Contract No. 8101.

Edward Duckett and Sons, Contractor.

SUPPLY AND DELIVERY OF

MILD STEEL.

DELIVERED AT SPENCER-STREET.

As ordered, from 1st July, 1899, to 30th June, 1900.

**SPECIFICATION.**

**MILD STEEL.**—From the Steel Company of Scotland, Dalzells, Carnegie's, or other approved maker, to bear trade marks or brands, and to be of any size or section required.

The mild steel is to be capable of being bent, punched, sheared, or welded without showing signs of deterioration, and is to be capable of withstanding the following tests:—

(a) Tensile.—To stand a minimum strain of 22 tons per square inch of section, and a maximum strain of 28 tons per square inch of section.

(b) A strip 8 inches x 1 inch cut from bar or plate heated to a red heat and cooled in water to stand bending thus  $\frac{1}{4}$  inch without showing signs of fracture.

| Item. | Description of Stores.                                                                               | Rate.   | Per. |
|-------|------------------------------------------------------------------------------------------------------|---------|------|

**Contract No. 8116.****Davies and Baird, Contractor.****SUPPLY AND DELIVERY OF  
IRON CASTINGS (FURNACE BARS AND BRAKE BLOCKS).**

DELIVERED AT SPENCER-STREET.

As ordered, from 1st July, 1899, to 30th June, 1902.

**SPECIFICATION.**

**IRON CASTINGS.**—The castings are to be clean, sharp, free from surface scale, shell, cold shuts, blow holes, honeycomb, cinder, or any other imperfections, and are to be sound in every respect, and thoroughly close in grain. When specially ordered, the castings are to be run with heads or runners of such weight as may be requested; and no extra charge shall be made or allowed for same, and the Contractor will be required to remove the head or runner from the casting, where possible in the opinion of the Chief Mechanical Engineer, and charge the casting at the net weight only, trimmed and clean. In cases where it is necessary to cut off the head in a lathe or machine, such head will be cut off by the Corporation, and returned to the Railway Station nearest to the Contractor's works, and will be delivered to the Contractor at the said Railway Station free of cost or carriage.

The Corporation will supply all patterns, and deliver the same to the Contractor, free of cost, at the Railway Station nearest to his works. All patterns, &c., supplied by the Corporation must be returned by the Contractor in good order, and delivered together with the castings (see Conditions of Contract).

**Contract No. 8117.**

**Davies and Baird, Contractor.**

**SUPPLY AND DELIVERY OF  
IRON CASTINGS**

(Excepting Furnace Bars and Brake Blocks).

DELIVERED AT SPENCER-STREET.

As ordered, from 1st July, 1899, to 30th June, 1902.

**SPECIFICATION.**

**IRON CASTINGS.**—1. Whenever specially ordered, the castings shall be run from the very best "cold-blast iron," and of such particular brand, quality, and mixture as may be described in the order; or of such other substituted mixture as may be approved or directed by the Chief Mechanical Engineer or Engineer for Existing Lines, so as to produce a hard, close, soft, or other description of metal, at the option and to the satisfaction of the Chief Mechanical Engineer or the Engineer for Existing Lines.

2. The castings are to be clean, sharp, free from surface scale, shell, cold shuts, blow holes, honeycomb, cinder, or any other imperfections, and are to be sound in every respect, and thoroughly close in grain. When specially ordered, the castings are to be run with heads or runners of such weight as may be requested, and no extra charge shall be made or allowed for same, and the Contractor will be required to remove the head or runner from the casting, where possible, in the opinion of the Chief Mechanical Engineer or the Engineer for Existing Lines, and charge the casting at the net weight only, trimmed and clean. In cases where it is necessary to cut off the head in a lathe or machine, such head will be cut off by the Corporation, and returned to the Railway Station nearest to the Contractor's works, and will be delivered to the Contractor at the said Railway Station free of cost or carriage.

3. Subject to the provisions of Clauses 4, 5, and 6 of this Specification, the Corporation will supply all patterns, and deliver the same to the Contractor, free of cost, at the Railway Station nearest to his works. All patterns, loam-boards, &c., supplied by the Corporation must be returned by the Contractor in good order, and delivered together with the castings. (See Conditions of Contract.)

4. Whenever ordered, the castings are to be moulded in loam without a pattern, and loam rate will be paid according to Schedule, but no extra charge will be allowed for paterus, strickles, or loam-boards.

5. All Water Supply castings must be moulded in loam whenever required, and a loam pattern made, and no extra rate or charge will be allowed for the loam pattern beyond the rate stated in Schedule. Contractor shall supply all patterns for Water Supply castings at his own cost.

6. Whenever only one or two castings are required, and, in the opinion of the Chief Mechanical Engineer or Engineer for Existing Lines, they can be moulded from the broken originals, the Contractor will be bound to mould from such broken originals without requiring the Corporation to supply a wooden or other pattern for same, and without being allowed any extra rate.

| Item. | Description of Stores.                                                                                                                                                                                                                                                                                                                                 | Rate. |    |    | Per. |

Contract No. 8118.

