WOMAN'S CHRISTIAN TEMPERANCE UNION OF VICTORIA.—PETITION FOR INCORPORATION.

THE substance and prayer of a petition to the Governor in Council, signed by not less than 25 contributors within the meaning of Part I. of the *Hospitals and Charities Act 1890* (54 Vict. No. 1099), section 3, to the Woman's Christian Temperance Union of Victoria, praying that such institution may be incorporated, are published hereunder, pursuant to an Order made by the Governor in Council on the 28th day of October, 1913, under the provisions of section 4 of the Act aforesaid.

J. MURRAY,
Chief Secretary.

Chief Secretary's Office,
Melbourne, 24th October, 1913.

In the matter of the *Hospitals and Charities Act 1890* and of the Woman's Christian Temperance Union of Victoria.

To His Excellency the Governor in Council.

THE humble petition of the contributors to the Woman's Christian Temperance Union of Victoria sheweth—

1. That an association called the "Woman's Christian Temperance Union of Victoria" has been established in the city of Melbourne since the year One thousand eight hundred and eighty-seven.

2. That the objects of such association include amongst other things the promotion of health, temperance, and morality, the prevention of cruelty and vice, and other cognate objects of a philanthropic and humane nature, as set out in section 19 of the *Hospitals and Charities Act 1890*.

3. That the said association is supported almost wholly by the voluntary contributions of not less than fifty persons, each of whom has paid and pays not less than One pound per annum.

4. That your petitioners are annual voluntary contributors in such association and have each paid not less than One pound towards the support of such association.

5. That your petitioners believe that it would be to the advantage of the said association to be incorporated under the provisions of the said *Hospitals and Charities Act 1890*.

6. Your petitioners desire the name of the association to continue as at present, the "Woman's Christian Temperance Union of Victoria," and further desire such association to have perpetual succession and a common seal.

Your petitioners therefore humbly pray that the contributors for the time being to such association may be incorporated in terms and under the provisions of the *Hospitals and Charities Act 1890*.

And your petitioners, as in duty bound, will ever pray.

Dated the sixteenth day of October, One thousand nine hundred and thirteen.

Health Act 1890.

BOROUGH OF DUNOLLY.

BY-LAW NO. 47.

IN pursuance of the powers contained in the *Health Act* 1890, and of any other power thereunto enabling them in that behalf, the Council of the Borough of Dunolly, in the name and on behalf of the Mayor, Councillors, and Burgesses of the said Borough, for the purpose of carrying the said Act into execution within their jurisdiction, make the following By-law, that is to say:—

1. All former By-laws, so far as they relate to the matters and things provided for in this By-law, are hereby repealed.
2. This By-law shall come into full force and operation on its confirmation by the Board of Public Health, and immediately after its publication in the *Government Gazette*.
3. This By-law shall apply to and have operation within the municipal boundaries of the Borough of Dunolly.
4. The Council may exempt any premises within the Borough of Dunolly from the operation of this By-law.
5. That the present system of pans for night-soil shall be and is hereby abolished.
6. The occupier of any premises on which there is a closet or privy shall cause the space under the seat of each closet or privy on such premises to be prepared, and shall permit the same to be used, for the double-pan service hereinafter provided for, and shall cause the closet or privy to be kept in a fit state for such service.
7. That from and after the By-law coming into force every closet shall be forthwith furnished with a double-pan service, such pans to be constructed of such materials, size, and design, as the Council may approve, and shall be interchangeable and purchased by the householder, excepting the pans for one service and the subsequent renewals of the householders' pans, which shall be provided and owned by the Council.
8. The occupier aforesaid or other person having the control or management of the premises shall cause to be kept in every closet or privy belonging thereto a supply of dry powdered earth, ashes, charcoal, lime, sawdust, or some other material efficient for deodorizing night-soil, and shall cause all night-soil which may be deposited in the pan in such closet or privy to be immediately on the deposit thereof covered with a quantity of such deodorizing material sufficient to thoroughly and effectually deodorize the contents of such pan.
9. The Council shall at least once a week cause the pan in use to be closed with a lid and removed with its contents from the premises in the day time, and a pan cleansed by efficient means approved of by the Council shall be left in place of the one removed.
10. Before leaving any pan in a closet or privy the Council shall cause the same to be cleansed by superheated steam and tar painted inside or by some equally efficient means.
11. The occupier aforesaid or other person shall not contract for the removal of night-soil from such premises (except in cases of exemption) in any other manner than is herein provided.
12. The night-soil removed shall be rendered inoffensive by being trenched into the ground in such locality as may be provided by the Council.
13. No occupier or person shall use a closet pan for depositing any house or yard rubbish, or any other material in (except for deodorizing) other than night-soil, or shall damage such pan and lids in any manner whatsoever.
14. The Council shall have power, in lieu of making a rate, to make a charge on each occupier for the removal of night-soil, the amount in default of payment to be recovered in any Court of Petty Sessions.

15. If any person or the Council commit a breach of this By-law he or they shall for every such breach be liable to a penalty not exceeding Ten pounds and not less than Five shillings, or to a penalty not exceeding Five pounds, and not less than Five shillings for each day during which such breach shall be committed or continued.

16. Occupiers of premises in the said borough shall permit the officers of the Council and all workmen and servants and contractors employed by it to have access to and upon their premises during such time as the Council may direct, for the purpose of performing the necessary service in connexion with the removal of night-soil therefrom.

Passed by special order by the Council on the 2nd of July, 1913.

Confirmed the sixth day of August, 1913.

W. H. F. COUCHMAN, Mayor.
S. H. BUTLER, Town Clerk.

The common seal of the Borough of Dunolly was hereunto affixed in pursuance of an Order of the Council made the sixth day of August, 1913.

(SEAL) W. H. F. COUCHMAN, Mayor.
H. W. LYNDON, Councillor.
H. J. JACKSON, Councillor.
S. H. BUTLER, Town Clerk.

The foregoing By-law was allowed and confirmed by the Board of Public Health in and for the State of Victoria (it having been first certified that notice of the intention to apply for such confirmation had been given in the Borough for which the same had been made, in the manner required by law) this twenty-ninth day of October, in the year of our Lord One thousand nine hundred and thirteen.

By order of the Board,

T. W. H. HOLMES,
Secretary.

SHIRE OF WODONGA.

BY-LAW NO. 15.

A By-law of the Shire of Wodonga, made under section 197 of the *Local Government Act* 1903 and section 35 of the *Health Act* 1890, and numbered 15, for prohibiting spitting and expectorating in certain places, and for preventing nuisances and securing the healthfulness of the said Shire and its inhabitants.

IN pursuance of the powers conferred by the *Local Government Act* 1903, and by the *Health Acts*, and of every other power enabling it in this behalf, the Council of the Shire of Wodonga, in the name and on behalf of the President, Councillors, and Ratepayers of the said Shire, for the purpose of carrying the said Acts into execution within its jurisdiction, orders as follows, that is to say:—

1. No person shall spit or expectorate on the footpath of any street or road, or on any pavement, floor, or wall of any place open to or frequented by the public.

2. Any person who shall commit a breach of this By-law shall, for every such breach, be liable to a penalty not exceeding Ten pounds (£10).

3. This By-law shall apply to and have operation throughout the whole of the municipal district.

Resolution for passing this By-law agreed to by the Council on the second day of July, 1913.

Confirmed on the sixth day of August, 1913.

(SEAL) J. HENRY MCGEOCH, President.
JOHN WOODLAND, Secretary.

The foregoing By-law was allowed and confirmed by the Board of Public Health in and for the State of Victoria (it having been first certified that notice of the intention to apply for such confirmation had been given in the Shire for which the same had been made, in the manner required by law) this twenty-ninth day of October, in the year of our Lord One thousand nine hundred and thirteen.

By order of the Board,

T. W. H. HOLMES,
Secretary.

Land Act 1911, Section 22.

MALLEE LANDS AVAILABLE FOR APPLICATION AS SELECTION PURCHASE ALLOTMENTS.

THE land is situated on the west side of the Mildura railway line, between Tempy and Nunga railway stations.

Applications (with uncanceled Victorian duty stamp of 5s., or postal note for same amount, affixed) must be made on the usual form, and delivered or forwarded by post to any Local Land Office, or to the Secretary for Lands, Melbourne, on or before Saturday, 15th November, 1913.

Not more than one allotment can be included in any application, but any number of applications may be lodged, with the prescribed fee in each case.

Applicants will be hereafter notified as to the date and place of hearing of their applications by Local Land Board.

The land will be granted under selection purchase lease and at the end of six years, if the residence, cultivation improvement, and all other conditions have been complied with, the lease will be endorsed under the seal of the Board of Land and Works to the effect that such conditions have been complied with, and at any time within the remaining period of 14 or 34 years (as the case may be) a Crown Grant will be issued on payment of the full amount of the purchase money.

The survey fee must be paid within 28 days of demand, and will range from £9 to £11 per allotment.

The lease will contain (*inter alia*) conditions to the effect as follows:—

That substantial and permanent improvements shall be made on the land, if in the first class, to the value of 3s. 4d. per acre, before the end of the second year from the date of the lease, another 3s. 4d. per acre before the end of each of the third and fourth years, and the balance of 10s. per acre before the end of the sixth year of the lease. If in the second class, to the value of 2s. 6d. per acre before the end of the second year from the date of the lease, another 2s. 6d. per acre before the end of each year of the third and fourth years, and the balance of 7s. 6d. per acre before the end of the sixth year of the lease. If in the third class, improvements to the value of 5s. per acre must be made on the land before the end of the third year from the date of the lease, and the balance of 5s. per acre before the end of the sixth year of the lease.

The first half-year's rent and lease-fee must be paid prior to issue of lease.

That the lessee shall go into residence on the land within twelve months after the date of the lease, and shall reside for at least three years and nine months on, or within five miles of, the land during the first six years of the term of the lease, and shall also clear and cultivate at least one-fourth of his allotment within two years of obtaining a permit to occupy the land.

That the lessee shall not transfer, assign, mortgage, or sublet, or part with the possession or grant the use of the whole or any part of the allotment during the first six years of the term of the lease, and that after the first six years of the term of the lease the lessee shall not sell, transfer, assign, mortgage, or sublet the whole, or any part of the allotment unless and until the lease has been endorsed under the seal of the Board to the effect that all the conditions and covenants of the lease during the first six years thereof have been complied with.

No person who already holds or has previously selected the area of Mallee land allowed by classification will be eligible to apply.

The total area of Mallee land which may be selected is 640 acres if in the first class, or 1,000 acres if in the second class, or 1,280 acres if in the third class. Any further area (limited as by the next succeeding paragraph) can be obtained only by purchase from other persons.

That a special condition shall be inserted in the lease and the Crown Grant, providing that the land referred to therein shall at all times be maintained and used for the purpose of residence or agriculture and grazing, and that no person will be permitted to subsequently acquire or hold, or have an interest in more than 1,000 acres, if the land be in the first class, or more than 1,600 acres, if the land be in any other class.

That the lessee or grantee or owner shall preserve the timber on, or plant an area of, not less than 3 per cent. of the total extent of his holding. (N.B.—Along the exposed boundary lines, viz., the western and southern, would be preferable).

No person unless specially authorized, will be permitted to clear timber from any portion of areas retained for the purposes of roads and windbreaks.

Plans may be obtained at the Enquiry Office, Lands Department, Melbourne, and at Land Offices, Alexandra, Ararat,

Bairnsdale, Ballarat, Beechworth, Benalla, Bendigo, Geelong, Hamilton, Horsham, Omeo, St. Arnaud, Stawell, Seymour, Sale, and Warracknabeal, and may be inspected at the principal railway stations throughout the State.

Applicants may obtain from a Local Land Officer, or the Enquiry Office, Lands Department, Melbourne, a certificate authorizing the issue, by the Railway Department, of a ticket over the Victorian Railways only, at excursion fares, to enable them to inspect the land, or to attend the Local Land Board.

J. MURRAY,

Acting Commissioner of Crown Lands and Survey.

TENDERS FOR GRAZING LANDS.

Tender Forms can be obtained on application to the Lands Department, Melbourne, or any of the Land Offices in the country.

Tenders should be placed in the Crown Lands Office Tender-box on or before Tuesday, 25th November, 1913.

NOTE.—No tender will be accepted unless the fee for the period as shown in the head-lines, and fee of Five shillings for licence, are forwarded.

TENDERS will be received on or before Tuesday, 25th November, 1913, for the right to depasture stock on the following unappropriated portions of land subject to the Regulations approved by the Governor in Council and also the subjoined Special Conditions.

Every licence granted under section 187 of the *Land Act* 1901 shall be subject to the conditions set forth in the schedule hereto and to such special conditions and payment in advance of such fee as the Minister may determine, and shall be issued by an officer of the Department of Lands and Survey duly authorized in that behalf.

Conditions.

