All Castings under this Contract shall be supplied subject to the approval of the officer duly authorized by the Department for which the castings are required, to order or accept delivery of same.</p> <p>2. Castings of a special character other than those provided for under this Schedule may be obtained locally without infringing this Contract.</p> <p>3. All castings are to be clean, sharp, free from surface scale, shell, cold shuts, blow holes, honey-comb, cinder, or any other imperfections, and are to be sound in every respect, and thoroughly close in grain. When specially ordered, the castings are to be run with heads or runners of such weight as may be ordered, such heads and runners to be cut off by the Contractor before delivery is made, and the charge for the casting must be at the net weight only, trimmed and clean.</p> <p>4. Whenever specially ordered, the iron castings shall be run from the very best "cold-blast iron" of such particular brand, quality, and mixture as may be described in the order; or of such other substituted mixture as may be approved or directed by the officer of the Department ordering, so as to produce a hard, close, soft, or other description of metal, at the option and to the satisfaction of the officer ordering.</p> <p>5. Whenever castings are required, and, in the opinion of the officer ordering, they can be moulded from the broken originals, the Contractor will be bound to mould from such broken originals without requiring the Government to supply a wooden or other pattern for same, and without being allowed any extra rate.</p> <p>6. All patterns lent by the Government will be delivered to the Contractor at his works, and all such patterns must be returned by and at the expense of the Contractor in good order and condition, and must be delivered together with the castings. In the event of the non-return of any of the patterns, or of their being damaged, the price, which will be fixed by the officer ordering, shall be paid by the Contractor, or may be deducted from any money due to the Contractor or from his security money.</p> <p>7. The Contractor shall, during the currency of this contract, furnish the officer ordering with the address or addresses of the place or places at which the steel castings are being manufactured by the Contractor, and the officer ordering, or any person appointed by him, from time to time shall at all times during business hours have free access to such place or places, and shall be afforded every facility for inspecting the castings while in process of manufacture.</p>

