<b>FIRE EXTINGUISHERS.</b>					
<i>Materials.—The materials of which the extinguishers are constructed shall be Copper, Brass, and Gunmetal, each the best of their respective kinds. The cones shall be coated internally with tin, and shall be burnished, bronzed, and lacquered externally.</i>					
<i>Workmanship.—All the parts of the extinguishers shall be carefully and accurately made and well finished, and all fittings shall be truly interchangeable, castings shall be free from imperfections of all sorts. All joints in the cones must be made according to the sample, and must be thoroughly sweated.</i>					
<i>Spanners.—Each Extinguisher shall be provided with a Gunmetal Spanner, tinned all over, and made in exact conformity with the sample.</i>					
<i>Pricker.—Each Extinguisher shall be provided with a brass pricker attached to the machine by a brass chain and ring, in exact conformity with the sample.</i>					
<i>Chemical Charges.—Each Extinguisher shall be supplied with two complete chemical charges. Each charge shall be contained in a cardboard box, properly labelled, and shall consist of 1 lb. Bi-carbonate of Soda, packed in a suitable brown paper bag and sealed up, and 3 ounces of Commercial Sulphuric Acid, contained in a glass test tube, of which the end is sealed by fusion. These charges shall be in exact conformity with the samples.</i>					

Item No. and Description.	Estimated Requirements for 2 Years.	—	Rate per —	Rate.	Name of Contractor.
FIRE EXTINGUISHERS—continued.				£ s. d.	
<i>Testing on Delivery.—The Fire Extinguishers shall each be subjected to and must satisfactorily withstand the tests hereinafter specified. The Contractor shall have the tests made on his premises in the presence of the Chief Storekeeper, and the Contractor must give notice of the dates on which he will be prepared to make the tests. Each Fire Extinguisher shall be filled with water and attached to a force pump and subjected to a pressure of 250 lbs. per square inch for a period of one minute. The Contractor shall have a representative present who shall assist at all the tests.</i>					
<i>Any defects observed during such tests shall, at the option of the Chief Storekeeper, either be made good by and at the expense of the Contractor to the satisfaction of the Chief Storekeeper before the service is finally accepted, or the machines showing defects may be marked with a distinguishing mark by the Chief Storekeeper, and must be stored in one place and remain there until the service is finally completed. Delivery of the service shall be deemed to be provisional until the Chief Storekeeper shall have certified that the same have been examined, tested, and found satisfactory in every respect, and no such provisional acceptance shall prevent the rejection of the service by the Chief Storekeeper.</i>

<b>IRON CASTINGS.</b>					
<i>The Contractor shall during the currency of this contract furnish the Chief Storekeeper with the address or addresses of the place or places at which the Iron Castings are being manufactured by the Contractor, and the Chief Storekeeper or any person appointed by him from time to time shall at all times during business hours have free access to such place or places, and shall be afforded every facility for inspecting the castings while in process of manufacture.</i>					
<i>The castings are to be clean, sharp, free from surface scale, shell, cold shuts, blow holes, honeycomb, cinder, or any other imperfections, and are to be sound in every respect, and thoroughly close in grain. When specially ordered, the castings are to be run with heads or runners of such weight as may be ordered, and no extra charge will be allowed for same, and the Contractor will be required to remove the head or runner from the casting where possible in the opinion of the Chief Storekeeper, and charge the casting at the net weight only, trimmed and clean. In cases where it is necessary to cut off the head in a lathe or machine, such head will be cut off by the Corporation, and will be returned to the Railway Station nearest to the Contractor's works, and delivered to the Contractor at the said Railway Station free of cost or carriage.</i>					
<i>Whenever specially ordered, the castings shall be run from the very best "cold-blast iron" of such particular brand, quality, and mixture as may be described in the order; or of such other substituted mixture as may be approved or directed by the Chief Storekeeper, so as to produce a hard, close, soft, or other description of metal, at the option and to the satisfaction of the Chief Storekeeper.</i>

## ROLLED IRON.

The Contractor shall during the currency of this Contract furnish the Chief Storekeeper with the address or addresses of the place or places at which the Rolled Iron is being manufactured by the Contractor, and the Chief Storekeeper, or any person appointed by him from time to time, shall at all times during business hours have free access to such place or places, and shall be afforded every facility for inspecting the Rolled Iron while in process of manufacture.

