No. 90]

THURSDAY, AUGUST 15.

[1929

CONTRACTS ACCEPTED.

(SERIES 1929-30-31.)

SUPPLY
OF
GENERAL STORES
FOR THE
PUBLIC SERVICE
FOR
STATE DEPARTMENTS,

FROM

1st JULY, 1929, to 30th JUNE, 1930,
OR AS STATED.

Articles included in the attached Contracts List which are indicated as being of Commonwealth Manufacture must, where practicable, be supplied bearing evidence that they have been manufactured in the Commonwealth.

Under these Contracts goods may be ordered by any Department of the Commonwealth, but it is optional on the part of the Contractor to supply.

Stores and Material other than those provided for under the foregoing Contracts, or any Contracts which may be subsequently gazetted, must be purchased as usual under the provisions of Clause 4 of the Stores and Transport Regulations, or by monthly, quarterly, or special quotations from time to time by the Tender Board.

Articles which can be supplied by the Penal Department are not included in these Contracts.

A. B. STANHOPE,
Secretary, Tender Board.

No. 90.—8355

ANNEX TO CONTRACTS NOS. 1929/746 TO 1929/749.

Schedule No. 26.

CASTINGS.

(Manufactured within the Commonwealth.)

Contract from 1st July, 1929, to 30th June, 1931.

1929/746—Holden and Lewis Pty. Ltd.	Security, £5.
1929/747—S. Lacey and Sons Pty. Ltd.	Security, £5.
1929/748—The Dawn Manufacturing Co. Pty. Ltd.	Security, £14.
1929/749—James Coppel Lee and Co.	Security, £6.

SPECIFICATION FOR CASTINGS.

1. All Castings under this Contract shall be supplied subject to the approval of the Officer duly authorized by the Department for which the castings are required, to order or accept delivery of same.
2. Castings of a special character other than those provided for under this Schedule may be obtained locally without infringing this Contract.
3. All castings are to be clean, sharp, free from surface scale, shell, cold shuts, blow holes, honey-comb, cinder, or any other imperfections, and are to be sound in every respect, and thoroughly close in grain. When specially ordered, the castings are to be run with heads or runners of such weight as may be ordered, such heads and runners to be cut off by the Contractor before delivery is made, and the charge for the casting must be at the net weight only, trimmed and clean.
4. Whenever specially ordered, the iron castings shall be run from the very best "cold-blast iron" of such particular brand, quality, and mixture as may be described in the order; or of such other substituted mixture as may be approved or directed by the Officer of the Department ordering, so as to produce a hard, close, soft, or other description of metal, at the option and to the satisfaction of the Officer ordering.
5. Whenever castings are required and, in the opinion of the Officer ordering, they can be moulded from the broken originals, the Contractor will be bound to mould from such broken originals without requiring the Government to supply a wooden or other pattern for same, and without being allowed any extra rate.
6. All patterns lent by the Government will be delivered to the Contractor at his works, and all such patterns must be returned by and at the expense of the Contractor in good order and condition; and must be delivered together with the castings. In the event of the non-return of any of the patterns, or of their being damaged, the price, which will be fixed by the Officer ordering, shall be paid by the Contractor, or may be deducted from any money due to the Contractor or from his security money.
7. The Contractor shall, during the currency of this contract, furnish the Officer ordering with the address or addresses of the place or places at which the steel castings are being manufactured by the Contractor, and the Officer ordering, or any person appointed by him from time to time shall at all times during business hours have free access to such place or places, and shall be afforded every facility for inspecting the castings while in process of manufacture.

QUALITY AND TESTING OF STEEL CASTINGS.