1. The issue of this licence shall not prevent the land comprised therein, or any part or parts thereof, being sold, leased, licensed, alienated, or dealt with under any of the provisions of the *Land Acts*, except under the 187th section of the *Land Act* 1901, or being resumed by order of the Governor or Administrator of the Government of Victoria, with the advice of the Executive Council, for any of the purposes for which land may be reserved under section 10 of the *Land Act* 1901, or for mining purposes.

2. In case the said land, or any part thereof, should be sold, leased, licensed, alienated, dealt with, or resumed as aforesaid, the licensee shall not be entitled to any compensation other than that which the responsible Minister of the Crown for the time being administering the *Land Acts* may think fit.

3. This licence is subject to the rights of the holders of miners' rights or of mining leases now issued or hereafter to be issued to enter upon the allotment hereby licensed, and to search for gold, and to mine thereon, and to erect and occupy mining plant and machinery, without making any compensation to the licensee, his executors, administrators, or assigns, for surface or other damage.

4. Subject to these conditions, the licensee shall be entitled to use the land for the purpose for which this licence has been granted, until such land, or any part thereof, has been sold, leased, licensed, alienated, dealt with, or resumed as aforesaid, and thereupon all the interest of the licensee therein shall cease and be determined.

5. No land comprised in roads from time to time surveyed and marked out within the boundaries of the land comprised in this licence shall be deemed within its operation.

6. This licence shall entitle the holder thereof, during the period for which it is granted, to use the land therein comprised for depasturing purposes only, but shall not confer any right to build thereon, or to cultivate or, without the permission of the Minister, fence any portion thereof, or construct a dam or tank.

7. The taking in of stock for agistment or otherwise allowing the use of the land, or part thereof, without authority in writing by the Minister, is forbidden.

8. That in the event of the Minister granting permission to fence the whole or any part of this area, the licensee shall provide gates or slip panels in suitable places for the convenience of the public. No compensation will be allowed for fencing erected on boundaries of allotments alienated or in course of alienation.

9. That where improvements are authorized under section 189 of the *Land Act* 1901 the licensee shall notify, on completion, that such improvements have been made, otherwise the work will not be recognised.

10. The interest in this licence shall not be transferred without the consent of the Minister, and the payment of a fee of Ten shillings.

11. The licence shall be liable to forfeiture if the licensee commit a breach of or neglect to comply with these conditions.

12. The publication of a notice in the *Government Gazette*, purporting to declare that the Governor or Administrator, with the advice aforesaid, has forfeited this licence, shall be conclusive evidence that the licence is forfeited.

13. The ring-barking of the timber upon the land by the licensee is forbidden, and he shall not be entitled to destroy or cut and take away any such timber.

14. Free access to water shall be kept open at all times for travelling and other stock and for persons desiring to take water for domestic purposes.

15. The licensee shall destroy all thistles on the land, and on the half width of the adjoining roads, and shall be responsible for the destruction of thistles under the *Thistle Act* 1890 in like manner as holders of freehold lands.

16. The licensee shall keep the land free from vermin, and, should he fail to do so, the licence shall be liable to forfeiture.

17. This licence is issued subject to the right of saw-millers to graze on this area such horses and bullocks as are actually used in connexion with their licensed operations on this land.

18. In the event of the area being damaged by fire, the licence may be forfeited unless the licensee satisfy the Minister that neither he, directly or indirectly, nor his workmen or servants were in any way responsible therefor.

Special Conditions.

1. The period of occupation will, except where otherwise specified, be for ten months from 1st December, 1913, to 30th September, 1914.

2. The fee for the period as shown in the head-lines—for which the licence will be issued, and fee for licence—must accompany the tender, otherwise the offer of the next highest tenderer who complies with this condition may be accepted.

3. Separate tenders must be lodged for each block.

4. *Tenders to be addressed to the Secretary for Lands (Tender-box), Melbourne.*

5. The highest or any tender not necessarily accepted.

6. Tenderers must give their full name and ordinary postal address.

7. The areas are given as more or less, and all appropriated, alienated, or licensed lands (if any) within the boundaries are excluded.

8. The outgoing tenant has the option to remove any existing fencing within one month or to require the incoming tenant to pay for it in accordance with the provisions of section 190, *Land Act 1901*.

Plans can be seen and information may be obtained in this office.

Section 13, *Land Act 1904*, provides:—

1. Where a licensee under section 187 of the *Land Act 1901* has, with the consent of the Minister, enclosed with a substantial fence the land which is the subject of his licence, he may impound any cattle, sheep, or other animals found trespassing thereon.

2. Where the licensee holds land under the said section which is unfenced, he may, in any Court of competent jurisdiction, sue the owner of any cattle, sheep, or other animals for damages arising from trespass by such cattle, sheep, or other animals.

CITY OF HAWTHORN.**BY-LAW No. 68.**

A By-law of the City of Hawthorn, made under sections 198 and 228 of the *Local Government Act 1903*, and numbered 68, for repealing By-laws numbered 44 and 66 and Regulation No. 16, and for regulating and restraining the erection and construction of buildings, erections, or hoardings; requiring the pulling down and removal of buildings, erections, and hoardings; authorizing the Council to pull down and remove buildings, erections, and hoardings erected or constructed contrary to such By-law, or not pulled down and removed as required by or under such By-law, and to sell the materials and apply the proceeds in reimbursing the expenses of pulling down and removing such buildings, erections, or hoardings; and in paying into the municipal fund any fees or penalties due by the owner thereof, and appointing fees which may be charged and received by the Council for any act done or to be done by any of its officers under such Regulations; and for any permit or licence to be issued by the Council.

IN pursuance of the powers conferred by the *Local Government Act 1903*, the Mayor, Councillors, and Citizens of the City of Hawthorn order as follows:—

1. Repeal.

By-law No. 44, made under section 48 of the *Local Government Act 1891*, for regulating and restraining the erection and construction of buildings and erections, and requiring the pulling down and removal of buildings and erections, and authorizing the Council to pull down and remove buildings and erections erected or constructed contrary to such By-law, or not pulled down or removed as required by or under such By-law, and to sell the materials and apply the proceeds in reimbursing the expenses of pulling down and removing such buildings and erections, and any fees or penalties due by the owner thereon, and for other purposes in connexion with the foregoing purposes, or some of them; made and passed by the Council on the 22nd day of March, 1900, and confirmed on the 2nd day of May, 1900.

By-law No. 66, made under the provisions of section 198 of the *Local Government Act 1903*, for regulating and restraining the erection of removed wooden buildings in the City of Hawthorn; passed by the Council on the 21st day of August, 1912; confirmed on the 18th day of September, 1912; and approved by the Governor in Council on the 4th day of November, 1912; and

Regulation No. 16, made under Part V. of the Thirteenth Schedule to the *Local Government Act 1874*, are hereby repealed.

PART I.**2. Definitions.**

In this By-law, unless inconsistent with the context or subject-matter—

"Approved" means approved by the Surveyor.

"Area" applied to a building means the superficies of the horizontal section thereof, made at the point of its greatest surface, inclusive of the external walls and of such portions of the party wall as belong to the building.

"Basement story" means any story of a building which is under the ground story.

"Bressummer" means the beam of reinforced concrete or a wrought-iron or steel girder which carries a wall.

"Brick" or "stone" where stated includes approved concrete.

"Builder" means the master builder or other person employed to execute any work, or if there is no master builder or other person so employed, then the owner of the building or other person for whom or by whose orders such work is to be done.

"Building" means any structure capable of affording protection or shelter, either roofed or intended or adapted to be roofed, and whether enclosed by walls or not; but does not include any greenhouse, aviary, fence, or other similar building or erection.

"Cement concrete" means an approved mixture of high-grade Portland cement, clean sharp sand, and aggregates consisting of fragments or particles of hard stone or gravel, thoroughly clean, and entirely free from combustible matter, and from volcanic scoriae, furnace slag, coke breeze, or any material containing any trace of sulphur.

"Concrete-cased steel" means a form of construction in which the steel is designed to support or resist the whole of the loads and stresses of whatever kind arising in the structure, such steel being encased in and entirely covered with cement concrete as hereinafter provided, such concrete being designed as taking no part in the support of and resistance to the loads and stresses.

"Cross wall" means any internal wall built in connexion with any external or party wall and bonding them together.

"Cubical content" applied to the measurement of a building means the space contained within the external surface of its walls, the upper surface of the floor of its lowest story, and the ceiling or tie of its topmost story.

"External wall" means an outer wall or vertical enclosure of any building not being a party wall.

"Fire resisting" used with reference to any materials includes—

- (a) brickwork constructed of good bricks, well burnt, hard and sound, properly bonded and solidly put together with good lime or cement mortar; and
- (b) any stone suitable for building purposes by reason of its solidity and durability; and
- (c) sheet metals when used for roof coverings; and
- (d) iron and steel, and (when used for columns, girders, or wall-framing) encased in cement concrete or other incombustible or non-conducting external coating as hereinafter provided; and
- (e) slate, tiles, brick, and terra-cotta, when used for covering or corbels; and
- (f) concrete composed of broken bricks, stone chippings, or ballast and lime cement or calcined gypsum.

"Foundation" applied to a wall having footings means the solid ground or artificially-formed support on which the footings of the wall rest.

"Frame-building construction" means the form of construction in which the design provides that the whole of the vertical forces due to the weight of the structure itself, the whole of its structural contents, and the whole of the added loads hereinafter stipulated, are carried down to the foundations solely by means of columns (comprising wall columns, and, where requisite, interior columns) in such a manner that neither the external or internal walls, if any, are required to assist in supporting such loads.

"Ground story" means the story of the building to which there is an entrance from the outside on or near the level of the ground, and, where there are two such stories, then the higher of the two. Provided that no story of which the upper surface of the floor is more than six feet below the level of the adjoining pavement shall be deemed to be the ground-story.

"Height" in relation to any building means measurement taken from the level of the footway (if any) immediately in front of the centre of the face of the building, or, when there is no such footway, from the level of the ground before excavation, to the level of the ceiling or tie of the topmost story.

"Hoarding" includes any erection or structure erected, built, or constructed or used for the purpose of writing, printing, painting, pasting, or posting thereon notices, advertisements, placards, or other printed, painted, or written matter, or any erection or structure being of a height greater than six feet measured from the level of the adjoining street to the highest point of such erection or structure upon which notices, advertisements, placards, or other printed, painted, or written matter are printed, written, painted, pasted, or posted; but does not include a hoarding erected in a street for the purpose of carrying on building operations only, or dwelling-house or shop, or any fence seven feet or under in height.

"Isolated" used with reference to a building means that the building is distant from the boundary of the land of any adjoining owner for a space of not less than the height of its external walls.

"Level of the ground" means the mean level of the ground as determined by the Surveyor.

"New building" includes—

- (a) any building erected or commenced to be erected after the date of this By-law coming into force; and
- (b) any building which for more than half its cubical content has been taken down or destroyed by fire, tempest, or otherwise, and is re-erected or commenced to be re-erected wholly or partially on the same site; and
- (c) any space between wall and buildings which is roofed or commenced to be roofed after the date of this By-law coming into force; and
- (d) any building or erection removed or transported wholly or in sections into the municipal district or from one part of the municipal district to another part of the same after the date of this By-law coming into force.

"Party wall" means a wall built to be used as a separation of two or more buildings or a wall forming part of a building built upon the dividing line between adjoining premises for their common use.

"Prescribed" means prescribed by this By-law.

"Reinforced concrete" means a form of construction in which cement concrete is reinforced with steel, these materials being so combined that the steel will take up and resist substantially the whole of the tensional stresses and assist in the resistance to shear, while the concrete will take up and resist substantially the whole of the compression stresses and assist in resistance to shear.

"Square" applied to the measurement of any area means the space of one hundred square feet.

"Steel" means "mild steel" of a standard equal to that prescribed by the British Board of Trade.

"Surveyor" means the Building Surveyor or other proper officer for the time being of the municipality.

"Topmost story" means the uppermost story in a building, whether constructed partly in the roof or not.

"Treasurer" means the Treasurer for the time being of the municipality.

3. For the purposes of this By-law buildings shall be divided into three classes:—

Class A.—"Domestic Class," which includes all buildings subject to small vibration and light loading of floors, such as residences, residential shops, offices, hotels, hospitals, private schools, club-houses, and studios.

Class B.—"Warehouse Class," which includes all buildings subject to vibration and heavy loading of floors, such as warehouses, factories, mills, and places for the storage and manufacture of goods.

Class C.—"Public Building Class," which includes all buildings designed to accommodate an assemblage of people, such as theatres, churches, chapels, assembly halls, museums, libraries, and public schools, the large assembly-rooms of hotels, offices exceeding eight hundred square feet in area, and hospital and school lecture theatres; but not the residential and office portion of such last-mentioned buildings.

PART II.