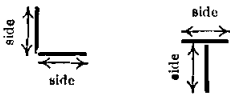

The whole of the Scrap for the manufacture of the Rolled Iron under this Contract must be purchased by the Contractor from the Corporation, and except as hereinafter provided shall be paid for by the Contractor at a fixed rate of £2 per ton delivered in trucks at Spencer-street Railway Station, and the rates set opposite to items numbered respectively 904 and 905 in this Schedule must include the cost of the said Scrap.

Item No. and Description.	Estimated Requirements for 2 Years.	—	Rate per—	Rate.	Name of Contractor.	
				£ s. d.		
ROLLED IRON—continued.						
To cover waste in the case of the Double Rolled Iron, the Contractor shall purchase as aforesaid 25 per centum of Scrap in excess of any quantity of Double Rolled Iron which may be ordered from time to time. To cover waste in the case of the Treble Rolled Iron, the Contractor shall purchase, as aforesaid, 30 per centum of Scrap in excess of any quantity of Treble Rolled Iron which may be ordered from time to time. Provided in the event of the Contractor requiring for the purposes of this Contract any quantity of Scrap exceeding the respective percentages as aforesaid, then in every such case he shall pay for such excess at the rate of £2 10s. per ton. Payment at the rate or rates aforesaid shall be made by the Contractor to the Chief Accountant of the Victorian Railways (within 48 hours after demand) for any Scrap which may be supplied to the Contractor from time to time as heretofore provided, and, failing payment as aforesaid, the Corporation shall be entitled to deduct any amount owing for the said Scrap from any money due, or which may become due, to the Contractor under this Contract.						
The Rolled Iron shall be entirely manufactured from the Scrap purchased from the Corporation as aforesaid, and will be paid for by the Corporation on the basis of the net weight of such Rolled Iron, when supplied and delivered in strict accordance with all the provisions and requirements of the annexed Conditions of Contract and this Schedule, and to the satisfaction in every respect of the Chief Storekeeper.						
All bars shall be cut to the lengths required, and have crop and bad ends cut off, and the Rolled Iron delivered shall be sound throughout and fit for use. Only the net weight of Rolled Iron delivered (after crop and bad ends have been cut off) will be paid for.

MILD STEEL (PLATES, SECTIONS, BARS, AND RIVET STEEL BARS).					
Quality of Material.—The Plates, Sections, and Bars must be manufactured from Acid or Basic Open Hearth Steel made from selected material, and must not show on analysis more than .06 per cent. of Sulphur or of Phosphorus. The Contractor shall supply an analysis whenever required to do so from time to time.					
Freedom from Defects.—The Plates, Sections, and Bars must be free from cracks, surface flaws, lamination, and all other defects, cut square, and finished in a workmanlike manner. No Plate, Section, or Bar must be more than 2½ per cent. over or 2½ per cent. under the calculated weight.					