9. PROCESS OF MANUFACTURE.—Steel for castings shall be made by the open hearth process, Acid or Basic, or by such other process as may be approved by the Officer duly authorized by the Department to accept delivery of the castings contracted for.
10. ANNEALING.—All Steel castings shall be thoroughly annealed in a properly constructed annealing furnace, which must permit of the whole casting being uniformly raised in temperature throughout its whole extent to the necessary intensity required for annealing purposes. The casting shall be allowed to cool down prior to removal from the annealing furnace; and if subsequently heated for any purpose it shall be again similarly annealed if required by the Officer duly authorized by the Department to accept delivery.
11. TESTING AND INSPECTION.—The following tests and inspections shall be made, preferably at the place of manufacture prior to despatch, but in the event of any casting proving unsatisfactory in the course of preparation, or fitting in its place, such casting shall be rejected, notwithstanding any previous certificate of satisfactory testing.
12. TENSILE AND BEND TEST PIECES.—The tensile strength and ductility shall be determined from standard test pieces, which are to be prepared from sample pieces cast on the casting. These sample pieces are not to be cut, or partially cut, from the castings until the annealing of such castings has been completed, nor until they have been stamped by the Officer duly authorized to accept delivery. The test pieces are to be stamped by the aforesaid Officer after the annealing. All test pieces shall be selected by the aforesaid Officer and tested in his presence, and he shall satisfy himself that the conditions herein described are fulfilled.
13. NUMBER OF TESTS.—At least one tensile test and one cold bend test are to be taken from each casting. In castings of complex design, at least two tensile and two cold bend tests are to be taken. Where a casting is made from more than one charge of steel, at least four tensile and four cold bend tests are to be taken from pieces cast as far apart as possible on the casting, some test pieces being taken from as near the top and others from as near the bottom of the casting as practicable.
14. DIMENSIONS OF TENSILE TEST PIECES.—The tensile test pieces are to be turned so as to have a diameter of .564 inch with a gauge length of 2 inches, or a diameter of .798 inch with a gauge length of 3 inches, or a diameter of .977 inch with a gauge length of 3½ inches.
15. DIMENSIONS OF BEND TEST PIECES.—The bend test pieces are to be machined to a rectangular section 1 inch wide by ½ inch thick, with the edges rounded to a radius of ¼ of an inch. They are to be bent over the thinner section. The bending may be performed either by pressure or blows.
16. TENSILE TESTS.—The tensile breaking strength determined from test pieces of standard dimensions is to be between the limits of 26 and 35 tons per square inch, with an elongation of not less than 20 per cent. measured on the standard test piece.
17. BEND TESTS.—The bend test pieces must withstand, without fracture, being bent cold through an angle of 120 degrees, the internal radius of the bend being not greater than 1 inch.
18. ADDITIONAL TESTS BEFORE REJECTION.—Should either the tensile or bend test, or both, fail, and should the Officer duly authorized for the purpose consider the fractured test piece or test pieces, or the results obtained therefrom, do not fairly represent the quality of the casting, a duplicate of the test or tests which failed shall be made if requested by the maker. In such cases the quality of the casting shall be judged by the result of the duplicate test or tests, and not by the original test or tests which failed.

19. PERCUSSION TESTS.—Stern frames cast in one piece to be let fall on hard ground (excavations to be made to take bosses and other projections) after being raised through an angle of 45 degrees. Stern frames cast in more than one piece, rudders, steering quadrants, crossheads, tillers, &c., are to be dropped on hard ground from a height of from 7 to 10 feet, according to the design, shape, and weight of the casting.

20. CASTINGS OF COMPLEX DESIGN.—Castings of complex design which are liable to be deformed if submitted to the drop or percussive test, may have this test dispensed with provided two tensile and two cold bend tests be made upon pieces taken from positions as far apart as possible on each casting; one tensile and one bend test being taken from as near the top, and the others from as near the bottom, of the casting as practicable.

21. HAMMERING TESTS.—After being subjected to the percussive test, the casting in each case is to be subsequently slung up and well hammered with a sledge hammer not less in weight than 7 lb., to satisfy the Officer duly authorized for the purpose that the casting is sound and without flaw. This hammering test is also to be applied to castings of complex design which may not have been submitted to a percussive test.

22. DRILLING TESTS.—In the case of large castings, the Officer duly authorized by the Department is to supplement the foregoing tests by drilling small holes at such parts of the castings as experience shows cavities and contraction cracks are most likely to occur, and at positions which are to be agreed upon between the aforesaid Officer and the manufacturer, in order to determine the soundness or otherwise of the casting. These holes are afterwards to be tapped and properly filled up with screw plugs.

ANNEX TO CONTRACTS NOS. 1929/750 TO 1929/752.

Schedule No. 27.

CHEMICALS, ETC.

(PHOTO-LITHO., PHOTOGRAPHIC, AND OTHER.)

Contract from 1st July, 1929, to 30th June, 1931.

1929/750—Felton, Grimwade, and Co. Pty. Ltd.	Security, £10.
1929/751—Kodak (Australasia) Pty. Ltd.	Security, £5.
1929/752—H. B. Selby and Co.	Security, £42.

Separate charges in accordance with those set out in the appendix of this Schedule are to be made by suppliers for Containers, and such charges must not be included in the price of the Chemical or other article tendered for.

All empty Containers that have been charged for will, where practicable, be returned to the Contractor, and if in good order and condition the charge for same to be refunded by the Contractor.

Each Container for which a charge has been made must bear a label setting forth the price charged for same, and such labels must not be removed by departments from the articles to be returned.

