Forests Act 1928.

"PROCLAIMED PERIOD" AND "PROCLAIMED AREAS" WHERE SERIOUS DANGER FROM FIRES EXISTS.

PROCLAMATION

By His Excellency the Lieutenant Governor, as Deputy for His Excellency the Governor, of the State of Victoria and its Dependencies in the Commonwealth of Australia, &c., &c., &c.

WHEREAS by section 69 of the *Forests Act 1928* (No. 3085) it is enacted that—

Whenever the Commission with respect to any period of twelve months reports to the Minister that, whether owing to climatic conditions or otherwise, there is a serious danger of fire or of the spread of fire in any part or parts of Victoria, the Governor in Council may from time to time for the purpose of this section declare by Proclamation—

- (a) any specified portion of such period to be a "proclaimed period"; and
- (b) any specified area of Victoria to be a "proclaimed area."

And whereas under this section it is provided that any person who during any proclaimed period within any proclaimed area lights or kindles or knowingly causes or permits to be lighted or kindled any fire in the open air except—

- (a) in such positions as are prescribed by Regulations under this section or are indicated by notices in the prescribed form issued under the authority of prescribed persons (including the holders for the time being of any prescribed offices as such) or bodies of persons; and

(b) with such precautions as are prescribed— shall be liable to imprisonment for a term of not more than two years or to a penalty of not more than Two hundred pounds or to both such imprisonment and penalty.

And whereas the Commission has reported to the Minister that owing to climatic conditions a serious danger of fire exists throughout Victoria: Now therefore I, the Lieutenant-

Governor, as Deputy for the Governor, of the State of Victoria, by and with the advice of the Executive Council of the said State, do hereby declare—

- (a) that the "proclaimed period" shall be from the eighteenth day of February, 1931, to the thirty-first day of March, 1931, both days inclusive; and
- (b) that the "proclaimed areas" shall include the counties set forth in the schedule hereunder—

BALLAN WATERWORKS TRUST.

RATING BY-LAW FOR 1931.

THE Commissioners of the Ballan Waterworks Trust do hereby, pursuant to and in exercise of the powers and authorities conferred by the *Water Act 1928*, make the following By-law:—

Rating By-law for 1931.

The following are the rates and charges which the occupiers or owners of lands and tenements within the Trust District shall pay for water supplied by the Trust for the year 1931:—

1. For every vacant piece of land which has a separate annual municipal value of any amount, and past which any water main is laid, the sum of Ten shillings (10s.) per annum.

2. For any shop which has a separate annual municipal value of any amount, not supplied with water, and past which any water main is laid, the sum of Ten shillings (10s.) per annum.

3. For every house or tenement of under Fifteen pounds (£15) annual municipal value, the sum of One pound ten shillings (£1 10s.) per annum.

4. For every house or tenement of Fifteen pounds (£15) and under Twenty pounds (£20) annual municipal value, the sum of One pound fifteen shillings (£1 15s.) per annum.

5. For every house or tenement of Twenty pounds (£20) and under Twenty-five pounds (£25) annual municipal value, the sum of Two pounds (£2) per annum.

6. For every house or tenement of Twenty-five pounds (£25) and under Thirty-five pounds (£35) annual municipal value, the sum of Three pounds (£3) per annum.

7. For every house or tenement of Thirty-five pounds (£35) and under Sixty pounds (£60) annual municipal value, the sum of Four pounds (£4) per annum.

8. For every house or tenement of Sixty pounds (£60) and under One hundred pounds (£100) annual municipal value, the sum of Four pounds ten shillings (£4 10s.) per annum.

9. For every house or tenement of One hundred pounds (£100) and over annual municipal value, the sum of Five pounds (£5) per annum.

10. For water supplied to any house or tenement upon which no annual municipal value is made, the sum of One pound ten shillings (£1 10s.) per annum.

11. All water supplied by the Trust by measurement shall be charged for at the rate of One shilling and sixpence (1s. 6d.) per thousand (1,000) gallons, but in no case shall the amount to be paid be less than that which would be payable for the premises under its municipal assessment.

12. For every public water trough supplied with water from the works of the Trust, the sum of One shilling (1s.) per annum shall be paid.

13. All public water troughs must be fitted with approved self-acting taps to prevent overflow; such taps to be approved by the secretary for the time being of the said Trust.

14. It shall be unlawful for any person to have an overflow waste pipe from any private bath.

15. The Trust may by notice, in writing, intimate to any owner or occupier using water for other than domestic purposes solely that the water supplied is to be charged by measure, and may by such notice require such owner or occupier to provide a meter within fourteen days after the receipt of such notice; and thereupon such owner or occupier shall, within the time specified, at his own expense, provide a meter.

16. No meter shall be affixed until it shall have been examined and approved, and a certificate from the Board of Works or other authorized person be produced for the inspection of the secretary of the Trust for the time being that such meter is in proper order.