Item No. and Description.	Estimated Requirements for 2 Years.	—	Rate per—	Rate.	Name of Contractor.
<p><b>MILD STEEL (PLATES, SECTIONS, BARS, AND RIVET STEEL BARS)—continued.</b></p> <p><i>Branding.—Each Plate, Section or Bar shall bear the proper trade marks or brands, and shall be of any size or section ordered.</i></p> <p><i>Mechanical Tests.—The tensile strength and ductility shall be determined from standard test pieces, cut lengthwise or crosswise, from the rolled material. When material is annealed or otherwise treated before despatch, the test pieces shall be similarly and simultaneously treated with the material before testing.</i></p> <p><i>Any straightening of the test pieces which may be required shall be done cold.</i></p> <p><i>Tensile Tests.—Plates and Sectional Material.—A standard test piece (as shown on diagram, marked "B" at back of schedule) having a gauge length of 8 inches, and for round bars (as shown on diagram marked "A" at back of schedule) must show a tensile breaking strength of from 26 to 30 tons per square inch with an elongation of not less than 20 per cent., and in the case of rivet steel bars an elongation of not less than 25 per cent. Where bars are above 1 inch in diameter, and are tested full size as rolled, or are turned down, and the resulting test piece is above 1 inch diameter, a standard test piece (as shown on diagram marked "C" at back of schedule) having a gauge length of not less than four times the diameter may be used, in which case the elongation shall be not less than 24 per cent. For material under 5-16 inch in thickness, bend tests only are required.</i></p> <p><i>Bend Tests.—Cold Bends: Test pieces shall be sheared or cut lengthwise from Plates, Sections, or Bars, and shall not be less than 1½ inches wide, but for small Plates, Sections, or Bars, the whole Section may be used.</i></p> <p><i>Temper Bends.—The test pieces shall be similar to those used for cold bend tests.—For temper bend tests the test pieces shall be heated to a blood red and quenched in water at a temperature not exceeding 80 degrees Fahr. The colour shall be judged indoor in the shade.</i></p> <p><i>In all cold or temper bend tests the sheared edges may be removed by milling, planing, grinding, or other method. The test pieces shall not be annealed unless the material from which they are cut is similarly annealed, in which cases the test pieces shall be similarly and simultaneously treated with the material before testing.</i></p> <p><i>For both cold and temper bends the test piece must withstand, without fracture, being doubled over until the internal radius is not greater than 1½ times the thickness of the test piece, and the sides are parallel.</i></p> <p><i>For small sectional material these bend tests may be made from the flattened bar.</i></p> <p><i>Rejection.—Should the material fail to comply in every particular with the above conditions, the lot from which the test pieces were selected will be rejected.</i></p>				£ s. d.	

Item No. and Description.	Estimated Requirements for 2 Years.	—	Rate per—	Rate.	Name of Contractor.
MILD STEEL (PLATES, SECTIONS, BARS, AND RIVET STEEL BARS)—continued.					
In the case of all Angle and T Steel referred to in the Schedule, the word "side" shall mean side as indicated for Angles and Tees respectively, thus:—					
					
Special Conditions applicable to Items 937, 943, 948, 953, and 958.					
<p>Provided, however, that if at any time the Contractor shall notify the Chief Storekeeper, in writing, that any Act of Parliament passed, or Determination of any Wages Board, during the currency of the Contract has had the effect of increasing the rates of wages paid or other payment made by the Contractor at the date of this Contract to any person or persons employed by the Contractor on the manufacture of the Stores, and if the Chief Storekeeper after due inquiry and investigation of the books of the Contractor shall certify, in writing, to the Corporation that the said rates of wages or other payment have been so increased, then the Contractor shall be entitled to give to the Corporation one month's notice in writing of his intention to terminate the Contract, and at the expiration of such period of one month, the Contract shall be terminated accordingly.</p> <p>If during the currency of this Contract any general strike of workmen shall occur in any trade or trades, and if the Contractor shall satisfy the Chief Storekeeper that such strike is a good and sufficient reason for supplies under this Contract being suspended, then, subject to the consent, in writing, of the Chief Storekeeper first obtained, the said supplies may be suspended, provided that such suspension shall cease and the supplies under the Contract be resumed within ten days after any such general strike as aforesaid shall have terminated.</p>

SPRING STEEL.					
1. <i>Quality of Material.</i> —The bars shall be manufactured from the highest quality of Acid Open Hearth Steel made from the best selected material, and must not show on analysis more than .8 per cent. nor less than .5 per cent. of carbon, nor more than .035 per cent. of Sulphur or of Phosphorus. The contractor shall supply an analysis whenever required to do so.					
2. <i>Freedom from Defects.</i> —The flat bars must be rolled concave, and both the flat and round bars must be perfectly smooth on their surfaces, and free from defects of any kind.					
Branding.—Each bar shall be stamped with the Manufacturer's name and date of manufacture.					