	<p style="text-align: center;">CASTINGS—continued.</p> <p style="text-align: center;">(Manufactured within the Commonwealth.)</p> <p style="text-align: center;">SPECIFICATIONS FOR CASTINGS—continued.</p> <p>8. No subletting will be allowed; all work must be carried out in the factory of the Contractor; the hours of employment of any person engaged in the manufacture of the Castings, &c., tendered for in this schedule shall not exceed 48 per week, and every such person shall be paid such wages and shall be employed subject to such conditions as are or may be determined by the Iron and Brasemoulders Board under the Factories and Shops Act; and a copy of these conditions shall be kept conspicuously and continually posted in legible Roman characters in the factory (and in each part of the factory where several rooms are in use) in which castings are prepared or manufactured under this contract. Any infringement of these conditions, in the opinion of the Treasurer, will subject the Contractor, upon report from the Tender Board, to such mulct, not exceeding Fifty pounds (£50), as the Treasurer may direct, and the amount will be deducted from the Contractor's account or from the security money, and the Treasurer's decision shall be binding, final, and conclusive as to the fact of infringement, and in all other respects.</p> <p style="text-align: center;">QUALITY AND TESTING OF STEEL CASTINGS.</p> <p>9. <i>Process of Manufacture.</i> Steel for castings shall be made by the open hearth process, Acid or Basic, or by such other process as may be approved by the Officer duly authorized by the Department to accept delivery of the castings contracted for—</p> <p>10. <i>Annealing.</i>—All steel castings shall be thoroughly annealed in a properly constructed annealing furnace, which must permit of the whole casting being uniformly raised in temperature throughout its whole extent to the necessary intensity required for annealing purposes. The casting shall be allowed to cool down prior to removal from the annealing furnace; and if subsequently heated for any purpose it shall be again similarly annealed if required by the officer duly authorized by the Department to accept delivery.</p> <p>11. <i>Testing and Inspection.</i>—The following tests and inspections shall be made, preferably at the place of manufacture prior to despatch, but in the event of any casting proving unsatisfactory in the course of preparation, or fitting in its place, such casting shall be rejected, notwithstanding any previous certificate of satisfactory testing.</p> <p>12. <i>Tensile and Bend Test Pieces.</i>—The tensile strength and ductility shall be determined from standard test pieces, which are to be prepared from sample pieces cast on the casting. These sample pieces are not to be cut, or partially cut, from the castings until the annealing of such castings has been completed, nor until they have been stamped by the officer duly authorized to accept delivery. The test pieces are to be stamped by the aforesaid Officer after the annealing. All test pieces shall be selected by the aforesaid Officer and tested in his presence, and he shall satisfy himself that the conditions herein described are fulfilled.</p> <p>13. <i>Number of Tests.</i>—At least one tensile test and one cold bend test are to be taken from each casting. In castings of complex designs, at least two tensile and two cold bend tests are to be taken. Where a casting is made from more than one charge of steel, at least four tensile and four cold bend tests are to be taken from pieces cast as far apart as possible on the casting, some test pieces being taken from as near the top and others from as near the bottom of the casting as practicable.</p> <p>14. <i>Dimensions of Tensile Test Pieces.</i>—The tensile test pieces are to be turned so as to have a diameter of $\frac{5}{16}$ inch with a gauge length of 2 inches, or a diameter of $\frac{7}{16}$ inch with a gauge length of 3 inches, or a diameter of $\frac{9}{16}$ inch with a gauge length of $3\frac{1}{2}$ inches.</p> <p>15. <i>Dimensions of Bend Test Pieces.</i>—The bend test pieces are to be machined to a rectangular section 1 inch wide by $\frac{3}{4}$ inch thick, with the edges rounded to a radius of $\frac{1}{4}$ of an inch. They are to be bent over the thinner section. The bending may be performed either by pressure or blows.</p> <p>16. <i>Tensile Tests.</i>—The tensile breaking strength determined from test pieces of standard dimensions is to be between the limits of 26 and 35 tons per square inch, with an elongation of not less than 20 per cent. measured on the standard test piece.</p> <p>17. <i>Bend Tests.</i>—The bend test pieces must withstand, without fracture, being bent cold through an angle of 120 degrees, the internal radius of the bend being not greater than 1 inch.</p> <p>18. <i>Additional Tests before Rejection.</i>—Should either the tensile or bend test, or both, fail, and should the Officer duly authorized for the purpose consider the fractured test piece or test pieces, or the results obtained therefrom, do not fairly represent the quality of the casting, a duplicate of the test or tests which failed shall be made if requested by the maker. In such cases the quality of the casting shall be judged by the result of the duplicate test or tests, and not by the original test or tests which failed.</p> <p>19. <i>Percussive Tests.</i>—Stern frames cast in one piece to be let fall on hard ground (excavations being made to take boxes and other projections) after being raised through an angle of 45 degrees. Stern frames cast in more than one piece, rudders, steering quadrants, crossheads, tillers, &c., are to be dropped on hard ground from a height of from 7 to 10 feet, according to the design, shape, and weight of the casting.</p>	£ s. d.

	QUALITY AND TESTING, ETC.—continued.		
	20. <i>Castings of Complex Design</i> .—Castings of complex design which are liable to be deformed if submitted to the drop or percussive test, may have this test dispensed with provided two tensile and two cold bend tests be made upon pieces taken from positions as far apart as possible on each casting; one tensile and one bend test being taken from as near the top, and the others from as near the bottom, of the casting as practicable.		
	21. <i>Hammering Tests</i> .—After being subjected to the percussive test, the casting in each case is to be subsequently slung up and well hammered with a sledge hammer not less in weight than 7 lbs., to satisfy the Officer duly authorized for the purpose that the casting is sound and without flaw. This hammering test is also to be applied to castings of complex design which may not have been submitted to a percussive test.		
	22. <i>Drilling Tests</i> .—In the case of large castings, the Officer duly authorized by the Department is to supplement the foregoing tests by drilling small holes at such parts of the castings as experience shows cavities and contraction cracks are most likely to occur, and at positions which are to be agreed upon between the aforesaid Officer and the manufacturer, in order to determine the soundness or otherwise of the casting. These holes are afterwards to be tapped and properly filled up with screw plugs.

