F. HAGELTHORN,
Commissioner of Public Works.

Department of Public Works (Unused Roads and Water Frontages Branch).

Melbourne, 16th day of July, 1913.

SHIRE OF MORTLAKE.

PUBLIC HEALTH BY-LAW NO. 14.

Public Health By-law.

A BY-LAW of the Shire of Mortlake, made under Parts III., XI., and XII. of the *Health Act 1890*, and numbered 14, providing for the removal by the occupier, or in case of his default by the Council, of dust, filth, rubbish, blood, offal, liquid manure, dung, or soil, or any deposit or accumulation thereof collected, placed, or found in or about any house, stable, coach-house, pigsty, lane, yard, street, or place whatsoever; for the prevention of the keeping of animals so as to be a nuisance or injurious to health; for regulating the times and manner of cleansing, emptying, and managing earth-closets, privies, cess-pools, and places for the deposit of night-soil, blood, offal, and other refuse matter contained therein or removed therefrom, and for the prevention of injury to health from the transport, deposit, or use as manure of night-soil; for the prevention of the pollution of water; for providing for the drainage of buildings and the prevention of damp foundations; and for the introduction and general management of the double-pan system within a certain defined area, including the Township of Mortlake.

1. All former By-laws on the matters and things herein-after provided for are hereby repealed, excepting as to acts done, penalties incurred, and proceedings at law pending at the time of this By-law coming into operation.

2. This By-law shall come into full force and operation on its confirmation by the Board of Public Health and immediately after its publication in the *Government Gazette*.

3. This By-law, excepting Part VII., shall apply to and have operation in the whole of the municipal district; and Part VII. of this By-law shall apply to and have operation within the boundaries in paragraph 33 of the said Part VII. defined and set out.

4. *Definitions*.—In the construction and for the purpose of this By-law the following terms shall, if not inconsistent with the context or subject-matter, have the respective meanings hereby assigned to them, that is to say:—

"House" shall mean and include dwellings of any kind, schools, hotels, licensed public-houses, factories, work-rooms, common or other lodging-houses, or other buildings or premises.

"Cess-pool" shall mean any receptacle for night-soil or for other noxious matter below or above the ground, and "earth-closet" shall include a pan closet of any description.

"Street" shall mean and include any highway or public bridge, or any road, lane, footway, square, court, alley, or passage, whether a thoroughfare or not.

"Slaughter-yard" or "slaughter-house" shall include any abattoir or any place where slaughtering takes place.

Words importing masculine gender shall be deemed and taken to include females, and the singular the plural, and the plural the singular, and the word person shall include a corporation.

PART I.—GENERAL CLEANLINESS.

5. The occupier of every house and premises shall cause the yard and the ground belonging thereto or occupied in connexion therewith to be kept so as not to be a nuisance or injurious to health, and shall cause all dust, filth, rubbish, and refuse matter to be at least once in every fourteen days or oftener, if ordered by the Officer of Health, removed from such yard or ground; and if at any time the occupier of any premises shall neglect or fail to have such filth, rubbish, or refuse matter so removed as aforesaid the Council may cause the same to be removed at the expense of such occupier.

6. The occupier of any premises used for the purpose of any offensive or noxious trade, business, occupation, process, or manufacture whatever, or used for the purpose of slaughtering, whether it be an abattoir or otherwise, shall cause any blood, rubbish, offal, bones, water, liquid, soil, or other offensive matter produced or accumulated thereon to be effectually deodorized and to be removed therefrom once in every twenty-four hours, and to be in the meantime kept so as not to be a nuisance or injurious to health, or to exhale any offensive effluvia; and if such occupier shall neglect or fail to have removed therefrom any offensive matter whatever it may be removed by the said Council at the expense of such occupier.

7. No person shall place or deposit any dust, mud, ashes, rubbish, filth, blood, offal, manure, dung, or soil, or any night-soil or other offensive matter in any street, road, lane, right-of-way, or place so as to be a nuisance to any person or injurious to health, or in any way contrary to the directions of the Council or Officer of Health.

8. No person shall cause, make, or commit, or permit or allow to be caused, made, or committed any nuisance, and any person responsible shall abate or prevent the same within seven days after receiving notice from the said Council or one of its officers to prevent or abate the same.

9. No person shall make or cause, or permit or suffer to be made, or to remain in any place whatsoever, any accumulation or deposit of water, liquid, soil, or other matter so that the same become offensive or a nuisance or injurious to health; but such accumulation or deposit of water, liquid, soil, or other matter shall be removed by the persons or person making or causing the accumulation or deposit, or by the owner or occupier of the premises upon which such accumulation or deposit is situated within seven days after receiving notice from the said Council or one of its officers so to do.

10. No person shall keep any animal of any kind, or any geese, ducks, or poultry so as to be a nuisance or injurious to health.

PART II.—DISPOSAL OF HOUSE REFUSE MATTER AND

CLEANLINESS IN TOWNS, ETC.

11. The occupier of any land on which is erected any stable, cow yard, cattle shed, or pigsty, or on which land is any building wherein any horse (or other beast of draught or burden), or any cattle or swine are kept, shall cause such premises to be kept in such state in respect of cleanliness as not to be a nuisance or injurious to health; and shall cause all soil, dung, or other manure produced or accumulated therein to be from time to time removed from such premises as often as the quantity of the same so produced or accumulated shall amount to two cubic yards, or once at least in every week should the quantity not amount to two cubic yards; and if at any time the occupier of such premises shall neglect or fail to have such soil, dung, or other manure removed therefrom as aforesaid the same shall be removed by the said Council at the expense of such occupier.

12. Every occupier of a building or premises wherein or whereon any horse (or other beast of draught or burden), or any cattle or swine may be kept, shall provide, in connexion with such building or premises, whenever required by the Council or Officer of Health, a suitable receptacle for dung, manure, soil, filth, or other offensive or noxious matter which may from time to time be produced in the keeping of any such animal in such building or upon such premises, and shall cause such receptacle to be constructed so that the bottom or floor thereof shall not in any case be lower than the surface of the ground adjoining such receptacle, and in such a manner and of such material, and to be maintained at all times in such condition as to prevent any effluvia therefrom or any escape of the contents thereof or any soakage therefrom into the ground or into the wall of any building, and to be furnished with a suitable cover, and when not required to be open to be kept properly covered.

13. He shall likewise provide in connexion with such building or premises, if required by the Council or Officer of Health, a sufficient drain constructed in such a manner and of such material and maintained at all times in such condition as to effectually convey all urine or liquid filth or refuse therefrom into a proper receptacle.

PART III.—AS TO MANURE.

14. Nothing herein contained shall be taken to prevent the occupier of any premises which are not within any surveyed or proclaimed township from causing any dung, soil (not being night-soil), or other refuse matter produced or accumulated on any premises to be at any time removed or to be used as manure on any garden or land, or to be kept for the purpose of being used on any garden or land contiguous to such premises as manure, so that the same be not so removed, kept, or used so as to contravene any By-law of the Council, or so as to be a nuisance or injurious to health or contrary to any directions of the Council or Officer of Health.

15. Every person placing, depositing, or spreading, or causing or suffering to be placed, deposited, or spread, or assisting in placing, depositing, or spreading on any land, whether by way of manure or otherwise, any liquid manure of which night-soil, urine, or other similar offensive matters form part, night-soil, offal, blood, or other refuse matter removed from any earth-closet, privy, cess-pool, or other place shall immediately upon the deposit or spreading thereof cover the same, or cause the same to be covered, and shall keep covered with a layer of earth not less than six inches in thickness, and shall keep and use the same in such a way only as not to be a

nuisance or injurious to health; and before doing so such person shall obtain the written permission of the Council or Officer of Health, subject however to any general regulations or directions which the Board of Public Health by publication in the *Government Gazette* may make or give; but such permission shall be no defence in any complaint or prosecution for having kept or used such liquid manure, night-soil, blood, offal, or other matter in such a way as to be a nuisance or injurious to health.

PART IV.—AS TO EARTH-CLOSETS, ETC.

16. No person shall construct or cause to be constructed any privy except in the form of an earth-closet, which shall consist of a proper privy building, the floor whereof is at no point less than three inches above the surface of the adjoining ground, and every such building shall be constructed with proper openings or flues to provide sufficient means of ventilation, and shall be provided with a suitable pan or other movable receptacle for night-soil, the contents whereof does not exceed three cubic feet, and with the requisite apparatus for the application of dry earth or some other deodorizing material to the contents thereof, and shall be constructed and placed so as to afford easy means of access for the purpose of removing the pan or receptacle and the contents thereof, and emptying and cleansing the same. Every privy attached to any school, hotel, licensed public-house, factory, work-room, or common lodging-house, and every public privy shall be flagged or paved with some non-absorbent material, having a fall or inclination towards the door or other opening of at least half an inch to the foot.

17. Every occupier and every person having the management or control of any premises shall cause to be kept in every earth-closet belonging thereto a supply of dry powdered earth, ashes, charcoal, lime, sawdust, or some other material efficient for deodorizing night-soil, and shall cause all night-soil which may be deposited in any pan or other receptacle in such earth-closet to be immediately upon the deposit thereof covered with a quantity of such deodorizing material sufficient to thoroughly and effectually deodorize the contents of such pan or other receptacle.

18. Every closet-pan shall be constructed of galvanized iron properly riveted and soldered so as to be watertight, and with handles thereto, and of a capacity not exceeding three cubic feet, and provided with a closely-fitted cover of a pattern to be approved of by the Inspector of Nuisances.

19. No closet door or trap shall abut or open on a street, lane, or right-of-way exceeding ten feet in width.

20. Subject as herein provided the further use of cess-pools is hereby prohibited, and the occupier of every house, building, or tenement having a cess-pool in use in the premises shall, within one calendar month after receiving from the Officer of Health a written notice to that effect, cease to further use the same, and shall forthwith effectually close and fill up any such cess-pool as and in such manner as the officer may direct or require, and so that if in the opinion of such officer it shall be necessary before closing or filling up such cess-pool that the contents thereof should be removed then the occupier shall cause the same to be removed. Provided that such contents shall not be removed therefrom except between the hours of Eleven p.m. and Five a.m. and until such contents shall have had mixed therewith carbolic acid, sulphate of iron, chloride of lime, or some other efficient deodorizer sufficient in quantity and quality to effectually deodorize and disinfect the same.

21. Every occupier and every person having the management and control of any premises shall once at least in every seven days or oftener if ordered by the Officer of Health, empty and cleanse, or cause to be emptied and cleansed, every earth-closet, privy, and place in the nature of an earth-closet for the reception of night-soil on or belonging to such premises.

22. No person shall empty an earth-closet except by means of a cart, carriage, or means of conveyance properly constructed and furnished with sufficient covering so as to prevent the escape of the contents, or any part thereof, or of effluvia therefrom.

