NOTICE TO MARINERS.—VICTORIA.  
(No. 7 of 1929.)

VESSELS INCONVENIENCED BY SEARCHLIGHTS.

MARINERS and others are hereby notified that henceforward the General Signals (temporarily suspended 1918) as set out hereunder are to be substituted for the Blue Light signal indicating that navigation is becoming hazardous owing to the operations of the lights.

Publications Affected.—*General Notice to Mariners respecting Navigation in Victorian Waters, 1927*, page 107, lines 28-34.

(Delete paragraph and substitute general signals as given.)

GEO. KERMODE,  
Port Officer.

Department of Ports and Harbours,  
Melbourne, 8th July, 1929.

*Signals to be made by Vessels Approaching Ports when Inconvenienced by Searchlights.*

"Any vessels approaching a port in the British Empire when searchlights are being worked, and finding that they interfere with her safe navigation, may make use of the following signals, either singly or combined:—

- (a) By flashing lamp, four short flashes, followed by one long flash.
  - (b) By whistle, siren, or fog horn, four short blasts, followed by one long blast.
- Whenever possible, both flashing lamp signals and sound signals should be used.

On these signals being made, the searchlights will be worked, as far as circumstances will permit, so as to cause the least inconvenience, being either extinguished, raised, or their direction altered.

The signals should not be used without real necessity, as unless the vessel is actually in the rays of a searchlight it is impossible to know which searchlight is affected. These signals should be repeated until the inconvenience is removed.

These signals are designed to assist mariners, and do not render the Government liable in any way."

## NAGAMBIE WATERWORKS TRUST.

## BY-LAW.

THE Nagambie Waterworks Trust (hereinafter called "The Trust"), in pursuance and exercise of the powers and authorities conferred by the Water Acts, doth hereby make the By-law following for its Waterworks District:—

*Connections with the Trust's Mains.*

(1) Except with the consent of the Trust, one service pipe only for domestic supply to each tenement shall be permitted, and not more than one house or tenement shall be supplied from a single water service. The Trust may, in special cases, consent to two, or more houses or tenements being supplied from one service, but in such cases the sub-services shall be so arranged that the supply to each house or tenement shall be independent of the supply to the remaining houses, and be controlled by a stop-cock on such service.

(2) No private service shall be extended without the consent of the Trust.

(3) Upon any person giving notice of his desire to lay a pipe to connect with and tap the pipes of the Trust, he shall be informed, on behalf of the Trust, whether it is or is not desired that such tapping should be made by an officer of the Trust, and if it be so desired, such person shall not tap any such pipe, but shall provide and bear the cost of all labour and material necessary for such connexion, and for the restoration of the ground to the satisfaction of the local authority; and be liable for the consequences of failure in so doing, and shall pay in advance to the Trust the expense of such tapping, including the stop-cock and ferrule as follows:—For  $\frac{1}{2}$ -inch pipe, Seven shillings and sixpence;  $\frac{3}{4}$ -inch pipe, Ten shillings; 1-inch pipe, Fifteen shillings. Such tappings shall not be made except under the supervision of a proper officer of the Trust.

(4) All service pipes laid in the ground on private property shall be laid at a depth of not less than 10 inches below the surface. The portions of the service pipe laid along or across any public street, lane, or right-of-way, or where it may be exposed to wheel traffic, shall be laid not less than 24 inches below the ground.

(5) Connexions with the Trust's mains shall (except where otherwise directed) be made with proper stop-cock ferrules, to which, for iron services, a wrought-iron quarter bend, or a length of not less than 3 feet of lead pipe must be attached. For houses rated under £45 per annum, the bore of such service pipe shall not exceed  $\frac{3}{4}$  inch; and for houses rated at £45 per annum and over, the size of such service pipe shall not exceed  $\frac{1}{2}$  inch, unless permission for a larger service shall have been received, in writing, from the Trust. A ratepayer agreeable to pay rates equal to at least the rates payable on a property with a valuation of £45 per annum may, on application, in writing, to the Trust, be permitted to have a service pipe with a  $\frac{1}{2}$ -inch bore.

(6) The maximum tapping allowed (except by special permit of the Trust) for each size of mains shall be as follows:—

For  $\frac{1}{2}$ -inch and 2-inch pipes,  $\frac{3}{4}$ -inch tapping, with approved clip.

For 3-inch and 4-inch pipes,  $\frac{1}{2}$ -inch tapping, with approved clip.

For 5-inch and 6-inch pipes, 1-inch tapping, with approved clip.

For 8-inch pipes,  $1\frac{1}{2}$ -inch tapping.