All Items to Sample Material at Tender Board Office.			
SPECIFICATION.			
All items, with the exception of 31, 32, 33, and 34, shall be made of 100 A 1 Bunting strictly in accordance with sample Bunting at the Tender Board Office.			
Items 31, 32, 33, and 34 are to separate samples.			
All flags shall be well and strongly made, lockstitched sewn, and subject to the approval of the Officer ordering.			
All flags shall be headed with light Linen Duck, and roped and toggled as required.			
All flags must conform strictly to the shade of colour of the samples shown, otherwise they will be rejected.			
The contractor may, at any time during the currency of this contract, be called upon to furnish a statutory declaration as to the country of origin of the articles supplied and the material from which they are made.			
No subletting will be allowed; all work must be carried out in the factory of the contractor; the hours of employment of any person engaged in the making up of the Flags tendered for in this schedule shall not exceed 48 per week; and every such person shall be paid such wages and shall be employed subject to such conditions as are or may be determined by the Tentmakers' Board under the Factories and Shops Acts of the State of Victoria; and a copy of these conditions shall be kept conspicuously and continually posted in legible Roman characters in the factory (and in each part of the factory where several rooms are in use) in which goods are prepared or manufactured under this contract. Any infringement of these conditions, in the opinion of the Treasurer, will subject the contractor, upon report from the Tender Board, to such mulct, not exceeding Fifty pounds (£50), as the Treasurer may direct, and the amount will be deducted from the contractor's account or from the security money, and the Treasurer's decision shall be binding, final, and conclusive as to the fact of infringement and in all other respects.

CONTRACT No. 1917/412.			
Schedule No. 38.			
IRON.			
(For Rivet Making.)			
For Shipyard, Williamstown.			
Contract from 1st July, 1917, to 31st December, 1917.			
1917/412—The Lion Rolling Mills Pty. Ltd. Security £50.			
Delivery to be made at the Shipyard, Williamstown, as ordered.			
The iron supplied must have a tensile strength of at least 20 tons per square inch and an elongation of at least 20 per cent. in a length of eight inches, and to be capable of being bent double when cold to a radius equal to the diameter of the bar. Samples of each size of iron quoted for to be sent along with the tender.			
Supplies of iron which are not equal under test to the samples originally supplied will be absolutely rejected.			
In the case of emergency where loss or inconvenience would be occasioned, or where sufficient notice cannot be given to enable the contractor to ensure prompt delivery, this contract shall not be considered as being broken, infringed, or vitiated, notwithstanding anything in the General Conditions to the contrary, by the purchase of any item elsewhere to meet such emergency demands arising at the Shipyard, Williamstown.

	CONTRACT NO. 1916/294. Schedule No. 28. PAINT (WHITE LEAD), AND PAINT OILS. Contract from 1st July, 1916, to 30th June, 1918. 1916/294—W. and G. Dean Pty. Ltd. ... Security, £175 WHITE LEAD, &C. In packages as stated hereunder. <i>Specification for White Lead.</i> The maker's name where indicated must be stated. All supplies shall be subject to the approval of the officer ordering and must be of the very best description. The White Lead must be finely ground in the best quality of pure linseed oil, the proportion of which must not exceed seven and one half per cent. of the weight. The surface of the lead when exposed to the air without water on the top of the lead shall not become brittle or crumbly after seven days' exposure. The White Lead is to be of the best quality. The process by which it is made shall be branded on the packages in which the White Lead is delivered. White Lead made by the Stack Process shall consist of Lead carbonate, and not less than twenty-five per cent. (25%) of Lead hydrate, as determined by analysis on the pigment freed from oil. The proportion of lead in dry white lead after the removal of the oil, when calculated to metallic lead shall not be less than seventy-eight (78) per cent. equal to oxide of lead eighty-four (84) per cent. Quantities of White Lead for testing may be taken out of any of the drums or kegs supplied at the expense of the Contractor, and then mixed together and analyzed. Packages in which White Lead and Oils are supplied, remain the property of the Contractor, and must be removed by the Contractor at his own expense when empty.	£ s. d.