23. Where any nightman is licensed by the municipal authorities such nightman shall be employed by the occupier of the premises for the removal of night-soil therefrom, and no other person shall remove the same.

24. All night-soil, blood, offal, or other offensive matter or thing shall be removed to and finally placed in such place or places only as may be appointed by the Council from time to time for the final reception of the same: but with the consent of the Council or any officer thereof night-soil may be buried, deposited, or used in any portion of the Shire except within the boundaries specified in Part VII. of this By-law. Provided that such night-soil shall be so buried, deposited, or used not less than two feet from any dwelling-house, and shall be covered with at least 6 inches of clean dry earth.

25. No person shall empty, or assist in emptying, or cause or permit to be emptied any earth-closet except between the hours of Eleven p.m. and Five a.m. unless otherwise permitted by the Council (of which the proof shall be on such person) or until the contents thereof have been properly deodorized; and every person emptying or causing to be emptied any earth-closet shall cause the night-soil to be removed as soon as it is emptied.

26. No person shall empty, or cause or permit to be emptied, or assist in emptying any earth-closet or place for the deposit of night-soil, blood, offal, or other refuse matter into any drain or sewer, or so that the contents thereof may find its way or be likely to find its way into any drain or sewer.

PART V.—PREVENTION OF POLLUTION OF WATER.

27. No person shall place, or assist in placing, or cause or permit to be placed in or so that the same may be likely to find its way into any water used or likely to be used by man for drinking or domestic purposes, or for manufacturing drinks for the use of man, or used or likely to be used in any dairy any matter or thing likely to endanger the health of any person using such water or drinks or milk or other produce of the dairy.

28. No person shall empty, or cause or permit to be emptied, or assist in emptying any cess-pool or place for the deposit of offal, blood, or other refuse matter into any water supplied, used, or likely to be used by man for drinking or domestic purposes, or for manufacturing drinks for the use of man, or used or likely to be used in any dairy so that the contents, or any portion of the contents thereof, may find its way or be likely to find its way into any such water.

29. Every accumulation or deposit of offensive matter so situated as to find its way, or be likely to find its way into any water used or likely to be used by man for drinking or for domestic purposes, or likely to be used in any dairy, shall be deodorized and removed by the owner of the property upon which the accumulation or deposit is situated within twenty-four hours of notice given by the Council or one of its officers.

30. No person shall keep any animal or any geese, ducks, or poultry in such a manner as to pollute any water used or likely to be used by man for drinking or domestic purposes, or for manufacturing drinks for the use of man, or used or likely to be used in any dairy so as to endanger the health of any person using such water or drinks or milk or other produce of the dairy.

PART VI.—DRAINAGE OF BUILDINGS.

31. Every person erecting or causing to be erected any new building shall cause the foundation thereof and the ground over which the building is to be placed to be rendered dry, sound, and well drained, so that no water, soakage, or damp shall lodge there.

32. Every owner of a building shall cause the same to be provided with proper and sufficient drains so constructed as to prevent any nuisance arising therefrom, and to secure the healthfulness of the inmates of such building; and every tenant of a building under a lease of which fourteen years or upwards is unexpired shall be deemed an owner within the meaning of this section.

PART VII.—DOUBLE-PAN SYSTEM.

33. This part of this By-law shall apply to and have operation within the following boundaries within the said Shire as hereunder described, namely:—Commencing at the north-west angle of allotment one, section one, parish of Mortlake, county of Hampden; thence east in a straight line to the north-east angle of allotment forty-five, section two, said parish and county; thence south in a straight line to the south-east angle of allotment twenty-five, section two, said parish and county; thence west in a straight line to the south-east angle of allotment eight, section twelve, said parish and county; and thence north in a straight line to the north-west angle of said allotment one, section one, the point of commencement.

34. No person shall within the said boundaries unless specially exempted by the said Council, upon the recommendation of the Health Officer and the Inspector of Nuisances, cleanse, empty, or manage any earth-closet or privy save and except at the times and in the manner prescribed by this part of this By-law.

35. The ordinary system of pans for night-soil hereinbefore prescribed by Part IV. of this By-law is hereby abolished within the boundaries aforesaid, and in lieu thereof every earth-closet shall be furnished with a double-pan service. Provided nevertheless that save and except as is hereby specially provided for the substitution of such double-pan service for the ordinary system all the general clauses and provisions contained and set out in the said Part IV. of this By-law, and not inconsistent with this Part of this By-law, shall be deemed to be and remain in full force and effect within the boundaries aforesaid.

36. The pans for such service shall be furnished by the said Council, and shall be and remain the property of the said Council; and every occupier shall permit such pans to be placed in every earth-closet where directed by the Inspector of Nuisances for the said Shire.

37. At least once a week, or so much more frequently as the said Council may from time to time direct, the pan in use in every earth-closet shall be closed with a tight-fitting lid and removed between such hours as the Council may direct in a suitable cart, and a pan cleansed with superheated steam or some other equally efficient means approved by the said Council left in its place.

38. The said Council shall have power in lieu of making a rate for the removal of night-soil and rubbish to make a charge on each occupier for such double-pan service as specified in this part of this By-law, and for pans supplied, and in default of payment such charge shall be recoverable in any Court of Petty Sessions.

39. No person within the meaning of this part of this By-law or other person shall use any closet-pan as a receptacle for depositing any house or yard rubbish or other material (save and except material for deodorizing purposes) other than night-soil, nor shall damage any such pan or lid in any manner whatever.

40. The night-soil removed shall be either rendered inoffensive or treated in a destructor, desiccator, or incinerator provided by the said Council, or be trenched or ploughed into the ground in such locality as may be provided by the said Council.

41. No occupier within the meaning of this part of this By-law shall allow the contents of the pan in use in his closet to accumulate so as to be within a distance of three inches from the top of the said pan.

42. In respect of any closets or sanitary conveniences erected or provided, or hereafter to be erected or provided by the Council in the Public Reserve, bounded on the north by Townsend-street, on the south-east by Shaw-street, and on the west by Officer-street, within the Township of Mortlake, under the control of the Council, and known as the Market Reserve, the Council shall, when leasing or licensing the said reserve to any person or corporation, pursuant to and in exercise of any powers in that behalf vested in the Council, have power to impose upon any such lessee or licensee as one of the conditions of such lease or licence, a condition that the lessee or licensee shall pay such charge as the Council shall from time to time fix and determine for the use of the said closets and conveniences and the removal of night-soil therefrom.

PART VIII.—PENALTIES.

43. Every person found guilty of any offence against this By-law, or of committing any breach thereof, shall be liable to a penalty not exceeding Ten pounds for every such offence or breach, or in a case of a continuing breach, a penalty not exceeding Five pounds for every day during which such breach shall be committed or continued. Provided that the Justices before whom any penalty is sought to be recovered may order the whole or part only (not being less than Five shillings) of such penalty to be paid, and every person so found guilty shall be liable to the respective penalties aforesaid, notwithstanding that the Council of the Shire may be empowered to remedy such breach and whether such Council has or has not exercised the power.

The common seal of the President, Councillors, and Ratepayers of the Shire of Mortlake was hereunto affixed this second day of May, One thousand nine hundred and thirteen, in the presence of—

(SEAL.) T. W. BAILEY, President.
THOS. MONTGOMERY, Councillor.
J. MCMEEKIN, Secretary.

Resolution for passing the above By-law was agreed to by the Council of the Shire of Mortlake on the fourth day of April, 1913, and was confirmed by the said Council on the second day of May, 1913.

The foregoing By-law was allowed and confirmed by the Board of Public Health in and for the State of Victoria (it having been first certified that notice of the intention to apply for such confirmation had been given in the Shire for which the same has been made in the manner required by law) this twenty-third day of July, in the year of our Lord One thousand nine hundred and thirteen.

By order of the Board,

T. W. H. HOLMES,
Secretary.

Factories and Shops Acts.

IN compliance with an application in writing under the provisions of the *Factories and Shops Act 1912*, and after due inquiry, I, being the responsible Minister for the time being administering the said Act, do hereby suspend the operation of sub-section (1) of section 37 of the said Act in the

FACTORY OR WORK-ROOMS OF CONNIBERE, GRIEVE, & CONNIBERE, 308 FLINDERS-LANE, MELBOURNE,

for a period of four weeks from the 16th July, 1913, upon the following express conditions, that is to say:—

1. That no person or persons shall employ in the said factory or work-rooms more than twenty females for more than forty-eight hours in any one week, and that the said twenty females shall not be employed for more than fifty-two and a half hours in any one week, nor for more than three hours beyond the ordinary working hours in any one day, in preparing or manufacturing articles for trade or sale.
2. AMENDMENT OF REGULATIONS RELATING TO THE LICENSING OF SAILING BOATS.

IN pursuance of the powers in that behalf conferred upon it by the *Marine Act 1890* and the Acts amending the same, the Marine Board of Victoria, with the approval of His Excellency the Governor of Victoria, by and with the advice of the Executive Council thereof, doth hereby make the Regulations following (that is to say):—

1. These Regulations may be cited as "The Passenger Sailing Boat Regulations 1913," and shall be read and construed as one with The Passenger (Sailing and Motor) Boat Regulations 1908 (hereinafter called the "Principal Regulations").

2. From and after the thirtieth day of September now next the proviso to section two (2) of the Principal Regulations is and the same shall stand repealed, and thenceforward all licences heretofore issued under any regulations whatsoever relating to the licensing of boats plying for hire for the carriage of passengers shall cease to have any further force or effect, and shall be deemed to be withdrawn, annulled, cancelled, and at an end.

3. Section eleven (11) of the Principal Regulations is hereby repealed, and the following shall be substituted therefor:—

"11. *Duration of Licence*.—A licence issued in respect of any boat whether a sailing boat motor boat or motor sailing boat shall, unless sooner cancelled by the Marine Board, continue in force from the date of the issue of the same until the 30th day of September then next and no longer."

4. Schedule XIV. to the Principal Regulations is hereby repealed, and the following shall be substituted therefor:—

"SCHEDULE XIV.

Licence for a Passenger Sailing Boat.

"The Marine Board of Victoria, in pursuance of the powers vested in it by the *Marine Act 1890* and Acts amending the same, doth hereby licence the Sailing Boat numbered _____ and owned by _____ of _____ to ply or be let out for hire or valuable consideration and to carry passengers within the limits of the Port of _____, subject to the provisions of the Marine Acts and to any rules or regulations made or to be made thereunder, or to any amendment thereof.

"This Licence shall unless sooner cancelled by the Marine Board, be in force until the 30th day of September, 19____, and no longer.

"Dated at Melbourne this _____ day of _____ 19____

"For the Marine Board of Victoria—

"Secretary."