For 9-inch pipes,  $1\frac{1}{2}$ -inch tapping.

For over 9-inch pipes, 2-inch tapping.

(7) A high-pressure screw-down stop-cock properly secured and covered with an approved cast-iron top, shall be fixed on each water service between the main and building line.

*Materials for Private Services, &c.*

(8) Lead piping of the following weights:—

For piping  $\frac{1}{2}$ -inch diameter, weight 6 lb. per yard.

For piping  $\frac{3}{4}$ -inch diameter, weight 9 lb. per yard.

(b) All pipes and pieces shall be true in sectional form, straight longitudinally, clear in bore, and properly coated throughout, and of equal strength and thickness throughout the entire body of same.

(c) All ends of pipes, bends, and the like shall be properly and truly threaded, and capable of being properly screwed into thimbles, tees, or fittings.

(d) The whole of the pipes, tees, bends, cocks, and fittings, shall be sound and free from all defects, and of strength to bear with safety the maximum hydrostatic pressure to which they may be subject, and if required by the Trust, shall be tested as directed.

(10) No person shall use any tap, stop-cock, bib-cock, ball-cock, valve, closet cistern, service box, wasterot regulator, bath tap, or other fitting in connexion with a supply of water of the Trust, which is not of the best quality and approved by the Trust.

(11) No person shall use any stop-cock, or bib-cocks which are not screw-down high-pressure cocks, made of hard brass or gun-metal, and in every respect of the best quality and approved by the Trust.

(12) All connexions between lead and iron pipes shall be made with brass union couplings.

(13) All joints connecting lead pipes shall be "wiped joints," and in no case will "bolt" or "copper bit" joints be allowed on water service pipes, either in the interior or on the exterior of any building or tenement, on pain of cancellation of licence of the plumber, who by himself or his workman shall break these Regulations.

(14) No person, whether licensed as hereinafter set out or not, shall connect any service pipe or branch service pipe with any steam boiler for the purpose of feeding or supplying the same with water, without first affixing a self-acting valve for preventing the pressure of the steam reversing or affecting the dial of the meter.

(15) No person shall construct or use any urinal or water-closet fitting not approved by the Trust, nor, unless the same be supplied with water from the service pertaining to a tenement, through a proper closet cistern or service box fitted with the approved waste-preventing apparatus. No person shall fit or use any service pipe which communicates directly or indirectly with the basin or trap, or otherwise than with the cistern of a urinal or water-closet. Urinals shall be provided with 2-gallon and closets with 3-gallon cisterns.

(19) All water troughs supplied from the pipes of the Trust shall be water-tight, and shall have proper and efficient fittings for supplying them automatically and for preventing overflow.

*Licensing of Plumbers.*

(20) Before any person shall affix any service pipe to any pipe of the Trust, or alter or in any manner interfere with any pipe of the Trust, or any service pipe, cock, or fitting connected with the pipes of the Trust, he shall obtain from the Trust a licence in that behalf to execute such works, and any unlicensed person affixing, altering, or repairing, or in any manner interfering with any such pipe, service pipe, cocks, or fitting as aforesaid, shall be guilty of an offence.

(21) Each licence shall be for the period ending 31st December next ensuing after the issue thereof; but may be renewed by the Trust at its discretion from time to time in each case to the following 31st December. The Trust shall have power at any time to cancel a licence in the event of the holder thereof performing his work in an unsatisfactory manner, or committing any breach of the Water Acts, or of this By-law, and in such matters the Trust shall be sole judge. For each original licence, the licensee shall pay to the Trust a fee of £1 (One pound) sterling, and for the renewal, five shillings.

(22) Before any such licence shall be granted by the Trust, the person applying for same shall satisfy the Trust that he is a competent plumber, and that he is thoroughly conversant with the provisions of the By-laws as they apply to town supplies. The Trust may, if it so desires or sees fit, refuse to grant the licence.

(23) Each licensed plumber shall report to the Trust secretary the completion of any new work, extensions, or repairs in connexion with any service within twenty-four hours of effecting same.

## MISCELLANEOUS.

*Waste or Misuse of Water.*

(24) No person supplied with water from the Trust shall permit or suffer the same to run to waste.

(25) No person receiving water from the Trust shall, without the written consent of the Trust, take or carry away water from the premises of any other person so supplied, or from any drinking tap, trough, or private or public service pipe.

(26) No person shall, without the written permission of the Trust, water streets or thoroughfares by means of hydrant and hose attached to fire-plugs.