	PIPING, PUMPS, SPOUTING, RIDGING, ETC.		
	Items marked (*) to sample at Tender Board Office.		
	SUB-SCHEDULE A.		
	(Manufactured within the Commonwealth.)		
	No subletting will be allowed; all work must be carried out in the factory of the contractor; and the hours of employment of any person engaged in the manufacture of the articles tendered for in this Schedule shall not exceed 48 per week, and every such person shall be paid at a minimum wage of not less than 9s. per day, except for articles where the wages and conditions for the manufacture of which are provided for by Special Boards appointed, or which may be appointed during the currency of the contract under the Factories and Shops Acts, when every such person shall be employed at such wages, and subject to such conditions as are, or may thus be determined; and a copy of these conditions shall be kept conspicuously and continually posted in legible Roman characters in the factory (and in each part of the factory where several rooms are in use) in which goods are prepared or manufactured under this contract. Any infringement of these conditions, in the opinion of the Treasurer, will subject the contractor, upon report from the Tender Board, to such mulct, not exceeding Fifty pounds (£50), as the Treasurer may direct, and the amount will be deducted from the contractor's account or from the security money, and the Treasurer's decision shall be binding, final, and conclusive as to the fact of infringement and in all other respects.		
	The Contractor shall, before any account is passed for payment for services rendered, furnish a statutory declaration that all the workmen under this contract have been employed in accordance with the above clause of these conditions, and have been paid not less than the minimum rate of wages for such workmen as is provided for under that clause.		
	Where the material used in the manufacture of the Piping, &c., tendered for in this schedule is not of Commonwealth production it must, where practicable, be of British origin, and the Contractor, if called on during the currency of the contract to do so, shall furnish evidence by statutory declaration or production of invoice of the country of origin of the material used.

	as may thus be determined; and a copy of these conditions shall be kept conspicuously and continually posted in legible Roman characters in the factory (and in each part of the factory where several rooms are in use) in which goods are prepared or manufactured under this contract. Any infringement of these conditions, in the opinion of the Treasurer, will subject the contractor, upon report from the Tender Board, to such mulct, not exceeding Fifty pounds (£50), as the Treasurer may direct, and the amount will be deducted from the contractor's account or from the security money, and the Treasurer's decision shall be binding, final, and conclusive as to the fact of infringement and in all other respects.		
	The Contractor shall, before any account is passed for payment for services rendered, furnish a statutory declaration that all the workmen under this contract have been employed in accordance with the above clause of these conditions, and have been paid not less than the minimum rate of wages for such workmen as is provided for under that clause.		
	All Safes and Boxes must be of the best make, subject to test.		
	Tenderers to insert maker's name of the Safes and Boxes, also the No. of the maker's list of the Safes they offer to supply. Safes must have ½-inch steel doors, No. 10-gauge steel for outside body, No. 14-gauge steel for inside lining, with bolts, locks, and duplicate keys. The fireproof packing to be not less than 3 inches thick, irrespective of steel plates. Locks on doors of safes must be protected by chilled-steel armour plate.		
	The Boxes must be made with 14-gauge steel for outside body and 16-gauge steel for inside lining, with locks and duplicate keys. Fireproof packing same thickness as in safes. The locks on doors of boxes must also be protected by chilled-steel armour plate, as in the case of safes.		
	The Contractor, if called on during the currency of the contract to do so, shall furnish evidence by statutory declaration or production of invoice, as required, of the country of origin of the material used.

Schedule No. 49.

TINWARE, ETC.

(Manufactured within the Commonwealth.)

All Items to Sample (at Tender Board Offices).

All Measurements are insides.

The weights quoted in this Schedule are the weights of the samples shown.

The tinware goods are to be made of the best quality tin or tinned steel of the gauges set out against the respective items. The galvanized-iron goods which are not specified as of black iron galvanized, must be made of Queen's Head or Redcliffe brand, of No. 20 standard gauge iron, and must be within 2 ozs. of the weight specified, either under or over. Items 40, 41, 43, and 44 must be made of black iron, galvanized. The joints of the wire in all cases must not be near the seams of the article, even though in this respect the samples may be faulty. All galvanizing and tinning must be done within the Commonwealth.