The foregoing Regulations were made and passed at a meeting of the Marine Board of Victoria, held this twenty-fifth day of July, in the year of our Lord One thousand nine hundred and thirteen.

FORTNIGHTLY LIST OF CROWN LANDS AVAILABLE.

THE undermentioned areas are available for application, as provided by various sections of the Land Acts, and all applications received on or before Wednesday, the 27th August, 1913, will be deemed to have been simultaneously made, but any application lodged after such date may be considered if received in time for inclusion in the advertisement in the Local Land Board.

Applications on proper form, accompanied by 5s. duty stamp uncancelled (registration fee), may be delivered or forwarded by post to the Local Land Officer, or to any Crown Lands Office in Victoria.

Applicants may obtain from Local Land Officers or the Enquiry Office, Lands Department, Melbourne, a certificate authorizing the issue by the Railway Department of a return ticket at concession fares to enable them to inspect a valuable area or to attend Local Land Boards. Specially reduced rates are also allowed for a selector when granting an allotment for removal of his family and belongings to the land.

Marked plans of any particular area, application forms, a pamphlet explaining various sections of the Land Acts, and any further information may be obtained from the Enquiry Office, Lands Department, Melbourne, and Land Officers, Alexandra, Ararat, Bairnsdale, Ballarat, Beechworth, Benalla, Bendigo, Geelong, Hamilton, Horsham, Melbourne, Omeo, Sale, Seymour, Stawell, St. Arnaud, and Warracknabeal.

Department of Crown Lands and Survey,
Melbourne, 30th July, 1913.

H. MCKENZIE,
Commissioner of Crown Lands and Survey.

Land Act 1911, Section 22.

SCHEDULE OF ALLOTMENTS.

MALLEE LANDS AVAILABLE FOR APPLICATION AS SELECTION PURCHASE ALLOTMENTS.

THE land is situated on the east side of the Mildura Railway line, between Ouyen and the north end of Lake Tyrrell.

Applications (with uncanceled Victorian duty stamp of 5s., or postal note for same amount, affixed) must be made on the usual form, and delivered or forwarded by post to any Local Land Office, or to the Secretary for Lands, Melbourne, on or before Saturday, 30th August, 1913.

Not more than one allotment can be included in any application, but any number of applications may be lodged, with the prescribed fee in each case.

Applicants will be hereafter notified as to the date and place of hearing of their applications by Local Land Board.

The land will be granted under selection purchase lease, and at the end of six years, if the residence, cultivation improvement, and all other conditions have been complied with, the lease will be endorsed under the seal of the Board of Land and Works to the effect that such conditions have been complied with, and at any time within the remaining period of 14 or 34 years (as the case may be) a Crown Grant will be issued on payment of the full amount of the purchase money.

The survey fee must be paid within 28 days of demand, and will range from £9 to £11 per allotment.

The lease will contain (*inter alia*) conditions to the effect as follows:—

That substantial and permanent improvements shall be made on the land if in the second class to the value of 2s. 6d. per acre before the end of the second year from the date of the lease, another 2s. 6d. per acre before the end of each year of the third and fourth years, and the balance of 7s. 6d. per acre before the end of the sixth year of the lease.

If in the third class, improvements to the value of 5s. per acre must be made on the land before the end of the third year from the date of the lease, and the balance of 5s. per acre before the end of the sixth year of the lease.

The first half-year's rent and lease-fee must be paid prior to issue of lease.

That the lessee shall go into residence on the land within twelve months after the date of the lease, and shall reside for at least three years and nine months on, or within five miles of, the land during the first six years of the term of the lease, and shall also clear and cultivate at least one-fourth of his allotment within two years of obtaining a permit to occupy the land.

That the lessee shall not transfer, assign, mortgage, or sublet, or part with the possession or grant the use of the whole or any part of the allotment during the first six years of the term of the lease, and that after the first six years of the term of the lease the lessee shall not sell, transfer, assign, mortgage, or sublet the whole, or any part of the allotment unless and until the lease has been endorsed under the seal of the Board to the effect that all the conditions and covenants of the lease during the first six years thereof have been complied with.

No person who already holds or has previously selected the area of Mallee land allowed by classification will be eligible to apply.

The total area of Mallee land which may be selected is 640 acres if in the first class, or 1,000 acres if in the second class, or 1,280 acres if in the third class. Any further area (limited as by the next succeeding paragraph) can be obtained only by purchase from other persons.

That a special condition shall be inserted in the lease and the Crown Grant, providing that the land referred to therein shall at all times be maintained and used for the purpose of residence or agriculture and grazing, and that no person will be permitted to subsequently acquire or hold, or have an interest in, more than 1,000 acres, if the land be in the first class, or more than 1,600 acres, if the land be in any other class.

That the lessee or grantee or owner shall preserve the timber on, or plant an area of, not less than 3 per cent. of the total extent of his holding. (N.B.—Along the exposed boundary lines, viz., the western and southern, would be preferable).

No person, unless specially authorized, will be permitted to clear timber from any portion of areas retained for the purposes of roads and windbreaks.

Plans may be obtained at the Enquiry Office, Lands Department, Melbourne, and at Land Offices, Alexandra, Ararat, Bairnsdale, Ballarat, Beechworth, Benalla, Bendigo, Geelong, Hamilton, Horsham, Omeo, St. Arnaud, Stawell, Seymour, Sale, and Warracknabeal, and may be inspected at the principal railway stations throughout the State.

Applicants may obtain from a Local Land Officer, or the Enquiry Office, Lands Department, Melbourne, a certificate authorizing the issue, by the Railway Department, of a ticket over the Victorian Railways only, at excursion fares, to enable them to inspect the land, or to attend the Local Land Board.

H. McKENZIE,

Commissioner of Crown Lands and Survey.

Tenders to be addressed to the Honorable the Commissioner of Public Works, and marked "Tender for—."

F. HAGELTHORN,
Commissioner of Public Works.

Melbourne, 30th July, 1913.

SUPPLY OF COIR YARN FOR THE PENAL DEPARTMENT.

TENDERS will be received until Eleven o'clock a.m. on Tuesday, the 26th August, 1913, from persons willing to supply Coir Yarn to the Penal Establishment, Pentridge, as per Schedule No. 37. Delivery to be made on or about 1st December, 1913.

Preliminary deposit, £3; security, £30. Samples (for quality) of the yarn offered must be submitted by tenderers.

Printed forms of tender, showing the quantity required, specifications, and conditions of contract, can be obtained at the Office of the Secretary to the Tender Board, Treasury, Melbourne.

Tenders must be accompanied by the preliminary deposit, as shown above, in bank notes, or a bank draft in favour of the Secretary to the Tender Board (cheques will in no case be received), which will be returned within ten days to unsuccessful tenderers on their application.

Security will be required, either in Victorian Government Debentures, Savings Bank Deposit Book, or Bank Deposit Receipt in favour of the Secretary to the Tender Board, or cash deposit, as the tenderer may elect.

The security must be completed and contract signed within five days of acceptance of the tender, failing which the contract may be again advertised or another tender accepted.

In the event of the tenderers withdrawing their tenders before notification of acceptance, or failing to take up their accepted tender within the prescribed period after notification of acceptance, the preliminary deposit will be forfeited, and in addition they may be disqualified from tendering or holding any future contract for Government supplies for a period of twelve months, such disqualification to date from the notification of acceptance of the tender.

The Government will not necessarily accept the lowest or any tender.

The conditions of contract and stipulations of advertisement are those for General Stores for 1913-14, published in the *Government Gazette* of 9th April, 1913, page 1573.

Tenders, enclosed in an envelope, and having the words "Tender for Coir Yarn" written thereon, must be deposited in the Tender-box at the Pay Office, Treasury, Melbourne.

A. J. PEACOCK,
Acting Treasurer.

In this By-law unless inconsistent with the context or subject matter—

- “Approved” means approved by the surveyor.
- “Area” applied to a building means the superficies of a horizontal section thereof, made at the point of its greatest surface inclusive of the external walls and of such portions of the party walls as belong to the building.
- “Basement story” means any story of a building which is under the ground story.
- “Bressummer” means a beam of reinforced concrete, or a wrought-iron or steel-girder which carries a wall.
- “Builder” means the master builder or other person employed to execute any work or if there is no master builder or other person so employed then the owner of the building or other person for whom or by whose orders such work is to be done.
- “Building” means any structure capable of affording protection or shelter either roofed or intended or adapted to be roofed and whether enclosed by walls or not; but does not include any greenhouse aviary fence or other similar building or erection.
- “Cement concrete” means an approved mixture of high-grade Portland cement clean sharp sand and aggregates consisting of fragments or particles of hard stone or gravel thoroughly clean and entirely free from combustible matter and from volcanic scoriz, furnace slag coke breeze or any material containing any trace of sulphur.

"Concrete-cased steel" means a form of construction in which the steel is designed to support or resist the whole of the loads and stresses, of whatever kind arising in the structure such steel being encased in and entirely covered with cement concrete as hereinafter provided such concrete being designed as taking no part in the support of and resistance to the loads and stresses.

"Cross Wall" means any internal wall not being less than two-thirds the thickness of the external or party walls and in no case less than nine inches in thickness built in connexion with any external or party wall and bonding them together.

"Cubical content" applied to the measurement of a building means the space contained within the external surface of its walls the upper surface of the floor of its lowest story and the ceiling or tie of its topmost story.

"External Wall" means an outer wall or vertical enclosure of any building not being a party wall.

"Fire resisting" used with reference to any materials includes:—

- (a) Brickwork constructed of good bricks well burnt hard and sound properly bonded and solidly put together with good lime or cement mortar; and
- (b) Any stone suitable for building purposes by reason of its solidity and durability; and
- (c) Sheet metals when used for roof coverings; and
- (d) Iron and steel and (when used for columns girders or wall-framing) encased in cement concrete or other incombustible or non-conducting external coating as hereinafter provided; and
- (e) Slate tiles brick and terra-cotta when used for covering or corbels; and
- (f) Concrete composed of broken bricks stone chippings or ballast and lime cement or calcined gypsum.

"Foundation" applied to a wall having footings means the solid ground or artificially-formed support on which the footings of the wall rest.

"Frame-building construction" means the form of construction in which the design provides that the whole of the vertical forces due to the weight of the structure itself the whole of its structural contents and the whole of the added loads hereinafter stipulated are carried down to the foundations solely by means of columns (comprising wall columns and where requisite interior columns) in such a manner that neither the external nor the internal walls if any are required to assist in supporting such loads.

"Ground story" means the story of the building to which there is an entrance from the outside on or near the level of the ground and where there are two such stories then the higher of the two: Provided that no story of which the upper surface of the floor is more than six feet below the level of the adjoining pavement shall be deemed to be the ground-story.