Supplies to be of the very best quality, subject to approval.

(b British, c Commonwealth.)

Men.

Instructions re Measurement.

Measures should be taken as follows:—

Chest—Over vest under coat, taken close to arms.

Waist—Over vest under coat, above hips.

Waist for trousers under vest and above trousers.

Inside the leg of knickers or trousers, not outside the leg.

Sleeve measure should be taken, from centre of back to the shoulder on to the elbow and thence to the wrist, and not the inside sleeve measure.

ANNEX TO CONTRACT NO. 1929/755

Schedule No. 29.

CLOTHING (UNIFORM).

FOR ATTENDANTS, HOSPITALS FOR THE INSANE.

Made up within the Commonwealth from Serge manufactured within the Commonwealth.

Period of Contract 1st July, 1929, to 30th June, 1931

1929/755—Sol. Davis Security, £156.

To Samples at Tender Board Offices.

The Contractor must provide everything necessary for the due fulfilment of his contract.

Measurements will be supplied to the Contractor by the Institutions for which the garments are required.

All supplies must be strictly in accordance with the sample garments at the Tender Board Office, well fitted and well made. The Serge to be 18 oz. weight of Commonwealth manufacture, and Indigo dyed, with best quality trimmings, as per sample garments.

All garments will be inspected on the premises of the Contractor before delivery is taken; any article not fitting, bad in workmanship or material, will be rejected.

Delivery must be made at the various Hospitals for the Insane within six weeks from the date of the order, failing which a fine of One Shilling (1s.) per garment per day may be enforced at the option of the Tender Board on report from the Inspector-General of the Insane, the amount to be deducted from the Contractor's account or from the security money.

Item No.	Description of Articles.	Rate.	Name of Contractor.
1	Tunics—Serge, Indigo dyed, single-breasted sac, square corners, double stitched edges, 2 inside pockets, padding around scye, through shoulders, and to be quilted, raised sleeve heads, all wool and hair hymo through breast and down fronts, patrol collar, 5 buttonholes, machine-worked with silk twist, 5 buttons, bone, imitation mohair, tab inside under collar for name	£ s. d 1 6 11	Sol. Davis
2	Trousers—Serge, cross pockets and hip pocket, fly buttons not more than 2 inches apart, bottom of trousers not less than 17 inches nor more than 18 inches in circumference	0 14 11	
3	Coats—Duck, with 2 inside breast pockets	0 10 3	

ANNEX TO CONTRACTS NOS. 1929/756 AND 1929/757.

Schedule No. 30.

COCKS AND FITTINGS (BRASS, ETC.) AND PLUMBERS' SUNDRIES.

Contract from 1st July, 1929, to 30th June, 1930.

1929/756—McPherson's Pty. Ltd. Security, £10.

1929/757—John Danks and Son Pty. Ltd. Security, £35.

All Articles marked (*) to Sample at Tender Board Offices.

Articles to be supplied of any pattern or thread required and only those of the best finish and strongest manufacture will be accepted. All high-pressure cocks must bear the stamp of the M. and M.B. of Works as having been tested to their standard. No others will be accepted.

ANNEX TO CONTRACTS NOS. 1929/758 TO 1929/761.

Schedule No. 31.

COPPERS, FURNACES, AND STOVES.

(Manufactured within the Commonwealth.)

Contract from 1st July, 1929, to 30th June, 1931.

1929/758—Metters Bros.	Security, £44.
1929/759—T. Mitchell and Co. Pty. Ltd.	Security, £5.
1929/760—J. Danks and Son Pty. Ltd.	Security, £7.
1929/761—Harnwell and Son	Security, £5.

All Supplies to be of the best manufacture and made of the best material.

The Copper Boilers are to be of the capacity ordered, to fit the furnaces, weighing not less than $1\frac{1}{2}$ lb. per gallon.

The Portable Washing Furnaces (items 3 and 4) must be constructed of wrought iron, riveted and strapped at top and bottom edges with 1-in. x $\frac{3}{8}$ -in. circular bars, cast-iron fire-grate, furnace door, flue pipe, and cap complete.

The Stoves (items 11, 12, and 13) must be made of cast-iron and sheet-steel, strongly put together. Each stove must be provided with 6-ft. flue, lifter, scraper, and brush, sliding or fall fire doors, and fall door to oven, and capable of burning wood or coal.

Schedule No. 52.

INKS—WRITING, INK POWDERS, AND INK FOR I.R. STAMPS.

(Manufactured within the Commonwealth).

Contract from 1st July, 1929, to 30th June, 1931 (except for items 5, 7, 12, 13, which will be from 1st October, 1929, to 30th June, 1931).