Item No. and Description.	Estimated Requirements for 2 Years.	—	Rate per—	Rate.	Name of Contractor.
SPRING STEEL—continued.					£ s. d.
<p>4. <i>Mechanical Tests.</i>—Test pieces taken from the bars must comply with the following tests without reheating or any other manipulation whatever.</p> <p>5. <i>Cambering Test for Flat Bars.</i>—Pieces of the flat bars 30 inches long shall be cambered to a radius of 80 times their thickness, hardened and tempered, and, after being pressed straight once and the camber carefully noted, must stand being pressed straight again six times in quick succession without showing any permanent set.</p> <p>6. <i>Round Bars.</i>—The round bars must be capable of being hardened in oil.</p> <p>7. <i>Rejection.</i>—Should the material fail to comply in every particular with the above conditions, the lot from which the test pieces were selected will be rejected.</p>

STEEL BLOOMS FOR LOCOMOTIVE STRAIGHT, CAR, AND WAGGON AXLES.					
<p><i>Quality.</i>—The Steel Blooms are to be of the very best quality, suitable for manufacture into locomotive, carriage, and waggon axles, to have the heads cut off, and to be perfectly sound, free from blow-holes, flaws, or any other defects. The Blooms are to be of the length, shape, and weight, and the ends must be left square, as shown on the diagrams on Ltho. No. 892/09 at back of schedule. They will be forged into axles and annealed by the Corporation, and each axle when finished will be branded with the initials of the firm supplying the Blooms.</p> <p><i>Tensile Strength.</i>—The steel in the Blooms must have a tensile strength of not less than 32 tons per square inch with elongation of at least 20 per cent. in a length of 2 inches.</p>

<b>STEEL BLOOMS FOR BUILT-UP LOCOMOTIVE CRANK AXLES.</b>					
<i>Quality.—The Steel Blooms are to be of the very best quality, suitable for locomotive crank axles, and to be perfectly sound, free from blow-holes, flaws, or any other defects. The Blooms are to be of the shape as shown on the diagrams on Litho. No. 103/08 at back of schedule, with sufficient material allowed for machining by the Corporation to the finished sizes. They will be made into axles by the Corporation, and each axle when finished will be branded with the initials of the firm supplying the Blooms. All the Blooms are to be annealed by the manufacturer.</i>					
<i>Tensile Strength.—The steel in the Blooms, Items Nos. 975, 976, and 977, must have a tensile strength of not less than 30 tons per square inch with elongation of at least 25 per cent. in a length of 2 inches, and in Item No. 978 not less than 38 tons per square inch with elongation of at least 18 per cent. in a length of 2 inches.</i>

SERGE AND VENETIAN CLOTH.					
All the Serge and Venetian Cloth must be dyed with Indigo dye.					
All the Serge and Venetian Cloth must be thoroughly dry when delivered, and must be clean scoured, and free from grease, soap, grass seeds, burrs, and all other imperfections and must be thoroughly shrunk.					