Henry Johnson, Contractor.

SUPPLY AND DELIVERY OF  
STEEL CASTINGS.

Delivered at Brunswick.

As ordered, from 1st July, 1899, to 30th June, 1902.

**SPECIFICATION.**

**STEEL CASTINGS.**—1. The castings are to be clean, sharp, free from surface scale, shell, cold shuts, blow holes, honeycomb, cinder, or any other imperfections, and are to be sound in every respect, and thoroughly close in grain. When specially ordered, the castings are to be run with heads or runners of such weight as may be requested, and no extra charge shall be made or allowed for same, and the Contractor will be required to remove the head or runner from the casting, where possible, in the opinion of the Chief Mechanical Engineer or the Engineer for Existing Lines, and charge the casting at the net weight only, trimmed and clean. In cases where it is necessary to cut off the head in a lathe or machine, such head will be cut off by the Corporation, and returned to the Railway Station nearest to the Contractor's works, and will be delivered to the Contractor at the said Railway Station free of cost or carriage.

2. The castings to be annealed until a piece cut from them or a test piece made from the same cast will bend 1 inch in 6 inches, thus:  and stand being brought back to its original shape without fracture.

3. The Contractor shall, if called upon to do so, supply a test bar six (6) inches long by two (2) inches square, which will be drawn out under the hammer, and then subjected to a tensile test; the minimum breaking strain to be twenty-five (25) tons per square inch, with elongation of ten (10) per cent.

4. Subject to the provisions of Clause 5 of this Specification the Corporation will supply all patterns, and deliver the same to the Contractor, free of cost, at the Railway Station nearest to his works. All patterns, &c., supplied by the Corporation must be returned by the Contractor in good order, and delivered together with the castings (see Conditions of Contract).

5. Whenever only one or two castings are required, and they can, in the opinion of the Chief Mechanical Engineer or the Engineer for Existing Lines, be moulded from the broken originals, the Contractor will be bound to mould from such broken originals without requiring the Corporation to supply a wooden or other pattern for same, and without being allowed any extra rate.

Australian Portland Cement Coy. Ltd., Contractor.

SUPPLY AND DELIVERY OF
CEMENT
(of Victorian Manufacture).

DELIVERED AT GEELONG

As ordered, from 1st July, 1899, to 30th June, 1902.

SPECIFICATION.

Cement to be of approved brand, closely packed in casks, containing 375 lbs. net, or in bags lined with paper containing 94 lbs. each (4 being equal to 1 cask). No repacked or damaged casks to be delivered. Samples may be taken, by a receiving officer appointed by the Corporation, from three casks or bags in each hundred by opening or boring with an auger.

The cement thus taken must comply with the following conditions:--

(1) Its constituents, to be found by analysis, shall be--

Lime	58 to 61 p.c.
Silica	20 to 27 "
Alumina	5 to 10 "
Oxide of Iron	Not more than 6 p.c.
Magnesia	" 3 "
Sulphuric Acid	" 2 "

(2) Its specific gravity must not be less than 3.

(3) It must be well burnt and finely ground so that 90 p.c. shall be capable of passing through a sieve of 32 gauge wire, 2,500 meshes to square inch.

(4) When mixed neat into five briquettes it must, after immersion in water for seven days, give an average tensile strength of 350 lbs. to square inch and not more than 500 lbs. to square inch. After 28 days in water the average tensile strength of five briquettes mixed neat must not be less than 450 lbs. or more than 700 lbs. to the square inch.

(5) Pats mixed neat on glass kept in a moist heat of 90° Fahr. till set and then placed in a bath of water 100° Fahr. or in air must show no sign of blowing or cracking.

Contract No. 8146.

MILLS AND Co., Contractor.

SUPPLY AND DELIVERY OF
EARTHENWARE DRAIN PIPES, ETC.

Delivered at Brunswick.

As ordered, from 1st July, 1899, to 30th June, 1902.

SPECIFICATION.

EARTHENWARE DRAIN PIPES.—The drain pipes are to be of the kind known as salt-glazed vitrified stoneware. They shall be made of plastic clay, containing a large proportion of silica, and free from limestone or lime. The clay is to be thoroughly well worked. The pipes to be well burnt, completely vitrified, and free from splints, cracks, or other defects. Each pipe, bend, or junction shall be uniformly and thoroughly glazed over the whole of the interior and exterior surfaces with salt glaze. The straight pipes, bends, and junctions shall be made to the exact form and dimensions ordered. The whole to be truly cylindrical. The branches to be truly set to the angle ordered. The socket of the oblique branches shall be as near as possible to the body of the pipe. The measurement of the pipes will be at the net length of 24 inches, as laid in the works, from the bottom of the socket to the end of the spigot for all straight pipes, and for the bends the length measured along the circumference of the central radius in the same manner.

