- (2) Where the supply is solely for other than domestic purposes, a quantity which, if charged as provided by the last preceding section, would give a sum of Five shillings for any continuous period of three months.

WHEREAS by the Education Act 1915 (6 Geo. V. No. 2644) it is enacted that the Governor in Council may from time to time make and rescind regulations for all or any of the purposes therein mentioned, and generally for carrying the said Act into effect: Now therefore His Excellency the Governor of the State of Victoria, by and with the advice of the Executive Council thereof, doth hereby rescind Regulation XXXVII made on the 20th August, 1918, and all other regulations at present in force relating to the establishment and administration of and payment of grants to technical schools, and doth make the following Regulation in lieu thereof:—

REGULATION XXXVII.—TECHNICAL SCHOOLS.

1. Each technical school in operation at the date of this Regulation or hereafter established by the Governor in Council shall in accordance with the provisions contained herein be under the supervision of a council, to which grants-in-aid of maintenance will be paid by the Minister from the Annual Vote for Technical Education. The amount of such grant shall be determined from time to time by the Governor in Council, who may at any time either discontinue the grant to any school or alter the amount of such grant.

2. The members of the councils of technical schools shall be appointed by the Governor in Council, and, except as otherwise directed by the Minister, each council shall consist of not fewer than seven nor more than fifteen members.

3. No person shall be appointed a member of the council of a technical school for more than three years, but any member of a council shall on ceasing to be a member be eligible for reappointment.

4. The council of a technical school shall include—

5. The councils of technical schools established prior to the 4th January, 1911, which have been appointed under the constitution of such schools, shall be deemed to be appointed under the provisions of this Regulation, provided that the Minister may appoint Government representatives to a number not exceeding one-third of the total number of members of such council.

6. The members of the councils of each technical school will be required—

- (a) to keep themselves in touch with the work carried on in the school by periodically visiting the class-rooms, laboratories, and workshops during the progress of instruction;

- (j) to grant, subject to the provisions of this Regulation, free courses for qualified pupils.

7. The council of each technical school shall meet at least six times in each year, and any member who is absent without leave for more than three consecutive meetings to which he has been duly summoned by letter at least three days in advance shall thereby forfeit his seat on the council.

8. The Minister may at any time authorize any person to audit the accounts of any of the schools subsidized under these Regulations.

11. In the case of teachers of technical schools not appointed under the provisions of the Public Service Act, no appointment may be made unless the approval of the Minister shall have been first obtained. In making nominations to vacancies councils must submit the application received to the Minister, so that, if he deems it necessary, they may be considered by one of the committees appointed under the provisions of clauses 14 and 15 hereunder.

12. No increase in the salary or emoluments attached to any vacant position nor in the salary of any teacher or officer of the council of any technical school which receives a grant from the Annual Vote for Technical Schools shall be made unless the express sanction of the Minister has first been obtained; provided that this clause shall not apply to the position of any teacher or officer in receipt of less than £100 per annum.

13. Where, under the registration provisions of the Education Act 1915, definite qualifications are insisted upon as a condition of employment in registered schools of teachers of special subjects, the councils of technical schools should not recommend for appointment to the staff of their school teachers of special subjects unless they are registered or possess the qualifications for registration. Approval will not be given by the Minister to the appointment of unregistered teachers of such subjects, unless the Director after due inquiry certifies to the efficiency of the teacher proposed to be appointed.

14. There shall be a committee consisting of three representatives of the Melbourne University nominated by the University Council, and three representatives of the technical schools nominated by the Minister, with the Chief Inspector of Technical Schools as chairman, whose duties shall be to—

- (h) make recommendations to the Minister relative to the science departments in technical schools.

15. There shall be a committee appointed by the Governor in Council consisting of two representatives of the art and trade sections of the technical schools respectively, two representatives of applied art and two of trade who are not employed in technical schools, the Art Inspector of the Education Department, and the Chief Inspector of Technical Schools, whose duties shall be to—

- (a) inquire into the qualifications and make recommendations to the Minister concerning all appointments of senior instructors in art or trade subjects;
- (b) make recommendations to the Minister concerning the appointments of examiners for art and trade subjects;

- (f) consult where necessary with representatives of industrial subjects before fixing any course of work; and
- (g) draw up a list of trade subjects which should be closely associated with the applied-art department in a technical school.

