Tender Forms can be obtained on application to the Lands Department, Melbourne, or any of the Land Offices in the country.

Tenders should be placed in the Crown Lands Office Tender-box on or before Noon on Tuesday, 31st January, 1922.

NOTE.—No tender will be accepted unless the fee for the full period, and fee of Five shillings for licence, are forwarded.

TENDERS will be received on or before Noon on Tuesday, 31st January, 1922, for the right to depasture stock on the following unappropriated portions of land, subject to the Regulations approved by the Governor in Council and also the subjoined Special Conditions.

Every licence granted under section 121 of the *Land Act 1915* shall be subject to the conditions set forth in the Schedule hereto and to such special conditions and payment in advance of such fee as the Minister may determine, and shall be issued by an officer of the Department of Lands and Survey duly authorized in that behalf.

## CONDITIONS.

1. The issue of this licence shall not prevent the land comprised therein, or any part or parts thereof, being sold, leased, licensed, alienated, or dealt with under any of the provisions of the *Land Acts*, except under the 121st section of the *Land Act 1915*, or being resumed by order of the Governor or Administrator of the Government of Victoria, with the advice of the Executive Council.

2. In case the said land, or any part thereof, should be sold, leased, licensed, alienated, dealt with, or resumed as aforesaid, the licensee shall not be entitled to any compensation other than that which the responsible Minister of the Crown for the time being administering the *Land Acts* may think fit.

3. This licence is subject to the rights of the holders of miners' rights or of mining leases now issued or hereafter to be issued to enter upon the allotment hereby licensed, and to search for gold, and to mine thereon, and to erect and occupy mining plant and machinery, without making any compensation to the licensee, his executors, administrators, or assigns, for surface or other damage.

4. Subject to these conditions the licensee shall be entitled to use the land for the purpose for which this licence has been granted until such land, or any part thereof, has been sold, leased, licensed, alienated, dealt with, or resumed as aforesaid, and thereupon all the interest of the licensee therein shall cease and be determined.

5. No land comprised in roads from time to time surveyed and marked out within the boundaries of the land comprised in this licence shall be deemed within its operation.

6. This licence shall entitle the holder thereof, during the period for which it is granted, to use the land therein comprised for depasturing purposes only, but shall not confer any right to build thereon, or to cultivate or, without the permission of the Minister, fence any portion thereof, or construct a dam or tank.

7. The taking in of stock for agistment or otherwise allowing the use of the land, or part thereof, without the authority in writing by the Minister, is forbidden.

8. That in the event of the Minister granting permission to fence the whole or any part of this area, the licensee shall provide gates or slip-panels in suitable places for the convenience of the public. No compensation will be allowed for fencing erected on boundaries of allotments alienated or in course of alienation.

9. That where improvements are authorized under section 123 of the *Land Act 1915* the licensee shall notify, on completion, that such improvements have been made, otherwise the work will not be recognised.

10. The interest in this licence shall not be transferred without the consent of the Minister, and the payment of a fee of Ten shillings.

11. The licensee shall be liable to forfeiture if the licensee commit a breach of or neglect to comply with these conditions.

12. The publication of a notice in the *Government Gazette*, purporting to declare that the Governor or Administrator, with the advice aforesaid, has forfeited this licence, shall be conclusive evidence that the licence is forfeited.

13. The ring-barking of the timber upon the land by the licensee is forbidden, and he shall not be entitled to destroy or cut and take away any such timber.

14. Free access to water shall be kept open at all times for travelling and other stock and for persons desiring to take water for domestic purposes.

15. The licensee shall destroy all thistles on the land, and on the half width of the adjoining roads, and shall be responsible for the destruction of thistles under the *Thistle Act 1890* in like manner as holders of freehold lands.

16. The licensee shall keep the land free from vermin, and should he fail to do so, the licence shall be liable to forfeiture.