"Height" in relation to any building means measurement taken from the level of the footway (if any) immediately in front of the centre of the face of the building or when there is no such footway from the level of the ground before excavation to the level of the ceiling or tie of the topmost story.

"Hoarding" includes any erection or structure erected built or constructed or used for the purpose of writing printing painting pasting or posting thereon notices advertisements placards or other printed painted or written matter or any erection or structure being of a height greater than six feet measured from the level of the ground to the highest point of such erection or structure upon which notices advertisements placard or other printed painted or written matter are printed written painted pasted or posted but does not include a hoarding erected in a street for the purpose of carrying on building operations only or dwelling house or shop or any fence seven feet or under in height.

"Isolated" used with reference to a building means that the building is distant from the boundary of the land of any adjoining owner for a space of not less than ten feet.

"Level of the ground" means the mean level of the ground as determined by the surveyor.

"New building" includes—

- (a) Any building erected or commenced to be erected after the date of this By-law coming into force; and
- (b) Any building which for more than half its cubical content has been taken down or destroyed by fire tempest or otherwise

and is re-erected or commenced to be re-erected wholly or partially on the same site; and

(c) Any space between wall and buildings which is roofed or commenced to be roofed after the date of this By-law coming into force; and

(d) Any building or erection removed or transported wholly or in sections into the municipal district or from one part of the municipal district to another part of the same after the date of this By-law coming into force.

"Party wall" means a wall built to be used as a separation of two or more buildings or a wall forming part of a building built upon the dividing line between adjoining premises for their common use.

"Prescribed" means prescribed by this By-law.

"Reinforced concrete" means a form of construction in which cement concrete is reinforced with steel these materials being so combined that the steel will take up and resist substantially the whole of the tensional stresses and assist in the resistance to shear while the concrete will take up and resist substantially the whole of the compression stresses and assist in resistance to shear.

"Square" applied to the measurement of any area means the space of one hundred square feet.

"Steel" means "mild steel" of a standard equal to that prescribed by the British Board of Trade.

"Surveyor" means the building surveyor or other proper officer for the time being of the municipality.

"Topmost story" means the uppermost story in a building whether constructed partly in the roof or not.

"Treasurer" means the treasurer for the time being of the municipality.

2. For the purpose of this By-law buildings shall be divided into three classes—

Class A.—"Domestic class" which includes all buildings subject to small vibration and light loading of floors such as residences residential shops offices hotels hospitals private schools club-houses and studios.

Class B.—"Warehouse class" which includes all buildings subject to vibration and heavy loading of floors such as warehouses factories mills and places for the storage and manufacture of goods.

Class C.—"Public building class" which includes all buildings designed to accommodate an assemblage of people such as theatres churches chapels assembly halls museums libraries and public schools the large assembly rooms of hotels offices exceeding eight hundred square feet in area and hospital and school lecture theatres but not the residential and office portion of such last-mentioned buildings.

PART II.

(1) Notice of Intention to Build and Lodgment of Plans.

1. No builder shall commence any building erection or structure or any addition or alteration to any building erection or structure without first delivering at the office of the surveyor a written notice of such intention three days before so commencing, and producing to the surveyor properly-prepared plans and specifications of such building erection structure addition or alteration and all stress and other calculations concerning same together with a tracing or copy of the floor plans of such building erection structure addition or alteration and also details of dimensions sizes and qualities of all materials and enumerating any old materials proposed to be used in the construction of same. Such plans and details may be inspected on payment of the fee set forth in Schedule A to this By-law.

2. The original plans and specifications when approved shall be returned to the owner or his agent but the tracing or copy of the plans and details of materials shall be retained by the surveyor.

(2) Payment of Fees and Permit.

3. No builder shall commence any building erection structure or any addition or alteration to any building erection or structure without having first obtained from the surveyor a written permit for the commencement of same and without having first paid to the treasurer the fees in respect thereof set forth in Schedule A to this By-law, having regard to the class of building erection or structure or any addition or alteration proposed to be built or erected. In the event of the sum so paid being found to exceed the total amount of fees finally payable at or before the completion of such building erection structure addition or alteration the amount paid in excess of such final sum shall be refunded to the person paying the same. Such permit shall only remain of force and effect for twelve months from date of issue of same.

(3) *Duties of Surveyor.*

4. The surveyor shall upon the receipt of any such notice as aforesaid and also upon any work being observed by or made known to him which is affected by the provisions of this By-law, but in respect of which no notice has been given from time to time during the progress of any work affected by such provisions as often as may be necessary for securing the due observance of such provisions survey any such building structure erection or work and cause all such provisions to be duly observed.

5. The surveyor, at all reasonable times before or after the completion of any building structure erection or work affected by any of the provisions of this By-law or by any terms or conditions on which the observance of any such provisions may have been dispensed with may enter and inspect such building structure or work.

6. The surveyor may for the purpose of ascertaining whether any building structure or erection is in such a situation or possesses such characteristics as are required in order to exempt it from the operation of any of the provisions of this By-law at all reasonable times enter any premises and he may do therein all such things as are reasonably necessary for that purpose.

(4) *General Provisions as to Buildings.*

7. A builder shall not erect, build or construct, or cause to be erected, built or constructed, any wooden building or structure within a distance of fifty feet from any street line unless the whole of the said building or structure covers an area of one thousand eight hundred square feet at least, exclusive of all detached outbuildings, and unless the external walls of such buildings or structure are at least five feet from the side boundaries of the land upon which such wooden building or structure is being built, and twenty feet from the street line.

8. No building used or intended to be used as a dwelling house shall be erected, the front of which would be nearer at any point than twenty feet to any street, the width of which is less than thirty-three feet. Nothing in this or the next preceding clause shall apply to any building or structure built or constructed fronting any of the streets set forth in Schedule C to this By-law.

9. No person shall use as a dwelling any building which may hereafter be erected on land not having a frontage to a street which street is not less than twenty-five feet wide.

10. No builder shall erect, build or construct, or cause to be erected, built or constructed, any building or structure of materials other than brick, stone or concrete, on land abutting on any of the streets set out in Schedule B.

11. As to streets set out in Schedule C, wooden buildings may be erected at a distance of not less than eight feet from the building line of such streets and five feet at the least from the side boundaries of the land upon which such wooden buildings or erection is being built, but if one external side wall is built of brick, stone, or concrete, having a parapet eighteen inches above its own adjoining roof or gutter, then such limited distance of five feet may as to such brick, stone, or concrete external wall be reduced, provided that the distance from the wall (unless the same be of brick, stone, concrete, or other fireproof material) of any other building not in the same occupation be not less than five feet, but in all other respects such buildings must conform to provisions of this By-law as to wooden buildings.

12. No builder shall erect, build or construct, or cause to be erected built or constructed, any building or structure which is intended to be used, or which shall or may be used as a shop, office, public building or warehouse unless the external walls thereof shall be brick, masonry or concrete.

13. The following buildings and works shall be exempt from the operation of this By-law:—

- (a) All buildings on land the property of His Majesty or the Victorian Railways Commissioners.
- (b) All buildings on land the property of the Mayor, Councillors and Citizens of the City of St. Kilda.
- (c) All temporary offices and sheds used by builders during the erection of any building, at or about the site of such building for a period not exceeding twelve months.

14. All distances stipulated for any building from any boundary or other building shall be measured as from the nearest part or projection of such building or structure to such boundary or nearest part or projection of the other building or structure.

15. If at any time any building erected or constructed at or prior to this By-law coming into force, shall by reason of any alteration or alterations thereto as to any boundary made subsequent to this By-law contravene any of the provisions such building shall in all respects be subject to the provisions hereof as fully as if it had been erected in contravention thereof.

(5) *Out-buildings.*

16. Workshops and out-buildings (except stables) of not more than one square in area, and not exceeding eight feet in height and not containing a fireplace or a wooden floor may be erected on any boundary if the roof and walls thereof are covered with galvanised corrugated sheet-iron or other approved fire-resisting material provided that such out-buildings are distant at least ten feet from any building used as a dwelling-house on the same allotment or any allotment adjoining, save and except that such workshops and out-buildings may not be erected within a distance of eighty feet of the frontage to any road or street being a public highway.

17. Out-buildings exceeding one square in area including roofed structures or erections for storage of timber or other materials shall be subject to all the conditions and limitations in regard to wooden buildings.

PART III.

Materials.

1. Brick used in any building shall be good, hard and well burnt. When old bricks are used in any wall they shall be thoroughly cleaned before being so used and shall be whole and good hard well-burnt bricks.

2. Sand used for mortar in any building shall be clean and sharp free from loam dirt and salt or organic matter.

3. Lime mortar shall be composed of freshly-burnt lime and sand in the proportions of at least one part by measure of lime and not more than three parts by measure of sand. All lime intended to be used for mortar shall be thoroughly burnt of good quality and be properly slacked before being mixed with the sand.

4. Cement mortar shall be composed of good Portland cement or other cement of equal quality approved of by the surveyor mixed with clean sharp sand in the proportions of at least one part by measure of cement and not more than four parts by measure of sand.

5. Concrete for foundations shall be composed of clean broken stone or other hard material approved by the surveyor broken to a gauge not exceeding two inches and sand well mixed on a wooden floor with freshly-burnt lime hydraulic lime or cement in the proportions of one part by measure of lime to not more than five parts or one part of cement to not more than six parts of the other materials.

6. All timbers and wooden beams used in any building shall be good sound material free from rot large or loose knots shakes or any other imperfections whereby the strength may be impaired and shall be of such sizes dimensions and spacings as set forth in Schedule D of this By-law.

PART IV.

Excavations, Foundations and Footings.

1. All excavations for footings of buildings other than wood shall be taken down to a solid bottom to be approved by the surveyor but not less than an average of eighteen inches in depth below the natural surface of the ground, except in the case of special construction of footing approved by the surveyor, and no footing or foundation shall, except with the written consent of the surveyor, be of less width than eight inches wider than the wall standing thereon. No footing or foundation shall be commenced to be placed in position until at least twenty-four hours' notice shall have been given to the surveyor that the trenches are ready for inspection.

2. The surface of the ground between all walls of buildings shall be levelled up higher than the finished surface outside and evenly graded to prevent any accumulation of water or drainage beneath the floors.

3. Every pier and story post as well as every external wall and every party wall shall have footings.

4. Every building must have a footing which by itself or with a foundation is at least twenty-one inches in height.

5. In the case of wooden buildings where wooden stumps are used for the foundations, such stumps shall consist of red-gum or jarrah, and be not less than four inches by four inches, spaced not more than four feet apart, sunk not less than eighteen inches below the natural surface of the ground, and shall rest on sole plates of a size and upon a bottom approved by the surveyor.