16. (1) The principal and the senior members of the teaching staff of a technical school may, subject to the approval of the Minister, or (in the case of teachers appointed under the Public Service Act) subject to the approval of the Governor in Council, be permitted to engage in such private work as will not in the opinion of the council of the school interfere with the efficient performance of the duties of such teachers in the school.

(2) A statement as to the nature and extent of such private practice should accompany the annual balance-sheet of the school.

17. The whole of the departments in any school shall be under the supervision of a principal, who shall, where practicable, be head of one department. The principal will be responsible for the discipline of the school, the efficient organization of departments, classes, and time-tables, and the exercise of general supervision over the staff and employees of the school.

18. (1) The head of each department in a technical school shall be held responsible for the efficient administration of his department. He shall report to the council periodically through the principal on the work and requirements of his department.

(2) The head of a department classified in the first class in clause 20 shall be permitted to place his report personally before the members of the council.

19. (1) Technical schools will be classified in accordance with—

- (i) the average terminal attendances;
- (ii) the nature and grade of the work done;
- (iii) the reports of inspectors and examiners.

(2) The courses of instruction offered in each school must be approved of by the Minister, and may include pure and applied science, pure and applied art, or subjects pertaining to engineering, mining, agricultural, industrial, trade, commercial, or household education.

Schools will be distinguished as science, art, trade, commercial, or household schools. Each school may give instruction in one or more of the foregoing branches of technical work.

20. (1) The following individual average terminal attendances will be necessary for a school to be placed in each class:—

	Science.	Art.	Trade.	Commer- cial.	House- hold.
First Class	150	150	200	200	200
Second Class	100	100	150	150	150
Third Class	75	75	100	100	100
Fourth Class	50	50	75	75	75
Fifth Class	30	30	50	50	50

A student who is in the first grade of his subject will be counted for attendance purposes as 1, a student in the second grade as 2, and a student in the third grade as 3.

(2) In estimating the classification of a school or department of a school, consideration will be given to the number of students who complete the advanced grades of the subject.

(3) The classification of technical schools will be announced from time to time in the *Education Gazette and Teachers' Aid*.

21. The course of study in each subject taught in technical schools shall be approved by the Director upon the recommendation of the committee appointed for the purpose of drawing up such course of study.

22. (1) Examinations by examiners appointed by the Minister will be held in the months of November and December of each year, or at such other times as may be deemed expedient.

(2) The conditions under which examinations will be held and under which certificates will be granted will be prescribed from time to time by the Director and published in the *Education Gazette and Teachers' Aid*.

(3) Should the reports of the examiners or the reports of the inspectors who inspect any school show that the teaching in such school during the year has been of an unsatisfactory character, the grant to such school may be partially or wholly discontinued.

(4) Where the progress of any school is deemed to be unsatisfactory, or the work of any teacher is regarded as inefficient, the Minister, on the recommendation of the Director, may (in the case of teachers not appointed under the provisions of the Public Service Act) require the council to determine the engagement of any teacher on the staff of such school.

(5) As far as practicable, the examiners will, from time to time, visit the schools for the purpose of observing the conditions under which work is done.

23. (1) No new subject or group of subjects and no additional work in the higher grades of any subjects shall be added to the curriculum of any technical school unless the approval of the Minister shall have been first obtained. In making application for such approval, a statement of the expenditure immediately and prospectively involved and the estimated number of students must be forwarded.

(2) In the last term of each year, the curriculum of each technical school shall be reviewed, and the Minister may, on the recommendation of the Director, order that any subject or group of subjects shall be removed from the curriculum of the school. The council shall thereupon take the necessary steps to dispense with the services of any teachers who are no longer necessary. Any apparatus or equipment provided wholly or partially out of the moneys granted for technical education which, in the opinion of the Minister, are no longer required in such school may be transferred to another technical school.

(3) The Minister may, if he thinks the circumstances warrant it, make a grant not exceeding the amount allowed to holders of senior technical scholarships to students whose courses have been interrupted owing to the provisions of this clause. This grant is intended to cover the increased cost involved in continuing their instruction in another technical school.

24. (1) Junior and senior commercial certificates will be issued to students of technical schools and high schools who have completed full courses and who satisfy the prescribed conditions. In estimating the efficiency of a student, consideration will be given to the progress reports upon each student furnished by the school as well as to the results obtained in a special examination.

(2) Commercial courses will not be maintained in technical schools or in high schools unless a due proportion of students show satisfactory results in the work prescribed for the above certificates.