4. Notice of Intention to Build and Lodgment of Plans.

(1) No builder shall commence any building, erection, or structure, or any addition or alteration to any building, erection, or structure without first delivering at the office of the Surveyor a written notice of such intention three days before so commencing, and producing to the Surveyor properly prepared plans and specifications of such building, erection, structure, addition, or alteration, together with a tracing or copy of the floor plans of such building, erection, structure, addition, or alteration, and also details of dimensions, sizes, and qualities of all materials, and enumerating any old materials proposed to be used in the construction of same. Such plans and details may be inspected at the discretion of the Surveyor.

(2) The original plans and specifications, when approved, shall be returned to the owner or his agent; but the tracing, or copy of the plans and details of materials shall be retained by the Surveyor.

5. Payment of Fees and Permit.

(3) No builder shall commence any building, erection, structure, or any addition or alteration to any building, erection, or structure without having first obtained from the Surveyor a written permit for the commencement of same, and without having first paid to the Treasurer such sum as shall be provided for in this By-law on account of fees in respect thereof, not exceeding in the whole the maximum fixed by the scale of fees set forth in Schedule A to this By-law, having regard to the class of building, erection, or structure, or any addition or alteration proposed to be built or erected. Such permit shall only remain of force and effect for twelve months from date of issue of same.

6. Duties of Surveyor.

(4) The Surveyor shall, upon the receipt of any such notice as aforesaid, and also upon any work being observed by or made known to him which is affected by the provisions of this By-law, but in respect of which no notice has been given, and also from time to time during the progress of any work affected by such provisions, as often as may be necessary for securing the due observance of such provisions, survey any such building, structure, erection, or work, and cause all such provisions to be duly observed.

(5) The Surveyor, at all reasonable times during the progress of any building, structure, erection, or work affected by any of the provisions of this By-law, or by any terms or conditions on which the observance of any such provisions may have been dispensed with, may enter and inspect such building, structure, or work.

(6) The Surveyor may, for the purpose of ascertaining whether any building, structure, or erection is in such a situation, or possesses such characteristics as are required in order to exempt it from the operation of any of the provisions of this By-law, at all reasonable times, and after reasonable notice, enter any premises, and he may do therein all such things as are reasonably necessary for that purpose.

7. Class of Buildings in Certain Streets.

(7) No person shall erect or construct any building or erection, or make any addition to any building or erection on any land abutting on any of the streets mentioned or referred to in Schedule B to this By-law, unless every external wall of such building or erection so erected or constructed, or such addition, as the case may be, be constructed of brick, stone, or concrete.

(8) Such of the following things as otherwise comply with the provisions of this By-law, and comply with the other By-laws and the Regulations of the City, shall be exempted from the foregoing provisions, viz. :—

(a) Privies, wood-sheds, and similar outhouses covering not more than two squares in all used in connexion with buildings which comply with the By-laws and Regulations of the City, including this By-law, provided such privies, wood-sheds, and outhouses are situated at the back of such buildings, and are screened to the satisfaction of the Building Surveyor of the City from the view of any persons in any street or from the premises adjoining.

(b) Ferneries, greenhouses, vineries, aviaries, and similar out-buildings covering not more than two squares in all used in connexion with buildings which comply with the By-laws and Regulations of the City, including this By-law, provided that such ferneries, greenhouses, vineries, aviaries, and out-buildings are constructed of sound, substantial, and suitable materials, and are of slightly design, and are in suitable positions, not nearer than twelve feet to any street, and that before the construction of such ferneries, greenhouses, vineries, aviaries, and out-buildings is commenced, the plans and specifications and proposed positions thereof are submitted to and approved of by the Building Surveyor of the City as complying with all the By-laws and Regulations of the City, including this By-law.

(c) Verandahs attached to buildings or erections constructed of brick, stone, or concrete.

(9) This By-law shall not apply to any temporary offices or sheds used by builders during the construction of any building at or about the site of such building during such time as building operations are in progress.

(10) Provided, however, that no person shall commence the erection or construction of any of the privies, wood-sheds, or similar out-houses, or ferneries, greenhouses, vineries, aviaries, or similar out-buildings mentioned in the foregoing sub-sections (a) or (b) unless he shall, two days before so commencing, have delivered to the Building Surveyor of the city a notice, in writing, of his intention so to commence, and also plans and specifications of the proposed building, and have paid the fees appointed by this By-law to be charged by the Council for things to be done by the said Building Surveyor.

(11) Dwelling-houses, in so far as relates to the provisions of this clause, shall mean any building or terrace of two buildings erected or constructed exclusively for residential purposes.

No person shall erect or construct, or cause to be erected or constructed—

(a) any dwelling-house within 15 feet of the alignment of any street in the said city;

(b) any dwelling-house within 5 feet of the dividing fence or boundary line of the allotment upon which such house is built, nor shall any dwelling-house be erected within 10 feet of any dwelling-house erected after the coming into operation of this By-law;

(c) any building other than a shop or factory within 10 feet of a dwelling-house erected after the coming into operation of this By-law, except privies, greenhouses, vineries, aviaries, or such like buildings for use in connexion with such dwelling-house;

(d) any dwelling-house within 20 feet of the alignment of a street or right-of-way less than 30 feet wide, provided, however, that a dwelling-house may be built up to the boundary between the allotment and a right-of-way not less than 10 feet wide running at the side of such dwelling-house;

(e) any party wall for the purpose of subdividing any building into more than two habitations for separate occupation, whether such party wall shall have openings therein or not;

(f) a terrace of more than two habitations in separate occupation.

(12) No builder shall erect, build, or construct, or cause to be erected, built, or constructed, any building or structure which is intended to be used, or which shall or may be used, as a shop, office, public building, or warehouse, unless the external walls thereof shall be brick, masonry, or concrete.

PART III.

8. Materials.

(1) Bricks used in any building shall be good, hard, and well burnt. When old bricks are used in any wall they shall be thoroughly cleaned before being so used, and shall be whole and good, hard, well-burnt bricks.

(2) Sand used for mortar in any buildings shall be clean and sharp, free from loam, dirt, and salt or organic matter.

(3) Lime mortar shall be composed of freshly-burnt lime and sand. All lime intended to be used for mortar shall be thoroughly burnt, of good quality, and be properly slacked before being mixed with the sand.

(4) Cement mortar shall be composed of good Portland cement or other cement of equal quality, approved of by the Surveyor, mixed with clean, sharp sand.

(5) Concrete for foundations shall be composed of clean broken stone or other hard material, approved by the Surveyor, broken to a gauge not exceeding two and a half inches, and sand well mixed on a wooden floor with freshly-burnt lime, hydraulic lime, or cement in the proportions of one part by measurement of lime to not more than five parts, or one part of cement, to not more than six parts of the other materials.

(6) All timbers and wood beams used in any building shall be good sound material, free from rot, large and loose knots, shakes, or any other imperfections whereby the strength may be impaired, and shall be of such sizes, dimensions, and spacings as set forth in Schedule C to this By-law.

PART IV.

9. Excavations, Foundations, and Footings.

(1) All excavations for footings shall be taken down to a solid foundation, to be approved by the Surveyor, but not less than eighteen inches in depth below the natural surface of the ground, except in the case of special construction of foundation approved by the Surveyor. No footing shall be commenced to be placed in position until at least twenty-four hours' notice shall have been given to the Surveyor that the trenches are ready for inspection.

(2) The surface of the ground between all walls of buildings shall be levelled up higher than the finished surface outside, and evenly graded to prevent any accumulation of water or drainage beneath the floors, and such surface shall, if required by the Surveyor, be covered with properly mixed tar composition pavement laid to an uniform thickness of not less than two inches in every part, rolled, rammed, and finished so as to be impervious to water and foul exhalations. In all bad or wet ground subsoil drainage shall be provided and laid in such manner as the Surveyor shall, in writing, direct and require.

(3) Unless with the consent of the Surveyor, every external wall and every party wall other than a wall carried on a bressummer, and every pier and story post, shall have footings.

(4) The width of the bottom of the footing of every such wall shall be at least one-half greater than the thickness of the wall at the ground floor level, but in no case less than eighteen inches wide, unless approved by the Surveyor, and the height of such footing shall be at least equal to the thickness of the wall at its ground floor level, but in no case less than nine inches.

(5) In the case of wooden buildings the foundations thereof for all walls may consist of redgum or jarrah stumps.

PART V.

10. Thickness of External and Party Walls for all Brick, Stone, or Concrete Buildings.

(1) The external and party walls of buildings of the domestic and warehouse classes respectively shall not be built of less thickness than as set forth in Schedule D to this By-law for their several grades, which grades are determined according to the heights and lengths of such external and party walls, such lengths being measured from the centre of one return wall to another, or from the centre of a return wall to a cross wall.

(2) No cellar wall shall be less than nine inches in thickness, and no foundation wall of an external wall shall be less than thirteen and a half inches in thickness unless approved by the Surveyor. But where a cellar wall is, in the opinion of the Surveyor, too great in length for such thickness, it shall be increased up to eighteen inches or be strengthened by piers.

(3) When the piers between the openings in any wall are less in area than one-third of the area of such wall in plan the wall shall be increased in thickness to an extent determined by the Surveyor or the piers built in cement mortar, in which case the area of the piers need not exceed one-fifth of the area of the wall in plan.

(4) Where piers are specified for any story of a wall that story shall be strengthened by building piers projecting four and a half inches; such piers shall not be spaced further apart than twelve times the thickness of the wall and in no case more than twelve feet apart, and shall not be less in width than one-fourth of their distance apart.

(5) In the domestic class of buildings no story shall be of greater height from floor to ceiling or from floor to roof than fourteen feet, but the height of a story if built in cement or with projecting piers may be sixteen feet. No two stories of nine-inch wall, even if one has piers, shall exceed thirty feet in height, and no three stories of thirteen and a half inch wall, including one with piers, shall exceed forty-eight feet in height; and no three stories, whatever the thickness, shall exceed fifty-four feet in height.

(6) In the warehouse class of buildings no story shall be of greater height from floor to ceiling or from floor to roof than twelve feet, but the height of a story if built in cement or with projecting piers may be thirteen feet six inches. No two stories of nine-inch wall, even if one has piers, shall exceed twenty-five feet in height, and no three stories of thirteen and a half-inch wall, including one with piers, shall exceed forty-two feet in height, and no three stories of any greater thickness shall exceed forty-eight feet in height.

(7) Where it is not desired to have projecting piers the wall may be built flush, if built four and a half inches thicker than specified in Schedule D to this By-law, without altering the rating of the stories below it.

(8) In the case of a party wall any projecting piers required by Schedule D to this By-law shall be built on both sides of the wall, or the whole wall shall be built four and a half inches thicker than specified in the tables in the said Schedule D appropriate to the class of building to which it belongs. In either case the wall shall be built central on the wall below.

(9) If walls are built of cement mortar instead of lime mortar they may be of thicknesses one grade lower than those set forth in Schedule D to this By-law.

(10) Where it is desired to alter or raise or increase the size of an old building, if the walls are, in the opinion of the Surveyor, sound and well consolidated for the purpose, and are approved by the Surveyor, and the new work is to be built in cement mortar, the Surveyor shall have power to treat the whole building as if built in cement mortar, and approve of walls of thicknesses one grade lower than those given in Schedule D to this By-law.

(11) When any building is raised in accordance with the last preceding clause a steel bond shall be built in on top of the old wall, such bond to be three-sixteenths of an inch in thickness and hooked together at all intersections, the width to be equal to one and a half inches for every four and a half inches in thickness of the wall built upon it if so directed by the Surveyor.

(12) In public buildings of several stories the external or surrounding walls shall not be of less thickness than those specified in Table "B" in Schedule "D" to this By-law for similar heights and lengths, and where the span of the floor girders or roof girders or trusses exceed thirty feet piers of an extra thickness of four and a half inches shall be provided to the satisfaction of the Surveyor.

(13) In public or assembly halls, churches, theatres, and like buildings—

(a) where the ceilings or roofs are carried on trusses or girders or otherwise the thickness of the surrounding walls shall not be less than those specified in Table "C" in Schedule "D" to this By-law;

(b) where the length of the wall exceeds one hundred feet, or in case there shall be one or more stories built above such hall, theatre, or like building, the thickness of the wall shall be increased four and a half inches, or the wall must be strengthened by piers or buttresses to the satisfaction of the Surveyor;

(c) where solid masonry or brick-in-cement buttresses are employed and placed sixteen feet or less apart and extended to the foot of the trusses or girders above, or if iron or steel pillars are inserted in the walls in lieu of masonry, and at distances not exceeding eighteen feet apart, the thickness may be reduced in proportion to the increase of strength afforded by such buttresses or pillars; but in no case shall any wall be less than thirteen and a half inches thick in the topmost portion and four and a half inches shall be added going downwards for each story or for each gallery or for each twenty-five feet in height of the wall. Where iron or steel pillars are introduced in such walls the brickwork round the pillar shall be bonded into that of the connecting walls, and each of such pillars shall have not less than nine inches of brick wall around its extreme dimensions;

(d) in the case of buildings divided into naves and aisles by walls of which the upper portions are external and the lower portions internal and pierced by arched openings carried on piers or columns the thickness of the nave walls shall not be less than that specified in Table "C" in Schedule "D" to this By-law for external and surrounding walls of similar heights, lengths, and spans, and the external walls of the aisles shall be of the same thickness unless strengthened by buttresses or piers to the satisfaction of the Surveyor, in which case the walls may be four and a half inches less in thickness.

