Tenders for supply of forage to more than five separate stations in any one district must be accompanied by a preliminary deposit of 10s. for each and every station tendered for, except in the case of the Melbourne District, the preliminary deposit for which shall be £25 with each tender, irrespective of the number of stations tendered for. Deposits must be in bank notes, or bank drafts payable to the order of the Secretary to the Tender Board (cheques will in no case be received), which will be returned within ten days to unsuccessful tenderers on their application; such deposit will be forfeited in the event of the tenderer, after the time fixed for the closing of tenders, withdrawing or attempting to withdraw his tender, or of the successful tenderer failing to complete the necessary bond within a reasonable time after the acceptance is notified.

Tenderers failing to take up their accepted tenders, or failing to carry out their contract satisfactorily, will be ineligible to hold contracts for Government supplies for a period of two years.

The price must include delivery at the stations, and all charges except the bags, which will remain the property of the contractor. At stations where the bags can be at once emptied the contractor will be required to remove them when delivery is taken. At other stations, notices will be sent to the contractor when the bags are empty. Bags to be removed at contractor's expense.

For police stations, excepting the dépôt and institutions other than police, the successful tenderer will be required to enter into a bond for the sum of £5 per horse per station, and for the dépôt and other institutions a bond based on one-quarter of the total amount of the tender accepted, such bonds to be entered into within a reasonable time after the acceptance is notified. Two approved sureties are required for contracts where the sum stated in the bond is £50 and upwards, and one surety where the sum stated is under £50.

CONDITIONS OF CONTRACT.

1. The hay to be good, sound, and sweet, and properly trussed except when otherwise specified in the contract; the straw to be wheat or oat, and both to be in all respects of the best quality; oats, white or Algerian (Victorian grown), of the best description, full kernel, clean, and free from wild oats or other objectionable seeds; bran to be sound and sweet, and of the best description; chaff to be made from oat hay of the best quality. As much forage as can be stored at any station where the storage is small will, for the convenience of the contractor, be ordered at one time.

2. The quantities stated in the schedule are only approximate, and the Government may draw either more or less than those mentioned. Should new stations be formed or additional horses be required at any station, the contractor will be required to supply the extra forage. Unless otherwise specified in the tender form the contractor may, if he desires it, terminate the contract by supplying at once the whole quantity due at the station, should the additional number of permanent horses exceed two.
3. Notwithstanding anything contained in the preceding condition, the contractors for the supply to the Police Dépôt may be called upon to supply forage for any extra horses that may be at any time stabled at the dépôt for police purposes, at the same rates.
4. Should forage duly ordered under these contracts not be delivered within forty-eight hours of the time specified in the order for delivery, it will be competent for the department to purchase the same at the risk of the contractor, from whose account any expense over and above the contract price is to be deducted.
5. In the event of a difference of opinion between the contractor and the officer receiving the forage as to the quality of the same, it is to be decided by a board of survey, composed of persons named by the head of the department ordering the supply, and the decision of the Board is to be considered final.
6. If the Board shall decide that the forage is not of proper quality, it must be immediately replaced, failing which it will be procured elsewhere, and the extra cost, if any, will be charged as in clause 4.
7. When a board of survey cannot be conveniently assembled, or when, from some other cause, injury would accrue to either party by waiting for a board of survey, the officer in charge will have the power to reject such supplies as are obviously of inferior quality; but he will be responsible to the Government for so doing; and the contractor must take back the rejected forage and supply good in its stead, failing which it will be obtained by the officer requiring it, and the expense will be charged as in clause 4.
8. A refusal to execute orders, irregularity in the quantity or quality of the forage, or delay in delivering or replacing it when required, will subject the contractor, upon report from the Tender Board, to such mulct, not exceeding £20, as the Treasurer of the State for the time being may direct. It will also be in the power of the said Treasurer, upon such refusal, irregularity, or delay, to terminate the contract forthwith.
9. Contractors are not at liberty to transfer their contracts under cover of power of attorney, coupled with an interest or otherwise; and no such transfer will be recognized by the Government.
10. Under no circumstances will a contractor be permitted to abandon his contract, and in the event of his failing to carry on his contract he will be held liable for any loss which the Government may sustain in consequence of such failure. In the event of a station being discontinued or any change in the supplies required, the contractor will receive the earliest possible intimation.
11. The contracts entered into under this notice are not to be considered as broken, infringed, or vitiated by the purchase by any Department of forage grown at any Government establishment.