PART V.

Thickness of External and Party Walls for all Brick Stone or Concrete Buildings.

1. The external and party walls of buildings of the domestic and warehouse classes respectively shall not be built if in lime mortar of less thickness than as set forth in Schedule E to this By-law for their several grades, which grades are determined according to the heights and lengths of such external and party walls such lengths being measured from the centre of one return wall to another or from the centre of a return wall to a cross wall.

2. No cellar wall shall be less than nine inches in thickness. But where a cellar wall is in the opinion of the surveyor too great in length for such thickness it shall be increased up to eighteen inches or be strengthened by piers.

3. When the piers between the openings in any wall are less in area than one-third of the area of such wall, if there were no openings, the piers shall be increased in thickness to an extent determined by the surveyor or the piers built in cement mortar, in which latter case the area of the piers need not exceed one-fourth of such area of the wall. This provision shall not apply to shop fronts or show windows approved by the surveyor.

4. Where piers are specified for any story of a wall that story shall be strengthened by building piers projecting four and a half inches; such piers shall not be spaced further apart than twelve times the thickness of the wall and in no case more than twelve feet apart and shall not be less in width than one-fourth of their distance apart.

5. In the domestic and warehouse classes of buildings no story shall be of greater height from floor to lowest part of ceiling or from floor to roof plate than fourteen feet.

7. Where it is not desired to have projecting piers the wall may be built flush, if built four and a half inches thicker than specified in Schedule E to this By-law without altering the rating of the stories below it.

8. In the case of a party wall any projecting piers required by Schedule E to this By-law shall be built on both sides of the wall or the whole wall shall be built four and a half inches thicker than specified in the tables in the said Schedule E appropriate to the class of building to which it belongs. In either case the wall shall be built central on the wall below.

9. If walls are built of cement mortar instead of lime mortar they may be of thickness one grade lower than those set forth in Schedule E to this By-law.

10. Where it is desired to alter or raise or increase the size of an old building if the walls are in the opinion of the surveyor sound and well consolidated for the purpose and are approved by the surveyor and the new work is to be built in cement mortar the surveyor shall have power to treat the whole building as if built in cement mortar and approve of walls of thickness one grade lower than those given in Schedule E to this By-law.

11. When any building is raised in accordance with the last preceding clause, a steel bond shall be built in on top of the old wall such bond to be three-sixteenths of an inch in thickness and hooked together at all intersections the width to be equal to one and a half inches for every four and a half inches in thickness of the wall built upon it if so directed by the surveyor.

12. In buildings within Class C of several stories the external or surrounding walls shall not be of less thickness than those specified in Table B in Schedule E to this By-law for similar heights and lengths, and if the span of the floor-girders or roof-girders or trusses exceed thirty feet, piers of an extra thickness of at least four and a half inches shall be provided in number and width to the satisfaction of the surveyor.

13. In buildings within Class C—

(a) Where the ceilings or roofs are carried on trusses or girders or otherwise the thickness of the surrounding walls shall not be less than those specified in Table C in Schedule E to this By-law.

(b) Where the length of the wall exceeds one hundred feet or in case there shall be one or more stories built above such hall theatre or like building the thickness of the walls shall be increased four and a half inches or the wall must be strengthened by piers or buttresses to the satisfaction of the surveyor.

(c) Where solid masonry or brick-in-cement buttresses are employed and placed sixteen feet or less apart and extended to the foot of the trusses or girders above or if iron or steel pillars are inserted in the walls in lieu of masonry and at distances not exceeding eighteen feet apart the thickness may be reduced in proportion to the increase of strength afforded by such buttresses or pillars but in no case shall any wall be less than thirteen and a half inches thick in the topmost portion and four and a half inches shall be added going downwards for each story or for each gallery or for each twenty-five feet in height of wall. Where iron or steel pillars are introduced in such walls the brickwork round the pillar shall be bonded into that of the connecting walls and each of such pillars shall have not less than nine inches of brick wall around its extreme dimension.

(d) In the case of buildings divided into naves and aisles by walls of which the upper portions are external and the lower portions internal and pierced by arched openings carried on piers or columns the thickness of the nave walls shall not be less than that specified in Table C in Schedule E to this By-law for external and surrounding walls of similar heights lengths and

spans and the external walls of the aisles shall be of the same thickness unless strengthened by buttresses or piers to the satisfaction of the surveyor in which case the walls may be four and a half inches less in thickness.

14. Where a wall is built in cement mortar or with projecting piers the height may be one-fifth greater than shown in Schedule E to this By-law.

15. Where it is proposed to convert or alter any building erected for a purpose other than a public purpose into a public building such conversion or alteration shall be carried into effect in such manner as may be approved by the surveyor and the provisions of this By-law shall apply to the public buildings thereby formed.

16. Except where otherwise provided in this By-law all external party and cross walls shall be constructed of brick masonry or concrete and shall be subject to all the provisions of this By-law.

17. Where a cross wall becomes in any part an external wall such cross wall shall be of the thickness required for an external wall of the same height and length and belonging to the same class of building.

18. No building of the warehouse class shall extend to more than four hundred and fifty thousand cubic feet unless divided by party walls in such manner that no division thereof extends to more than four hundred thousand cubic feet.

19. No addition shall be made to any building of the warehouse class or to any division thereof so that the cubical content of any such building or division shall exceed four hundred thousand cubic feet unless the whole construction thereof is of fireproof material and the thickness of the walls is of the extra first rating.

PART VI.

Construction of Buildings.

Unless where otherwise sanctioned in this By-law all buildings and structures shall comply with the following conditions:—

Walls.

1. Every external party and cross wall constructed of brick stone concrete or reinforced concrete or other similar material approved of by the surveyor shall be properly bonded and solidly put together with mortar.

2. In the case of walls that are built as hollow walls the same quantity of stone brick or concrete shall be used in their construction as is provided in this By-law for solid walls and no hollow walls shall be built unless the parts of the same are connected by proper ties either of brick stone or iron placed not more than three feet apart in every fourth course. No hollow wall shall be greater in superficial strength than two squares in any one story unless strengthened by a cross wall fireplace or projecting pier in each such area and to the satisfaction of the surveyor.

3. All hollow walls shall be bonded longitudinally by the inlaying of hoopiron or other approved reinforcing material one strand to each half brick in thickness of wall. The strands shall be laid for the full length of the wall and turned up and down at ends and openings and interlaced at angles. The cavity separating the inner and outer parts of a hollow wall shall in no case be of a width greater than two and a half inches, nor less than one and a half inches.

4. Hollow concrete blocks may be used for the construction of walls of buildings of one story provided that such walls are not required by these regulations to exceed nine inches in thickness.

The thickness of the concrete at face and back of such blocks shall be not less than two and a half inches thick with four inch cavity between and the thickness of the cross ties shall be not less than two inches for the full height of the block.

Ties shall be spaced not more than fifteen inches apart. Blocks requiring to be built up of special sections shall be rebated dovetailed or tongued together to the satisfaction of the surveyor.

Concrete blocks shall not be used green and unless special permission is obtained no block shall be used within fourteen days from date of construction. The blocks shall be bedded and jointed in cement mortar. Joists and beams shall not be let into hollow concrete walls.

5. Where the external wall of any building is erected on the boundary of the land on which the same stands or where the overhanging eaves or gutter of such building would be within two feet of such boundary then the external wall of such building shall be carried up to form a parapet fifteen inches at least in height above the roof or above the highest part of any flat or gutter as the case may be.

6. In buildings of the warehouse class the thickness of such parapet shall be equal to the thickness of such wall in the topmost story and in any other building of a thickness of eight and a half inches at the least.

7. Every party wall shall be carried up for a height of fifteen inches above the roof measured at right angles to the slope thereof or fifteen inches above the highest part of any flat or gutter as the case may be and of a

thickness (in buildings of the warehouse class) equal to the thickness of such wall in the topmost story, and in any other building of a thickness of eight and a half inches at the least.

8. No verandah shall approach nearer than five feet to any adjoining property unless built wholly of fire-resisting material or separated from any adjoining verandah or premises by a wall eight and a half inches at least in thickness and projecting four inches at least beyond the face of the woodwork.

9. Every party wall shall be carried up of the thickness aforesaid above any turret dormer lantern-light or other erection of combustible materials fixed upon the roof or flat of any building within four feet from such party wall and shall extend at the least fifteen inches higher and wider on each side than such erection and every party wall shall be carried up above any part of any roof opposite thereto and within four feet therefrom.

10. Every wall and fireplace constructed of brick stone or other similar materials except reinforced concrete construction shall have a damp-proof course of asphalt or other impervious material laid throughout its entire length and thickness in a position to be approved by the surveyor, but such damp course may be turned vertically upwards within the thickness of the wall to a higher level on the outside.

Where owing to a change of level it is not practicable to lay the same on a level plane throughout the walls of a building the same may be laid on two or more level planes.

Where a damp-proof course is laid on more than one level plane the ends of the damp-proof courses on each level shall overlap the ends of the damp-proof course on the next level and each of such layers shall be connected by vertical connexions of the same material.

Recesses and Chases.

11. Recesses may be made in external walls provided—

(a) That the backs of such recesses shall not be of less thickness than eight and a half inches.

(b) That over every recess so formed there shall be an arch of at least two rings of brickwork or an approved lintel extending in each case through the whole thickness of the wall. Every such lintel shall have a bearing on each side of such recess of at least four and a half inches if the width of the recess do not exceed three feet and otherwise of at least nine inches.

(c) That the area of such recesses and openings shall not, taken together, exceed one-third of the whole area of the wall of the story in which they are made. No recesses shall be made under girders or points of special pressure. The word "area" as used in this clause means the area of the vertical face or elevation of the wall or recess to which it refers.

12. Recesses in party walls shall not come within thirteen and a half inches of the inner face of the external walls.

13. In an external or party wall a chase shall not be made wider than thirteen and a half inches nor more than four and a half inches deep from the face of the wall nor so as to leave less than eight and a half inches in thickness at the back or opposite side thereof and a chase shall not be made within a distance of seven feet from any other chase on the same side of the wall nor within thirteen and a half inches from the nearest external wall.

Projections from Buildings.

14. No coping, cornice, string-course, fascia, window, window-dressing, portico, balcony, balconette, bridge connecting buildings, balustrade and architectural projection or decoration shall project beyond the building line of any street or alley unless it be of brick, tile, stone, artificial stone, slate, cement, or fire-resisting material other than wood.

15. No projection shall extend more than three inches beyond the building line at any height less than ten feet from the level of the public footpath.

16. Every porch, gangway, outside landing and outside steps shall be of fire-resisting material, and shall not project beyond the building line of any street or alley.