25. Students of technical schools who have completed a satisfactory attendance will be examined without fee. Other candidates for examination will be required to pay a fee of ten shillings for each subject, provided that teachers employed by the Education Department who desire to be examined in subjects prescribed for qualification as teachers shall be admitted without fee.

26. Any grant-in-aid of buildings shall be expended subject to the condition that the plans and specifications are approved by the Director before the commencement of the work, and that 25 per cent. of the grant be retained until the work has been passed by an officer of the Public Works Department authorized for the purpose.

27. (1) Special grants for the purchase of furniture, apparatus, and equipment may be made by the Minister in addition to the annual maintenance grant to any technical school, provided that the Minister is satisfied that such furniture, apparatus, and equipment should not be purchased out of the revenue of the school.

(2) All applications for grants should be forwarded to the Director not later than the 31st March in each year, and, as a general rule, applications made after that date will not be considered during the ensuing financial year.

28. (1) With a view of encouraging measures for beautifying and improving the grounds of any school, the establishment and maintenance of a school garden, the decoration and equipment of a schoolroom, and the formation of a school library, the Minister may supplement funds raised locally at the rate of £1 for each £1 thus raised.

(2) No grant, however, for the purpose of this clause will be made, unless the approval of the Minister to the proposed expenditure is first obtained.

29. No member of the council of a technical school may be pecuniarily interested in any work or purchase exceeding in amount One pound (£1), the cost of which is a charge against the school funds, without the express sanction of the Minister having first been obtained.

30. The councils of all technical schools shall as conditions of their receiving grants from moneys voted for technical education—

- (i) administer the maintenance grant efficiently and economically, and keep the expenditure of the school within its income;
- (ii) comply strictly with the regulations regarding the appointment and retention of teachers and the salaries and emoluments of teachers;
- (iii) comply strictly with the regulations as to the curriculum to be followed in the school and the addition of new subjects and courses to those already in operation.

31. The councils of technical schools shall receive as free pupils such students as may from time to time be granted scholarships to such school by the Minister; and the councils shall admit to courses of instruction in technical schools without fee such teachers and junior teachers employed under the Education Department as may be nominated by the Director.

32. (1) The council of a technical school may admit qualified pupils for free instruction in any subject or course, provided that the number of pupils nominated in any year shall not exceed 10 per cent. of the total number of pupils paying full fees for such subject or course. The council may not make out of the revenues of the school any grant to any pupil for books, travelling expenses, or maintenance. They may, however, make recommendations to the Minister for such grants.

(2) If he considers the circumstances warrant it, the Minister may make grants-in-aid of school requisites up to £2 per annum, or of travelling expenses up to £5 per annum, or of maintenance up to £26 per annum, to any pupil in a technical school. But no grant in aid of maintenance shall be made unless satisfactory evidence is produced that the pupil shows distinct promise as a technical-school student, and unless it is necessary for the pupil to reside apart from his parents.

(3) In every case of a grant under this clause, the parents or guardians of the pupil concerned must show by statutory declaration their income during the previous year.

(4) Nothing in this clause will prevent the council of the school providing for grants in aid of books, apparatus, or maintenance out of sums subscribed to the school for this special purpose.

33. All technical schools shall be open to inspection by any officer authorized by the Minister.

34. The Minister will issue diplomas to students who have completed full course and passed the required examinations. These diplomas will be indorsed with the name of the school at which the student has been educated.

35. The following records must be carefully kept in each technical school and the instructions issued must be strictly adhered to:—

- (i) A general register or card index in which must be entered the register number, name, age, and occupation (if any) of each student, class or classes in which enrolled, and date of passing any examination of the Education Department held under this Regulation;
- (ii) A register of students' attendances, which must be posted up daily;
- (iii) A fee book in which all fees paid by students are entered;
- (iv) A list of students admitted to free courses by the council, or under the provisions of the regulations governing the award of scholarships; and
- (v) A teachers' time-sheet in which all members of the staff shall enter up their hours of arrival and departure daily.

36. A return upon the form prescribed showing the number of the term attendances of all students enrolled in the several classes and grades of classes in technical schools must be forwarded to the Director not later than seven days after the close of each term.

37. An annual return on the prescribed form must be forwarded by each school to the Director not later than the 31st January in each year giving information relative to the number and attendances of students, fees paid, and occupations followed by students, names and qualifications of teachers, the size of classes, and such other information as may be, from time to time required by the Minister.