17. This licence is issued subject to the right of saw-millers to graze on this area such horses and bullocks as are actually used in connexion with their licensed operations on this land.

18. In the event of the area being damaged by fire, the licence may be forfeited unless the licensee satisfy the Minister that neither he, directly or indirectly, nor his workmen or servants, were in any way responsible therefor.

## SPECIAL CONDITIONS.

1. The period of occupation will, except where otherwise specified, be for eight months from 1st February, 1922, to 30th September, 1922.

2. The fee for the full period—for which the licence will be issued, and the fee for licence—must accompany the tender, otherwise the offer of the next highest tenderer who complies with this condition may be accepted.

3. Separate tenders must be lodged for each block.

4. Tenders to be addressed to the Secretary for Lands (Tender-box), Melbourne.

5. The highest or any tender not necessarily accepted.

6. Tenderers must give their full name, occupation, and ordinary postal address.

7. The areas are given as more or less, and all appropriated, alienated, or licensed lands (if any) within the boundaries are excluded.

8. The outgoing tenant has the option to remove any existing fencing within one month or to require the incoming tenant to pay for it in accordance with the provisions of section 124, *Land Act 1915*.

Plans can be seen and information may be obtained in this office.

Section 121, *Land Act 1915*, provides:—

1. Where a licensee under section 121 of the *Land Act 1915* has, with the consent of the Minister, enclosed with a substantial fence the land which is the subject of his licence, he may impound any cattle, sheep, or other animals found trespassing thereon.

2. Where the licensee holds land under the said section which is unfenced, he may, in any Court of competent jurisdiction, sue the owner of any cattle, sheep, or other animals for damages arising from trespass by such cattle, sheep, or other animals.

There shall be provided in each dwelling-room approved outlet ventilators of at least fifty-four square inches for each one thousand cubic feet of air space. 6. All timbers and beams used in any building shall be good sound material free from rot, large and loose knots, shakes, or any other imperfections whereby the strength may be impaired, and shall be of such sizes, dimensions, and spacing as set forth in Schedule A to this By-law.

### PART IV.

#### Excavations, Foundations, and Footings.

1. All excavations for footings of buildings, other than wood, shall be taken down to a solid bottom, to be approved by the Surveyor, but not less than an average of 18 inches in depth below the natural surface of the ground except in the case of special construction of footing approved by the Surveyor, and no footing or foundation shall, except with the written consent of the Surveyor, be of less width than 2 inches wider than the wall standing thereon. Should the excavation for foundation finish on a clay bottom, the excavation trenches shall be covered with a layer of 3 inches approved sand before the concrete is put in. No footing or foundation shall be commenced to be placed in position until at least 24 hours' notice shall have been given to the Surveyor that the trenches are ready for inspection.

2. The surface of the ground between all walls of buildings shall be levelled up higher than the finished surface outside, and evenly graded to prevent any accumulation of water or drainage beneath the floors, and such surface shall, as required by the Surveyor, be covered with properly mixed tar composition pavement laid to a uniform thickness of not less than 2 inches in every part, rolled, rammed, and finished so as to be impervious to water and foul exhalations. In all bad or wet ground subsoil drainage shall be provided and laid in such manner as the Surveyor shall, in writing, direct and require.

3. Every pier and story post, as well as every external wall and every party wall, shall have footings.

4. Every building must have a footing which, by itself or with a foundation, is at least 21 inches in height.

5. In the case of wooden buildings where wooden stumps are used for the foundation such stumps shall consist of redgum or jarrah, and be not less than 4 inches by 4 inches, spaced not more than 4 feet apart, sunk not less than 18 inches below the natural surface of the ground, and shall rest on sole plates of a size and upon a bottom approved by the Surveyor.

6. The underpinnings of walls and chimneys shall be built with brick or stone bedded in cement to the full thickness and length of the wall or work, or to an additional thickness if the increased height of the wall so requires, and shall rest on the solid ground or solid sub-structure as a foundation, and the whole shall be executed to the satisfaction of the Surveyor.