(14) Where a wall is built in cement mortar it may be used for a span or height one-fifth greater than shown in Schedule "D" to this By-law.

(15) Where it is proposed to convert or alter any building erected for a purpose other than a public purpose into

a public building such conversion or alteration shall be carried into effect, and the public building thereby formed, including the walls, roofs, and chimneys, shall be constructed in such manner as may be approved by the Surveyor; and the provisions of this By-law shall apply to such alteration or conversion as though it were the construction of a public building.

(16) Except where otherwise provided in this By-law, all external party and cross walls shall be constructed of brick, masonry, or concrete, and shall be subject to all the provisions of this By-law. And no external wall shall have windows or openings within 4 feet of the boundary of land not in the same occupation.

(17) Where a cross wall becomes in any part an external wall such cross wall shall be of the thickness required for an external wall of the same height and length and belonging to the same class of building.

(18) No building of the warehouse class shall extend to more than four hundred and fifty thousand cubic feet unless divided by party walls in such manner that no division thereof extends to more than four hundred thousand cubic feet.

(19) No addition shall be made to any building of the warehouse class or to any division thereof so that the cubical content of any such building or division shall exceed four hundred thousand cubic feet unless the whole construction thereof is of fireproof material and the thickness of the walls is of the extra first rating.

PART VI.

11. *Buildings Wholly or Partly in Wood, including Removal and Re-erection of such Buildings.*

(1) Subject to the provisions of this By-law buildings may be built or erected in wood or partly in wood and partly in other materials in streets other than the streets specified in Schedule B to this By-law. Provided that—

(a) the external walls of such buildings shall not exceed in height fifteen feet, measured from the floor level to the top of the wall plates;

(b) every such building shall be wholly in one occupation or be constructed or adapted so to be;

(c) all such buildings shall be detached and shall be distant at the least fifteen feet from the building line of any street or road, and ten feet from any other building, and shall be and continue to be five feet from the boundaries of the land of any adjoining owner, or from the boundaries of land not in the same occupation; but providing always that in no case shall the distance between any two buildings of wood or iron erected since the coming into operation of this By-law and not in the same occupation be less than ten feet;

(d) but if any such other building is built of brick or stone, or was erected prior to the date of this By-law coming into force, then such new building shall be distant fifteen feet at the least from the building line of any street or road, and shall be and continue to be distant five feet from the boundary of such adjoining allotment if in separate occupation. The eaves of such building may overhang the walls, but such eaves may not approach nearer to the boundary of land not in the same occupation than four feet. A detached building shall not be excluded from this exemption solely by reason of its being within ten feet of any other building constructed as stables or out-offices to be used in connexion with such building.

(2) Wooden buildings erected prior to this By-law coming into force may be added to in wood subject to the conditions and limitations of this By-law.

(3) In this clause the word "building" means wooden building, and includes any erection.

(a) No person shall remove, or cause to be removed, into the city of Hawthorn, or from any one part of the city to another part of the same, and erect and permit to remain for any longer period than seven days, any building which does not comply with the provisions of the By-laws and regulations of the city.

(b) Before any building intended to be so erected is removed into the city or from any one part of the city to another part, the owner or the person carrying out the removal shall give to the Surveyor not less than ten clear days' notice, in writing, of his intention to remove and re-erect such building in the city, and shall accompany such notice supply the following particulars:—

(1) The situation of the building which it is proposed to remove.

(2) The situation of the land on which it is proposed to re-erect or place such building.

- (3) A plan giving the dimensions of the building, including any alterations or additions thereto, and a tracing copy of such plan to be retained by the surveyor.

- (4) A specification giving particulars of the construction of the existing building and of the alterations and additions (if any) which it is intended to make when the building is re-erected.

And shall at the same time produce to the Surveyor such information as will enable him to satisfy himself whether or not such building has been condemned as dilapidated, insanitary, or unfit for human habitation. On receipt of such notice particulars, plans, specifications, and information, and the proper fee, the Surveyor shall inspect such building before removal, and shall report to the Council whether, in his opinion, such building when removed and re-erected will be in compliance with the provisions of the By-laws and regulations of the city or not. If the Surveyor reports that such building when removed and re-erected will be in accordance with such By-laws and regulations, then the Council shall grant a permit for its removal and re-erection in the city, but not otherwise.

- (c) No building that has been condemned as dilapidated, insanitary, or unfit for human habitation shall be removed and re-erected within the city unless the requirements of sub-section (d) be complied with.
- (d) No building in which any case of infectious or contagious disease has occurred, and which is intended to be wholly or partly used as a dwelling-house, shall be removed into and erected within the city, or removed from one part of the city to another, and erected there, unless the same has been thoroughly fumigated and disinfected to the satisfaction of some duly qualified medical practitioner, or of the Health Inspector of any municipal Council, as testified by a certificate, signed by either or both of such authorities, and produced to and retained by the Surveyor.
- (e) No building intended or adapted to be wholly or partly used as a dwelling-house shall be removed into and re-erected within the City, or removed from one part of the City to another and erected there, unless the same when re-erected shall cover an area of 800 square feet at the least, nor unless such building shall be properly framed and shall comply with the requirements of Schedule C to this By-law.

All timber and material which, in the opinion of the Surveyor, is unsound or defective, shall be removed and replaced with sound material. Such building when completed shall also comply with the By-laws and Regulations of the City (the conditions of this section shall not apply to buildings to be used as stables or sheds, provided the same comply in all other respects with the By-laws and Regulations of the City.)

- (f) Nothing herein contained shall prevent the alteration of the position of any building within boundaries of the land on which the same stands.
- (g) The following fees shall be payable to the City by the owner or person removing any building upon giving the notice mentioned in sub-section (b) of this By-law:—

- (a) For examining any building which it is proposed to remove into and erect within the City of Hawthorn, or to remove from any one part of the city to another part and erect there, whether the same is approved or not, Two pounds; and after approval:

- (b) For issue of a permit to remove any building and re-erect the same in the city of Hawthorn, additional to the fee for inspection, One pound.

- (4) Except in the case of an isolated building the interior surface of the walls and ceilings of wooden buildings shall be finished in lath and plaster, or metal, or other approved fire-resisting materials; but, in the discretion of the surveyor, a wooden dado, not exceeding five feet in height and panelled wooden ceiling may be allowed, and the undersides of rafters in skillion roofs may be lined with tongued and grooved boards.

- (5) Roofs shall be covered with tiles, slates, metal, or other fire-resisting materials approved by the surveyor.

- (6) In the construction of all wooden buildings except sheds, vermin plates shall be used.

12. Out-buildings.

- (1) Workshops and out-buildings (except stables, cowsheds and fowlhouses) of not more than one square

in area, and not exceeding eight feet in height, and not containing a fireplace may be erected on any boundary, save and except the frontage to any road or street, being a public highway if the roof thereof is covered with galvanized corrugated sheet iron or other approved fire-resisting material, provided that such out-buildings are situated at the rear of and distant at least ten feet from the rear of any building used as a dwelling-house on the same allotment or any allotment adjoining.

No wooden building or dwelling may be extended in such a manner that such out-buildings and dwelling shall thereafter be within ten feet of each other; but this provision shall not prevent the owner of a building or dwelling on land adjoining that on which such out-building has previously been erected from extending such building or dwelling, subject to the provisions of this By-law.

(2) Out-buildings exceeding one square in area, including roofed structures and erections for storage of timber or other materials, shall be subject to all the conditions and limitations in regard to wooden and iron buildings, except as provided elsewhere in this By-law with regard to certain buildings which shall be built for purposes other than a dwelling-house and not otherwise herein particularly defined.

No such building of a larger floor area than five (5) squares and not more than fifteen feet high shall be erected of material other than brick or stone unless the external walls are constructed of galvanized-iron and are at a distance at least thirty feet from the building line of any street, and at a distance of at least the height of the wall of such building from the boundary of land not in the same occupation, and no building of this class of a greater area than fifteen squares (1,500 square feet) ground floor area only being computed and of more than ground and first floor may be erected or added to in iron or wood so that at any time the total area of such building shall exceed 1,500 square feet on any one floor. This provision as to limit of area shall not apply to buildings erected at a distance of 100 feet or more from the building line of any street if approved by the surveyor.

In all other respects such iron or wooden buildings must not be nearer than 15 feet to the building line of any street and 5 feet from the boundary of land not in the same occupation, and if not more than five squares may be built of galvanized-iron or good sound weatherboards abutting on to a right-of-way not less than ten feet wide, provided the walls are not nearer than the height of such wall, including the vertical portion of a gable-end roof to any land not in the same occupation.

No stable, unless built of brick or stone, may be erected nearer than twenty feet to any dwelling not in the same occupation, and no stable, whether of brick, stone, or other material, may have floors, windows, or other openings at a distance nearer than twenty feet from any dwelling, nor within 5 feet of land not in the same occupation.

Fowlhouses of not more than two squares in area, and not more than six feet in height may be erected at rear of any dwelling on the boundary of land not in the same occupation, provided that the nearest portion of such fowlhouse is at least fifteen feet from the building line of any street and twenty-five feet from any dwelling-house, church, schoolroom, hall, or factory. The walls and roof covering of such fowlhouses must be of iron or other fire-resisting material approved by surveyor. In all other respects they must comply with the regulations for wooden buildings generally, and not be nearer to the boundary of land not in the same occupation than five feet.

Fowlhouses of larger area may be erected on the boundary if at a distance of at least fifty feet from any street and twenty-five feet from any dwelling-house, provided the roof and walls are covered with galvanized-iron or other fire-resisting material approved by the surveyor, and not more than seven feet high.

PART VII.

13. Construction of Buildings.

Unless where otherwise sanctioned in this By-law all buildings and structures shall comply with the following conditions:—

(a) Walls.

(1) Every external party and cross wall constructed of brick, stone, concrete, or reinforced concrete, or other similar material approved of by the surveyor shall be properly bonded and solidly put together with mortar. And no external wall shall have windows or openings within 4 feet of the boundary of land not in the same occupation.

(2) In the case of walls that are built as hollow walls the same quantity of stone, brick, or concrete shall be used in their construction as is provided in this By-law for solid walls as if they were built solid, as in this By-law provided; and no hollow walls shall be built unless the parts of the same are connected by proper ties either of brick, stone, or iron, placed not more than three feet apart in every fourth course. No hollow wall shall be greater in superficial extent than two squares in any one story unless strengthened by a cross wall, fireplace, or projecting pier in each such area, and to the satisfaction of the surveyor.

No hollow wall shall be permitted in the warehouse class above the height of ten feet unless such walls are strengthened at least four and a half inches in thickness, but the walls of the domestic class may, subject to the approval of the surveyor, be built with hollow walls consisting on the ground floor of two walls of which each outer wall is at least four and a half inches in thickness, and each inner wall at least eight and a half inches in thickness; or, if built with cement mortar, such inner and outer walls may be four and a half inches thick and from the underside of the first floor to the underside of the wall plate for receiving the roof, may consist of two walls each four and a half inches in thickness, and in buildings of this class not exceeding fifteen feet in height hollow walls may be built consisting of two walls, each of which shall not be less than four and a half inches in thickness; provided always that in every case the inner and outer walls shall be securely tied together with proper ties, as previously provided, and that in no case shall the cavity between the two walls exceed two inches, and no hollow walls shall be permitted in buildings of more than two stories or of a greater height than twenty-five feet, unless with the approval of the referees.

(3) Where the external wall of any building is erected on the boundary of the land on which the same stands, or where the overhanging eaves or gutter of any building would be within two feet of such boundary, then the external wall of such building shall be carried up to form a parapet fifteen inches at the least in height above the roof or above the highest part of any flat or gutter, as the case may be.

(4) In buildings of the warehouse class the thickness of such parapet shall be equal to the thickness of such wall in the topmost story, and in any other building of a thickness of eight and a half inches at the least.