Melbourne, 3rd December, 1925.

- (b) supplied with, or desiring to be supplied, with water;
- (c) whose premises are directly or indirectly connected with the mains or pipes of the Board, or are about to be so connected—

to be supplied by measure, and to fix a meter in a position or place to be approved of by the Engineer, to register the quantity of water so supplied.

Any person so directed, who shall not within fourteen days after service of such notice, duly and properly fix a meter shall be guilty of an offence, and shall be liable to a penalty not exceeding Five pounds, and to a further penalty not exceeding One pound for each day after notice of the offence from the Council.

*Meters.*

8. (a) No meter shall be affixed until it has been examined, tested, and approved by a duly authorized officer of the Board, and each meter must be capable of registering at least 1,000,000 gallons, and each  $\frac{1}{2}$  inch,  $\frac{3}{4}$  inch, or 1 inch meter must be capable of registering any flow not less than 10, 15, or 20 gallons per hour, respectively.

(b) Every meter must be fixed truly level with connexions above ground approved by the Engineer, in an easily accessible position, and properly protected on a proper foundation of

timber, stone, brick, or concrete approved by the Engineer, which must, wherever practicable, be level with the surface of the ground, and within 3 feet of the building line of the property. Where it is impracticable to place the meter above the surface of the ground, it may be fixed in a pit approved by the Engineer, which must be properly constructed and drained. Lead connexions approved by the Engineer must be fixed on each side of the meter, except the use of two wrought iron quarter bends has been allowed by such officer. The use of elbows will not be permitted. Any meter which does not comply with the provisions of this sub-clause must be made to so comply within seven days after notice of such defect shall have been sent by the Engineer to the owner.

(c) Wherever washers are necessary for meter connexion couplings leather washers must in all cases be used.

(d) Every meter must be fixed to register the whole of the water supplied to any tenement or premises, except where otherwise allowed by the Engineer.

(e) Every person desiring to remove or alter the position of the meter must make written application for consent of the Council to such removal or alteration, and no such removal or alteration shall be effected until the Engineer's permission in writing is given.

(f) No work in connexion with the fixing, removal, or alteration of a meter shall be done by any person other than a licensed plumber.

9. No person shall construct, place, stack, store, or permit to be constructed, placed, stacked, or stored any building, erection, materials, or goods over or upon any meter through which water is supplied by the Board, or do, or permit anything which shall prevent or interfere with the inspection at any time by any officer of the Council of any such meter. Any person who neglects or refuses on notice from the Council to remove any such obstruction or impediment to inspection shall be guilty of an offence, and shall be liable to a penalty not exceeding Five pounds, and to a further penalty not exceeding Two pounds for each day after notice of the offence from the Council. The Council may, by notice in writing, direct the removal of any meter to a position approved by the Engineer, free from obstruction or impediment to inspection at any time by any officer of the Council of any such meter. Any person who neglects or refuses to comply with such notice shall be guilty of an offence, and shall be liable to a penalty not exceeding Five pounds, and to a further penalty not exceeding Two pounds for each day after notice of the offence from the Council.

10. The Council may, if it so thinks fit, but not otherwise, let for hire water meters, the rent for which, if inferential meters, shall be at the rate per annum of—

- For  $1\frac{1}{2}$ -inch meter, fourteen shillings.

Such rent shall be exclusive of, and in addition to, the amount of rate chargeable for the recorded consumption of water, and shall be due, and must be paid, half-yearly in advance on the first day of the months of January and July in every year, the first payment to date, and be made as from the commencement of the then current half-year.

Every meter must be fixed by a licensed plumber at the cost of the owner or hirer, on his premises, in the position directed by the Engineer.

11. (a) Every hired meter must be kept in repair by and at the cost of the Board, except in case of receiving external injury, in which case the hirer must bear the cost of repair.

(b) Every private meter shall be kept in repair by and at the cost of the owner.

(c) If any meter in use ceases to register, or is reported as out of repair, or registering inaccurately, the Council will estimate and charge for the water consumed during the period such meter is not in working order, and until it is repaired and refixed (1) by taking an average of the quantity used during the previous quarter, or during the corresponding period of the previous year; or (2) on the basis of subsequent consumption after repairing; or the Council may insert a check-meter on the service-pipe, and charge upon estimate from the registering thereof.