Cash Boxes to be stamped "G.P.O." &c., as required.

The contractor will be allowed a reasonable time, and, in the case of orders for the larger institutions, a period of one month from the receipt of each order to complete the delivery.

	TINWARE, ETC.—<i>continued.</i>		
	(Commonwealth Manufacture— <i>continued.</i>)		
	No subletting will be allowed; all work must be carried out in the factory of the contractor; every person engaged in the manufacture of the tinware tendered for in this Schedule shall be paid such wages and shall be employed subject to such conditions as are or may be determined by the Sheet Metal Workers Board under the Factories and Shops Act of Victoria; and a copy of these conditions shall be kept conspicuously and continually posted in legible Roman characters in the factory (and in each part of the factory where several rooms are in use) in which goods are prepared or manufactured under this contract. Any infringement of these conditions, in the opinion of the Treasurer, will subject the contractor, upon report from the Tender Board, to such mulct, not exceeding Fifty pounds (£50), as the Treasurer may direct, and the amount will be deducted from the contractor's account or from the security money; and the Treasurer's decision shall be binding, final, and conclusive as to the fact of infringement and in all other respects.

CONTRACT No. 1916/315.				
Schedule No. 41.				
TUBES AND COVERS FOR MOTOR CARS AND CYCLES.				
(Manufactured within the Commonwealth.)				
Contract from 1st July, 1916, to 30th June, 1918.				
1916/315—Barnet Glass Rubber Co. Ltd. Security £50.				
The Tubes and Covers shall be of the very best description, subject to the approval of the Secretary for Public Works or such other Officer as may be duly authorized to order.				
No subletting will be allowed; all work must be carried out in the factory of the contractor. Every person engaged in the manufacture of the Indianrubber goods tendered for in this schedule shall be paid such wages and shall be employed subject to such conditions as are or may be determined by the Rubber Board under the Factories and Shops Acts of Victoria; and a copy of these conditions shall be kept conspicuously and continually posted in legible Roman characters in the factory (and in each part of the factory where several rooms are in use) in which goods are prepared or manufactured under this contract. Any infringement of these conditions, in the opinion of the Treasurer, will subject the contractor, upon report from the Tender Board, to such mulct, not exceeding Fifty pounds (£50), as the Treasurer may direct, and the amount will be deducted from the contractor's account or from the security money, and the Treasurer's decision shall be binding, final, and conclusive as to the fact of infringement and in all other respects.

	TUBING AND FITTINGS (GAS, WATER, AND STEAM).		
	All lengths of galvanized tubing supplied under this contract shall bear the brand as having passed the test of the Melbourne and Metropolitan Board of Works.		
	In the case of galvanized tubing, &c., the officer receiving same shall satisfy himself as to the quality and extent of the galvanizing material used in its manufacture.		
	The contractor, when requested to do so by the officer ordering, shall supply copies of price list current at any time during the period of the contract.		
	Preference will be given by the Tender Board for tenders for articles manufactured within the Commonwealth, provided the quality of such articles is equal to the particular manufacture indicated in the schedule and the rates charged are considered reasonable. Preference will also be given to articles of British manufacture as against those of foreign manufacture. As regards imported articles, the tenderer must indicate hereunder by inserting the name of the country from which the tubing, &c., is imported whether the goods tendered for are of British or foreign origin.		
	In the event of the tender being accepted for goods of Commonwealth or British manufacture, all such goods supplied shall bear evidence that they are of the particular manufacture tendered for, and the Contractor, if called on to do so during the currency of the Contract, furnish fresh evidence by statutory declaration or production of invoice of the country or origin of the tubing, &c., supplied. In all cases, articles of Commonwealth manufacture and production will receive preference over imported goods.

SPECIFICATION FOR VENETIAN BLINDS.

OUTSIDE VENETIAN BLINDS.

