet therefrom. Branch drains need not be vented if the gully traps are within less than 15 feet from the main drain, or unless otherwise ordered by the Board, and then must be vented according to such order.

Traps must be prevented from syphonage, or the waste pipe leading from them be ventilated by a special pipe taken from such a position that the vent pipe entrance will not be fouled by the discharge of the trap.

The vents must not be less than 2 inches for water-closets, and not less than 1½ inches for other traps. The combined vertical vent pipes for traps of water-closets in buildings must be at least 3 inches in diameter, with branches 2 inches diameter to each trap, and for traps of other fixtures not less than 2 inches in diameter, unless the trap is smaller, in which case the diameter of the branch vent pipe must be at least equal to the diameter of the trap.

In all cases vent pipes must be of cast or wrought iron or lead inside a building, dipped and folded galvanized-iron vent pipes may be used where they are entirely outside a building, and shall be connected with the traps with brass or lead ferrules.

Vent pipes must extend 2 feet at least above the highest part of the roof or coping. The extension must not be reduced in diameter. The various vent pipes may be branched into a soil or waste pipe of the same class above the inlet from the highest fixture. They may be combined by branching together those which serve several traps of the same class.

These vent pipes must always have a continuous slope, to avoid collecting water by condensation.

No vent pipe shall be used as a waste or soil pipe.

No brick, earthenware, or house chimney flue shall be used as a sewer ventilator, nor to ventilate any drain, soil, or waste pipe.

All inlets to drains or openings for ventilating shall be efficiently protected by proper gratings of ample area. The aggregate area of the apertures in any grating covering a ventilation opening shall not be less than the sectional area of the pipe or drain to which such grating is fixed. All openings for ventilation made in accordance with these regulations, or by order of the Board, shall at all times be kept open and perfectly free from obstruction.

SAFES, OVERFLOWS, ETC.

22. Every lead safe under a water-closet, urinal, lavatory, bath, refrigerator, sink, or other fixture must be drained by a special pipe not directly connected with any waste pipe, soil pipe, drain, or sewer. They must be provided at the outlet into the open air with flap valves of brass or other approved metal.

The drip pipe from refrigerators shall not be connected with the soil or waste pipes, drains, or sewers.

No steam exhaust, blow-off, or drip pipe shall be connected with a drain or sewer, or with any soil or waste pipe. Such pipes must discharge into the rain-water channels.

RAIN WATER AND PAVED YARDS.

23. Rain-water conductors must not be connected with the sewers. All stables, dairies, paved yards, market-places, cabstands, or other places for which the Board may from time to time grant consent to be connected with the sewers or drains, must be properly graded, cemented, flagged, or well paved, and properly drained, and must be trapped with an approved gully silt trap, connected with the drain inside the boundary trap.

WATER-CLOSETS.

24. Every water-closet in a building shall, where practicable, be constructed in such a position that one of its sides at least shall be an external wall. Every water-closet, that is every closet consisting of a single or not more than two soil-pans, constructed in connexion with a building, whether the situation of such water-closet be or be not within the building, shall have in the walls of such water-closet a window of not less dimensions than 2 square feet in aperture, exclusive of frame, and, where practicable, opening directly into the external air.

In addition to such window such water-closet must be provided with adequate means of constant ventilation by at least one air brick built in an external wall of such water closet, or by an air shaft, or by some other effectual method or appliance for ventilation.

Every water-closet in connexion with a building shall be furnished with a separate flushing cistern of at least 3 gallons capacity, which shall be so constructed, fitted, and placed as to admit of the supply of water for use in such water closet without any direct communication between any service-pipe upon the premises and any part of such water-closet other than such cistern or flushing box. A suitable apparatus must be provided for the effectual application of water to the basin of the water-closet, and for the effectual flushing and cleansing of such basin, and for the prompt and effective removal therefrom of any solid or liquid filth which may from time to time be deposited therein. Such water closet shall be furnished with a basin of non-absorbent material of such shape, capacity, and mode of construction as to receive and contain a sufficient quantity of water, and to allow all filth which may from time to time be deposited in such basin to fall free of the sides thereof and directly into the water received and contained in the basin.

Latrines, or a group of closets, may, by special permission, be supplied from one flushing tank of approved size; but water-closets on different floors must not be flushed from one tank. In houses occupied by different tenants in separate rooms, or suites of rooms, there must be a separate cistern to each water-closet. In no case will water-closet accommodation be allowed in the cellar or basement. Water-closets of the description known as "pan closets" are absolutely prohibited. At any time after the date fixed by notice from the Board to the owner of any house, building, or ground, requiring him to connect the same with any sewer of the Board, no privy closet, other than a water-closet approved by the Board, shall be used in such house or building, or upon such ground.