(5) Every party wall shall be carried up for a height of fifteen inches above the roof measured at right angles to the slope thereof, or fifteen inches above the highest part of any flat or gutter, as the case may be, and of a thickness (in buildings of the warehouse class) equal to the thickness of such wall in the topmost story and in any other building of a thickness of eight and a half inches at the least. Provided, however, that in the case of domestic buildings where not more than two buildings are erected under one roof, it shall be sufficient if the party wall is carried up at least eight and a half inches in thickness to the underside of the roof covering, and such roof covering of iron, slate, or other material must be bedded in good mortar to the satisfaction of the Surveyor, and the top of such party wall shall not be hidden from view until it has been approved by the Surveyor.

(6) No verandah shall approach nearer than five feet to any adjoining property unless built of jarrah or fire-resisting material, or separated from any adjoining verandah or premises by a wall eight and a half inches at least in thickness, and projecting four inches at least beyond the face of the woodwork.

(7) Every party wall shall be carried up of the thickness aforesaid above any turret, dormer, lantern light, or other erection of combustible materials fixed upon the roof or flat of any building within four feet from such party wall, and shall extend at the least fifteen inches higher and wider on each side than such erection; and every party wall shall be carried up above any part of any roof opposite thereto, and within four feet therefrom.

(8) Every wall and fireplace constructed of brick, stone, or other similar materials except reinforced concrete construction shall have a damp-proof course of asphalt or other impervious material laid throughout its entire length and thickness on a level plane at least six inches below the surface of the lowest floor; but such damp-course may be turned vertically upwards within the thickness of the wall to a higher level on the outside.

Where, owing to a change of level, it is not practicable to lay the same on a level plane throughout the walls of a building, the same may be laid on two or more level planes.

Where a damp-proof course is laid on more than one level plane the ends of the damp-proof courses on each level shall overlap the ends of the damp-proof course on the next level, and each of such layers shall be connected by vertical connexions of the same material, and every such layer shall be six inches at least below the surface of the lowest floor.

(b) Closets and Urinals.

(9) No closet or urinal shall be erected or remain in front of any dwelling or building facing a public highway, or at a less distance than fifteen feet from any street, or from the door or window of any dwelling, or at a less distance than three feet from the boundary of land not in the same occupation, unless the wall on the boundary be built of brick or stone; but such closets or urinals may be built abutting on any lane of less width than sixteen feet.

In all cases closets and urinals must have a door, and be properly enclosed, screened and fenced from public view, or the view of adjoining residents. Nothing in the

foregoing section except that referring to the screening from public view, or the view of the adjoining residents, shall apply to any closet or urinal forming part of a main building, and connected to an underground sewerage system.

(c) Recesses and Chases.

(10) Recesses and openings may be made in external walls, provided—

(a) that the backs of such recesses shall not be of less thickness than eight and a half inches;

(b) that over every recess so formed an arch of at least two rings of brickwork of the full width of the recess shall be turned (except in the case of recesses for lifts); but where such recess does not exceed five inches in depth corbelling in brick or stone may be substituted for arching;

(c) that the area of such recesses and openings shall not, taken together, exceed one-third of the whole area of the wall of the story in which they are made. No recesses shall be made under girders or points of special pressure.

(11) Recesses may be made in party walls, provided—

(a) that the backs of such recesses shall not be of less thickness than eight and a half inches;

(b) that over every recess so formed an arch of at least two rings of brickwork of the full width of the recess shall be turned on every story (except in the case of recesses formed for lifts); but where such recess does not exceed five inches in depth corbelling in brick or stone may be substituted for the arching;

(c) that the area of such recesses shall not, taken together, exceed one-third of the whole area of the wall of the story in which they are made. No recesses shall be made under girders or points of special pressure;

(d) that such recesses shall not come within thirteen and a half inches of the inner face of the external walls.

(12) An opening shall not be made in any party wall except in accordance with the provisions of this By-law in relation thereto. Provided that the Surveyor may, on application made to him, give consent, in writing, to any modification or relaxation of the requirements of this clause with respect to the area of recesses and openings in any special cases where he may think proper.

The word "area" as used in this clause means the area of the vertical face or elevation of the wall or recess to which it refers.

(13) In an external or party wall a chase shall not be made wider than fourteen inches, nor more than four and a half inches deep from the face of the wall, nor so as to leave less than eight and a half inches in thickness at the back or opposite side thereof; and a chase shall not be made within a distance of seven feet from any other chase on the same side of the wall, nor within thirteen inches from the nearest external wall. No chase shall be made in a wall of less thickness than thirteen inches.

(d) Projections from Buildings.

(14) In every brick, stone, or concrete building every coping, cornice, string, course, fascia, window, dressing, portico, porch, balcony, verandah, balustrade, outside landing, outside stairs and outside steps, and architectural projection or decoration whatsoever of any external wall, and also the eaves, barge-boards, and cornices of any overhanging roof shall be of brick, tile, stone, artificial stone, slate, iron, cement, or other fire-resisting material.

The foregoing provisions of this clause shall not apply to—

(a) the cornices and dressings of the window fronts of shops;

(b) the eaves, barge-boards, and cornices to detached and semi-detached dwelling-houses, and to other dwelling-houses in which the party walls are corbelled out so as to project four inches beyond such eaves, barge-boards, or cornices;

(c) the flooring supports and framing of verandahs and balconies.

For the purposes of this clause a pair of semi-detached houses shall be deemed to be one building.

(15) Every balcony, cornice, or other projection of or from any external wall shall be tied into the wall of the building and weighed or tied down to the satisfaction of the Surveyor, and no cornice shall exceed in projection the thickness of the wall immediately below except in cases where the materials and construction thereof are approved by the Surveyor.

(16) No part of the woodwork of any shop front shall be fixed nearer than four and a half inches to the centre of the party wall where the adjoining premises are separated by a party wall, or nearer than four and a half inches to the face of the adjoining premises where the adjoining premises have a separate wall; and if it is fixed at such distance of four and a half inches a pier or corbel of stone, brick, or other incombustible material four and a half inches wide at the least shall be placed

as high as such woodwork, and projecting throughout three inches at the least in front thereof between such woodwork and the centre of the party wall or the separate walls, as the case may be.

(e) *Woodwork in External Walls.*

(17) All woodwork fixed in any external wall except frames of doors and windows of shops on the ground story of any building shall be set back four inches at the least from the external face of such wall; but loop-hole frames and frames of windows and doors of redgum or other approved hardwood may be fixed flush with the face of any external wall. Provided that such work is constructed to the satisfaction of the Surveyor.

(f) *Bressummers.*

(18) Every bressummer, unless otherwise allowed by the Surveyor, shall have a bearing in the direction of its length of four inches at least at each end upon a sufficient pier of brick or stone, or upon a timber or iron story post fixed on a solid foundation in addition to its bearing upon any party wall or external wall; and the Surveyor shall have power in his discretion to require that every bressummer shall have such story-posts, iron columns, stanchions, or piers of brick or stone or corbels as may be sufficient to carry the superstructure.

(19) The ends of wooden beams or joists or other timbers bearing on party walls shall be at least one and a half inches distant from the centre line of such party walls.

(20) Every bressummer bearing upon a party wall shall be borne by a templet or corbel of stone or iron, tailed through at least half the thickness of the wall, and of the full breadth of the bressummer.

(g) *Flats and Roofs.*

(21) The flat gutter and roof of every building and every turret, dormer, lantern light, skylight, or other erection placed on the flat or roof thereof shall be externally covered with slates, tiles, metal, or other fire-resisting materials, except wooden cornices and barge-boards to dormers, not exceeding twelve inches in depth, and doors, door-frames, windows, and window-frames in such dormers, lantern lights, skylights, or other erections.

(22) Every building exceeding thirty feet in height used wholly or in part as a dwelling-house or factory, and having a parapet, shall be provided either—

- (a) with a dormer-window or a door opening on to the roof; or
- (b) with a trap-door furnished with a fixed or hinged step ladder leading to the roof; or
- (c) with other proper means of access to the roof.

(23) The plane of the surface of the roof of a building of the warehouse class shall not incline from the external or party walls upwards at a greater angle than forty-seven degrees with the horizon, provided that this clause shall not apply to towers, turrets, or spires, or to the more perpendicular sides of saw-tooth roofs not exceeding thirty feet in span.

(24) The plane of the surface of the roof of any other building shall not incline from the external or party walls upwards at a greater angle than seventy-five degrees from the horizon, provided that this clause shall not apply to towers, turrets, or spires.

(h) *Lighting of Cellars, &c.*

(25) Where the lowermost rooms or cellars in any building (being rooms of which the surface of the floor is more than four feet below the level of the nearest footpath, street, or lane) cannot be otherwise lighted, the same may be lighted by means of apertures or areas extending under the footway. Such apertures or areas shall be enclosed by solid masonry, concrete, or brickwork surmounted by a proper stone or metal kerb, and covered with an immovable horizontal iron frame with glass cubes or prisms level with the surface of such footway, and secured to the kerbing by being run thereto with lead or zinc to the satisfaction of the Surveyor. No such aperture, area, or grating shall extend from the line of building under the footway more than two feet, nor shall any such aperture, area, or grating be more than four feet in length, except with the written permission of the Surveyor.

(i) *United Buildings.*

(26) Buildings shall not be united except where they are wholly in one occupation, or are constructed or adapted to be so.

(27) Buildings shall not be united if, when so united and constructed as to form one building only, they would not be in conformity with this By-law.

(28) An opening shall not be made in any party wall or in two external walls dividing buildings which, if taken together, would extend to more than four hundred thousand cubic feet, except with the approval of the Surveyor; and proper fire-resisting doors shall be provided.

(29) Whenever any buildings which have been united cease to be in the same occupation, all openings made for the purpose of uniting them in any party wall between the buildings, or in any external wall, shall be stopped up with brick or stonework not less in thickness than the party wall or the external wall (as the case may be) in which such openings were made, and any timber not in conformity with this By-law placed in the wall shall be removed.

(30) Whenever any buildings which have been united cease to be in the same occupation the owner thereof shall forthwith give notice thereof to the Surveyor, and shall cause any openings made in the party wall to be stopped up as aforesaid.

(j) *Alterations and Additions.*

(31) Except with the consent of the Surveyor, no alteration shall be made in any building in such manner that when so altered it will, by reason of such alteration, not be in conformity with the provisions of this By-law relating to new buildings.

(32) Unless in any case the Surveyor otherwise allows, where a party or external wall not in conformity with this By-law has been taken down, burnt, or destroyed to the extent of one-half thereof (measured in superficial feet), every remaining portion of the old wall not in conformity with this By-law shall either be made to conform therewith or be taken down before the rebuilding thereof.

(33) Every addition to or alteration of a building and any other work made or done for any purpose in, to, or on a building (except that of necessary repairs not affecting the construction of any external, cross, or party wall) shall, so far as regards such addition or alteration or other work, be subject to the provisions of this By-law relating to new buildings.

PART VIII.

14. *Ventilation, Lighting, and Open Spaces.*

(1) Every person who builds or erects a new building shall so construct every room in the lowest story having a boarded floor, that there shall be for the purposes of ventilation between the under-side of every joist on which such floor is laid and the upper surface of the asphalt or concrete with which the ground surface or site of the building is covered, a clear space of two inches at the least in every part, and not less than four inches where the site is not concreted or asphalted, and shall cause such space to be thoroughly ventilated by means of suitable and sufficient air-bricks or by some other effectual method, so arranged as to cause a through current of air to pass beneath the flooring. The Surveyor may require the surface under the floor of any building, or any part thereof, to be concreted or tar-paved to his satisfaction.

(2) Every building used or intended to be used as a dwelling-house shall have in the rear an open space at the ground level, and exclusively belonging thereto, of the extent of at least 500 square feet of yard space clear of any buildings erected thereon, and no additions shall be made to any dwelling at any time that shall reduce the back-yard space to a smaller area than 500 square feet. There shall be provided in each dwelling-room approved outlet ventilators of at least twelve square inches for each one thousand cubic feet of air space. The outlet ventilation shall be by means of shafts through the roof, or outlets in the walls near the ceiling line, and protected on the outside to prevent back draughts.

(3) Every habitable room except rooms wholly or partly in the roof shall be at least ten feet in height from the floor to the ceiling.

(4) Every habitable room wholly or partly in the roof shall be at least eight feet in height from the floor to the ceiling throughout not less than one-half of the area of such room.

(5) Every habitable room shall have one or more windows opening directly into the external air with a total superficies clear of the sash-frames free from any obstruction to light equal to at least one-tenth of the floor area of the room, and so constructed that a portion equal to at least one-twentieth of such floor area can be opened, and the opening in such case shall extend to at least seven feet above the floor level; but a room having no external wall or a room constructed wholly or partly in the roof may be lighted through the roof by a dormer-window with a total superficies clear of such frames free from any obstruction to the light equal to at least one-twelfth of the floor area of the room, and so constructed that a portion of such window equal to at least one-thirtieth of such floor area can be opened, and the opening in each case shall extend to at least five feet above the floor level of such room, or such room may be lighted by a lantern light or skylight, of which a portion equal to at least one-thirtieth of the floor area can be opened.