(27) The water supply of all public parks and gardens shall be exclusively under the control and direction of the officers of the Trust, and no person, unless duly authorized, shall turn on the water or otherwise interfere with such water supply.

(28) The Trust may contract with any owner or occupier of premises, or of any lands or tenements, who is entitled to be supplied with water from its works, or who is desirous of being so supplied, for the provision and laying on of a service pipe from the pipes of the Trust to the boundaries of such land, premises, or tenements abutting on the street or road in which the pipes of the Trust are laid.

(29) If any person shall neglect to repair any service pipe conveying water from the pipes of the Trust into the premises of such person after having received notice from an officer of the Trust that such service pipe requires repairing, the Trust may stop the water from flowing into such premises, either by cutting off the service pipe or otherwise as to the Trust may seem fit, until the necessary repairs have been effected.

(30) No person shall lay any pipe to communicate with the pipes of the Trust without first receiving permission, and giving two days' notice of the day and hour when such pipe is intended to be made to communicate with the pipes of the Trust, nor shall make such communication except under the superintendence and according to the directions of a duly authorized officer of the Trust appointed for the purpose.

(31) In every case in which it is necessary to obtain the consent of the Trust before doing any act or commencing any work, such consent must be asked for by notice, in writing, addressed to the secretary of the Trust, and delivered at his office, of such length as is mentioned in the Acts or this By-law, and in no case less than two days prior to the time proposed for the doing of such act or the commencement of such work; and such notice must state clearly the act proposed to be done or work to be commenced, and such acts shall not be done or work commenced save upon the Trust's consent, in writing, and then only subject to and in accordance with such direction or conditions as shall be therein specified. Such consent may be given by and under the chairman of the Trust, the secretary, or the engineer, who severally shall be competent to give the Trust's consent, and on behalf of the Trust to prescribe any directions or conditions attaching thereto, and subject to and in accordance with which only consent shall be deemed to have been given. The giver of every such consent shall notify the same to the next following meeting of the Trust for confirmation.

(32) In the construction of this By-law, the word "person" shall be deemed to extend to and include a corporation, whether aggregate or sole, and the meaning which in the Water Acts is assigned to any word, where occurring in this By-law, unless inconsistent with the subject-matter or context.

(33) Any person who does, or causes to be done, anything in contravention of this By-law, or fails to do anything which under this By-law ought to be done, shall be guilty of an offence, and for every such offence the offender shall, upon conviction, be liable to a penalty not exceeding five pounds (£5), and in continuing offence to a further penalty not exceeding five pounds (£5) for every day after notice of the offence from the Trust.

#### Meters.

(34) If any meter in use cease registering, or be reported by a duly authorized officer of the Trust as out of repair or registering inaccurately, the Trust will estimate and charge for the water consumed during the period such meter was not in working order, and until it is repaired and refixed, either by taking an average of the quantity used during the previous quarter, or during the corresponding period of the previous year, on the basis of subsequent consumption after repairing, or the Trust may insert a check meter on the service pipe, and charge upon the estimates from the registering thereof.

No meter shall be affixed until it shall have been examined, tested, and approved by a duly authorized officer of the Trust, and each meter must be capable of registering at least 1,000,000 gallons, and each  $\frac{1}{2}$ -inch,  $\frac{3}{4}$ -inch, and 1-inch meter must be capable of registering any flow not less than ten, fifteen, and twenty gallons per hour respectively; and each meter must be fixed with approved lead connections or wrought-iron quarter-bends above ground in a conveniently accessible position, and properly protected. Wherever washers are necessary for meter connexion couplings, leather washers in all cases shall be used.

## SHIRE OF KORONG WATER SUPPLY DISTRICT.

### BY-LAW No. 41.

BY-LAW No. 41 of the Shire of Korong, made under the Water Acts, for regulating the supply of water in Wellerburn and Korong Vale Water Supply Districts.

1. The Council shall undertake the construction and maintenance of all mains for reticulation purposes. Extensions of reticulation shall be made from time to time where these are justified in the opinion of the Council. For the purpose of defining reticulations, all pipes on roadways having an internal diameter of 1 inch and upwards shall be deemed reticulation mains.

2. The consumer shall bear the cost of construction and maintenance of all service pipes, which shall include the joint of service pipe with reticulating main, and all pipes and fittings that have or are forming part of the consumer's service, either on a roadway or on the property occupied by the consumer; and, in the case of maintenance, irrespective of whether constructed by the Council or not.