17. Every person requiring to remove or alter the position of any meter shall give six days' notice, in writing, to that effect to the Trust, and a registration of the quantity of water used shall be taken before such removal or alteration is made.

18. If any person who has provided any meter fail to give the notice required of any repairs required for such meter he shall be liable to a penalty not exceeding Five pounds (£5).

19. If any person refuse or delay to have such meter properly repaired and put in correct working order after having been required by any officer of the Trust so to do, the Trust may shut off the supply of water from the premises of such person, either by cutting the service-pipe or otherwise, until such meter shall have been properly repaired and certified by some officer of the Trust as being in proper working order.

20. Any person supplied with water by the Trust who shall permit or suffer water to run to waste shall be liable to a penalty, or who shall use or allow the water to be used in an unauthorized manner, or who is in arrears with the payment of his water rate, the Trust may, after one hour's notice, cut off the supply of water from the premises of such person either by cutting the pipes by or through which the water is supplied or by any other means that are available, and may cease to supply such premises with water so long as the Trust may think fit.

21. It shall be lawful for any person appointed by the Trust for such purpose to request permission from any owner or occupier to make an inspection of the water service to ascertain if the water is being allowed to run to waste, and, if such

owner or occupier refuse permission for such inspection the Trust may, if it think fit, refuse to supply such premises with water; and such refusal on their part will in no way relieve the owner or occupier from payment of any rate or rates as may be levied on such property.

22. If the person appointed for such inspection shall ascertain that any owner or occupier is allowing water to waste by reason of leaky taps or otherwise, he shall be empowered to authorize the repair of such taps or pipes and to notify such owner or occupier that the waste of water must at once cease.

23. No person shall affix any service-pipe to any pipe of the Trust, or alter or repair or in any way interfere with any pipe of the Trust or any service-pipe, cock, or fitting connected with the pipes of the Trust until he shall have obtained from the Trust permission to execute such work, and such permission shall be at and during the pleasure of the Trust, who may at any time cancel such permission.

24. Any person, whether licensed or permitted as aforesaid or not, who shall require to affix any service-pipe to any pipe of the Trust, or to make any repairs to pipes under the control of the Trust, shall give notice to the secretary of his intention to do so.

25. All connexions from the Trust mains to property shall be made at the expense of the owner or occupier of the property to be supplied, and all repairs or renewals shall, when necessary, be made by the owner or occupier, and such pipes shall at all times be under the control of the Trust.

26. All connexions, pipes, and fittings shall be of the best quality, and approved by the secretary and chairman of the Trust.

27. The service-pipes from the main being the property of the owner or occupier of the tenements supplied by such service-pipes, the occupier (if any), and, if none, the owner, shall, upon receiving notice that his service-pipe requires repairing, immediately proceed to repair the same, and he shall be responsible for any loss of water or other damage which shall be caused by reason of such service-pipe being leaky or otherwise out of repair or broken, and the Trust may stop the water from flowing into such premises in any way it may seem fit until such repairs have been effected.

28. Fire-plugs shall not be used except for the purpose of extinguishing fires unless any other use of them be allowed by the Trust, and they shall at all times be under the control of an officer of the Trust.

29. Any person watering any street or footpath by means of a hose except under the direction of an officer of the Trust shall be guilty of an offence against these Regulations.

30. For any breach of these Regulations, a penalty not exceeding Five pounds (£5) shall be imposed.

31. The above-mentioned rate is made for one year, commencing on the 1st day of January, 1931, and ending on the 31st day of December, 1931, and shall be payable in two instalments; the first instalment shall be due and payable on the 1st day of May, 1931, and the second instalment on the 1st day of November, 1931. Such person or persons as the Commissioners of the Ballan Waterworks Trust may from time to time appoint for that purpose shall be authorized to demand and receive and collect and recover the said rate.

Dated this 15th day of January, 1931.

C. F. MYERS, Chairman.
(SEAL) JOHN V. PORTER, Secretary.

Approved by the Governor in Council,

Electricity Commission Acts.

ELECTRICITY COMMISSION OF VICTORIA.

WIRING REGULATIONS AMENDED.

WHEREAS by Order in Council made the twenty-sixth day of October, 1925, and published in the *Government Gazette* of the 4th day of November, 1925, pages 3601 and following, certain Regulations were made on the recommendation of the State Electricity Commission of Victoria (hereinafter referred to as "the Commission") by the Governor in Council pursuant to the powers in that behalf conferred by section 17 of the *State Electricity Commission Act 1918* and section 20 of the *State Electricity Commission Act 1920* as amended by section 4 of the *State Electricity Commission Act 1921*, and were amended by Orders of the Governor in Council published in the *Government Gazette* of the 22nd day of July, 1927, page 2247, the 14th day of September, 1927, page 2776, the 29th day of August, 1928, page 2341, and the 3rd day of July, 1929, pages 1897 and 1898; and whereas although the said Acts were by section 2 of the *State Electricity Commission Act 1928* repealed, it is provided that such repeal shall not affect any regulation or by-law made under the said repealed Act or any of them; and whereas pursuant to the provisions of section 27 of the *State Electricity Commission Act 1928* the Governor in Council, on the recommendation of the Commission, may make Regulations for or with respect to certain matters therein specified, the Commission doth hereby recommend that the Governor in Council make the following Regulations, amending and adding to the Regulations above referred to:—