(6) Every habitable room constructed over a stable shall be separated from such stable by a floor rendered impervious to foul air.

PART IX.

15. *Chimneys, Flues, Fireplaces, and Heating Apparatus.*

(1) Chimneys built on corbels of brick, stone, or other fire-resisting materials may be erected if the work so corbelled out does not project from the wall more than one and a half times the thickness of the wall, measured immediately below the corbel; but all other chimneys shall be built on solid foundations, and with footings similar to the footings required in the case of external and party walls, unless they are carried upon iron girders with direct bearings upon party external or cross walls to the satisfaction of the Surveyor.

(2) Chimneys and flues having proper soot doors of not less than forty square inches may be constructed at an angle; but in no other case shall any flue be inclined at a less angle than forty-five degrees to the horizon, and every angle shall be properly rounded.

(3) All soot doors shall be at least fifteen inches distant from any woodwork.

(4) An arch of brick or stone, or a bar of wrought iron of sufficient strength, shall be built over the opening of every chimney to support the breast thereof, and where the breast projects more than four inches from the face of the wall, and the jamb on either side is of less width than thirteen and a half inches, the abutments shall be tied in by an iron bar or bars of sufficient strength turned up and down at the ends, and built into the jambs for at least eight and a half inches on each side.

(5) A flue shall not be adapted to or used for any oven, furnace, steam boiler, or close fire used for any purpose of trade or business, or to or for the range or cooking apparatus of any hotel or eating-house unless the flue is surrounded with brickwork at least eight and a half inches thick from the floor on which such oven, furnace, cockle, steam boiler, or close fire is situated to the level of the ceiling of the room next above the same.

(6) A flue shall not be used in connexion with a steam boiler unless the flue is at least fifty feet in height, measured from the level of the floor on which the boiler is placed.

(7) The inside of every flue, and also the outside thereof, where passing through any floor or roof, or behind or against any woodwork, shall be rendered pargeted or lined with fire-resisting stoneware.

(8) The jambs of every fire-place opening shall be at least eight and a half inches wide on each side of the opening thereof, except that kitchen ranges may be built without side jambs.

(9) The back of every fire-place opening from the hearth up to the height of twelve inches above the mantel shall be at least eight and a half inches thick, except in the case of double chimneys, when back may be four and a half inches in thickness.

(10) The thickness of the upper side of every flue when its course makes with the horizon an angle of less than forty-five degrees, shall be at least eight and a half inches.

(11) Every chimney-shaft or smoke-flue shall be carried up in brick, stone, or reinforced concrete at least four and a half inches thick throughout to a height of not less than three feet above the roof-flat or gutter adjoining thereto, measured at the highest point in the line of junction with such roof-flat or gutter.

(12) The brickwork or stonework of any chimney-shaft, except that of a furnace of any steam engine, mill, brewery, distillery, bakehouse, or manufactory, shall not be built higher above the roof-flat or gutter adjoining thereto than a height equal to six times the least width of such chimney-shaft at the level of such highest point in the line of junction, unless such chimney-shaft is built of increased thickness, or otherwise rendered secure to the satisfaction of the Surveyor.

(13) There shall be laid level with the floor of every story before the opening of every chimney a slab of stone, slate, or other fire-resisting substance at least six inches longer on each side than the width of such opening, and at least twelve inches wide in front of the breast thereof.

(14) On every floor, except the lowest floor, such slab shall be laid wholly upon stone or iron bearers, or upon brick trimmers or other fire-resisting materials; but on the lowest floor it may be bedded on concrete covering the site, or on solid materials placed on such concrete.

(15) The hearth or slab of every chimney shall be bedded wholly on brick, stone, or other fire-resisting substance, and shall, together with such substance, be solid for a thickness of four inches at the least beneath the upper surface of such hearth or slab.

(16) A flue shall not be built in or against any party structure unless it be surrounded with new brickwork at least four and a half inches in thickness, properly bonded. No flue shall be used for a smoke-flue which is of less internal area than eighty-one square inches, except in cases of copper or scullery flues, which may be of any size allowed by the Surveyor.

(17) A chimney breast or shaft built with or in any party wall shall not be cut away unless the Surveyor certifies that it can be done without injuriously affecting the stability of any building.

(18) A chimney shaft, jamb, breast, or flue shall not be cut into except for the purpose of repair or doing some one or more of the following things:—

- (a) Letting in, removing, or altering flues, pipes, or funnels for the conveyance of smoke or steam, or letting in, removing, or altering smoke-jacks.
- (b) Forming openings for soot doors, such openings to be fitted with a close iron door and frame.
- (c) Making openings for the insertion of ventilating valves, subject to the following restriction:— That an opening shall not be made nearer than twelve inches to any timber or combustible substance.

(19) Timber or woodwork shall not be placed—

- (a) in any wall or chimney-breast nearer than nine inches to the inside of any flue or chimney opening;
- (b) under any chimney opening within six inches from the upper surface of the hearth of such chimney opening;
- (c) within two inches from the face of the brickwork or stonework about any chimney or flue where the substance of such brickwork or stonework is less than eight and a half inches thick, unless the face of such brickwork or stonework is rendered.

(20) Unless the Surveyor otherwise permits, every chimney-shaft for the furnace of a steam engine, mill, brewery, distillery, bakehouse, or manufactory shall be at least fifty feet in height, and shall be constructed in conformity with the following rules:—

- (a) Every shaft shall be carried up throughout in brickwork and mortar of the best quality, and, if detached, shall taper gradually from the base to the top of the shaft at the rate of at least two and a half inches in every ten feet of height. If approved by the Surveyor, flues to small steam boilers or forges may be constructed in metal if properly stayed; but such flues shall not be fixed in front of any building in any street, or nearer than twelve inches to any combustible material.
- (b) The thickness of brickwork at the top of the shaft and for twenty feet below the top shall be at least eight and a half inches, and shall be increased at least half a brick for every additional twenty feet, measured downwards.
- (c) Every cap, cornice, pedestal, plinth, string, course, or other variation from plain brickwork shall be provided as additional to the thickness of brickwork required under this clause, and every cap shall be constructed and secured to the satisfaction of the Surveyor.
- (d) The foundation of the shaft shall always be made to the satisfaction of the Surveyor on concrete or other sufficient foundation.
- (e) The footings shall be spread all round the base by regular offsets to a projection equal to the thickness of the enclosing brickwork at the base of the shaft, and the space enclosed by the footings shall be filled in solid as the work progresses.
- (f) The width of the base of the shaft, if square, shall be at least one-tenth of the proposed height of the shaft, or, if the same is round or of any other shape, then one-twelfth of the height.
- (g) Any fire-bricks built inside the lower portion of the shaft shall be provided as additional to and independent of the thickness of brickwork prescribed by these rules, and shall not be bonded therewith.
- (h) The floor under every oven, copper, steam boiler, or stove which is not heated by gas (except in the case of a dwelling-house), and the floor round the same for a space of eighteen inches, shall be formed of materials of fire-resisting and non-conducting nature not less than six inches thick.
- (i) No boiler used for generating steam at a gauge pressure exceeding fifteen pounds per square inch shall be set or fixed inside any dwelling-house, nor within a distance of two feet six inches from the external wall of any dwelling-house, nor within five feet of any land not in the same occupation—the said distances being in every case measured from the external face of the boiler or its setting.
- (j) No metal pipe for conveying smoke or other product of combustion shall be fixed nearer than nine inches to any combustible materials.

- (k) A pipe for conveying steam at a gauge pressure exceeding fifteen pounds per square inch shall not be fixed nearer than six inches to any combustible materials.
- (l) A pipe for conveying hot water shall not be placed nearer than three inches to any combustible materials unless such pipe is provided with a free blow-off.
- (m) The floor over any room or enclosed space in which a furnace is fixed, and any floor within eighteen inches from the crown of an oven shall be constructed of fire-resisting materials.

No furnace or baker's oven may be erected so that the brickwork enclosing the same shall be nearer than six inches from the boundary of the land not in the same occupation, and there shall always be a well-ventilated cavity or air space between the brickwork of such oven and the wall of any adjoining building, and such air space shall be kept clear from obstruction of any kind that will be likely to prevent the free circulation of air between such walls.

PART X.

16. (a) Fire-proof Construction.

(1) None of the provisions contained in any other part of this By-law as to the materials and mode of construction of external party and cross walls, or the thickness of same, shall apply to any building erected or constructed in accordance with the provisions of this part of this By-law.

(2) The adoption of frame-building construction will be permitted for all classes of buildings, whether required by this By-law to be fire-proof or otherwise, subject to the employment in combination of cement concrete and of steel as substantially the sole component materials for the frames of such buildings, and provided that the conditions and stipulations hereinafter contained are complied with.

(3) Wherever in this part of this By-law it is provided that buildings or specified portions of buildings shall be fire-resisting or fire-proof, the employment for columns or girders of steel alone unprotected by a casing of concrete in the manner hereinafter provided will not be permitted.

(b) Frame-building Construction.

(4) Frame-building construction will be permitted only if carried out either wholly in concrete-cased steel or wholly in reinforced concrete, or wholly in a combination of such methods. Provided that all subordinate or appurtenant parts, such as walls, partitions, stairways, bulkheads, lift wells, and the like, not necessarily forming part of the structural frame, may be carried out in other materials unless prohibited by other provisions of this part of this By-law.

(5) The supporting columns shall be spaced so that the distance in plan to the nearest adjacent column shall in no case be more than twenty feet in one direction, nor more than thirty feet in a direction at right angles thereto—these distances being measured from face to face of the columns.

(6) Every column shall be rigidly connected to the floor systems at every floor level in a manner to satisfactorily resist wind or other lateral pressures.

(7) The external walls of frame-buildings may be carried out as curtain-walls, designed to support only their own weight, and to resist only wind or other lateral pressures, provided that—

- (a) if carried out in brickwork or stonework or terracotta they shall be not less than nine inches thick, exclusive of any surface treatment, where the least free span does not exceed fifteen feet, and not less than fourteen inches thick, exclusive of any surface treatment, where the least free span exceeds fifteen feet;
- (b) if carried out in reinforced concrete they shall not be less than four and a half inches thick, exclusive of any surface treatment, where the least free span does not exceed fifteen feet, and not less than six inches thick, exclusive of any surface treatment, where the least free span does exceed fifteen feet.

(8) In frame-buildings internal walls required to be fire-resisting may be carried out in reinforced concrete, provided that they shall be not less than four and a half inches thick, exclusive of any surface treatment.

(9) In all frame-buildings there shall be provided at every floor level a complete system of wall girders, so designed as to wholly relieve the underlying external walls or curtain-walls of any vertical load other than their own weight.

(c) Stress Calculations.

(10) For all forms or modes of construction dealt with in this part of this By-law all designs shall be based on the following loadings, being added loadings over and above the full actual structural or dead loads, viz:—

For residential or office buildings, a minimum of eighty-four pounds per square foot of floor area.

For shops, stores, and warehouses, a minimum of one hundred and twenty pounds per square foot of floor area.

For public buildings and all areas in any building subject to the load of moving crowds, a minimum of one hundred and fifty pounds per square foot of floor area.

(11) The bending moments of all girders shall be computed as being one-eighth part of the product of the total equivalent distributed load and the net span; but where the girders are satisfactorily "fixed" at their ends by reason of continuity or appropriate attachment to columns, such calculated bending moments may be reduced by twenty per cent. Beyond this allowance, however, no further reduction of bending moments by reason of continuity of girders will be permitted.

(12) In computing columns, any column which exceeds in unbraced height fifteen times its least diameter or least width shall be regarded as a long column, subject to flexure, and shall be designed accordingly.

(13) In buildings comprising a plurality of stories, the total loading of the columns shall be computed as follows:—

(a) For any number of stories up to three stories, upon the assumption that all the floors will be simultaneously loaded with the full dead and full live-load.

(b) For a greater number than three stories, upon the assumption that the three uppermost floors will be simultaneously loaded with the full dead and full live loads, while the remaining floors will be at the same time loaded with the full dead and one-half the live loads.

(d) Concrete-cased Steel.

(14) Whenever concrete-cased steel is employed the work shall be so designed that the steel alone shall support and resist the whole of the loads and stresses without any assistance from the concrete.

(15) The following stress intensities upon the steel will be permitted as a maximum, provided that the calculation of external forces has been made in accordance with the rules hereinbefore provided, viz:—

(a) For all joists, beams, bars, or members employed substantially as they come from the rolls without forging, drilling, punching, riveting, or machining in any vital part—

in direct compression, direct tension, or cross bending, seventeen thousand pounds per square inch of net section;
in shear, fifteen thousand pounds per square inch of net section.

(b) For all joists, beams, bars, or members which have to be machined, drilled, punched, riveted, welded, or forged—

in direct compression, direct tension, or cross bending, fifteen thousand pounds per square inch of net section;
in shear, thirteen thousand pounds per square inch of net section.