(d) In the event of the hirer being dissatisfied with the registering of a hired meter, he may, by notice in writing, require the Council to cause such meter to be removed and tested, and together with such notice shall forward a sum of One pound, which, if the meter is found to register correctly, shall be applied in paying the cost of removing, testing, and replacing such meter, and the balance, if any, shall be returned to him; but if such meter is found to fail to register, or if found to register incorrectly, such meter shall be repaired and replaced, or another meter shall be placed instead of it at cost of the Council, and the amount deposited by the hirer shall be returned to him. In the case of a private meter, the owner must employ at his expense a licensed plumber to remove and submit the meter for test by the Council.

(e) Every meter removed through being out of order must be repaired, adjusted, and submitted for test, and refixed with the least possible delay by a licensed plumber employed for the purpose. For any unnecessary delay in refixing meter, such licensed plumber shall be guilty of an offence, and shall be liable to a penalty not exceeding Five pounds, or suspension or cancellation of his licence.

(f) In every case of fixing and refixing a 2-inch meter, or meter of larger size, provision must be made for testing the working of the meter in position by the affixing of a stop-tap or valve on the outlet side of the meter with a stop-tap ferrule between the stop-tap and the meter. No branches are to be taken off between the stop-tap or valve and the meter. The sizes of stop-tap ferrules must be as follow:—

For 2-in. and 3-in. meters— $\frac{3}{4}$  inch.

For 4-in. meters—1 inch.

For meters larger than 4-in.— $1\frac{1}{2}$  inch.

12. Any person hiring a meter from the Council who shall leave the premises on which such meter is fixed without having previously given, in writing, at least six days' notice to the Council of his intention to leave the premises shall be guilty of an offence, and shall be liable to a penalty not exceeding Five pounds.

13. Any meter fixed prior to this By-law coming into operation shall, if removed for any purpose whatever, be refixed in manner and position in strict accordance with the provisions of this By-law.

14. Such meters, instruments, pipes, and apparatus shall not be subject to distress for rent of the premises where the same are used, or be attached or taken in execution under any process of any court of law or equity, or in pursuance of any sequestration or order in insolvency, or other legal proceedings against or affecting the consumers of the water, or the occupier of the premises, or other person in whose possession the meters, pipes, instrument, and apparatus may be.

15. If any repairs to the meter are required, such person shall immediately give notice to the Council, and if he fails to give such notice, he shall be liable to a penalty of not more than Five pounds. Before any repairs are effected, a registration of the quantity of water used shall be taken by the Engineer, or other proper officer of the Council.

16. If any person refuses or delays to have the meter provided by him properly repaired and put in correct working order after having been required by the Engineer so to do, the Council may shut off the supply of water from the premises of such person either by closing or cutting the service pipe, or otherwise, until such meter has been properly repaired, and certified by the Engineer as being in proper working order.

17. Any plumber or other person who fixes or refixes any meter upon any premises supplied with water without having first obtained a certificate from the Board that the said meter has been examined and found in correct working order, shall be liable to a penalty of not more than Five pounds.

#### *Connexion with New Mains.*

18. When a pipe for the supply of water has been laid by the Board in any street, or part thereof, the owner of any tenement abutting on such street, or part thereof, whose premises are being supplied directly or indirectly with water from some other pipe laid in a street, or part of a street, not abutting on the said tenement, shall, within two months after written notice from the Council, cause a proper pipe and stop-taps to be laid so as to convey a supply of water within such tenement from the pipe laid in the street, or part thereof, upon which his said tenement abuts, and shall disconnect and plug such other pipe supplying his premises as aforesaid, and shall also, if ordered in writing by the Council so to do, plug the main to which such other pipe is attached. Every person guilty of any breach of this clause shall be liable for each such offence to a penalty not exceeding Five pounds, and in the event of continuing the offence, to a further penalty not exceeding One pound for each day after notice of the offence from the Council.