1. A. The said Regulations published in the *Government Gazette* of the 4th day of November, 1925, pages 3601 and following, and of the 22nd day of July, 1927, page 2247, and of the 14th day of September, 1927, page 2776, and of the 29th day of August, 1928, page 2341, and of the 3rd day of July, 1929, pages 1897 and 1898, and the following Regulations and any Regulations hereinafter made to be read as one set of Regulations with them, may be cited as the "Wiring Regulations."

B. The said Regulations published in the *Government Gazette* of the 4th day of November, 1925, pages 3601 and following, are herein referred to as the "Principal Regulations."

2. Regulations for or with respect to prescribing the quality of materials, fittings, and apparatus to be used in connexion with electrical installations and the methods to be followed in carrying out electrical installations, that is to say:—

Access to Roofs.

A. The following regulation shall be added after regulation 11 of the principal Regulations:—

11A. No wiring shall be installed between roofs and uppermost ceilings unless there is a convenient means of access thereto available. No aperture unless it contains a rectangular space 16 inches by 14 inches shall be deemed a convenient means of access.

Earth Clips.

B. The following regulation shall be added after regulation 20 of the principal Regulations:—

20A. Earth clips shall be made of incorrodible metal not less than .044 inches (No. 18 S.W.G.) in thickness, and if made in one piece shall be not less than $\frac{3}{4}$ inch wide, and if made in two pieces shall be not less than 1 inch wide.

C. Clause (b) of regulation 49 of the principal Regulations shall be repealed and the following regulation shall be enacted in its place:—

Conduits shall enclose the conductors throughout their entire length except where the installation of conduit is impracticable in dry rigid non-conductive hollow partitions down which the conductors of final sub-circuits pass from the ceiling to a switch or a lighting or power point not less than 12 inches above the floor level. In such cases the conduit shall be terminated by entering or being fixed by a flange to the wooden wall plate through which the conductors pass.

D. Regulation 50 of the principal Regulations shall be repealed and the following Regulations shall be made:

*CASED WIRING.**Suitable Timber.*

50. Conductors (excepting flexible conductors) insulated as in classes A and B of regulation 32 of the Wiring Regulations may be enclosed in wood casing only if such casing is made of well seasoned, straight, fine-grained timber of a non-resinous nature, free from shakes, knots,

and other flaws, and subject to compliance with the following conditions:—

Location.

(a) Wood casing shall be used only in dry situations where it is not exposed to rough usage or wear and tear. In positions subject to occasional condensation, such as bathrooms and wash-houses in domestic installations, casing and capping (provided they are painted over with water-resisting paint after erection) may be used on the surface of walls and partitions.

Exposed to View.

(b) Except between a roof and the uppermost ceiling, where it is accessible for inspection, wood casing shall be exposed to view throughout its entire length.

Prohibited Positions.

(c) Wood casing shall not be used in lift wells, hoist ways, or in positions where it is likely to be damaged by rodents, and shall not come in contact with gas or water pipes or run continuously below water pipes. In no case shall it come within 12 inches above a floor.

Fixing.

(d) Where wood casing is continuously supported it shall be fixed to the support or structure at intervals of not more than 5 feet, and where it is not so supported it shall be so fixed at intervals of not more than 2 ft. 6 in.

Construction.

(e) Wood casing shall be so constructed that the width of the fillet between the grooves is at least $\frac{1}{4}$ inch, and the thickness of the outside at least $\frac{1}{4}$ inch.

Capping.

(f) The thickness of capping shall in no case be less than $\frac{1}{4}$ inch, except at mouldings, where the minimum thickness may be $\frac{3}{16}$ inch. Capping shall be secured at all ends and between ends at intervals not exceeding 2 feet by round-headed screws to the centre fillet of the casing.

To Enclose Conductors.

(g) Casing and capping shall enclose conductors throughout their entire length except where the conductors of final sub-circuits pass through a non-conductive hollow partition to a switch or a lighting or power point not less than 12 inches above the floor level. In such cases the casing and capping shall terminate by being securely fixed to the wooden wall plate through which the conductors pass.

Erection.

(h) Wood casing and capping shall be erected in a neat and workmanlike manner, and all joints therein shall be close fitted and all angles mitred. All cross-overs shall be properly bridged and securely fixed.

Prohibited Uses.