(16) The cement concrete employed in casing the steel shall be so proportioned that there shall be used not less than one cask of Portland cement, weighing three hundred and seventy-five pounds net, for each twenty-two cubic feet of net finished concrete, measured in place.

(17) The steel shall be wholly embedded in and surrounded with concrete upon all sides, in such manner that there shall be in the case of girders a thickness of not less than one and a half inches of concrete upon the exposed sides or edges of the steel, and in the case of columns, a thickness of not less than two inches of concrete upon the exposed sides or edges of the steel, such respective thicknesses of protecting concrete being exclusive of any plastering veneer or other surface treatment.

(18) All steel employed in and in combination with cement concrete shall be clean and free from paint, oil, grease, or tar of any kind, and shall also be free from scaly rust.

(e) Reinforced Concrete.

(19) In all cases where reinforced concrete is employed, whether in buildings as a whole or specified portions of buildings required or not required by this part of the By-law to be fire-proof or fire-resisting, the reinforced concrete work shall be designed in accordance with the rules, and carried out under the conditions hereinafter contained.

(20) Before the actual carrying out of the work, or any portion thereof, complete drawings of such work, or portion, shall be filed with the Surveyor, showing all details of the construction and the size, spacing, and arrangement of all the reinforcing members.

(21) Every agreement with a builder for the carrying out of reinforced concrete work shall contain provisions whereby the builder shall be responsible for the efficiency of the execution of such work, and also provisions empowering the architect or owner to apply actual loading tests to such work in accordance with the stipulated loads to be carried in each case. The Surveyor shall have power to require that such loading tests shall be actually applied in such cases as he may think fit.

(22) No reinforced concrete work will be permitted to be carried out except under the immediate and continuous direction and supervision of an engineer or foreman, who can produce to the Surveyor satisfactory evidence that he has had not less than two years' previous experience in the actual execution of this form of construction, whether in buildings or engineering structures.

(23) The cement concrete employed in reinforced concrete work shall be so proportioned that there shall be used not less than one cask of Portland cement, weighing three hundred and seventy-five pounds net for each eighteen cubic feet of net finished concrete, measured in place.

(24) The steel employed in reinforced concrete work shall be clean and free from paint, oil, grease, or tar of any kind, and shall also be free from scale rust.

(25) The following stress intensities upon the several materials will be permitted as a maximum, provided that the calculation of external forces has been made in accordance with the rules hereinbefore provided, viz. :—

(a) For all steel reinforcing members employed substantially as they come from the rolls—

in tension or compression, seventeen thousand pounds per square inch;

in shear, ten thousand pounds per square inch.

(b) For all steel reinforcing members where forged or welded—

in tension or compression, fifteen thousand pounds per square inch;

in shear, ten thousand pounds per square inch.

(c) For the adhesion between the concrete and the steel, seventy pounds per square inch.

(d) For concrete—

in compression, five hundred pounds per square inch;

in shear, seventy pounds per square inch;

in tension, nil.

(26) The detailed design of all parts of the reinforced concrete work, subject to cross bending or direct stresses, shall proceed upon the basis of the latest methods, subject, however, to the following requirements :—

(a) The steel shall take all the tensile stresses.

(b) The ratio of the modulus of elasticity of steel to that of concrete shall be taken as fifteen.

(c) Where the concrete is of insufficient section to take up the shearing stresses, sufficient steel shear bars shall be provided to take up the residue of the shearing stresses.

(d) In columns, all main reinforcing bars shall be held together by horizontal steel ligatures, spaced not further apart than twenty diameters of the main bars.

(e) The extremities of all tension bars employed in all girders shall be cogged or swelled in all cases where such bars exceed half inch in diameter.

(27) In the execution of reinforced concrete work no concrete in any column or main girder shall be left uncompleted at the end of the day. Whenever concrete operations are resumed the surfaces of completed work against which fresh concrete is to be placed must be thoroughly washed, cleaned, and watered. No concrete work shall be carried out during any period when the shade temperature is higher than one hundred degrees Fahrenheit, nor lower than thirty-five degrees Fahrenheit.

(28) The steel reinforcements shall be wholly embedded in and surrounded with cement concrete. The following shall be the minimum thickness of concrete upon the exposed sides or edges of all steel reinforcements, viz. :—

In floor slabs or plates, three-quarters of an inch.

In girders and ribs, one inch.

In columns, one and a half inches,

such thickness being exclusive of any plastering, veneer, or other surface treatment.

(29) The following shall be the minimum thicknesses of concrete in any portions of the work required by this By-law to be fire-proof or fire-resisting, viz. :—

In floor-plates not exceeding six feet net span, three inches.

In floor-plates not exceeding eight feet net span, four inches.

In floor-plates not exceeding ten feet net span, five inches.

In floor-plates exceeding ten feet net span, six inches.

In external walls not exceeding fifteen feet net span, four and a half inches.

In external walls exceeding fifteen feet net span, six inches.

In partitions, two and a half inches.

No internal wall shall be deemed to be fire-resisting unless four and a half inches in thickness. Such respective thicknesses shall be exclusive of any plastering, veneer, or other surface treatment.

PART XI.

17. Ruinous and Dangerous Buildings.

(1) When it is made known to the Council that any building or structure is in a ruinous or dangerous state the Council may require a survey of such building or structure to be made by the Surveyor, who shall have power to enter any premises for the purpose of making such survey, and if the Surveyor reports that such building or structure is in a ruinous or dangerous state the Council may cause the same to be shored up or otherwise secured to the satisfaction of the Surveyor, and shall cause a notice, in writing, to be served on the owner of such building or structure, requiring such owner forthwith to take down, secure, or repair such building or structure as the case may require.

(2) If such owner does not begin to take down, repair, or secure such building or structure within three days after service of such notice, and complete such taking down, repairs, or securing as speedily as the nature of the case will admit, the Council may, with all convenient speed cause all or so much of the building or structure as is in a ruinous or dangerous condition to be taken down, repaired, or otherwise secured in such manner as may be requisite, and may recover from the owner in any court of competent jurisdiction the cost incurred in so doing.

PART XII.

18. Verandahs, Signs, and Hoardings.

(1) No person shall erect, or cause to be erected, any portico or verandah over the footway of any street in the municipal district without first obtaining the consent of the Council, and such portico or verandah shall be of the shape, figure, dimension, and materials approved by the Council, but the lowest part of the frieze or rail of such portico or verandah shall in no case be of less height than eight feet six inches above the level of the outer edge of the footway.

(2) No opening shall be made in the roof of any verandah for the purpose of affording light unless such opening be properly framed and glazed with rough rolled plate-glass, protected underneath with fine mesh wire netting to the satisfaction of the Surveyor.

(3) Save as hereinafter provided, no person shall erect, build, or construct, or alter, or add to, or cause to be erected, built, or constructed, or altered, or added to, any hoarding, signboard, or erection for advertising purposes without first obtaining the consent of the Council, and unless such hoarding, signboard, or erection is erected, built, or constructed, altered, or added to in accordance with the plan and specification prepared by such person, and previously approved of by the Surveyor. No hoarding, signboard, or erection shall be within a distance of the building line of any street or road equal to the greatest height of such hoarding, signboard, or erection, nor the lowest part of such hoarding other than the main supports thereof be nearer than three feet from the levels of the ground.

(4) The material of which such hoarding, signboard, or erection is to be built or constructed, or with which it is to be altered or added to, shall be such as may be approved by the Surveyor, having due regard to the height, position, and site of such hoarding, signboard, or erection.

(5) No person shall erect or fix, or cause to be erected or fixed, under any verandah extending over the footpath in any street or road, any signboard, hanging lamp, or gas-pipe fixture unless the lowest part of such signboard, hanging lamp, or gas-pipe fixture is of a height not less than eight feet six inches above the level of the footpath over which it is fixed, and unless a written permit or licence from the Council is first obtained.

(6) No person shall erect, build, or construct, or cause to be erected, built, or constructed, any hoarding, signboard, or erection for advertising purposes over any street, or any part thereof, unless the same form part of a verandah.

(7) No signboard shall be fixed or erected on or over the roof of any verandah or on the front or roof of any building unless with the consent of the Council, and unless such signboard is of approved material and construction, and properly secured to the satisfaction of the Surveyor, and the depth of such signboard shall not exceed four feet six inches.

PART XIII.

19. Enforcement of By-law and Penalties.

(1) Where any building or erection is partly or wholly erected, built, or constructed contrary to the provisions of this By-law—

(a) the Council may give to the owner or builder, or leave upon the site of such building or erection, fourteen days' notice, in writing (which notice may be signed by the Municipal Clerk on behalf of the Council) to bring such building or erection into conformity with the said provisions or requiring the pulling down or removal of such building or erection; and

(b) if default is made in complying with such notice, and, notwithstanding the imposition or recovery of any penalty, it shall be lawful for the Council, through its Surveyor, to enter upon such building or erection, and on the site thereof, with a sufficient number of workmen, and to demolish and pull down the said building or erection, or any part or parts thereof, and to do any other act that may be necessary for the purposes, and to remove the materials thereof to some convenient place; and if the Council in its discretion thinks fit the Council may sell the same in such manner as the Council think fit; and

(c) all expenses incurred by the Council or Surveyor in demolishing and pulling down the said building or erection, or any part thereof, or of removing the materials thereof and selling the same, and in doing such other acts as aforesaid, and all fees or penalties due by the owner or builder thereof, may be deducted and retained by the Council out of the proceeds of such sale, and may be recovered from such owner or builder in any court of competent jurisdiction; and

(d) the Council shall pay over any surplus arising from such sale on application being made by the person entitled thereto.

(2) If any person erects, builds, alters, adds to, constructs, or fixes, or causes to be erected, built, altered, added to, constructed, or fixed, any hoarding, signboard, or erection for advertising purposes, or any signboard, hanging lamp, or gas-pipe fixture contrary to the provisions of this By-law, it shall be lawful for the Council or Surveyor to serve on the owner or occupier of the premises to which the same is affixed a notice to pull down and remove such hoarding, signboard, erection, hanging lamp, or gas-pipe fixture by giving such notice to such owner or occupier, or by affixing such notice on the hoarding, signboard, erection, hanging lamp, or gas-pipe fixture; and in the event of such owner or occupier thereof refusing or neglecting to pull down and remove such hoarding, signboard, erection, hanging lamp, or gas-pipe fixture for seven days from and after the service of such notice, it shall be lawful for the Council to pull down and remove, or cause to be pulled down or removed, any hoarding, signboard, erection, hanging lamp, or gas-pipe fixture constructed, erected, altered, added to, or fixed contrary to this By-law; and the Council may recover from such owner or occupier the cost of so doing in any court of competent jurisdiction, and, in addition, may sell the materials thereof, and apply the proceeds of such sale in reimbursing the expenses of pulling down and removing such hoarding, signboard, erection, hanging lamp, or gas-pipe fixture, and in paying any fees and penalties due by such owner or occupier.

(3) If any builder or owner disagrees with any decision of the Surveyor as to any matter or thing arising under this By-law he may, on giving notice in writing thereof to the Surveyor, and on payment to the Treasurer of the sum of Two pounds two shillings, have the question referred to an architect of known ability appointed by the Council, and one appointed by the Governor in Council, and the said architects in case of disagreement may call in a third architect of known ability, and the decision of any two of such architects shall be final and conclusive, and binding in all respects on the parties.

(4) Any person who is guilty of any wilful act or default contrary to any of the provisions of this By-law shall be liable to a penalty not exceeding Twenty pounds for each offence; and in the case of a continuing offence, to a further penalty of Two pounds for each day such offence is continued after written notice of the offence from the Council.

PART XIV.

(1) This By-law shall apply to and have operation throughout the whole of the City of Hawthorn, but shall not apply to any Government railway or municipal building, nor to any building in course of removal through and beyond the city.

SCHEDULE "A."

Fees Payable under this By-law.

For the purpose of determining the fees to be paid under this By-law, the following matters shall be considered:—

The fee for buildings of the domestic class shall be determined by the number of squares contained in the total floor area.

The fee for buildings of the warehouse class shall be determined by the cubical capacity thereof.

The fee for buildings of the public building class, and special and temporary buildings, shall be determined by the Surveyor, according as the building partakes of the nature either of the domestic or warehouse class.

Buildings of Domestic Class.

For all new buildings erected—For every square or part of a square, 2s. Maximum fee for one building of domestic class, £2 10s.

Conditions for Determining the Rates of Buildings of the Warehouse Class and Public Building Class.

In Reference to Capacity.	Rate of Building.
Over 200,000 cubic feet	Extra first rate
More than 120,000 cubic feet and not more than 200,000 cubic feet	First rate
More than 80,000 cubic feet and not more than 120,000 cubic feet	Second rate
More than 40,000 cubic feet and not more than 80,000 cubic feet	Third rate
More than 10,000 cubic feet and not more than 40,000 cubic feet	Fourth rate
Not more than 10,000 cubic feet ..	Fifth rate

Fees Payable under Part X. of this By-law and for Special Duties.