38. The school year shall be divided into terms as approved by the Director, and shall make provision for forty-two weeks' school work, including examinations.

39. A copy of the time-table for each term shall be forwarded to the Director not later than three weeks after the commencement of each term.

No. 201.—17502.—3

40. (1) No portion of the annual grants for maintenance, nor any portion of the fees paid by students for tuition in subjects subsidized under this Regulation, is to be paid by councils of schools for the maintenance of classes in subjects other than those included in the technical-school syllabus approved as a part of the curriculum of the said school by the Minister.

(2) If it is desired to establish classes in other subjects and maintain them out of fees for instruction in such subjects, the approval of the Director must be first obtained.

JUNIOR TECHNICAL SCHOOLS.

41. The Governor in Council may, from time to time, sanction the establishment of junior technical schools or junior technical classes either in conjunction with or apart from technical schools which have already been established.

42. (1) The courses of study in each junior technical school shall be, from time to time, prescribed by the Director; and shall include instruction extending over three years.

(2) A junior technical certificate shall be issued by the Education Department to students who have completed the full course under conditions prescribed from time to time by the Director. In estimating the efficiency of a pupil for the purpose of this certificate, consideration will be given to the reports of his progress as shown in the school terminal examinations, as well as to the results of a special examination.

43. The qualifications for enrolment of pupils in junior technical schools shall be as follow:—

- (i) Pupils must have passed the qualifying examination or an approved equivalent examination or (in the case of pupils at least thirteen years of age at the date of enrolment) must be certified by the head teacher of the school which they last attended as likely to profit by the instruction given in a junior technical school;
- (ii) They must furnish a written undertaking from their parents or guardians that they will attend the junior technical school until they have completed at least two years of the course.
- (iii) They must furnish a note on the prescribed form from the head teacher of the school last attended, setting out their age in the school records, the standard which they have reached in the school, and their attendances for the past twelve months.

44. (1) During their course in a junior technical school or junior technical class, pupils shall be required to attend regularly and punctually and to make satisfactory progress in the subjects prescribed for their course.

(2) Head masters of junior technical schools may, with the approval of the Director, exclude from attendance at such school pupils who attend irregularly or who fail to make satisfactory progress.

45. (1) Pupils of junior technical schools who are fourteen years of age and over shall pay a fee. The fees to be paid by pupils over the age of fourteen years shall be £3 per annum, payable for each term in advance.

(2) No fee shall be payable by pupils who are under fourteen years of age.

(3) Pupils enrolled without fee shall be liable to pay fees from the beginning of the term immediately succeeding the date of their fourteenth birthday.

(4) Fees paid by pupils of junior technical schools shall be paid into the school revenue.

46. (1) The Minister may remit the fees in the case of a pupil whose parents are not in a position to pay them, provided that such pupil shows special aptitude and promise as certified to by an inspector of schools, or by the head master of the junior technical school which the pupil is attending.

(2) If he considers the circumstances warrant it, the Minister may make grants in aid of school requisites up to £2 per annum, or of travelling expenses up to £5 per annum, or of maintenance up to £26 per annum, to any pupil in a junior technical school; but no grant in aid of maintenance shall be made in respect of any pupil who has not obtained a merit certificate or an approved equivalent, and, as a general rule, except where it is necessary for the pupil to reside apart from his parents. In every case of a grant under this clause, the parents or guardians of the pupil concerned must show by statutory declaration their income during the previous year.

(3) Applications for grants under this clause must be made on the prescribed form before the end of February in each year. As a rule, no grant shall be made except in necessitous cases where pupils show special aptitude and promise.

47. The school year for junior technical schools shall be divided into terms, and shall provide for instruction for forty-two weeks beginning on the first Monday in February, except in special cases approved by the Director.

48. No pupil shall be enrolled after the expiration of four weeks from the commencement of the first term, unless with the special sanction of the Director. Pupils may, however, be transferred from one junior technical school to another under the same conditions as regards transfer notes as are provided in the case of pupils attending elementary schools.

49. The staffing of junior technical schools and junior technical classes and the appointment of teachers shall be determined by the Public Service Commissioner.

50. Head masters shall assign to assistant teachers duties and responsibilities in accordance with the salaries and status of the positions held by such teachers.

51. As far as practicable, appointments to vacancies in junior technical schools and junior technical classes will be made towards the end of each calendar year; and, in the case of teachers taking up duties in new positions immediately after the midsummer vacation, such appointments and promotions shall date as from the first of January in such vacation.