The water-closet fitting must be entirely open to inspection, and with no enclosures.

*STRAINERS.

25. The entrance to exit pipes to all fixtures except water-closets shall be furnished with suitable permanently attached strainers.

URINALS.

26. Internal cradle urinals must be small, free from projecting ornament, and of non-absorbent material. The waste pipe shall be of potteryware or lead, and, after being trapped, deliver out into the open air over a gully trap or into a disconnector trap, keeping the waste pipe as short and free from bends as possible. The urinal must be provided with approved flushing apparatus. The floor under urinals must be covered with non-absorbent material.

In hotels, clubs, restaurants, theatres, and other public places, enamelled slate or other approved water troughs shall be provided, sunk in an impervious floor under the range of urinals, and kept full of flowing water by approved flushing apparatus. The floors of the urinals must be tiled or paved with a fall towards the trough. The walls behind and screens between urinals must be of non-absorbent material, and of approved height; the screens must also be free from the floor for a portion of the width of the divisions. They must project at least 1ft. 6in., and be not less than 2 feet apart.

HOUSEMAIDS' SLOP SINKS.

27. The waste pipe from a slop sink must be of at least 8-lb. lead, and must be carried independently out to the open air, with a quick fall, and into a full bore ventilated 3-in. down pipe to the ground, where a gully trap or disconnector trap must take the waste to the drain, and must be trapped with 3-in. trap, having a 23-in. seal and a brass cleaning screw under the water line, well opened out into a deep cone to receive the sink basin. The trap must be fitted with a 2-in. vent pipe. The sink must be of approved material. Draw-off taps must not be used directly over slop sinks unless at least 2 feet above the sink. Slop sinks must be provided with approved flushing arrangements.

KITCHEN AND SCULLERY SINKS OR TROUGHS.

28. Unless where otherwise specially approved kitchen and scullery sinks and troughs must discharge into the open air over a gully trap. The trap and waste pipes must be not less than 1½ inches diameter. The brass strainer must be sunk in a hollow cone to the level of the trough.

BATHS AND LAVATORIES.

29. The waste pipe must be at least 1½ inches diameter, of 8-lb. lead pipe, trapped with a deep syphon trap, with a cleansing screw provided with a 2-in. vent pipe. The waste pipe must be carried separately to the open air and delivered over a gully trap, or into a disconnector trap.

The waste pipe and trap from single lavatories must be at least 1 inch in diameter, but the area of the grating must be sufficient to fill the waste pipe full bore. The waste pipe must be as short as possible, and discharge into the open air.

CONSENT OF BOARD.

Where the sanction, permission, authority, consent, approval, satisfaction, order, direction, opinion, indication, or notice of or from the Board is necessary, whether special, in writing, or otherwise, with regard to any act, matter, or thing mentioned in this By-law, the same may be given by and under the hand of the Chairman of the Board or of the Engineer-in-Chief, personally, or through an inspecting officer appointed under him, who severally shall be competent to give the same and on behalf of the Board to prescribe any conditions attaching thereto, and subject to and in accordance with which only the same shall be deemed to have been given. The giver of the same shall notify his having done so at the next following meeting of the Sewerage Committee of the Board, with a view to report thereof to the Board for confirmation where necessary.

PENALTY.

30. Any person offending against any provision of this By-law, for violation of which no special penalty is hereinbefore prescribed, shall be liable for every such offence to a penalty not exceeding Twenty pounds, or may be proceeded against under the 165th section of the Act as an offender against the Act.—[Sections 93, 110, 113, and 165.]

The foregoing By-law was made and passed by the Melbourne and Metropolitan Board of Works, and the common seal of the said Board was hereunto affixed the eleventh day of December, One thousand eight hundred and ninety-four in the presence of—

No. 13.—FEBRUARY 1, 1895.—2.

Education Act 1890. ALTERATION OF REGULATIONS.

At the Executive Council Chamber, Melbourne, the twenty-ninth day of January, 1895.

PRESIDENT:

His Excellency the Governor.

Mr. Isaacs	Mr. Williams
Mr. Peacock	Mr. Taverner
Mr. Best	Mr. Foster.

WHEREAS by section 23 of the *Education Act 1890* (54 Vict. No. 1086) it is enacted that the Governor in Council may from time to time make and rescind regulations for all or any of the purposes therein mentioned, and generally for carrying the said Act into effect: Now therefore His Excellency the Governor, acting by and with the advice of the Executive Council, doth by this Order rescind Regulation No. III. (Payments by way of Results) of the Regulations made under the provisions of the Act aforesaid; and doth make the Regulation following in lieu thereof, viz.:—

III.—PAYMENTS BY WAY OF RESULTS.