For the following special duties performed by the Surveyor where such duties are not performed incidentally to the building or rebuilding of, or adding to, or altering any building in respect of which any other fees may be payable, that is to say:—

Calculation fee on reinforced concrete and frame-construction buildings, an amount equal to the building fee.

Calculation fee on brick or stone buildings in which more than one-half the areas of the floors are carried by internal pillars or columns, an amount equal to half the building fee.
Calculation fee for reinforced concrete floors, including ribs or girders, each, £1 1s.
Calculation fee for reinforced concrete floors, without ribs or girders, each, 10s.

Fees for Special Services.

Fees for special services not expressly provided for:—

For any services performed by the Surveyor which are required by this By-law, but not comprehended under any of the foregoing heads, such fees, not exceeding Five pounds five shillings, as the Council may by resolution appoint and fix.

SCHEDULE "B."

Table showing minimum sizes, dimensions, and spacings of all timbers and wood beams to be used in any building:—

Blocks—Redgum or jarrah, at least 4 in. x 4 in., sunk in the ground at least 16 inches on a sole-piece at least $1\frac{1}{2}$ inches thick and measuring at least 54 superficial inches.
Ground plates and sleeper plates—4 in. x 3 in., scarfed on blocks not more than 4 feet apart.
Floor joists—4 in. x 2 in., not more than 18 inches from centre to centre.
Vermin plates—4 in. x 2 in.
Top plates—4 in. x 2 in.
Studs—4 in. x $1\frac{1}{2}$ in. on all walls. Studs for windows and door openings, and lintels for doors and windows, 4 in. x 2 in. Angle studs, 4 in. x 4 in.
Ceiling joists—4 in. x $1\frac{1}{2}$ in.; 18 inches from centre to centre.
Rafters—4 in. x $1\frac{1}{2}$ in., properly braced with collar ties to the satisfaction of the Surveyor.
Hips and ridges and hanging beams of sizes approved by the Surveyor.

SHIRE OF BORUNG.

By-Law No. 13.

A By-law of the Shire of Borung made under subdivisions 1 and 2 of section 197 of the *Local Government Act* 1903, and numbered 13, for adopting certain provisions of the 13th schedule of the said Act.

IN pursuance of the powers conferred by the *Local Government Act* 1903, the President, Councillors, and Ratepayers of the Shire of Borung order as follows:—

1. The following provisions contained in the 13th schedule of the said Act shall be and are hereby adopted:—

PART IV.—PLACES OF IMPROVEMENT AND RECREATION, ETC.
Sub-section 2.—Public Gardens.

Clauses 4, 5, 6, 7, 8, 9, 10, 11, 12.

This By-law shall apply to and have operation throughout the whole of the municipal district of the Shire of Borung.

The common seal of the Shire of Borung was hereunto affixed in pursuance of an order of the Council, the 16th day of October, 1913, in the presence of—

C. W. POTTER, President.
JOHN CAMPBELL, Councillor.
R. LONG, Secretary.

Resolution for passing this By-law No. 13, agreed to by the Council the 12th day of September, 1913, and confirmed the 16th day of October, 1913. 3058

SHIRE OF TUNGAMAH.

By-Law No. 29.

For Regulating Buildings in the Township of Cobram.

THE Council of the Shire of Tungamah, in the State of Victoria, in the name and on behalf of the President, Councillors, and Ratepayers of the said Shire, by virtue of the powers contained in the *Local Government Act* 1903, and every other power enabling them in this behalf, and for the purpose of carrying the said Act into execution within the jurisdiction of the said Council, hereby makes the following By-law, being By-law No. 29 of the said Council:—

BUILDING REGULATIONS FOR THE TOWN OF COBRAM.

1. Where any person proposes to erect any building, or to alter by way of addition any building already erected,

he shall submit to the Council—(a) A plan of the land upon which he proposes to build, showing the proportion of such land which is occupied by existing buildings (if any) and the proportion which will be occupied by buildings proposed to be erected; (b) a plan and specification of the proposed building showing its height, design, structure, building line, arrangements for sanitation, and the materials proposed to be used in its construction; and (c) an application for the approval of the Council of such plans and specifications, giving particulars of the proposed situation.

2. The plans to be submitted shall be the usual working drawing, comprising plan, section plans, elevation plans, block plan, copy of specification; and the application shall also state the estimated cost of the building; such plans to be drawn to not less than ¼-in. scale.

3. The plans to be submitted shall, if approved, be stamped by the Council's officer as being approved, and shall be returned to the applicant, but shall be produced to the Council's officer whenever required by him.

4. At least a fortnight's notice must be given by the applicants for permission to build.

5. The minimum size of allotments on which dwelling houses may be erected shall be 33 feet frontage x 105 feet deep, or equal area with lane 10 feet wide at rear, or, if there be no lane at rear, the frontage must be 44 feet; and a side entrance or right-of-way 10 feet wide must be provided. If practicable, the lane must be provided. At least 6 feet of frontage must be left unbuild upon, viz., 3 feet 6 inches on one side of the dwelling-house and 2 feet 6 inches on the other side.

6. No dwelling houses shall be erected within 15 feet of the building line, the distance being calculated from the nearest part of the building or the verandah.

7. No shop shall be erected with less than 16 feet frontage. The minimum inside height of shops from floor to ceiling to be 12 feet. If no entrance be provided from the rear, a side entrance of at least 4 feet wide must be provided. All shops shall have open spaces to the full width of the shop for at least 100 feet in depth at the rear of the shop where practicable. No external walls to be built of wood or inflammable material without special permission from the Council.

8. In cases of less frontage than above specified, special application must be made to the Council, and such application must be accompanied by a fee of 2s. 6d.

9. All buildings to be brick, stone, or other approved material; in single story brick, walls to be not less than 9 inches; if single story wood, not less than 5½ inches in thickness, internal walls not less than 4 inches if built of weatherboard, studding to be not less than 4 inches x 2 inches. No unpapered hessian to be used.

10. In three-story brick buildings the walls at the bottom story shall be at least 14 inches in thickness, the second story 14-inch walls, the third 9-inch walls, with approved 18-inch piers. In four story the walls of the bottom story shall not be less than 18 inches, the second 16-inch walls, with approved 18-inch piers, the third 14-inch walls, and the fourth 9-inch walls. Cavity walls to be connected by approved ties. In two-story buildings the walls at bottom story to be 12 inches in thickness at least, and the second story to be 9 inches. In case of any other material being used, the thickness of the walls to be approved of by the Council.

11. The walls of cellars must be brick, cement, or approved material, with vertical damp-courses.

12. Between the under-side of every joist in dwelling houses and the ground surface there shall be a ventilated space of not less than 12 inches, and this space shall be thoroughly ventilated by suitable and sufficient air bricks. Ground surface shall be considered same as the fixed level of the footpaths at the building line, or the crown of the roadway opposite the proposed building. In case of shops the under-side of the joist shall be level with the ground surface.

13. There shall be a damp-course in all the walls of brick, stone, or similar material, of lead, slate, or other material approved by the Council's officer. Such damp-course to be placed underneath level of the ground floor plate to the full width of all walls.

14. No material considered by the Council's officer to be dangerous to health will be permitted to be used in erection or repair of any building. Any person desirous of using material for buildings other than new material shall acquaint the Council's officer with the locality whence it came, and a sworn declaration may be demanded by the Council's officer if considered necessary.

15. No living room shall contain less than 1,000 cubic feet of air space. In cases where same is covered with skillion roof, the back wall shall not be less than 9 feet high from floor to ceiling; all rooms in the main building shall not be less than 10 feet high from floor to ceiling.

16. Each habitable room shall have one or more windows, each to be at least 4 ft. 2 in. x 2 ft. 10 in., opening directly to the external air, and two 9 inch x 6 inch air-bricks or similar openings under the ceiling line.

17. No first or second floor joists shall be less than 9 inches by 2 inches for a span of 14 feet, and for every additional 5 feet span the joists shall be 1 inch deeper, with a row of herring bone struts not more than 7 feet apart.

18. All ground floor piers shall be not less than 6 feet, centres and bearers not less than 5 inch x 4 inch, joists not less than 5 inch by 2 inch. Damp-courses must be inserted in floor piers under bearers.

19. Ceiling joists shall not be less than 4 inch x 2 inch and rafters not less than 4 inch x 2 inch. Ceiling joists to be spaced not more than 2 feet apart, rafters not to be spaced more than 4 feet apart.

20. In iron flat roofs the rafters shall be not more than 2 feet centres, and bearers not more than 7 feet apart.

21. Where roofs are covered with slates, shingles, or tiles, the rafters and ceiling joists shall be spaced not more than 18-inch centres. No roof in any class of building to be covered externally with wood or any inflammable material.

22. Every dwelling house shall have a bathroom, dimensions not less than 7 feet x 4 feet, or equal area, fitted with the usual water service pipes, and one tap and shower. The floor of such bathroom shall have a tray or approved covering, and the walls shall have a cemented or approved dado of 5 feet high. This clause shall not apply where the town water supply is not available.

23. Portions of Punt-road, Main-street, High-street, and Station-street to be brick areas.

24. All fences to be approved of by the Council's officer. Verandahs on streets to be of approved design and of a width to be fixed by the Council.

25. The Council may refuse permission to build on lands which may be considered unsuitable for building on.

26. Applications for permission to erect fowl-houses, stables, and out-houses shall be made to the Council for approval, but no fees shall be charged for such permission.

27. No building shall be removed and re-erected without the consent of the Council.

28. All footpaths shall be made uniform to the satisfaction of the Engineer.

29. A fee of 2s. 6d. shall be paid to the Council before approval will be given to any plans and specifications for the erection of a building or the erection of additions to existing buildings.

30. Provided always that notwithstanding anything hereinbefore provided to the contrary, the Council reserves the right to order what class of building either in material or design shall be erected in any particular locality within the area, and also under special circumstances and for special causes; and at a meeting, at which due notice of the business has been given to each councillor, declare that the provisions of these Regulations, either in whole or in part, shall not apply to any particular building.

31. Any person offending against or not complying with any provision of these Regulations shall be liable to a penalty not less than £1 or more than £50, and the Council may by notice, signed by the clerk, order that any building which is commenced or erected in contravention of these Regulations be altered to comply therewith, and may, where deemed advisable, in like manner order that all other operations on such building be discontinued until such first-mentioned order has been complied with to the satisfaction of the Council.

32. Application forms for permission to erect cottages, villas, shops, other buildings, or alterations or additions to existing buildings, may be obtained on application to the Shire Secretary.

The above By-law was passed at a meeting of the Tungamah Shire Council, held on Monday, 6th October, 1913, and confirmed, and the seal of the Council attached at a meeting of the said Council, held on Monday, 3rd November, 1913.

A copy of the Gazette filed at each place for public reference.

The GOVERNMENT GAZETTE is published on WEDNESDAY EVENING in each week, and Notices for insertion must be received by the Government Printer on or before Two o'clock of the day preceding the day of publication.

Single copies of the GOVERNMENT GAZETTE are Sixpence, posted Sixpence halfpenny, each.

N.B.—All Gazettes prior to 1st January, 1872, are One shilling and sixpence, posted One shilling and sixpence halfpenny each.

*** ALL PAYMENTS ARE REQUIRED IN ADVANCE. Remittances should be made by postal note, money order, or draft in favour of the Government Printer. Advertisements unaccompanied by a remittance sufficient to cover the cost of insertion will be returned unpublished.

All communications should be addressed to "The Government Printer, Melbourne."

THE "VICTORIA GOVERNMENT GAZETTE."

SUBSCRIPTIONS.—The Subscription, including Postage, is £1 8s. 4d. per annum, or 7s. 1d. per quarter, payable in advance.

Subscriptions are required to commence and terminate with a month.

A lesser period than three months cannot be subscribed for.

Subscribers do not receive the Acts of Parliament with the Gazette.

ADVERTISEMENTS are charged at the rate of SEVENPENCE per line throughout.

The Title (£5 Reward, Dissolution of Partnership, &c.) forms one or more lines, as a heading.

On an average, ten words make a line, but for the description of a brand consisting of more than one letter, &c., placed perpendicularly, thus, B, each additional letter under the first is charged as a line.

Every signature must likewise be counted as a line.

The final words of a paragraph, though only a portion of a line, must be counted as one line.

Signatures (in particular) and Proper names must be written very plainly in the text; ONE SIDE ONLY of each slip of paper should be WRITTEN UPON.

ALL DOCUMENTS illegibly written will be returned unpublished, and, where brands occur unprovided for by the ordinary letters of the alphabet, a worded explanatory description must be furnished.