(i) Wood casing shall not be used for pressures exceeding 250 volts between conductors or for circuits carrying more than 50 amps. unless the previous sanction in writing of the authorized inspector has been obtained.

Mixed Systems Not Permitted.

(j) Sub-circuit wiring protected partly by conduit and partly by casing will not be permitted except in the case of circuits for water heaters and unbalanced stoves, in which cases the casing shall be terminated at a double-pole switch fixed adjacent to the appliance, and the wiring from switch to appliance protected by flexible conduit. The casing shall, in all cases, be fixed and terminated at a sufficient distance from the water heater or stove to avoid any risk of fire.

Special Casing.

(k) If the casing forms part of ornamental woodwork, ready access shall be provided to the cables contained therein.

E. Clauses (a) and (c) of regulation 71 of the principal Regulations shall be repealed and the following Regulations shall be enacted in their place:—

Temperature Rise.

(a) All contacts shall be so formed and all parts shall be so proportioned that when the maximum working current flows through them continuously their temperature

shall not rise above that of the surrounding air more than 36 deg. Fahr. (20 deg. Cent.) in the case of switches rated below 100 amps., or 54 deg. Fahr. (30 deg. Cent.) in the case of switches rated at or above 100 amps.

Rupturing Capacity.

(c) 1. Circuit breakers shall be capable of interrupting currents 100 per cent. in excess of the maximum currents they carry at a pressure of 10 per cent. in excess of the normal supply pressure.

2. Switches controlling wall sockets rated at less than 10 amps. shall be capable of interrupting at a pressure 10 per cent. in excess of the normal supply pressure direct currents in a non-inductive circuit 100 per cent. in excess of the maximum current to be supplied through the wall socket so controlled.

3. All switches other than those specified in the immediately preceding sub-clauses 1 and 2 shall be capable of interrupting at a pressure 10 per cent. in excess of the normal supply pressure direct currents in a non-inductive circuit 50 per cent. in excess of the currents they carry.

Mechanical and Rupturing Tests.

4. Switches other than circuit breakers shall be capable of withstanding a mechanical test of 2000 consecutive operations each consisting of closing and opening the switch and in addition of operating satisfactorily under the conditions laid down in the immediately preceding sub-clauses 2 and 3 100 consecutive times within a period of 10 minutes without the formation of a sustained arc, and without appreciable damage to the contacts.

F. Clauses (a), (b), (c), and (d) of regulation 75 of the principal Regulations shall be repealed and the following Regulations shall be enacted in their place:—

Carrying Capacity.

(a) 1. Any wall plug or socket to be used for a current of 10 amps. or more shall be capable of carrying continuously a current 50 per cent. in excess of that current without the temperature rise in any part exceeding 34 deg. Fahr. (20 deg. Cent.). Any wall plug or socket to be used for a current less than 10 amps. shall be capable of carrying continuously a current 100 per cent. in excess of that current under similar conditions.

Clearances.

2. The clearances shall be such that an arc cannot be maintained if the plug is withdrawn while carrying the overload current stated in the above preceding paragraph 1 in a non-inductive circuit at a pressure 50 per cent. in excess of the normal supply pressure. This test shall be carried out with direct current.

Arrangement of Contacts—Cord Grips.

(b) No wall plugs shall be used except such as are so arranged that no live metal is exposed to accidental contact, short circuit, or injury, and that the terminals are relieved from the direct pull of the flexible cord.

Construction—Where Fixed in Floor.

Only such wall plugs and sockets as are robustly constructed of non-absorbent incombustible material, and where used in damp places of watertight construction, shall be used. Where the socket is attached to a floor, it shall be fitted with a strong hinged incombustible close fitting cover, capable of withstanding rough usage in service, and so arranged that the cover will automatically close over the contacts when the plug is withdrawn. In addition, the arrangement of the socket shall be such that no dust or water can accumulate therein. No plug sockets other than sockets of an approved type conforming with the provisions of this regulation shall be fixed in a floor, but where power outlets away from walls are required, sockets may be fixed on supports projecting above the floor in such a manner that no portion of the socket or its controlling switch is less than 3 inches above floor level. Controlling switches mounted alongside floor plugs, if of the tumbler type, shall be so protected that they cannot be accidentally switched on in the process of sweeping and cleaning.

Switch Plugs.

(c) Where used on low pressures, provided the plug and socket are so arranged and constructed that the action of inserting the plug or removing the plug from the socket automatically, by means of a spring control or otherwise, makes or breaks the circuit with a definite and rapid action, or operates a switch in the active conductor, plugs and sockets, approved for this purpose may be used without the control switch specified in clause (d) of this regulation.

Control Switch—Contact Mats.