Frames.—The frames to be constructed of clear pine, wrought throughout, with 1-in. jambs and soffits dove-tailed at joints, and $\frac{3}{4}$ -in. front and back linings, securely put together. The outside linings to be finished all round with small clear pine moulding mitred at angles, and the frames to be accurately fitted to openings with any cutting to shape required, and to be securely screwed to plugs in reveals. The head linings to be made to form casings of sufficient depth to entirely cover the blinds when drawn up, and the fronts of same to be divided into ornamental panels of approved patterns by means of selected mouldings planted on; the lower edges of outside head linings to be scalloped to approved pattern.

Blinds.—The laths, pulley bearers, and top and bottom laths of clean clear pine wrought throughout, and all laths to be $2\frac{1}{2}$ inches wide and spaced not more than 2 inches apart; pulley bearers to be $1\frac{1}{2}$ inch thick, to be properly mortised to receive pulleys, and to be neatly grooved for cords; top and bottom laths to be $\frac{5}{8}$ inch thick and intermediate laths $\frac{5}{16}$ inch thick, and all edges to be neatly rounded.

Blinds to be hung with all necessary brass pulleys, lignum vitæ or other approved drums, approved linen web ladder tapes, and 4-lb. best patent white cords, and to be provided with Young's patent cord-holders, or, when ordered, 6-in. double brass plate hooks. Blinds to be provided with brass pulleys, so that they may be raised and regulated from inside the rooms. Blinds up to 3 ft. 6 in. in width to have two lines of tapes and cords, and over that width three lines.

Painting.—The whole of the woodwork of blinds and frames to be primed with red lead and raw linseed oil, and to be then painted three coats of the best oil colour, composed of white lead, raw linseed oil, colour, turpentine, and dryers; the painting to be rubbed down with glass paper between the coats, and to be finished in selected tints. The last coat but one to be slightly darker than the tint selected for the finishing coat, and the last coat to be a coat of flattening. The whole to be once varnished with the best English pale copal varnish.

Repairing, &c., old blinds.—Repairing old blinds is to include taking down, washing, painting two coats of oil colour as before described and once varnishing both blinds and frames, providing and fixing approved new linen web ladder tapes and 4-lb. best patent white cords, and securely refixing and putting in working order.

INSIDE VENETIAN BLINDS.

Inside Venetian Blinds to be as above described for Outside Blinds, except that they are to be made of California red pine without frames.

Repairing, &c., old blinds.—Repairing old blinds is to include taking down, washing, painting two coats of oil colour as before described and once varnishing, providing and fixing approved new linen web ladder tapes and 4-lb. best patent cords, and securely refixing and putting in working order. Any old galvanized iron brackets to be made thoroughly secure, and new galvanized iron brackets to be supplied and fixed where required.

MATERIALS FOR ABOVE.

Materials.—The clear pine and red California pine for all blinds are to be sound, dry, and well seasoned; and the whole of the materials are to be of the best of their respective kinds, free from all defects equal to samples to be seen at the Department of Public Works, and to be subject to the approval of the Superintending Officer. Blinds to be made generally to correspond with samples to be seen at the Public Offices.

Fitting and fixing.—Where the building for which the blinds are required is within a radius of 8 miles from the General Post Office the contractor will be required, when ordered to fix the blinds, to take his own dimensions, to properly fix the blinds either under soffits of windows or on approved galvanized-iron brackets, securely screwed, and to make good any damage done to the buildings.

Packing for transit to country.—Where the building for which the blinds are required is beyond a radius of 8 miles from the General Post Office the contractor will be required, when ordered to pack the blinds for transit to the country, to provide proper packing cases and to securely pack the blinds, and to deliver them complete and perfect and ready for fixing at such railway station or other forwarding agency in Melbourne as may be directed.

Generally.—All blinds must be examined and passed by an officer of the Public Works Department before they are paid for.

All blinds to be made and painted on the contractor's premises, which must be within a reasonable distance of the city of Melbourne; and every facility must be afforded the officers of the Public Works Department for examining the work at any time previous to its delivery.

The contract for repairing, &c., only applies to buildings within the radius above mentioned.

The Government reserves the right, when erecting new buildings or when making additions or repairs to buildings outside the radius above mentioned, of including any Venetian Blinds required in the general contract for such building, additions, or repairs.