1929/814—Wiltshire's Pty. Ltd.	Security, £5.
1929/815—Angus and Co.	Security, £5.
1929/816—Spicer and Detmold Ltd.	Security, £12.
1929/817—H. Pudney and Co. Pty. Ltd.	Security, £5.

The ink supplied under any item listed in this Schedule must not be inferior in quality or in any other regard to inks if such had been manufactured or prepared in accordance with the following formulae and specifications.

Special Blue Black Writing Ink for Records, and Blue Black Writing Ink.

The inks should have the properties of flowing freely from the pen and making a legible and permanent record. They must be gallate and gallo-tannate of iron inks not inferior in any essential to those properly prepared after the following respective formula in which all the ingredients are of the strength and quality prescribed in the British Pharmacopoeia.

Formulae for Special Blue Black Writing Ink for Records, and Blue Black Writing Ink.

	Special Blue Black Writing Ink (for Records).	Blue Black Writing Ink.
	Grains.	Grains.
Ferrous Sulphate	2,083	1,052
Tannic Acid	1,624	821
Gallio Acid (X'tals)	534	266
Hydrochloric Acid Dilute B.P.	1,735	877
Carbolic Acid	70	70
Gum Arabic	694	..
Soluble Blue Dye	152	246
Water to make	1 gallon	1 gallon

Inks.—Blue, Green, Scarlet and Violet :—

The blue ink shall contain at least 2 per cent. by weight of suitable blue aniline colour, the green ink shall contain at least 2 per cent. by weight of malachite green, the scarlet ink shall contain at least 2 per cent. by weight of eosin or other suitable aniline dye-stuff and the violet ink shall contain at least 3 per cent. by weight of methyl violet or other suitable aniline colour.

These inks should not throw down any appreciable deposit on standing; they should flow easily from the pen and should not fade appreciably when exposed to diffused daylight for 48 hours and should dry readily, leaving a clear impression without any distinct gumming of the written characters.

Ink Powders.—The blue-black writing ink in powder form should be prepared in such a manner as to produce a fluid conforming with the specification shown above for blue-black writing ink; the scarlet ink in powder form should be prepared in such a manner as to produce a fluid ink conforming with the requirements shown above for scarlet ink.

Schedule No. 72.

TANKS—

CORRUGATED, CYLINDRICAL

(Of Commonwealth Manufacture).

Contract from 1st July, 1929, to 30th June, 1930.

1929/907—Apex Sheet Metal Products Co. Security, £10.
 1929/908—Weickhardt & Co. Security, £30.

Taps to Sample at Public Works Department.

Galvanized Corrugated Tanks for use outside the Melbourne District may be purchased locally without infringing this Contract.

SPECIFICATION.

TANKS.—To be made of 24-gauge corrugated galvanized "Orb" brand for sides, with bottoms of 24-gauge galvanized "Queen's Head" flat iron (or other approved brand), to be lapped not less than 3" at all vertical joints and one (1) corrugation for all horizontal joints, and bottoms properly seam-jointed and well soldered. All vertical joints to be double riveted with galvanized iron rivets, and joints soldered on external and internal face of tanks.

All horizontal joints to be riveted with galvanized iron rivets at 9" pitch round circumference of tank, and joints to be soldered on external and internal faces of tanks. The whole of the rivets and soldering to be well sweated in.

The junction of sides and bottom to be well paned on and thoroughly soldered. The cover to be 26-gauge galvanized flat iron, conical shaped, with all joints properly scamed and soldered and paned on to a 3" 24-gauge galvanized iron rim and all to be well soldered, the bottom edge of rim to be wired. The Contractor must provide and fix inside the tank a 2" diameter 24-gauge galvanized iron overflow pipe the full height of the tank, the same to be secured thereto at the top of overflow with galvanized iron strap soldered to the overflow and to the tank.

A hole to be cut in the bottom of the tank 7" diameter, the Contractor to securely solder and rivet with No. 12 rivets to bottom of tank a 24-gauge galvanized iron cone 7" diameter at bottom, 5" high, and 2" diameter at top. The overflow to come through cone and to project 4", all to be securely soldered and left watertight.

The Contractor must provide with tank a 24-gauge galvanized iron elbow 2" diameter to slip on to overflow, each arm of elbow to be 12" long.

The Contractor must provide and securely fix a galvanized iron socket properly bossed and soldered to receive the tap, also a low-pressure brass spring tap with movable key complete. All tanks to be thoroughly watertight and perfectly clean.

Schedule No. 73.

TENTS AND FLYS.