(d) Where used for medium and low pressures, except as specified in clause (c) of this regulation, every wall plug and socket shall be independently controlled by a fixed switch on the live side of the plug and adjacent to it. Where used for low pressures, a wall plug and socket combined with a switch shall be deemed to comply with this regulation. Where switches are used in portable heating appliances, at least one section of the heating element shall be controlled solely by the fixed switch on the live side of the socket or by the switch plug mentioned in clause (c) of this regulation. Portable appliances using pressures exceeding 250 volts shall be controlled by wall switches only. Woven contact mats and electric table cloths must be controlled from wall switches and have red pilot lamps or other approved indicators in circuit.

G. Regulation 96 of the Regulations made by Order in Council the 26th day of October, 1925, shall be repealed and the following regulation shall be made:—

Unsafe and Disused Cables, Fittings, &c.

96. (a) No person shall connect and no consumer shall permit to be or to remain connected to an installation supplied with electricity from supply mains, any cables, fittings, appliances, or accessories which are in an unsafe condition. The occupier of any premises shall cause to be completely disconnected from the supply mains all disused cables and fittings, and shall cause such disconnected cables and fittings to be dismantled entirely or to a sufficient extent to make it clear on a casual examination that they no longer form a portion of the electrical installation.

Repairs.

(b) Before any repairs or alterations are commenced the circuits which are to be handled shall be entirely disconnected from the source of supply.

H. Regulation 120 of the principal Regulations as amended by any subsequent regulation shall be amended by the insertion of the following additional definition after clause 27:—

27. (a) Supply main means an electric line of any Supply Authority.

3. Regulation for or with respect to prescribing the quality of materials and methods to be adopted in the installation of radio receiving equipment and similar apparatus operating from supply mains that is to say:—The following regulation shall be added after regulation 119 of the principal Regulations:—

119A. This regulation shall apply where relevant to all electro-acoustic reproducing apparatus and to rectifying appliances not exceeding 1200 volt amps. input rating, used for charging storage batteries and for similar purposes, and in addition paragraphs (a), (b), (f), (h), (i), (j) shall apply to radio transmitting equipment. The expression radio equipment where used in any part of this regulation means equipment or apparatus to which the relevant paragraph of the regulation applies. Any person who connects or permits to be connected to any supply main any radio equipment or similar apparatus shall be guilty of an offence against this regulation, unless the following conditions are complied with:—

Method of Connexion.

(a) Electricity from supply mains shall be conveyed to radio equipment only through permanent wiring or through a proper authorized outlet such as a power plug or lamp holder with an adaptor.

Flexible Connections.

(b) All flexible conductors used for connexion to the supply side of radio equipment shall be of circular type and of the quality specified in regulations 40, 41, 42, and 43 of the Wiring Regulations. They shall be taken directly on to suitably protected terminals on the appliance or connected thereto by means of a contact socket. In no case shall exposed live terminals or contacts directly connected to supply mains or energized to a pressure exceeding 100 volts, directly or indirectly from supply mains, be permitted.

Entry of Connections.

(c) The holes in metal frames through which flexible conductors enter shall be bushed by durable insulating bushes permanently fixed in position and cord grips or other approved means shall be provided to relieve the strain from the connecting terminals.

Protection of Terminals.

- (d) Where the maximum voltage at any terminals exceeds 100 volts such terminals shall be of the insulated pattern, and shall have the extreme voltage distinctly marked thereat. Such terminals, unless otherwise enclosed, shall be protected by a cover.

Switches.

- (e) All switches used on the supply connexions to radio equipment shall be of ample capacity for the current to be carried, and of suitable design for the supply voltage. Only switches of approved pattern shall be used for this purpose.

Transformers.

- (f) All transformers, including those in battery chargers, eliminators, &c., connected to lighting or power circuits shall have independent primary and secondary windings which shall not be connected with one another and shall have suitable high insulation between windings. Electricity from supply mains shall be utilized in radio equipment only by medium of transformers which comply with the requirements of this regulation.

Danger Notice.

- (g) All radio equipment which is operated by connexion to supply mains shall be provided with a suitably worded danger notice which shall be permanently fixed on the inside of the lid, door, or cover by which access is obtained to the interior of the equipment. This notice shall contain the heading "DANGER" in bold letters, and the words "This equipment operates at a dangerous electrical pressure. No adjustment to the interior apparatus is to be made unless disconnected from the supply mains."

Earthing.

- (h) In situations where contact with earth, conducting floors, or earthed metal is possible, exposed metal containing cases, covers, and frames, including transformer frames, shall be efficiently connected to earth through suitable terminals provided for that purpose. Such terminals shall be distinctly marked "Earth." Earthing conductors within 6 feet of the radio equipment shall be covered with insulation of not less than 600 megohm grade.

Earthing Conductors.

- (i) Permanent earthing conductors (exclusive of flexible earthing leads attached to portable sets) shall be of stranded copper and shall be not smaller than 7/029 inches (7/22 S.W.G.). They shall in all respects comply with the provisions of regulation 20 of the Wiring Regulations with respect to earthing.

Leading-in Wires.