17. Every balcony, cornice or other projection of or from any external wall shall be tailed into the wall of the building, and weighted or tied down to the satisfaction of the surveyor, and no cornice, window or balcony shall, without special permission of the council, exceed four feet in projection over the public way in streets over thirty-three feet in width or more than two feet in streets of thirty-three feet or less in width.

18. No shop front shall exceed two stories in height above the level of the pavement of the public footpath in front of the shop. No part of the woodwork of any shop front shall be fixed nearer than four inches to the centre of the party wall where the adjoining premises are separated by a party wall, or nearer than four inches to the face of the wall of the adjoining premises where the adjoining premises have a separate wall, unless a

pier or corbel of stone, brick, or other incombustible material, four inches wide at the least, be placed as high as such woodwork, and projecting throughout an inch at the least in front thereof between such woodwork and the centre of the party wall or the separate wall as the case may be. Woodwork wholly encased with metal not less than twenty-two gauge may be fixed flush with the face of the wall.

Woodwork in External Walls.

19. All woodwork fixed in any external wall except bressummers and story posts under the same and frames of doors and windows of shops on the ground story of any building shall be set back four inches at the least from the external face of such wall, but frames of doors and windows of redgum or other approved hardwood may be fixed flush with the face of any external wall.

Bressummers.

20. Every bressummer shall have a bearing in the direction of its length of four inches at least at each end upon a sufficient wall, pier of brick or stone, or upon an iron story post fixed on a solid foundation, and the surveyor shall have power in his discretion to require that every bressummer shall have such story-posts iron columns stanchions or piers of brick or stone or corbels as may be sufficient to carry any superstructure. Every bressummer bearing upon a party wall shall be borne by a templet or corbel of stone or iron tailed through at least half the thickness of the wall and of the full breadth of the bressummer.

21. At each end of every metallic bressummer a space shall be left equal to a quarter inch for every ten feet and also for any fractional part of the length of such bressummer to allow for expansion.

22. The ends of wooden beams, wood plates or joists bearing on party walls shall be at least one and a half inches distant from the centre line of such party walls.

Flats and Roofs.

23. The flat gutter and roof of every building and every turret dormer lantern-light skylight or other erection placed on the flat or roof thereof, except wooden cornices and barge boards to dormers not exceeding twelve inches in depth, and doors, door-frames windows and window-frames in such dormers lantern-lights skylights or other erection, shall be externally covered with slates tiles metal or other fire-resisting materials.

Lighting of Cellars, &c.

24. Where the lowermost rooms or cellars in any building (being rooms of which the surface of the floor is more than four feet below the level of the nearest footpath street or lane) cannot be otherwise lighted the same may be lighted by means of apertures or areas extending under the footway. Such apertures or areas shall be enclosed by solid masonry concrete or brickwork surmounted by a proper stone or metal kerb and covered with an immovable horizontal iron frame with glass cubes or prisms level with the surface of such footway and secured to the kerbing by being run thereto with lead or zinc to the satisfaction of the surveyor. No such aperture area or grating shall extend from the line of building under the footway more than two feet nor shall they be more than four feet in length except with the written permission of the surveyor.

Closets and Urinals.

25. No closet or urinal shall be erected or remain in front of any dwelling or building facing a public highway or at a less distance than ten feet from any street or lane or from the door or window of any dwelling or at a less distance than two feet from the boundary of land not in the same occupation unless the wall on the boundary be built of brick or stone but such closets or urinals may be built abutting on any lane of a less width than sixteen feet.

Nothing in this clause shall apply to any closet or urinal forming part of a main building and connected to an underground sewerage system.

United Buildings.

26. Buildings shall not be united if when so united as to form one building they would not be in conformity with this By-law.

27. An opening shall not be made in any party wall or in two external walls dividing buildings which if taken together would extend to more than four hundred thousand cubic feet except with the approval of the surveyor; and proper fire-resisting doors shall be provided.

28. Whenever any buildings which have been united cease to be in the same occupation all openings made for the purpose of uniting the same in any party wall between the buildings or in any external wall shall be stopped up with brick or stone work not less in thickness than the party wall or the external wall (as the case may be) in which such openings were made and any timber not in conformity with this By-law placed in the wall shall be removed.

29. Whenever any buildings which have been united cease to be in the same occupation, the owner thereof shall forthwith give notice thereof to the surveyor and shall cause any openings made in the party wall to be stopped up as aforesaid.

Set of Chambers.

30. Separate sets of chambers or rooms tenanted by different persons shall, if contained in a building exceeding 3,600 square feet in area, be deemed to be separate buildings, and be divided accordingly as far as they adjoin vertically by party walls, and so far as they adjoin horizontally, each alternate floor shall be of fire-resisting material.

Alterations and Additions.

31. Where a party or external wall not in conformity with this By-law has been taken down burnt or destroyed to the extent of one half thereof (measured in superficial feet) every remaining portion of the old wall not in conformity with this By-law shall either be made to conform therewith or be taken down.

32. Whenever any addition to or alteration of or other work for any purpose in to or upon any building (except that of necessary repairs not affecting the construction of any external cross or party wall) shall be made or done such consequential alterations shall be made in such building as to make it when completed conform with the provisions of this By-law relating to new buildings.

PART VII.

Ventilation, Lighting, and Open Spaces.

1. Every person who builds or erects a new building shall so construct every room in the lowest story having a boarded floor that there shall be for the purposes of ventilation between the under side of every joist on which such floor is laid and the upper surface of the tarpaving or concrete with which the ground surface or site of the building is covered a clear space of two inches at the least in every part and not less than four inches between such undersides and the ground where the site is not tarpaved or concreted, and shall cause such space to be thoroughly ventilated by means of suitable and sufficient airbricks or by some other effectual method so arranged as to cause a through current of air to pass beneath the flooring. The surveyor may require the surface under the floor of any building or any part thereof to be tarpaved or concreted to his satisfaction.

2. No building shall be erected on any land so as to reduce the area of the land occupied or used solely therewith and in the same ownership and free from buildings to a less area exclusive of passages not exceeding three feet in width than such as will be in the proportion of eighty square feet for every hundred square feet of the area of the land over which whether on the ground floor or on any story are rooms other than such as are exclusively used for business purposes.

3. Every habitable room shall be of an average height of not less than nine feet from the floor to the ceiling, and shall contain not less than 700 cubic feet of space.

4. Every habitable room shall have one or more windows opening directly into the external air with a total superficies clear of the sash frames free from any obstruction to light equal to at least one-tenth of the floor area of the room and so constructed that a portion equal to at least one-twentieth of such floor area can be opened and the opening in such case shall extend to at least seven feet above the floor level. But a room having no external wall or a room constructed wholly or partially in the roof may be lighted through the roof by a dormer window with a total superficies clear of such frames free from any obstruction to the light equal to at least one-twelfth of the floor area of the room, and so constructed that a portion of such window equal to at least one-thirtieth of such floor area can be opened and the opening in each case shall extend to at least five feet above the floor level of such room or such room may be lighted by a lantern light or skylight of which a portion equal to at least one-thirtieth of the floor area can be opened.

5. Every habitable room constructed over a stable shall be separated from such stable by a floor rendered impervious to foul air.

PART VIII.

Chimneys, Flues, Fireplaces, and Heating Apparatus.

1. Chimneys built on corbels of brick stone or other fire resisting materials may be erected if the work so corbelled out does not project from the wall more than one and a half times the thickness of the wall measured immediately below the corbel but all other chimneys shall be built on solid foundations and with footings similar to the footing required in the case of external and party walls unless they are carried upon iron girders with direct bearings upon party external or cross walls to the satisfaction of the surveyor.

2. Chimneys and flues having proper soot doors of not less than forty square inches may be constructed at any

angle but in no other case shall any flue be inclined at a less angle than forty-five degrees to the horizon and every angle shall be properly rounded.

3. All soot doors shall be at least thirteen inches distant from any woodwork.

4. An arch of brick or stone or a reinforced concrete lintel or a bar of wrought iron of sufficient strength shall be built over the opening of every chimney to support the breast thereof and where the breast projects more than four inches from the face of the wall and the jamb on either side is of less width than nine inches the abutments shall be tied in by an iron bar or bars of sufficient strength turned up and down at the ends and built into the jambs for at least eight and a-half inches on each side.

5. A flue shall not be adapted to or used for any oven furnace cockle steam boiler or close fire used for any purpose of trade or business or to or for the range or cooking apparatus of any hotel or eating house unless the flue is surrounded with brickwork at least eight and a half inches thick from the floor on which such oven furnace cockle steam boiler or close fire is situated to the level of the ceiling of the room next above the same.

6. A flue used in connection with a steam boiler shall be at least fifty feet in height measured from the level of the floor on which the boiler is placed.

7. The inside of every flue and also the outside thereof where passing through any floor or roof or behind or against any woodwork shall be rendered pargeted or lined with fire-resisting stoneware.

8. The jambs of every fireplace opening shall be at least eight and a half inches wide on each side of the opening thereof. Kitchen ranges may be built without side jambs.

9. The back of every fireplace opening from the hearth up to the height of twelve inches above the mantel shall be at least eight and a half inches thick.

10. The thickness of the upper side of every flue when its course makes with the horizon an angle of less than forty-five degrees shall be at least eight and a half inches.

11. Every chimney shaft or smoke flue shall be carried up in brick or stonework at least four and a half inches thick throughout to a height of not less than three feet above the roof flat or gutter adjoining thereto measured at the highest point in the line of junction with such roof flat or gutter.

12. The brickwork or stonework of any chimney shaft except that of the furnace of any steam engine mill brewery distillery bakehouse or manufactory shall not be built higher above the roof flat or gutter adjoining thereto than a height equal to six times the least width of such chimney shaft at the level of such highest point in the line of junction unless such chimney shaft is built of increased thickness or otherwise rendered secure to the satisfaction of the surveyor.

13. There shall be laid level with the floor of every story before the opening of every chimney a slab of stone slate or other fire-resisting substance at the least six inches longer on each side than the width of such opening and at the least twelve inches wide in front of the breast thereof.

14. On every floor except the lowest floor such slab shall be laid wholly upon stone or iron bearers or upon brick trimmers or other fire resisting materials but on the lowest floor it may be bedded on concrete covering the site or on solid materials placed on such concrete.

15. The hearth or slab of every chimney shall be bedded wholly on brick stone or other fire resisting substance and shall together with such substance be solid for a thickness of four inches at least beneath the upper surface of such hearth or slab.

16. A flue shall not be built in nor against any party structure unless it be surrounded with new brickwork at least four and a half inches in thickness properly bonded. No flue shall be used for a smoke-flue which is of a less internal diameter than eight and a half inches except in cases of copper or scullery flues which may be of any size allowed by the surveyor.