(CALICO AND DUCK.)

(Manufactured in the Commonwealth.)

Contract from 1st July, 1929, to 30th June, 1930.

1929/909—Evan Evans Pty. Ltd. Security, £10.
 1929/910—The Gair Manufacturing Co. Pty. Ltd. .. Security, £22.

All items to Sample at Tender Board Offices.

SPECIFICATIONS.

TENTS AND FLYS—CALICO.—*The Calico Tents and Flys must be made of heavy superfine British Calico, weighing 8 oz. to the square yard. They must be well made and machine stitched. Only No. 50 linen thread is to be used in the stitching. Each Tent and Fly to have a Turnover Ridge Band 9 in. wide. The tents to have doorway one end with flap complete with strong tapes for fastening. All eyelet holes must be reinforced with canvas patches. The eyelets used are to be extra strong, with turnover ring. The eaves to be roped, such ropes to extend 6 inches up the gables. 40 feet of ½-in. Manila rope must be supplied with each Tent and Fly respectively.*

TENTS AND FLYS—DUCK.—*The Duck Tents and Flys are to be made of the best quality English Duck, weighing 12 oz. to the square yard, each with Ridge Band 12 in. All seams to be sewn with best 3-cord linen thread. Tents to have doorway one end with flap complete with strong tapes. The eaves of tents to have eyelets reinforced with canvas patches, also eyelets all round the bottom of the tent. All eyelets on eaves to have best ¾-in. Manila ropes 8 feet long spliced in each.*

The Flys to have 12-in. Ridge Band. Eyelet holes are to be reinforced with canvas patches in which ropes are to be spliced, consisting of 8 feet of ¾-in. Manila rope to each, and to have ¾-in. Manila rope sewn in all round.

ANNEX TO CONTRACTS NOS. 1929/911 TO 1929/915

Schedule No. 74.

TIMBER (COMMONWEALTH).

(SAWN AND OTHER.)

Contract from 1st July, 1929, to 30th June, 1930.

1929/911—H. Beecham and Co. Pty. Ltd. Security, £76.
1929/912—James Moore and Sons Pty. Ltd. Security, £10.
1929/913—John Sharp and Sons Ltd. Security, £50.
1929/914—Millar's Timber and Trading Co. Ltd. Security, £35.
1929/915—T. Anthony and Co. Pty. Ltd. Security, £32.

All timber to be thoroughly seasoned, free from large knots, shakes, heart, sap, gum veins, or any other imperfection; and must be thoroughly sound and of approved quality.

When timber which is rated at per superficial foot of one inch thick is asked for and supplied of a greater or less thickness than one inch it shall be paid for proportionately.

Actual measurements only will be paid for.

This Contract is not to be considered broken, infringed, or vitiated by the purchase locally of any of these items for Country Stations.

ANNEX TO CONTRACTS NOS. 1929/932 AND 1929/933.

Schedule No. 79.

WHITE LEAD AND LINSEED OIL.

(Manufactured in the Commonwealth.)

Contract from 1st July, 1929, to 30th June, 1930.

1929/932—E. L. Yencken and Co. Pty. Ltd. Security, £70.
 1929/933—Brooks, Robinson, and Co. Ltd. Security, £30.

SPECIFICATION.

WHITE LEAD IN OIL.—*The White Lead (in Oil) must not be inferior in quality or description, or in any other respect, to the standard specification for genuine white lead in oil as set out by the Australian Commonwealth Engineering Standards Association, in its publication No. K.10/1928, page 11.*

To determine whether the supply conforms to the specification referred to above, samples of not less than 1 lb. may be taken from any unopened packages (selected at random) of the supply, and forwarded in suitable air-tight containers to the Tender Board Office for test and analysis under the methods specified by the above-mentioned Association in its publication No. K.10/1928, pages 13-18.

The manufacturer's name and the net contents of each container shall be clearly shown thereon.

LINSEED OIL—RAW AND BOILED.—*The Raw and Boiled Linseed Oils must not be inferior in quality or description or in any other respect to the standard specifications for Raw and Boiled Linseed Oils as set out by the Australian Commonwealth Engineering Standards Association in its publication No. K.2-6/1928, page 9, for "Raw," and page 15 for "Boiled." To determine whether the supplies conform to the specifications referred to above, samples of not less than 1 pint may be taken from the bulk supply, thoroughly mixed, and forwarded to the Tender Board Office in a clean and dry suitable container for test and analysis under the methods specified by the above-mentioned Association in its Publication No. K.2-6/1928, pages 19-23.*

The description of the contents whether "Raw" or "Boiled" Oil must be clearly shown on each container.