Item No. and Description.	Estimated Requirements for 2 Years.	—	Rate per—	Rate.	Name of Contractor.
£ s. d.					
SERGE AND VENETIAN CLOTH—continued.					
The colour of the Serge and Venetian Cloth must be true to sample and must be fast in shade, whether the sample be fast or not.					
The Serge or Venetian Cloth supplied from time to time will be subject to such tests as the Chief Storekeeper may think proper. The dye will be liable to be tested by lengthened exposure of the Serge or Venetian Cloth to the weather, or otherwise. For the purposes of any such tests as aforesaid the Chief Storekeeper shall be entitled, whenever he shall think proper, to cut off from any piece of Serge or Venetian Cloth supplied under this contract a portion not exceeding 9 in. in length, and to destroy such portion, and for the purposes of such tests as aforesaid the Chief Storekeeper shall further be entitled, whenever he shall think proper, to wash and dry any piece of Serge or Venetian Cloth supplied under this contract, and in the event of any Serge or Venetian Cloth being rejected, as the result of such tests, the Contractor shall not be entitled to any payment or equivalent for any Serge or Venetian Cloth destroyed or damaged in making such tests.					
One thread of pale blue must be woven into the full width of the heading of each piece of Serge and Venetian Cloth supplied. Any piece of Serge or Venetian Cloth rejected by the Chief Storekeeper will have a small piece (comprising portion of the one pale blue thread hereinbefore referred to) removed from the heading, and no piece of Serge or Venetian Cloth from the heading of which a small piece has been so removed will be subsequently received by the Chief Storekeeper under this contract.

**FURNITURE AND GLASSWARE.****SPECIAL CONDITIONS APPLICABLE TO ITEM 1188.**

(A.) Subletting will not be allowed, and all work in fulfilment of any order for the Stores shall be carried out in the factory of the Contractor, and shall be open for inspection at any time by such officer as the Corporation may direct. No Chinese labour shall be employed in the manufacture of the Stores.

(B.) The hours of duty of any person engaged in the fulfilment of any order for the Stores shall not exceed 48 per week.

(C.) Every person engaged in the fulfilment of any order for the Stores shall not be paid less than the wage prescribed in respect of the avocation of such employé in any Determination issued by the Furniture Board under the Factories and Shops Act in operation for the time being, and shall be employed under such other conditions as may be prescribed in any such Determination.

Item No. and Description.	Estimated Requirements for 2 Years.	—	Rate per —	Rate.	Name of Contractor.
				£ s. d.	
FURNITURE AND GLASSWARE—continued.					
(D.) A copy of the conditions contained in this sub-clause (D.) and in sub-clauses (A.), (B.), (C.), and (E.) shall be kept conspicuously posted, in legible Roman characters, in the factory (and in each part of the factory where several rooms are in use), in which any person is engaged in the fulfilment of any order for the Stores set out in the annexed Schedule.					
(E.) Any infringement of the conditions contained in this sub-clause (E.) and in sub-clauses (A.), (B.), (C.), and (D.) will render the Contractor subject to such mulct, not exceeding £50, as the Chief Storekeeper may determine, and the amount will be deducted from the Contractor's account or from the security money lodged for the due and proper performance of the Contract, and in addition any Stores manufactured or partially manufactured under conditions contrary to those prescribed in sub-clauses (A.), (B.), (C.), and (D.) will be rejected, and the Contractor shall not have any claim for compensation or damages in respect thereof. The Chief Storekeeper shall be the sole judge as to the infringement of any of these conditions, and the decision of the Chief Storekeeper shall be binding, final, and conclusive as to the fact of the infringement and in all other respects.

## MINERAL LUBRICATING OILS.

The Oils must, in the opinion of the Chief Storekeeper, be in every way in accordance with the samples, suitable for lubrication of locomotive engines, and carriages and waggons, and free from all impurities and foreign matters, objectionable acids, gumminess, or other defects. The three (3) classes of Oil required are referred to respectively as "Class No. 1," "Class No. 2," and "Class No. 3," and shall be supplied in casks distinctly branded "Class 1," "Class 2," or "Class 3," as the case may be, and each of such classes must comply with the Conditions set against it hereunder as follows:—

—	FLASH POINT.	CONGELING POINT.	VISCOSITY IN SECONDS PER 50 C. C. VOLUME.
Class No. 1 ..	Must not flash at a lower temperature than 550 degrees Fahrenheit.	Must not solidify at a higher temperature than 40 degrees Fahrenheit.	Must not exceed 114 at a temperature of 74 degrees Fahrenheit and must not be less than 25 at 212 degrees Fahrenheit.
Class No. 2 ..	Must not flash at a lower temperature than 500 degrees Fahrenheit.	Must not solidify at a higher temperature than 30 degrees Fahrenheit.	Must not exceed 130 at a temperature of 74 degrees Fahrenheit and must not be less than 2 at 212 degrees Fahrenheit.
Class No. 3 (for Carriages, Wagons, and Tenders, &c.)	Must not flash at a lower temperature than 320 degrees Fahrenheit.	Must not solidify at a higher temperature than 20 degrees Fahrenheit.	Must not exceed 15 at a temperature of 74 degrees Fahrenheit and must not be less than 2 at 140 degrees Fahrenheit.