## PART V.

*Thickness of External and Part Walls for all Brick, Stone, or Concrete Buildings.*

1. No cellar wall shall be less than 9 inches in thickness. But where a cellar wall is, in the opinion of the surveyor, too great in length for such thickness, it shall be increased up to 18 inches or be strengthened by piers.

2. In the domestic class of buildings no story shall be of greater height from floor to the ceiling or from floor to roof than 14 feet; but the height of a story if built in cement or with projection piers may be 16 feet. No two stories of 9 inch walls, even if one has piers, shall exceed 30 feet in height, and no three stories of 13½-inch walls, including one with piers, shall exceed 48 feet in height; and no three stories, whatever the thickness shall exceed 54 feet in height.

## PART VI.

*Construction of Buildings.*

Unless where otherwise sanctioned in this By-law all buildings and structures shall comply with the following conditions:—

*Walls.*

1. Every external party and cross wall constructed of brick, stone, concrete or reinforced concrete, or other similar material approved of by the Surveyor shall be properly bonded and solidly put together with mortar. And no external wall shall have windows or openings within three feet of the boundary of land not in the same occupation.

2. In the case of walls that are built as hollow walls the same quantity of stone, brick, or concrete shall be used in their construction as is provided in this By-law for solid walls as if they were built solid as in this By-law provided; and no hollow walls shall be built unless the parts of the same are connected by proper ties either of brick or stone, or iron placed not more than 3 feet apart in every fourth course. No hollow shall be greater in superficial extent than two squares in any one story unless strengthened by a cross wall, fireplace, or projecting pier in each such area, and to the satisfaction of the Surveyor.

3. Hollow concrete blocks may be used for the construction of walls of buildings of one story, provided that such walls are not required by these regulations to exceed 9 inches in thickness.

4. Where the external wall of any building is erected on the boundary of the land on which the same stands, or where the overhanging eaves or gutter of such building would be within two feet of such boundary; then the external wall of such building shall be carried up to form a parapet 15 inches at least in height above the roof or above the highest part of any flat gutter as the case may be.

5. Every party wall shall be carried up for a height of 15 inches above the roof measured at right angles to the slope thereof or 15 inches above the highest part of any flat or gutter as the case may be, and of a thickness (in buildings of the warehouse class) equal to the thickness of such wall in the topmost story, and in any other building of a thickness of eight and a half inches at the least. Except that in the case of domestic buildings, where not more than two buildings are erected under one roof, it shall be sufficient if the party wall is carried up to the underside of the roof covering and of a thickness of eight and a half inches at the least.

6. Every party wall shall be carried up of the thickness aforesaid above any turret, dormer, lantern, light or other erection of combustible material fixed upon the roof or flat of any building within four feet from such party wall, and shall extend at the least fifteen inches higher and wider on each side than such erection, and every party wall shall be carried up above any part of any roof opposite thereto and within four feet therefrom.

7. Every wall and fireplace constructed of brick, stone or other similar materials except reinforced concrete construction shall have a damp-proof course of asphalt or other impervious material laid throughout its entire length and thickness in a position to be approved by the Surveyor, but such damp course may be turned vertically upwards within the thickness of the wall to a higher level on the outside.

Where owing to a change of level, it is not practicable to lay the same on a level plane throughout the walls of a building, the same may be laid on two or more level planes.

Where a damp-proof course is laid on more than one level plane the ends of the damp-proof courses on each level shall overlap the ends of the damp-proof course on the next level, and each of such layers shall be connected by vertical connections of the same material.

## PART VII.

1. When it is made known to the Council that any building or structure is in a ruinous state or dangerous state the Council may require a survey of such building or structure to be made by the Surveyor who shall have power to enter any premises for the purpose of making such survey, and if the Surveyor reports that such building or structure is in a ruinous or dangerous state the Council may cause the same to be