- (j) Inside buildings the leading-in wires shall be covered with insulation of not less than 600 megohm grade. Both inside and outside of buildings, a distance of not less than 12 inches shall be maintained between leading-in wires and electric light or power wires, unless a continuous and firmly fixed non-conductor with a well maintained permanent separation separates them. This non-conductor shall be in addition to any insulation on the wire.

4. Regulations for or with respect to prescribing the quality of materials and methods of installing vacuum and inert-gas tube systems operating at pressures in excess of 650 volts, that is to say:—The following regulation shall be added after regulation 119A:—

119B. Any person installing a vacuum or inert-gas tube system operating at a pressure in excess of 650 volts, unless the system is to operate at high frequency, who fails to ensure that the following provisions are observed and fulfilled, shall be guilty of an offence against this regulation:—

Control.

- (a) A control switch entirely disconnecting the step-up transformer or transformers from the supply mains shall be fixed in an easily accessible position immediately adjacent to the transformer or transformers. This switch shall be marked "Sign Control Switch," and shall not be contained in the same case as the transformer or transformers.

Danger Notice.

- (b) A suitably worded danger notice, consisting of red lettering on a white ground, shall be fixed in a prominent position adjacent to the transformer and control switch. This notice shall have the word "DANGER," printed in bold letters as a heading, and shall contain a warning that the

system operates at a dangerous electrical pressure, and that no portion of the system is to be touched unless the system is disconnected from the supply mains by means of the control switch.

Transformers.

- (c) Transformers used to increase the electrical pressure for vacuum and gaseous tubes shall have independent primary and secondary windings with suitable high insulation between windings, which windings shall not be interconnected. The transformer secondary open circuit voltage shall not exceed 15,000 volts. Where the secondary open circuit voltage exceeds 7,500, the mid-point of the secondary winding shall be connected to earth. Exposed frames and cores of transformers shall be connected to earth. High voltage transformers of other than weather proof type and other high voltage equipment shall be installed in approved cabinets, unless placed within the enclosure provided for the complete assembly. Each transformer shall bear a name-plate showing the manufacturer's name and address, the primary rating in volts, amperes, and volt-amperes, and the secondary operating voltage and milliamperage.

Connexions.

- (d) The connexions to lamp tubes shall be made at approved connectors and all current carrying metal parts throughout the system shall be suitably insulated or otherwise protected against personal contact.

Conductors.

- (e) Conductors connecting transformers with lamp tubes shall be approved stranded high tension cables. Except where contained in a metal case enclosing the complete sign equipment they shall be enclosed in lead sheathing, class "B" conduit, or other approved metal ducts, which shall be efficiently connected to earth. Separate conduits shall be used for high tension circuits originating from separate transformers. Where it is not practicable to bunch the lead and return conductors of a high tension circuit in one conduit they may be enclosed in separate conduits. Alternatively, bare or insulated conductors may be supported on suitable insulators, maintaining a spacing of at least 4 inches between conductors of opposite polarity and 2 inches between conductors and all metal or earthed surfaces, and so enclosed or protected that accidental personal contact is not possible. Conductors not larger than 1/029 inches diameter (No. 22 S.W.G.) where bare shall be painted with weather proof dielectric paint. Where inert-gas tubes are used in conjunction with signs employing incandescent lamps the separate circuits shall be identified by permanent labels or other permanent markings.

Earthing.

- (f) Exposed frames and metal parts of all inert-gas tube signs and incidental apparatus, as well as metal sheathing and conduits enclosing conductors, shall be efficiently connected to earth.

Loading of Circuits.

- (g) Not more than one transformer shall be connected on any one sub-circuit, unless the combined load is less than 1,200 volt-amps. The number of transformers on any one sub-circuit shall not be more than 10 and sub-circuits shall not carry more than 5 amps. where more than one transformer is connected.

Mechanical Support.

- (h) Tubes shall be substantially supported at a sufficient distance from the sign face to ensure against arcing from the tube to any other portion of the sign, and so installed as to be free from contact with inflammable material, with the exception that rubber glands may be used where a weather-proof construction is desirable. Tubes shall not be unduly exposed to mechanical injury.

The common seal of the State Electricity Commission of Victoria was hereto affixed in the presence of—

(SEAL) F. W. CLEMENTS, Deputy Chairman.
THOMAS R. LYLE, Commissioner.
ROBERT GIBSON, Commissioner.

Real Estate Agents Acts (Nos. 3762 and 3933).

REGULATIONS.

At the Executive Council Chamber, Melbourne, the eleventh day of February, 1931.

PRESENT:

His Excellency the Lieutenant-Governor, as Deputy for His Excellency the Governor, of Victoria.

Mr. Lemmon
Mr. Webber

Mr. Pollard.

UNDER the powers in that behalf conferred by the Real Estate Agents Acts, the Lieutenant-Governor, as Deputy for the Governor, of the State of Victoria, by and with the advice of the Executive Council of the same, doth hereby make the following Regulations, such Regulations to be in substitution for all Regulations previously made under the provisions of the *Real Estate Agents Act 1928*.