52. The Director may appoint from time to time committees consisting of the Chief Inspector of Technical Schools, an administrative officer of the Education Department, and a teacher employed in technical or junior technical schools, to report to him upon applications for appointments and promotions submitted to him for recommendation by the Public Service Commissioner.

53. Junior technical schools associated with technical schools shall be regarded as a part of the technical school, and, as such, shall come under the control of the council of the technical school. The head master of the junior technical school shall be responsible for the organization and instruction of the school, and for the due observance by himself and members of his staff of all regulations. The principal of the technical school shall, however, be responsible for the allocation of class-rooms, for the general time-table of the institution, and for the assignment of special duties in the junior technical school of members of the technical school staff, or the assignment of duties within the technical school to members of the staff of the junior technical school. He will also be responsible for the discipline and efficient organization of the institution as a whole.

54. (1) Where any junior technical school or any junior technical class has been established in connexion with a technical school, the Chief Inspector of Technical Schools, or (in the case of teachers of art subjects) the Art Inspector may require teachers of the technical school to devote a portion of their time to the teaching of subjects in the junior technical school or class, or he may require teachers in the junior technical school to undertake the teaching of classes in the senior technical school.

(2) The teachers so employed shall conform to the regulations and instructions issued to teachers in technical and junior technical schools respectively.

55. (1) Where in any district a high school or a higher elementary school and a technical school or junior technical school have been established the members of the staff of the high school or higher elementary school may, subject to the approval of the Director, be called upon to devote a portion of their time to the teaching of subjects in the technical or junior technical school; and the members of the staff of the technical school or junior technical school may, subject to the approval of the Director, be called upon to devote a portion of their time to the teaching of subjects in the high school or higher elementary school.

(2) Any teacher so employed shall conform to the regulations issued for the guidance of teachers of high schools, higher elementary schools, technical schools, and junior technical schools.

56. (1) At least once in each year, junior technical schools shall be inspected by boards of inspectors appointed by the Director for any school or group of schools. The Chief Inspector of Technical Schools and the Art Inspector shall be members of all such boards.

(2) In addition to a general report upon the work of the school, the board of inspectors shall report fully to the Director upon the work of each teacher, and shall recommend an efficiency mark to be entered in the teacher's record.

(3) Upon application to the Director, teachers of junior technical schools may be supplied with a copy of the report furnished upon their work by the board of inspectors.

(4) Subject to the approval of the board of inspectors, the classification of pupils, whether at their entrance to the school or at any subsequent period of their attendance at a junior technical school or class, shall be determined by the head master of such school.

(5) Head masters of junior technical schools shall keep such records and furnish such returns and reports as may, from time to time, be required.

(6) Progress examinations of pupils in junior technical schools shall be conducted by the head master and his staff, and a record of the progress of each pupil, together with a report on the progress examination generally, shall be available for the board of inspectors at their visit.

57. The district inspector of schools may, at any time, visit a junior technical school or junior technical class and examine the records of the school, or inspect the work of the pupils in any of the subjects which are common to the course of study for junior technical schools and elementary schools.

58. All reports upon the work of junior technical schools shall be entered in an inspection register, which shall be left in the school. The inspection register shall, at any time, be open for the perusal of members of the council of the school.

59. A return of all fees collected from pupils of junior technical schools shall be furnished to the Director during the last term of each year.

60. Before the end of the first term in each year, a return shall be forwarded to the Director, showing the names of all students who have left during the previous year, together with a statement as to the occupation which each such student has entered upon. It should also include a statement as to the further instruction in technical schools for which such students have entered.

And the Honorable Sir A. J. Peacock, His Majesty's Minister of Public Instruction for the State of Victoria, shall give the necessary directions herein accordingly.

CONDITIONS OF CONTRACT.

1. As the exact quantity of firewood or charcoal which may be required cannot be stated, the estimate being approximate only, the Government will not be bound by the quantity stated in the schedule, but will be at liberty to order more or less, according to circumstances, and the contractor will be bound to supply the same at contract rates.