#### *Tappings and Services.*

19. (a) All work, connexions, fittings, apparatus, and material in connexion with the supply of water from the pipes of the Board, must be in strict accordance with the provisions of this By-law; and where any service existing at the time of the coming into operation of this By-law, and supplying water from the pipes of the Board, or any fitting or apparatus connected therewith is not in accordance with the provisions of this By-law, all renewals, alterations, or replacements thereof or thereto must be effected in strict accordance with the provisions of this By-law.

(b) Ordinary connexions with sub-mains must be made with proper stop-cock ferrules, to which for iron services a length of not less than 3 feet of lead pipe must be attached, or alternatively a stop-tap ferrule with standard test of brass tail piece, screwed for wrought-iron pipe, may be used in conjunction with a galvanized wrought-iron right-angle bend, in cases where it may be desired, and if no objection is offered by the Engineer. One service-pipe only for domestic supply to each

tenement will be permitted. For tenements rated at Twenty pounds per annum, or under, the bore of such service-pipe must not exceed  $\frac{1}{2}$  inch, and for a tenement rated at over Twenty pounds per annum, the bore of such service-pipe must not exceed  $\frac{3}{4}$  inch, unless permission for a larger service has been received in writing from the Engineer, and the supply is taken through a meter; and no such larger service shall exceed 1 inch in diameter, unless the average number of persons residing in the tenement is more than twenty-five, or the tenement is rated at not less than One hundred and fifty pounds per annum, nor shall it exceed  $1\frac{1}{4}$  inch in diameter unless the average number of persons residing in the tenement is more than one hundred, or the tenement is rated at not less than Two hundred and fifty pounds per annum.

(c) The maximum tapping that will be allowed without clip for each size of cast-iron main is as follows:—

- For 3-in. and 4-in. pipes— $\frac{1}{2}$ -in. tapping
- For 5-in., 6-in., and 7-in. pipes—1 inch tapping.
- For 8-in. pipes— $1\frac{1}{4}$ -in. tapping.
- For 9-in. pipes— $1\frac{1}{2}$ -in. tapping.
- Over 9-in. pipes—2-in. tapping.

A clip must be used for tappings to all pipes other than cast-iron, except where otherwise permitted by the Engineer.

(d) A branch must be inserted for all connexions of 2-in. diameter or over to mains of 5-in. diameter or less, and for all connexions of 3-in. diameter or over to mains of 6-in. diameter or over. All such branches must be of pattern and material approved by, and be fixed only in accordance with, the directions of the Engineer.

(e) All connexions with lead and iron pipes must be made with brass union couplings.

20. A high-pressure screw-down stop-tap, properly secured, and covered with an approved cast-iron box, must be fixed on each water service between the main and the building line.

Where mains are under wood blocks, concrete, or other special pavements an approved iron box must be fixed over the stop-tap ferrule in the main.

Except where otherwise permitted by the Engineer, every stop-tap and stop-tap ferrule must be opposite the tenement supplied, and in one line at right angles to the main on which such stop-tap ferrule is fixed. Every service which does not enter the building line of the tenement supplied at a point opposite to the main to which such service is connected, must be provided with two high-pressure screw-down stop-taps and approved cast-iron covers, one of which must be fixed opposite the stop-tap ferrule on the main, and the other in a position approved by the Engineer, immediately outside the building line, where the service enters the tenement.

21. All joints connecting lead pipes must be "wiped" joints, and in no case will "bolt," or "copper bit," or "blown" joints be allowed on water service pipes, either in the interior or on the exterior of any buildings or tenement. Any licensed plumber who, by himself or his workman, commits a breach of this clause shall be guilty of an offence, and shall be liable to suspension or cancellation of his licence.

21. (a) Excepting with the permission, in writing, of the Engineer, not more than one tenement shall be supplied from a single water service.

(b) The Engineer may, if he thinks fit, give permission to arrange, in special cases, that the water supply to more than one tenement may pass from the water main into a single pipe (herein called "trunk service"), which must be laid in a street, and have branch piping to each tenement, and on each such branch there must be a stop-tap fixed in a public thoroughfare, but in no such case shall branches be fixed in excess of the number, or of the diameter proportioned to the trunk service set forth in the subjoined table, namely:—

Diameter of Trunk Service.	No. of 1-in. Branches only.	No. of $\frac{1}{2}$ -in. Branches only.	No. of $\frac{1}{4}$ -in. Branches only.
$\frac{3}{4}$ -inch .. .. .	..	..	2
1-inch .. .. .	..	2	or 5
$1\frac{1}{4}$ -inch .. .. .	2	or 4	or 10
$1\frac{1}{2}$ -inch .. .. .	3	or 6	or 15
2-inch .. .. .	6	or 12	or 30

(c) In any thoroughfare every service pipe must be laid at a depth of at least 1 foot from the surface so as to ensure freedom from damage as far as possible. A service pipe must not be laid longitudinally under a footpath or pitched channel, or in a water channel, unless expressly allowed by the regulations of the local municipal councils, which are in all cases to be observed.