1. These Regulations may be cited as the *Real Estate Agents Licensing Regulations 1931*.

2. In these Regulations, unless inconsistent with the context or subject-matter—

“Acts” means the Real Estate Agents Acts.

“Licence” means a licence under the said Acts.

“Prescribed” means prescribed by the Acts or these Regulations.

“Registrar” means the registrar appointed under the Acts.

3. An application for a licence or a transfer of a licence or for a certificate under sub-section (2) of section 4 of the *Real Estate Agents Act 1928* as amended by Act No. 3933 shall be made in the form or to the like effect of the one appropriate to the case contained in the First Schedule hereto.

4. The notice of every application for a licence or for the transfer of a licence required by the Acts to be posted by a Clerk of Petty Sessions in a conspicuous place inside and also outside of the Court building shall be in the form or to the effect of the one contained in the Second Schedule hereto.

5. A person desiring to object to the grant or transfer of a Real Estate Agent's Licence or to the grant of a Sub-agent's Licence shall lodge with the Clerk of Petty Sessions, at the Court where the application is to be heard, a notice in the form or to the effect of the one contained in the Third Schedule hereto.

6. The fidelity bond required to be lodged with an application for a Real Estate Agent's Licence or for the transfer of such a licence from one individual to another, or from one corporation to another, shall be in the form applicable to the case contained in the Fourth Schedule hereto.

7. The Clerk of Petty Sessions of the Court at which an application for a licence is granted shall, on payment of the prescribed fee, prepare and issue to the person entitled a licence in the form applicable to the case contained in the Fifth Schedule hereto.

8. In the case of the grant of an application for the transfer of a Real Estate Agent's Licence the Clerk of Petty Sessions, on payment of the prescribed fee, shall endorse the licence transferred with a memorandum in the form contained in the Sixth Schedule hereto.

9. Every duplicate licence ordered to be issued by a Court on the loss or destruction of the original shall, before issue, be endorsed by the Clerk of Petty Sessions issuing it, with the words “Duplicate of licence No. . . ., issued by Order of the Court of Petty Sessions at this . . . day of . . . 19 . . . Signed—Clerk of Petty Sessions.”

10. The Clerk of Petty Sessions at each Court shall forward to the Treasury, with his Revenue Statement of Collections, returns in the form or to the effect of those contained in the Seventh Schedule hereto of all issues, transfers, or cancellations of licences made during the time covered by the Revenue Statement which they accompany.

11. The record required to be kept in the Treasury of Real Estate Agents' Licences issued, transferred, or cancelled, and of Sub-agents' Licences issued or cancelled, shall be in the appropriate form contained in the Eighth Schedule hereto.

In the case of a licence issued to a person nominated by a corporation the issue of the licence shall be recorded under the name of the corporation concerned.

12. The certificate of exemption provided for in sub-section (2) of section 4 of the *Real Estate Agents Act 1928* as amended by Act No. 3933 shall be in the form or to the like effect of the one contained in the Ninth Schedule hereto.

13. The statement, in writing, provided for in section 20 of the *Real Estate Agents Act 1930*, containing particulars of the name and work or services of and the salary, wages, or commission paid each month to every person employed by a Real Estate Agent in connexion with his business shall be kept in the following form:—

Month of 19	Name of Employee.	Capacity in which Employed.	If Licensed as a Sub-Agent.	Remuneration Paid.	
				Salary or Wages.	Commissions.
				£ s. d.	£ s. d.

14. The authority in writing to be given by a licensed Real Estate Agent to a Sub-agent under section 31 of the *Real Estate Agents Act 1930* shall be in the form or to the like effect of the one contained in the Tenth Schedule hereto.

15. The holder of any authority referred to in the last preceding clause shall on demand produce it to the Registrar or to any member of the Police Force or to any person with whom he is transacting or attempting to transact any business as a sub-agent.

The Industrial and Provident Societies Act 1928.

REGULATIONS.

At the Executive Council Chamber, Melbourne, the
eleventh day of February, 1931.

PRESENT:

His Excellency the Lieutenant-Governor, as Deputy for
His Excellency the Governor, of Victoria.

Mr. Lemmon
Mr. Webber

Mr. Pollard.

IN pursuance of the powers and authorities conferred by the *Industrial and Provident Societies Act 1928*, and of every other power and authority enabling him in that behalf, His Excellency the Lieutenant-Governor, as Deputy for His Excellency the Governor, of Victoria, by and with the advice of the Executive Council thereof, doth make the Regulations following, that is to say:—

Applications to Register Societies or Amendments of Rules.

Section 5 (2), Form A.

1. Every application to register a society under the *Industrial and Provident Societies Act 1928* (in these Regulations termed "the Act") shall be in Form "A" subjoined to these Regulations, and shall be sent to the Registrar.