The flash test will be determined by an "Abel's" Close Test Instrument; the fluidity at low temperature by a "Tagliabue's" Instrument; and the viscosity by a "Redwood's" Viscometer (viscosity of filtered water being 1). The tests will be made with instruments similar to those exhibited in the Contractor's Room, No. 1 Railway Offices, Spencer-street. All tests of the Oils will be made by the Chief Mechanical Engineer, whose decision shall be final.

Item No. and Description.	Estimated Requirements for 2 Years.	—	Rate per—	Rate.	Name of Contractor.

<p align="center"><b>TIMBER, VARIOUS.</b></p> <p>The Contractor shall in respect of each delivery of the Timber give to the Chief Storekeeper reasonable notice so that the inspection of the timber may be arranged for.</p> <p>The timber other than that required for use at Newport will be inspected at any railway station at which such timber shall have been delivered as provided for in clause 8 of the annexed Conditions of Contract, and will be liable to rejection at such railway station in manner provided in clause 12 of the said Conditions of Contract.</p> <p>No timber other than that under Items 1616 to 1683 inclusive required for use at Newport will be inspected until it shall have been received at Newport, and it will then be liable to rejection at Newport in manner provided in clause 12 of the said Conditions of Contract.</p> <p>Notwithstanding anything to the contrary contained in the said clause 12 the Contractor will not be required in respect of any timber so rejected at Newport to pay carriage on the same from the railway station at which such timber so rejected shall have been delivered as aforesaid to Newport. In the event of the Contractor requiring such rejected timber to be carried by rail from Newport to the railway station at which the same was delivered as aforesaid or to any other railway station or siding, full railway freight will be charged therefor.</p> <p>Timber under Items 1616 to 1683 inclusive required for use at Newport will be inspected either on the River Yarra Wharves or at the depôt of the Millars' Karri and Jarrah (1902) Co., South Melbourne.</p> <p>If the inspection is to be made at the Contractor's yard or River Yarra Wharves the timber will be there inspected, passed, and branded by the Receiving Officer, and the Contractor shall unless directed to the contrary by the Receiving Officer within 24 hours after such inspection, passing, and branding deliver to the Corporation at Spencer-street Railway Station the whole of the timber so inspected, passed, and branded, and failing such delivery within 24 hours aforesaid, the Chief Storekeeper, notwithstanding such inspection, passing, and branding, by the Receiving Officer, will be entitled and shall have full power to reject either at the Contractor's yard or the River Yarra Wharves or after its arrival at Newport the whole or any portion of the timber in respect of which such failure shall have occurred.</p> <p>The Contractor shall have the timber ordered ready for inspection within 48 hours after service of the order upon the Contractor, or within such other time as the Chief Storekeeper may fix in writing as fair and reasonable, and the Contractor shall at his own cost have the timber turned over and properly exhibited to the Receiving Officer so that he may inspect the same to his complete satisfaction.</p> <p>The timber must be supplied in such sections and shapes as may be ordered, and must be of the first quality, thoroughly seasoned, free from knots, shakes, heart, sap, and all other imperfections, thoroughly sound, and close grained or free, as may be required.</p> <p>No allowance will be made for waste in sawing the timber to taper or other peculiar sections or shapes.</p> <p>Timber supplied for use at the Newport Locomotive Workshops shall be delivered in such exact lengths as may be ordered, or in such lengths as will cut thereto without waste.</p> <p>Timber supplied for use elsewhere than at the Newport Locomotive Workshops, if ordered for stock, will, subject to the Conditions of Contract, be accepted in lengths approximate to those ordered, and if ordered for use on any particular work, then, in the event of any lengths longer than those ordered being delivered and accepted, only the actual lengths as ordered will be paid for, and in the event of any lengths shorter than those ordered being delivered, they will only be accepted if such shorter lengths are suitable for the particular work, such shorter lengths to be then paid for, on the basis of their actual net lengths.</p>