Items marked * to be supplied to sample exhibited by Corporation, and which may be seen on application to the Railway Storekeeper.

**Contract No. 8163.**

**John Slater and Co., Contractor.**

**SUPPLY AND DELIVERY OF  
TELEGRAPH WIRE.**

DELIVERED AT MELBOURNE.

As ordered, from 1st July, 1899, to 30th. June, 1900.

**SPECIFICATION.**

**GALVANIZED TELEGRAPH WIRE.**—The wire is to be uniformly annealed, soft, pliable, free from scale, inequalities, flaws, splits, and other defects, and must be uniformly cylindrical.

The wire is to be drawn in continuous pieces of not less than 90 lbs. nor more than 120 lbs. No piece of wire shall contain any weld, joint, or splice whatever, either in the rod before it is drawn or in the finished wire.

The wire to be well galvanized. It will be tested as under:—

Samples taken from any coil or coils will be placed in a solution of sulphate of copper, saturated at 60° Fahr., and allowed to remain there for one minute, when they will be withdrawn and wiped clean. The galvanizing must admit of this being performed four times without there being any sign of a reddish deposit of metallic copper on the wire, which would be the case if the coating of zinc were too thin.

The diameter of the wire to be 171 mils, and no greater difference than 5 (five) mils under or above will be accepted.

To prove its ductility, the wire must be capable of bearing 21 twists in six inches without breaking or showing any sign of splitting.

The weight of wire per mile to be 400 lbs., with a maximum resistance of 13½ ohms.

The wire must bear a weight of not less than 1,300 lbs. without breaking.

If, after the examination of any particular parcel of wire, 10 per cent. of such wire fails, in the opinion of the Telegraph Superintendent, to meet the requirements of the foregoing stipulations, the whole of such parcel shall be rejected, and no such parcel, or any part thereof, shall on any account be again presented for examination and testing, and this stipulation shall be deemed to be, and shall be treated as, an essential condition of the contract.

**Contract No. 8165.**

**James Moore, Contractor.**

**SUPPLY AND DELIVERY OF  
CARPENTERS' WORK.**

DELIVERED AT SPENCER-STREET, FLINDERS-STREET, OR PRINCE'S-BRIDGE.

As ordered, from 1st July, 1899, to 30th June, 1902.

**SPECIFICATION.**

**LADDERS.**—The Ladders are to be of Red or Yellow Baltic Fir, free from large or loose knots, and perfectly straight in grain, sound and free from heart and sap. The rounds are to be cleft, of young and fresh Hickory, English Ash, or English Oak, straight in grain, and turned to 1 1/4" diameter in centre, and for 1/2" holes at ends. The sides of the Ladders are to be bored to receive the rounds, and the holes are to be tapered outwards, so as to admit of the round being opened and wedged. All the rounds are to well fill the holes, and be wedged with glue into the sides, previously having received a coat of wet white lead. Every eighth round a tie-bolt 1/2" diameter with collar at each end 1 1/4" diameter is to be inserted below the round with nut and washer at each end, the rounds to be 9" apart centre to centre. The Ladders are to be finished with three coats of good lead and oil paint, of such colour as may be ordered.

The 36-foot Ladders are to be spread at bottom 18" clear between the sides, which are to be 4 1/2" x 2 1/2"; and at top 9 1/2" clear, with sides 2 3/4" x 1 1/2".

The 30-foot Ladders 18" clear at bottom, with sides 4 1/2" x 2 1/2"; and at top 10 1/2" clear, with sides 2 3/4" x 1 1/2".

The 24-foot Ladders 16" clear at bottom, with sides 4 1/2" x 2"; at top 10" clear, with sides 2 1/2" x 1 1/2".

The 20-foot Ladders 15" clear at bottom, with sides 3 3/4" x 2"; at top 10" clear, with sides 2 1/2" x 1 1/2".

The 16-foot Ladders 14" clear at bottom, with sides 3 1/2" x 1 1/2"; and at top 10" clear, with sides 2 1/2" x 1 1/2".

The 14-foot Ladders 13" clear at bottom, with sides 3 1/2" x 1 1/2"; and at top 10" clear, with sides 2 1/2" x 1 1/2".

The 12-foot Ladders 13" clear at bottom, with sides 3 1/2" x 1 1/2"; and at top 10" clear, with sides 2 1/2" x 1 1/2".

The 10-foot Ladders 13" clear at bottom, with sides 3 1/2" x 1 1/2"; and at top 10" clear, with sides 2 1/2" x 1 1/2".

The 8-foot Ladders 12" clear at bottom, with sides 3 1/2" x 1 1/2"; and at top 9" clear, with sides 2 1/2" x 1 1/2".

All the Ladders over 14 feet long are to be parallel in the sides to one-third of the height from the bottom; that is, the sides are to be of the same section one-third up as at bottom.

Items marked \* to be supplied to sample exhibited by Corporation, and which may be seen on application to the Railway Storekeeper.