17. A chimney breast or shaft built with or in any party wall shall not be cut away unless the surveyor certifies that it can be done without injuriously affecting the stability of any building.

18. A chimney shaft jamb breast or flue shall not be cut into except for the purpose of repair or doing some one or more of the following things:—

- (a) Letting in or removing or altering flues pipes or funnels for the conveyance of smoke or steam or letting in removing or altering smoke jacks.
- (b) Forming openings for soot doors such openings to be fitted with a close iron door and frame.
- (c) Making openings for the insertion of ventilating valves subject to the following restriction:—That an opening shall not be made nearer than thirteen inches to any timber or combustible substance.

19. Timber or woodwork shall not be placed—

- (a) In any wall or chimney breast nearer than nine inches to the inside of any flue or chimney opening.
 - (b) Under any chimney opening within six inches from the upper surface of the hearth of such chimney opening.
 - (c) Within two inches from the face of the brickwork or stonework about any chimney or flue where the substance of such brickwork or stonework is less than eight and a half inches thick.
20. Every chimney shaft for the furnace of a steam engine mill brewery distillery bakehouse or manufactory shall be constructed in conformity with the following rules:—

- (a) Every shaft shall be at least fifty feet in height from the natural surface of the ground at the base of the said shaft, except otherwise expressly permitted by the council.
 - (b) Every shaft shall be carried up throughout in brickwork and mortar of the best quality and if detached shall taper gradually from the base to the top of the shaft at the rate of at least two and a half inches in every ten feet of height. If approved by the surveyor flues to small steam boilers or forges may be constructed in metal if properly stayed but such flues shall not be fixed in front of any building in any street or nearer than eighteen inches to any combustible material.
 - (c) The thickness of the brickwork of every such chimney shaft shall be nine inches at the least at the top of the shaft and shall increase by at least half a brick for every section of such shaft of twenty feet in length or less down to a point seventy-five feet above the bed of the shaft's foundation and thereafter such thickness shall increase by half a brick for every section of twenty-five feet.
 - (d) Every cap cornice pedestal plinth string course or other variation from plain brickwork shall be provided as additional to the thickness of brickwork required under this clause and every cap shall be constructed and secured to the satisfaction of the surveyor.
 - (e) The foundation of the shaft shall always be made to the satisfaction of the surveyor on concrete or other sufficient foundation.
 - (f) The footings shall be spread all round the base by regular offsets to a projection equal to the thickness of the enclosing brickwork at the base of the shaft and the space enclosed by the footings shall be filled in solid as the work progresses.
 - (g) The width of the base of the shaft shall be at least one-tenth of the proposed height of the shaft.
 - (h) Firebricks shall be built inside this lower portion of the shaft when considered necessary by the surveyor shall be provided as additional to and independent of the thickness of brickwork prescribed by these rules and shall not be bonded therewith.
 - (i) Notwithstanding anything herein contained shafts may with the approval of the council be constructed of other material or design.
21. (a) The floor under and for a space of eighteen inches in front of every oven copper steam boiler or stove which is not heated by gas shall be formed of materials of fire-resisting and non-conducting nature not less than six inches thick.
- (b) No boiler used for generating steam at a gauge pressure exceeding fifteen pounds per square inch shall be set or fixed inside any dwelling-house nor within a distance of two feet six inches from the external wall of any dwelling-house nor within five feet of any land not in the same occupation the said distances being in every case measured from the external face of the boiler or its setting.
- (c) No metal pipe for conveying smoke or other product of combustion shall be fixed nearer than eighteen inches to any combustible materials.
- (d) A pipe for conveying steam at a gauge pressure exceeding fifteen pounds per square inch shall not be fixed nearer than six inches to any combustible materials.
- (e) A pipe for conveying hot water shall not be placed nearer than three inches to any combustible materials unless such pipe is provided with a free blow-off.
- (f) The floor over any room or enclosed space in which a furnace is fixed and any floor within eighteen inches from the crown of an oven shall be constructed of fire-resisting materials.

PART IX.

(1) *Buildings, Wholly or Partly in Wood, including Removal and Re-erection of such Buildings.*

1. Subject to the provisions of this By-law buildings may be built or erected in wood or partly in wood and partly in other materials in the streets other than those specified in Schedule B to this By-law: Provided that—

- (a) The external walls of such buildings shall not exceed in height fifteen feet, measured from the floor level to the top of the wall plates.
 - (b) Every such building shall be wholly in one occupation or be constructed or adapted so to be.
 - (c) All such buildings shall be detached and shall be distant from the building line of any street or road as hereinbefore provided, and ten feet from any other building and shall be and continue to be five feet from the boundaries of the land of any adjoining owner or from the boundaries of land not in the same occupation; but in no case shall the distance between any two buildings be less than ten feet, but if one external side wall is built of brick, stone or concrete, having a parapet eighteen inches above its own adjoining roof or gutter, then such limited distance of five feet may as to such brick, stone or concrete external wall be reduced, provided that the distance from the wall (unless the same be of brick, stone, concrete or other fire-proof material) of any other building not in the same occupation be not less than five feet, but in all other respects such buildings must conform to the provisions of this By-law as wooden buildings.
2. Wooden buildings erected prior to this By-law coming into force may be added to in wood subject to the conditions and limitations of this By-law.
3. Wooden buildings transported or removed either whole or in part into the municipal district or from one part of the municipal district to another part shall only be erected whole or in part in compliance with all the provisions of this By-law in regard to the erection of new buildings and such buildings either whole or in sections shall not be brought into the municipal district without the special consent of the council and until the same have been inspected and approved by the surveyor and the fees for such inspection have been paid.
4. Except in the case of an isolated building the interior surface of all walls and ceilings of wooden buildings other than outbuildings shall be finished in hardwood lath and plaster, metal or other approved fire-resisting materials but in the discretion of the surveyor a wooden dado not exceeding five feet in height may be allowed and also the undersides of rafters in skillion roofs may be lined with tongued and grooved boards.
5. Roofs shall be covered with tiles slates metal or other fire-resisting materials approved by the surveyor.
6. In the construction of all wooden buildings except sheds vermin plates shall be used.
7. Stucco or rough cast work will not be allowed in walls and gables unless such walls and gables are first covered with waterproof material to the satisfaction of the surveyor.

PART X.

(1) *Fire-proof Construction.*

- 1. None of the provisions contained in any other Part of this By-law as to the materials and mode of construction of external party and cross walls or the thickness of same shall apply to any building erected or constructed in accordance with the provisions of this Part of this By-law.
- 2. Wherever in this Part of this By-law it is provided that buildings or specified portions of buildings shall be fire-resisting or fire-proof the employment for columns or girders of steel alone unprotected by a casing of concrete in the manner hereinafter provided will not be permitted.

(2) *Frame-building Construction.*

- 3. The adoption of frame-building construction will be permitted for all classes of buildings whether required by this By-law to be fire-proof or otherwise subject to the employment in combination of cement concrete and of steel, as the sole component materials for the frames of such buildings and provided that the conditions and stipulations hereinafter contained are complied with.
- 4. Provided that all subordinate or appurtenant parts such as walls, partitions, stairways bulkheads lift wells and the like not necessarily forming part of the structural frame may be carried out in other materials unless prohibited by other provisions of this Part of this By-law.
- 5. The supporting columns shall be spaced so that the distance in plan to the nearest adjacent column shall in no case be more than twenty feet in one direction nor more than thirty feet in a direction at right angles thereto these distances being measured from face to face of the columns.

6. Every column shall be rigidly connected to the floor systems at every floor level, in a manner to satisfactorily resist wind or other lateral pressure.

7. The external walls of frame-buildings may be carried out as curtain-walls designed to support only their own weight and to resist only wind or other lateral pressure provided that—

(a) If carried out in brickwork or stonework or terracotta they shall be not less than nine inches thick exclusive of any surface treatment where the least free span does not exceed fifteen feet; and not less than fourteen inches thick exclusive of any surface treatment where the least free span exceeds fifteen feet.

(b) If carried out in reinforced concrete they shall be not less than four and a half inches thick exclusive of any surface treatment where the least free span does not exceed fifteen feet; and not less than six inches thick exclusive of any surface treatment where the least free span does exceed fifteen feet.

8. In frame-building internal walls required to be fire-resisting may be carried out in reinforced concrete provided they shall be not less than three inches thick exclusive of surface treatment if the span does not exceed fifteen feet and otherwise than four and a half inches thick exclusive of any surface treatment.

9. In all frame-buildings there shall be provided at every floor level a complete system of wall girders so designed as to wholly relieve the underlying external walls or curtain walls of any vertical load other than the weight of such walls.

(3) Stress Calculations.

10. For all forms or modes of construction dealt with in this Part of this By-law all designs shall be based upon the following loadings being added loadings over and above the full actual structural or dead loads, viz:—

For residential or office buildings a minimum of eighty-four pounds per square foot of floor area.
For shops stores and warehouses a minimum of one hundred and twenty pounds per square foot of floor area.

For public buildings and all areas in any building subject to the load of moving crowds, a minimum of one hundred and fifty pounds per square foot of floor area.

11. The bending moments of all girders shall be computed as being one-eighth part of the product of the total equivalent distributed load and the net span, but where the girders are satisfactorily "fixed" at their ends by reason of continuity or appropriate attachment to columns such calculated bending moments may be reduced by twenty per cent. Beyond this allowance however no further reduction of bending moments by reason of continuity of girders will be permitted.

12. In computing columns any column which exceeds in unbraced height fifteen times its least diameter or least width shall be regarded as a long column subject to flexure and shall be designed accordingly.

13. In buildings comprising a plurality of stories the total loading of the columns shall be computed as follows:—

(a) For any number of stories up to three stories upon the assumption that all the floors will be simultaneously loaded with the full dead and full live load.

(b) For a greater number than three stories upon the assumption that the three uppermost floors will be simultaneously loaded with the full dead and full live loads; while the remaining floors will be at the same time loaded with the full dead and one-half the live loads.

(4) Concrete-cased Steel.

14. Whenever concrete-cased steel is employed the work shall be so designed that the steel alone shall support and resist the whole of the loads and stresses without any assistance from the concrete.

15. The following stress-intensities upon the steel will be permitted as a maximum provided that the calculation of external forces has been made in accordance with the rules hereinbefore provided, viz:—

For all joists beams bars or members—

In direct compression direct tension or cross bending fifteen thousand pounds per square inch of net section. In shear, fifteen thousand pounds per square inch of net section.

16. The cement concrete employed in casing the steel shall be so proportioned that there shall be used not less than one cask of Portland cement weighing three hundred and seventy-five pounds net for each twenty-two cubic feet of net finished concrete measured in place.