**STRINGY BARK, TASMANIAN.**

*The Contractor shall in respect of each delivery of the timber give to the Chief Storekeeper reasonable notice, so that the inspection of the timber may be arranged for.*

*The timber other than that required for use at Newport will be inspected at any railway station at which such timber shall have been delivered, as provided for in clause 8 of the annexed Conditions of Contract, and will be liable to rejection at such railway station in manner provided in clause 12 of the said Conditions of Contract. No timber required for use at Newport will be inspected until it shall have been received at Newport, and it will then be liable to rejection at Newport in manner provided in clause 12 of the said Conditions of Contract. Notwithstanding anything to the contrary contained in the said clause 12, the Contractor will not be required in respect of any timber so rejected at Newport to pay carriage on the same from the railway station at which such timber so rejected shall have been delivered as aforesaid to Newport. In the event of the Contractor requiring such rejected timber to be carried by rail from Newport to the railway station at which the same was delivered as aforesaid or to any other railway station or siding, full railway freight will be charged therefor.*

*The timber must be supplied in such lengths, as may be ordered, and must be of the first quality, thoroughly seasoned, free from knots, shakes, heart, sap, and all other imperfections, thoroughly sound, and close grained or free, as may be required.*

Item No. and Description.	Estimated Requirements for 2 Years.	—	Rate per—	Rate.	Name of Contractor.
				£ s. d.	
STRINGY BARK, TASMANIAN—continued.					
Timber supplied for use at the Newport Locomotive Workshops shall be delivered in such exact lengths as may be ordered, or in such lengths as will cut thereto without waste.					
Timber supplied for use elsewhere than at the Newport Locomotive Workshops, if ordered for stock, will, subject to the Conditions of Contract, be accepted in lengths approximate to those ordered, and, if ordered for use on any particular work, then, in the event of any lengths longer than those ordered being delivered and accepted, only the actual lengths as ordered will be paid for, and, in the event of any lengths shorter than those ordered being delivered, they will only be accepted if such shorter lengths are suitable for the particular work, such shorter lengths to be then paid for on the basis of their actual net lengths.					
The Contractor shall have a responsible agent in Melbourne to represent him in all matters connected with this Contract. At all times during the currency of this Contract the Contractor shall keep the Chief Storekeeper advised as to the name and address of the said responsible agent for the time being.

STONEWARE DRAIN PIPES, ETC.					
The Drain Pipes, &c., must be delivered properly loaded and stacked in railway trucks by and at the cost of the Contractor at the South Brunswick Railway Station, and be consigned thence as ordered.					
The pipes shall be of salt glazed vitrified stoneware; they shall be made of plastic clay, thoroughly worked, containing a large proportion of silica, but free of limestone or lime. Each pipe shall be of uniform and suitable composition, and shall ring with a well-defined sound when struck with a wooden mallet. The pipes shall be well burnt, completely vitrified, and free from splits, cracks, inequalities, and all other defects, and shall be uniformly and thoroughly glazed over the whole of the inside and outside with salt glaze. All pipes, bends, and junctions shall be made to the exact forms, angles, and dimensions ordered. The pipes must have their spigot and socket ends accurately formed at right angles to the direction of the bore, which shall be of uniform circular section throughout. All straight pipes and junctions must measure 24 inches net from the bottom of the socket to the end of the spigot, unless other-