2. All the firewood supplied under these contracts must, with the exception of box blocks, be split out of large timber, and of the kind or kinds specified in the schedule, and must be dry, perfectly sound, and of good burning quality, and cut into billets of the lengths stated in the schedules, such billets to be not less than four inches nor more than six inches in any diameter. The long wood to be not less than nine inches nor more than eighteen inches in any diameter. Neither burnt wood, heart wood, small branches, nor outside pieces of bark will be received. Box blocks must be the best of their kind, dry, and perfectly sound. If the firewood is obtained from a State forest timber reserve or ordinary Crown lands, persons cutting and removing same must be provided with a licence or permit from the State Forests Department. Charcoal must be of the very best description for the purpose for which it is required, and subject to approval of the officer ordering.

3. The orders will be issued by the departments requiring the supplies, and the firewood or charcoal shall be delivered as may be directed by the officer ordering the supply. Should an order not be complied with within forty-eight hours it will be competent for the department concerned to purchase the firewood or charcoal at the contractor's risk, and the extra expense (if any) over and above the contract price will be deducted from the contractor's account or from the security money.

4. Melbourne District will include a radius of six miles from the General Post Office. The Williamstown District will include the Borough.

5. The contractor will be bound to place the firewood in stacks for measurement on such ground as may be pointed out. The stacks are to be five feet high, and of the width of the length of the firewood specified in the various schedules, with space between each stack for measuring; and the billets or lengths are all to lie the same way, viz., crossways of the stacks in the form of a cord, and are to be laid as closely and solidly as possible in the stack, and to the satisfaction of the officer receiving the supply. Firewood for the Yarra Bend need not be stacked, but must be weighed on the Asylum weighbridge.

6. The acceptance of the firewood or charcoal shall be subject to the approval of the officer authorized to take delivery, or such other officer as shall be named by him. If after the delivery of the firewood or charcoal has been taken any deficiency or defect is discovered therein, such firewood or charcoal may be returned to the contractor. In case of the rejection or return of any supplies, the contractor shall bear the whole cost of replacing the article so rejected or returned.

7. As soon as the orders shall have been completed the contractor will be required to furnish to the department supplied his account in the prescribed form, with the receipted delivery order attached thereto. Accounts will be payable at any Receipt and Pay Office that the contractor may desire.

8. In the event of a difference of opinion between the contractor and the officer receiving the firewood or charcoal as to the quality, the same shall be decided by a board of survey, composed of persons named by the head of the department, and the decision of the board is to be considered as final.

9. If the board shall decide that the firewood or charcoal is not of proper quality it must be immediately replaced by the contractor, failing which it will be procured elsewhere and the extra expense (if any) will be deducted as in condition 3.

10. If from any cause injury would accrue to the public service by waiting for a board of survey, the head of the department or officer in charge will have the power to reject such firewood or charcoal as is obviously of inferior quality, it being understood that he will be responsible to the Government for so doing; and the contractor must take back the rejected article, and supply good in its stead, failing which it will be procured elsewhere, and the extra expense (if any) will be charged as in condition 3.

11. A refusal to execute orders, irregularity in the quality or quantity of the firewood or charcoal, or delay in delivering or replacing it when required, will subject the contractor to such mulct, not exceeding £50, as the Treasurer of the State for the time being may direct; and the amount may be deducted as in condition 3. It will also be in the power of the said Treasurer, upon such refusal, irregularity, or delay, to terminate the contract forthwith.

13. The contracts entered into under this notice are not to be considered as being broken, infringed, or vitiated by any purchase of firewood or charcoal by the Commonwealth Government.

14. Under no circumstances will a contractor be permitted to abandon his contract. In the event of the contractor failing to carry on the contract the contract security money will in that case be absolutely forfeited, and in addition the contractor will be held liable for any loss which the Government may sustain in consequence of such failure.

15. No subletting will be allowed; all work must be carried out by the contractor, and the hours of employment of any person engaged in any business or occupation connected with the preparation of the firewood for sale or connected with the sale or distribution of the firewood tendered for in this schedule shall be in accordance with those provided for by the Fuel and Fodder Board or the Country Fuel and Fodder Board, as the case may be, under the Factories and Shops Acts, and every such person shall be paid such wages and shall be employed subject to such conditions as are or may be therein determined; and a copy of these conditions shall be kept conspicuously and continually posted, in legible Roman characters, on the premises of the contractor. Any infringement of these conditions, in the opinion of the Treasurer, will subject the contractor, upon report from the Tender Board, to such mulct, not exceeding Fifty pounds (£50), as the Treasurer may direct, and the amount will be deducted from any accounts which are or may be due to the contractor, and the Treasurer's decision shall be binding, final, and conclusive as to the fact of infringement, and all other respects.