1. Payments by way of results will be made to head teachers and assistant teachers upon examination of their schools by an inspector in the subjects specified in the course of free instruction.

2. The maximum payment which any teacher can obtain by way of results will be an amount equal to one-half of his fixed salary.

3. In order to entitle the teachers of any school to this maximum—

(i) Every scholar who has attended the school during any part of the two weeks preceding such visit must be presented for examination, unless prevented from attending by any unavoidable cause, such as—

- (a) Removal from the district;
- (b) Suffering from severe bodily accident or sickness, or being excluded on account of infectious disease at home;
- (c) Flooded state of the roads;
- (d) Death of a near relative;

Scholars who within the two months immediately previous to the inspector's visit have resumed attendance after exclusion from school for at least two months on account of infectious disease need not be taken into account in calculating the percentage unless the teacher so desire.

(ii) The inspector must be satisfied—

(a) That every scholar has a satisfactory knowledge of the work of the class in which he is enrolled, and has made adequate progress, and that singing and drawing and the special lessons mentioned in the General Notes to Regulation I. have been satisfactorily taught.

Scholars over seven years of age in Class I. who have been not less than twelve months on the roll must be presented for individual examination. Other scholars in that class may be so presented if their attainments be satisfactory.

Children (1) who have been less than six months in their class or (2) have attended less than half the number of possible attendances during the six months preceding the examination need not be taken into account in calculating the percentage, but should be examined to test their classification and progress; provided that of the children due for examination in any school the number excluded from examination on the foregoing grounds shall not exceed 10 per cent. In the case of the children included under (1) above who have been promoted less than six months prior to the examination, the inspector must be satisfied that their promotion was necessary or desirable; and in the case of those included under (2) above the irregularity of attendance must be satisfactorily explained. A satisfactory explanation would be one which showed that the irregularity was in no measure due to negligence or want of energy or tact on the part of the head teacher.

(b) That the names and ages of the scholars are stated correctly in the rolls.

(c) That the scholars are properly classified.

(iii) The average age of the scholars examined individually in Class 1 must not exceed 8 years; the average age of the scholars in Class 2 must not exceed 9 years; of those in Class 3, 10 years and 6 months; of those in Class 4, 12 years; and of those in Class 5, 13 years and 6 months.

(iv) In special cases, where considerable progress is shown, no deductions will be made on account of the average age of any class exceeding that specified in the preceding clause. "Considerable progress" shall be thus defined for this purpose—

(a) The scholars to be properly classified and to pass well, gaining not less than 80 (eighty) per cent. of the possible passes, exclusive of the merit grant.

(b) The infants to be efficiently taught on a proper system.

(c) Of the children presented for individual examination, excluding those who have been previously examined in the sixth class, not less than 75 (seventy-five) per cent. shall be presented for examination in a higher class than that in which they were presented in the preceding year. Should 80 (eighty) per cent. be so promoted 75 (seventy-five) per cent. will be accepted under (iv) (a).

4. Not more than 94 per cent. of the marks obtained by any school shall be granted for compliance with the conditions specified above under 3 (ii). The remaining 6 per cent. shall be awarded according to the degree of merit shown in the following respects, viz. —

- (a) State of premises, furniture, apparatus, and supply of requisites.
 - (b) Arrangement of school work (including time-table), distribution of staff, supervision, classification, discipline, and tone.
 - (c) Style of work at examinations and inspections, progress (as shown by percentage of promotions), presence of a Sixth class where practicable, &c.
5. Marks will be withdrawn for individual scholars and for classes failing to comply with any of the required conditions. Provided that if the classification and progress are satisfactory —
- (1) No deduction will be made for the excessive age of scholars in part-time schools;
 - (2) That in full-time schools the age of any pupil who has been less than twelve months on the rolls of the school may be disregarded.

6. The result payment made to the teachers will be in the same ratio to the maximum as the number of marks actually awarded to the school is to the number which might have been obtained; provided that in schools having more than one teacher entitled to result payment any such teacher who has displayed marked inefficiency may be paid on some lower percentage of the maximum than that awarded to the school.

7. Any change in the amount payable for results, consequent upon an examination of the school, will take effect from the first day of the month succeeding that in which the examination is held.

8. In new schools result payments will be based upon a percentage of 80 until the school shall have been examined for results; but the payments upon that percentage will cease from the last day of the month in which the examination takes place.

9. The examination of a school for results will be held annually, and, as far as practicable, in the same month of the year.

And the Honorable Alexander James Peacock, Her Majesty's Minister of Public Instruction for Victoria, shall give the necessary directions herein accordingly.

13. The licensee shall destroy all thistles on the land, and on the half width of adjoining roads, and shall be responsible for the destruction of thistles under the Thistle Act in like manner as holders of freehold lands.