17. The steel shall be encased with approved bonding and then wholly embedded in and surrounded with concrete upon all sides in such manner that there shall be in the case of girders a thickness of not less than one inch of

concrete upon the exposed sides or edges of the steel, and in the case of columns a thickness of not less than two inches of concrete upon the exposed sides or edges of the steel such respective thickness of protecting concrete being exclusive of any plastering veneer or other surface treatment.

18. All steel employed in and in combination with cement concrete shall be clean and free from paint oil grease or tar of any kind and shall also be free from scaly rust.

(5) Reinforced Concrete.

19. In all cases where reinforced concrete is employed whether in buildings as a whole or specified portions of buildings required or not required by this Part of this By-law to be fire-proof or fire-resisting the reinforced concrete work shall be designed in accordance with the rules and carried out under the conditions hereinafter contained.

20. Before the actual carrying out of the work or any portion thereof complete drawings of such work or portion shall be filed with the surveyor showing all details of the construction and the size spacing and arrangement of all the reinforcing members.

21. The surveyor shall have power to require that loading tests provided for in this By-law be actually applied in his presence by the builder in such cases as the surveyor may think fit.

22. The cement concrete employed in reinforced concrete work shall be so proportioned that there shall be used not less than one cask of Portland cement weighing three hundred and seventy-five pounds net for each eighteen cubic feet of net finished concrete measured in place.

23. The steel employed in reinforced concrete work shall be clean and free from paint oil grease or tar of any kind and shall also be free from scaly rust.

24. The following stress intensities upon the several materials will be permitted as a maximum, provided that the calculation of external forces has been made in accordance with the rules hereinbefore provided, viz:—

(a) For all steel reinforcing members employed substantially as they come from the rolls—

In tension or compression, fifteen thousand pounds per square inch.

In shear, ten thousand pounds per square inch.

(b) For all steel reinforcing members where forged or welded—

In tension or compression, fifteen thousand pounds per square inch.

In shear, ten thousand pounds per square inch.

(c) For the adhesion between the concrete and the steel, seventy pounds per square inch.

(d) For concrete—

In compression, five hundred pounds per square inch.

In shear, seventy pounds per square inch.

In tension, nil.

25. The detailed design of all parts of the reinforced concrete work subject to cross bending or direct stresses shall proceed upon the basis of the latest methods subject however to the following requirements:—

(a) The steel shall take all the tensile stresses.

(b) The ratio of the modulus of elasticity of steel to that of concrete shall be taken as fifteen.

(c) Where the concrete is of insufficient section to take up the shearing stresses sufficient steel shear bars shall be provided to take up the residue of the shearing stresses.

(d) In columns all main reinforcing bars shall be held together by horizontal steel ligatures spaced not further apart than twenty diameters of the main bars.

(e) The extremities of all tension bars employed in all girders shall be coggled or swelled in all cases where such bars exceed half inch in diameter.

26. In the execution of reinforced concrete work no concrete in any column or main girder shall be left uncompleted at the end of the day. Whenever concreting operations are resumed the surfaces of completed work against which fresh concrete is to be placed must be thoroughly washed cleaned and grouted with neat cement. No concrete work shall be carried out during any period when the shade temperature is higher than one hundred degrees Fahrenheit nor lower than thirty-five degrees Fahrenheit.

27. The steel reinforcements shall be wholly embedded in and surrounded with cement concrete. The following shall be the minimum thickness of concrete upon the exposed sides or edges of all steel reinforcements, viz:—

In floor slabs or plates—Three-quarters of an inch.

In girders and ribs—One inch.

In columns—One and a half inches.

Such thickness being exclusive of any plastering, veneer or other surface treatment.

28. The following shall be the minimum thickness of concrete in any portions of the work required by this By-law to be fire-resisting, viz. :—

In floor plates not exceeding six feet net span—Three inches.

In floor plates not exceeding eight feet net span—Four inches.

In floor plates not exceeding ten feet net span—Five inches.

In floor plates exceeding ten feet net span—Six inches.

In external walls not exceeding fifteen feet net span—Four and a half inches.

In external walls exceeding fifteen feet net span—Six inches.

In partitions—Two and a half inches.

No internal wall shall be deemed to be fire resisting unless four and a half inches in thickness. Such respective thicknesses shall be exclusive of any plastering veneer or other surface treatment.

PART XI.

Insanitary, Ruinous and Dangerous Buildings.

1. When it is made known to the council that any building or structure is in an insanitary, ruinous or dangerous state the council may inspect the same and may require a survey of such buildings or structure to be made by the surveyor who shall have power to enter any premises for the purpose of making such survey, and if the surveyor reports that such building or structure is in an insanitary, ruinous or dangerous state the council may cause the same to be shored up or otherwise secured to the satisfaction of the surveyor and shall cause a notice in writing to be served on the owner of such building or structure requiring such owner forthwith to take down secure or repair such building or structure as the council may require.

2. If such owner does not begin to take down repair or secure such building or structure within three days after service of such notice and complete such taking down repairs or securing as speedily as the nature of the case will admit the council may with all convenient speed cause all or so much of the building or structure as is in an insanitary, ruinous or dangerous condition to be taken down, repaired or otherwise secured in such manner as may be requisite and may recover from the owner in any court of competent jurisdiction the cost incurred in so doing.

PART XII.

Verandahs, Signs, and Hoardings.

1. No person shall erect or cause to be erected any portico or verandah over the footway of any street in the municipal district without first obtaining the consent of the council and such portico or verandah shall be of the shape figure dimensions and materials adopted by the council, but the lowest part of the frieze or rail of such portico or verandah shall in no case be of less height than eight feet six inches above the level of the outer edge of the footway.

2. No opening shall be made in the roof of any verandah for the purpose of affording light unless such opening be properly framed and glazed with rough rolled plate glass protected underneath with fine mesh wire netting to the satisfaction of the surveyor.

3. Save as hereinafter provided no person shall erect build or construct or alter or add to or cause to be erected built or constructed or altered or added to any hoarding signboard or erection for advertising purposes without first obtaining the consent of the council and unless such hoarding signboard or erection is erected built or constructed altered or added to in accordance with the plan and specification prepared by such person and previously approved of by the council. No hoarding, signboard or erection shall be within a distance from the building, line of any street or road equal to the greatest height of such hoarding signboard or erection; nor the lowest part of such hoarding other than the main supports thereof be nearer than three feet from the level of the ground.

4. A signboard hanging-lamp or gaspipe fixture may be erected on or attached to any building or verandah provided it be of material construction and design approved by the surveyor, be in no part less than eight feet six inches above the level of the footpath beneath, and the written permission of the council thereto be first obtained. But no signboard shall exceed in depth three feet nor unless attached to a verandah project over the footpath.

PART XIII.

Enforcement of By-law and Penalties.

1. In the case of any building erection or construction contrary to the provisions of this By-law either in whole or in part—

(a) the council may give to the owner or builder or leave upon the site of such building erection or construction fourteen days' notice in writing (which notice may be signed by the municipal

clerk on behalf of the council) to bring the same into conformity with the said provisions or requiring the pulling down or removal of such building erection or construction; and

(b) if default is made in complying with such notice and notwithstanding the imposition or recovery of any penalty it shall be lawful for the council through its surveyor to with a sufficient number of workmen demolish and pull down the said building erection or construction, or any part or parts thereof and to do any other act that may be necessary for the purposes and to remove the materials thereof to some convenient place; and the council in its discretion may sell the same in such manner as it thinks fit; and

(c) all expenses incurred by the council or surveyor in demolishing and pulling down the said building or erection or construction or any part or parts thereof or in removing the materials thereof and selling the same and in doing such other acts as aforesaid and all fees or penalties due by the owner or builder thereof may be deducted and retained by the council out of the proceeds of such sale; and

(d) the council shall pay over any surplus arising from such sale on application being made by the person entitled thereto.

2. If any builder or owner disagrees with any decision of the council or surveyor as to any matter or thing arising under this By-law, he may on giving notice in writing thereof to the council and on payment to the treasurer of the sum of Two pounds two shillings have the question referred to an architect of known ability appointed by the council and one appointed by the Governor in Council and the said architects in case of disagreement may call in a third architect of known ability; and the decision of any two of such architects shall be final and conclusive and binding in all respects on the parties.

3. Any person who is guilty of any wilful act of default contrary to any of the provisions of this By-law shall be liable to a penalty not exceeding Twenty pounds for each offence, and in the case of a continuing offence to a further penalty of Two pounds for each day such offence is continued after written notice of the offence from the council.

SCHEDULE A.

FEES PAYABLE UNDER THIS BY-LAW.

For the purposes of determining the fees to be paid under this By-law, the following matters shall be considered :—

(1) Rates of Buildings.

Rates of buildings of the domestic class shall be determined by the area and number of stories contained therein.

Rates of buildings of the warehouse class shall be determined by the cubical capacity thereof.

Rates of buildings of the public building class and special and temporary buildings shall be determined by the surveyor, according as the building partakes of the nature either of the domestic or warehouse class.

THE "VICTORIA GOVERNMENT GAZETTE."

SUBSCRIPTIONS.—The Subscription, including Postage, is £1 8s. 4d. per annum, or 7s. 1d. per quarter, payable in advance.

Subscriptions are required to commence and terminate with a month.

A lesser period than three months cannot be subscribed for.

Subscribers do not receive the Acts of Parliament with the *Gazette*.

ADVERTISEMENTS are charged at the rate of SEVENPENCE per line throughout.

The Title (£5 Reward, Dissolution of Partnership, &c.) forms one or more lines, as a heading.

On an average, ten words make a line, but for the description of a brand consisting of more than one letter, &c., placed perpendicularly, thus, B, each additional letter, under the first is charged as a line.

Every signature must likewise be counted as a line.

The final words of a paragraph, though only a portion of a line, must be counted as one line.

Signatures (in particular) and Proper names must be written very plainly in the text; ONE SIDE ONLY of each slip of paper should be WRITTEN UPON.

ALL DOCUMENTS illegibly written will be returned unpublished, and, where brands occur unprovided for by the ordinary letters of the alphabet, a worded explanatory description must be furnished.

The GOVERNMENT GAZETTE is published on WEDNESDAY EVENING in each week, and Notices for insertion must be received by the Government Printer on or before TWO o'clock of the day preceding the day of publication.

Single copies of the GOVERNMENT GAZETTE are Sixpence, posted Sixpence halfpenny, each.

N.B.—All Gazettes prior to 1st January, 1872, are One shilling and sixpence, posted One shilling and sixpence halfpenny each.

* * ALL PAYMENTS ARE REQUIRED IN ADVANCE. Remittances should be made by postal note, money order, or draft in favour of the Government Printer. Advertisements unaccompanied by a remittance sufficient to cover the cost of insertion will be returned unpublished.

All communications should be addressed to "The Government Printer, Melbourne."