(d) Whenever any service existing at the time of the coming into operation of this By-law supplies more than one tenement, and such service is not laid in accordance with the provisions of this clause, repair of such service will not be permitted should the repair involve the replacement of more than one pipe length of the service, but the service must be renewed strictly in accordance with the before mentioned provisions.

(e) Any person offending against the provisions of this clause shall be guilty of an offence, and shall be liable to a penalty not exceeding Two pounds.

22. No extension of a private service will be allowed except by consent of the Engineer.

In connexion with every application to lay a water service of 2 inches and upwards in diameter, or to alter the position of any such water service, the plumber's notice must be accompanied by a properly dimensioned plan showing the locality of the premises at which the work is to be effected, and the position in which it is intended to lay the pipes, and fix meters, plugs, stop-taps, &c., thereto.

23. Any permission granted by the Engineer to supply a property with water by means of an extension service from a main pipe, which does not pass in front of the said property, or from a private service, shall be deemed to be temporary, and shall be liable to revocation at the pleasure of the Engineer.

24. The service pipe from the main being the property of the owner or occupier of the tenement supplied by such service pipe, the occupier (if any) or (if none) the owner shall, upon receiving notice that his service pipe requires repairing immediately proceed to repair the same, and he shall be responsible for any loss of water or other damage which is caused by reason of such service pipe being leaky, or otherwise out of repair, or broken, and, in default of so repairing, he shall be guilty of an offence, and shall be liable to a penalty not exceeding Five pounds, and in the event of continuing the offence, to a further penalty not exceeding Two pounds for each day after receipt of such notice, and the Council may stop the water from flowing into such tenement, either by cutting off the service pipe, or otherwise, as the Council may seem fit, until the necessary repairs have been effected.

*Waste of Water.*

25. Any person supplied with water by the Council who shall wilfully or negligently allow the same to run to waste shall be guilty of an offence, and shall be liable for each such offence to a penalty not exceeding Five pounds, and in the event of continuing the offence to a further penalty not exceeding Two pounds for each day after notice of the offence from the Council.

*Taking or Supplying Water Without Authority.*

26. Any person receiving water from the Council who, without the written permission of the Engineer, takes or carries away such water from his tenement, or allows any person to take or carry away such water, or sells the same to any other person, shall be guilty of an offence, and shall be liable to a penalty not exceeding Five pounds.

Any person, not having agreed to be supplied by the Council, who takes or carries away water from the premises of any other person so supplied, or from any drinking tap, trough, or private or public service pipe, shall be guilty of an offence, and shall be liable to a penalty not exceeding Five pounds.

*Licensed Plumbers.*

27. (a) No person who is not the holder of plumber's licence from the Board shall affix any service pipe to any pipe of the Board, or alter, repair, or in any manner interfere with, any pipe of the Board, or any service pipe, tap, meter, or fitting connected with the pipes of the Board; and any person who is not the holder of a plumber's licence from the Board affixing, altering, repairing, or in any manner interfering with any such pipe, service pipe, tap, meter, or fitting as aforesaid, shall be guilty of an offence, and shall be liable to a penalty not exceeding Ten pounds.

(b) Plumbers' licences shall be at and during the pleasure of the Board, and be subject to review from time to time, and the Board may at any time suspend or cancel any such licence in the event of the holder thereof being adjudged by the Board to be incompetent, or by himself, or his employees committing any breach of the Board's Acts, By-laws, Regulations, or this By-law.

(c) A licence issued in conformity with the provisions of the *Water Act 1915*, or any Act repealed thereby, shall not authorize the holder thereof to do any kind of work connected with the sanitary fittings of houses or the sewerage system.

*Notices.*

28.