3. In future construction the size of all service pipes laid in the ground shall be  $\frac{3}{4}$ -inch internal diameter, and any service pipes replaced shall be of this dimension, whether originally so or not. In the case of pipes not laid in the ground, the size of pipes and fittings shall be  $\frac{1}{2}$ -in or  $\frac{3}{4}$ -inch internal diameter. In special cases the Council may allow the use of 1-in. internal diameter service pipes, but no service pipes of greater dimensions shall be permitted. Pipes to market gardens shall in all cases be of 1-in. internal diameter without reference to the Council.

4. No consumer shall be supplied with more than one service pipe without the approval of the Council, and shall pay an additional rate fixed by the Council in respect of each additional pipe.

5. The construction and maintenance of all water services shall be carried out to the satisfaction of the Shire Engineer by either a licensed plumber or by some person approved by the said Engineer.

6. The consumer shall at all times keep the whole of his service pipes and fittings in good order, so that leaks and waste are avoided. The Shire Engineer may at any time make an inspection to see that this is being done, and if a state of disrepair or waste is discovered, may require the consumer to rectify the matter immediately. If this is not done he may disconnect the consumer by cutting and plugging the service pipe. Should the consumer later require to be connected, same shall be done only after approval of the Council, and after payment of cost of disconnection, and any other costs incurred by the Council in the matter. Where leaks appear to the Shire Engineer or person authorized by him to be of a serious nature, the Council may arrange for the work to be done expeditiously in order to prevent excessive waste, and the consumer shall pay to the Council within one month of receipt of statement of repairs the cost of same, under penalty of being disconnected.

7. When it is proposed to carry out works in construction or maintenance of water services, the consumer shall give notice to the Shire Engineer in the prescribed form showing details of the location of the allotment to be served, a sketch of the proposed services, the main to which it is proposed to connect, and stating the person or persons to be in charge of the work, and the time it proposed to proceed with the works, and any other information which may be required by the Shire Engineer. If required, when the work of repair or construction is complete, the trench shall be left open for the inspection of the work by the Shire Engineer or his representative.

8. Where repairs or construction have been effected by consumers without giving the required notification, and where trenches have been backfilled before an inspection has been made, or where it has been intimated that an inspection was to have been made, or where water services are not to the Shire Engineer's approval nor in accordance with these Regulations, the Shire Engineer may disconnect the supply, and the consumer shall only be reconnected with the approval of the Council, and upon payment of such costs or compensation as is fixed by the Council.

9. Any consumer who shall authorize an excavation on roadways or footpaths for repairs or construction for water service shall properly protect same, and shall be solely responsible for any accident caused by his negligence in this respect. In backfilling over service pipes, care shall be taken to properly consolidate the material by ramming, and where the service was metal, tarred, gravelled, or otherwise improved, the surface shall be reconstructed as before to the Shire Engineer's satisfaction. An amount of Two shillings and sixpence for every 50 feet or less shall be paid to the Council with notice of work on roadway, which amount shall be paid to the Central Riding for maintenance of the trench after backfilling and the repairs of road surface. All service pipes crossing roadways shall have a cover of at least 15 inches below the surface of the ground, and in special cases where the Shire Engineer may anticipate the existing surface of the roadway being lowered, the depth of cover shall be increased as instructed.

10. Where the Council lowers the road surface below the level existing at the time the service pipe was laid, the Central Riding shall arrange for the cost of lowering such pipe, but shall not be responsible for any repairs to service pipes at a later date, unless in the Shire Engineer's opinion same are damaged by the lowering of the ground level.

11. Waste of water.—Any person supplied with water by the Council who shall wilfully or negligently allow the same to run to waste shall be liable for each offence to a penalty not exceeding Five pounds, and shall be disconnected.

12. Market garden shall mean an area of land supplied with water on which is grown flowers, fruit, or vegetables for sale, or any crop for fodder. The Council reserve the right, in the interest of the consumers, to limit the number of market gardens, or to at any time restrict the area of same. Application shall be made to the Council for the right to use water for the purpose of a market garden.

13. Vacant allotment shall mean an area of land not exceeding one-quarter of an acre, whether surrounded by a fence or not, but abutting on to a street or road carrying a water main.

14. Should the land occupied by a house or tenement exceed an area of one-half of an acre, such excess area shall be charged a rate as an allotment for each quarter-acre.

15. Any officer or servant of the Council may make an inspection of a consumer's property for the purpose of securing the due observance of and compliance with this By-law.

16. Penalties.—Any person who shall by act or omission wilfully offend against the provisions of this By-law shall be liable for every such offence to a penalty not exceeding Five pounds.

Resolution for the passing of this By-law was agreed to by the Council on the 9th day of April, 1929, and confirmed on the 14th day of May, 1929.