<b>REINFORCED CEMENT CONCRETE PIPES.</b>					
<i>The pipes shall be uniform in similar diameters and shall be of good workmanship and finish.</i>					
<i>The pipes shall be manufactured from sand of approved quality, bluestone screenings, and Union brand Portland cement manufactured by the Commonwealth Portland Cement Co. Ltd.</i>					
<i>For diameters from 9 inches to 30 inches, the pipes shall be made by machine process, and for diameters beyond 30 inches, by hand process.</i>					
<i>Each pipe shall be provided with a seat and reinforced in the following manner for the sizes named:—</i>					
<i>9" to 15" dia. . . No. 8 steel wire rings spaced 4" apart along the pipe, and two <math>\frac{1}{4}</math>" steel bars longitudinal with the pipe, and placed in the seat.</i>					
<i>15" to 18" dia. . . No. 6 steel wire rings spaced 4" apart along the pipe, and two <math>\frac{5}{16}</math>" steel bars longitudinal with the pipe and placed in the seat.</i>					
<i>18" to 36" dia. . . <math>\frac{1}{4}</math>" to <math>\frac{3}{8}</math>" steel bar rings, the diameter of the bar used increasing with the diameter of the pipe, spaced 4" apart along the pipe, and two <math>\frac{3}{8}</math>" steel bars longitudinal with the pipe and placed in the seat.</i>					
<i>The pipes must be delivered properly loaded and stacked in railway trucks by and at the cost of the Contractor at the Spencer-street Railway Station, and be consigned thence as ordered.</i>

FOUNDRY COKE.					
<p>(A.) In the event of any general strike of the Contractor's employ��s engaged in the actual work of shipping the Coke to Victoria, then in every such event the supplies of Coke under this Contract (provided that the Chief Storekeeper be satisfied that the Contractor has made all reasonable efforts to overcome the difficulty and continue to supply) may be suspended five clear days after written notice of such intended suspension shall have been given by the Contractor to the Corporation, provided, in case such strike terminates prior to the expiration of the said five clear days, that such notice shall, for all purposes, be null and void; and further provided that for the purposes of this clause the term "Contractor's employ��s" shall mean the coal trimmers at Sydney, or the wharf labourers at Melbourne, or the crews of the vessels in which the coke is carried.</p> <p>(B.) In the event of any general strike or lock-out of persons employed in any mine or mines, the produce of which is supplied by the Contractor to the Corporation under this Contract, then in every such event the supplies of Coke from the particular mine or mines may be suspended five clear days after written notice of such suspension shall have been given by the Contractor to the Corporation (provided in case such strike or lock-out terminates prior to the termination of the said five clear days, that such notice shall for all purposes be null and void).</p> <p>In the event of any such suspension as referred to in the foregoing paragraphs marked respectively (A) and (B), the supplies of Coke the produce of the mine or mines named in the annexed Schedule shall be resumed within seven days from and after the date upon which such strike or lock-out shall have terminated.</p> <p>In the event of any such strike or lock-out as aforesaid, the Contractor may, with the written consent of the Chief Storekeeper, obtain the Coke for this Contract from any mine or mines in New South Wales, provided that the supply of all Coke so obtained shall be subject to the whole of these Conditions of Contract the same as if the mines from which such Coke shall be obtained were named in the Schedule hereto.</p> <p>In the event of Great Britain being at war with some other naval power, the Contractor may give seven days' notice, in writing, of the Contractor's desire to suspend the supplies of Coke hereunder, or to terminate this Contract, and if the Chief Storekeeper shall adjudge the cause or reason sufficient, the said supplies may, on the expiration of the said notice, be suspended, or, at the option of the Corporation, this Contract may be determined, provided, in the event of suspension as aforesaid, that if the Chief Storekeeper shall certify in writing at any time during the period of this Contract that in his opinion there is no longer sufficient cause or reason for such suspension, then the supplies of Coke under this Contract shall be resumed within seven days after the service upon the Contractor of a notice in writing from the Corporation, calling upon the Contractor to resume such supplies.</p>