Section 10 (2).

2. An amendment of the rules of the society may be either—

- (a) a partial amendment, consisting of the addition of a new rule or rules, or part of a rule or rules, to the existing rules, or the substitution of a new rule or rules, or part of a rule or rules, for any of the existing rules, or any part thereof, or a rescission of any of the existing rules, or any part thereof, without any substitution therefor, or more than one or all of the foregoing;
- (b) a complete amendment, consisting of the substitution of an entire set of rules for the existing rules, and hearing at the beginning the words "All previous rules rescinded."

Forms B and C.

3. An application to register a partial amendment of rules must be made by the secretary of the society in Form B, and must be sent to the Registrar, accompanied by a statutory declaration in Form C, and by a printed copy of the existing rules marked to show where the alterations occur, and what they are, and by the following documents:—

- (a) If the partial amendment consists of the addition or substitution of a new rule or rules, three copies of such new rule or rules, each copy being marked "O" and signed by five members and the secretary.
- (b) If the partial amendment consists of the rescission of any of the rules without any substitution, three copies of the resolution for such rescission, each copy being marked "O" and signed by five members and the secretary.

Form D.

4. An application to register a complete amendment of rules must be made by the secretary of the society in Form D, and must be sent to the Registrar, accompanied by a statutory declaration in Form C and by a copy of the existing rules, and by three copies of the new rules, each of the latter copies being marked "P," and signed by five members and the secretary.

Cancelling and Suspension of Registration.

Section 9, Form E.

5. Acting Clerk of the Executive Council.

REGULATIONS UNDER SECTION 69, SUB-SECTION (5), OF THE FORESTS ACT 1928.

At the Executive Council Chamber Melbourne, the seventeenth day of February, 1931.

PRESENT:

His Excellency the Lieutenant-Governor, as Deputy for His Excellency the Governor, of Victoria.

Mr. Williams | Mr. Pollard.
Mr. Webber

PURSUANT to section 69, sub-section (5) of the *Forests Act 1928*, His Excellency the Lieutenant-Governor, as Deputy for His Excellency the Governor, of the State of Victoria, by and with the advice of the Executive Council thereof, doth hereby make the Regulations as set forth hereunder (that is to say):—

Regulations under section 69, sub-section (5), of the *Forests Act 1928* (No. 3685), whereby certain fires may be lighted subject to specified conditions:—

REGULATION 1.—FOR THE PURPOSES OF PREPARING MEALS AND FOR NO OTHER PURPOSE FIRES MAY BE LIGHTED.

(a) In specified places provided or allowed by the *Forests Commission of Victoria*, provided that the area within a radius of 10 feet of such fireplace be cleared of all inflammable material, and that the fire be properly extinguished before being left.

(b) On highways, roads, and recognized camping grounds, in properly constructed stoves or receptacles in which the fires will be restricted to the limits of the said stoves or receptacles, provided that the area within a radius of 10 feet of such stoves or receptacles be cleared of all inflammable material, and that the fire be properly extinguished before being left.

REGULATION 2.—BURNING OF STUBBLE OR GRASS.

Stubble or grass may be burnt only after sundown on a day when the temperature has not exceeded 90 degrees and provided that at the time of burning not more than a light breeze is prevailing, and only after a firebreak comprised of two ploughed strips each at least 4 feet in width and at least 10 feet apart with such intervening space cleared has been made round the said stubble or grass, and the provisions of the *Police Offences Act* have been fully complied with. Where stubble or grass is situated within 1 mile of any State forest, notice of intention to burn must either be forwarded in writing by registered post or by personal service to the nearest forest officer or police officer not less than 48 hours before the day on which it is intended to burn.

REGULATION 3.—BURNING OF FIREBREAKS IN GRASS LANDS.

(a) The *Forests Commission of Victoria* may grant to persons approved by it permits to burn firebreaks in grass lands. Such permits shall be in the form contained in Schedule A hereto, shall be issued by a forest officer, and shall authorize the holders thereof to burn such firebreaks between the hours of Three o'clock in the afternoon and Eleven o'clock in the forenoon of the day following, provided that at the time of burning the temperature does not exceed 90 deg. Fahr. and that not more than a light breeze is then prevailing. Provided further that no such fire shall be lighted until at least six men, equipped with approved fire-fighting appliances, under the control of a man experienced in burning firebreaks, are in attendance, and a strip of land at least 4 feet wide along either side of the proposed firebreak has been completely cleared of all vegetation and inflammable material and ploughed. Firebreaks shall be not more than 2 chains wide, inclusive of the ploughed area. All fires shall be properly extinguished before being left. Notice in writing of intention to burn shall, not less than 48 hours before the day on which it is intended to burn, be forwarded by registered post to, or be served personally upon the nearest forest officer, the officer in charge of the nearest police station, and the occupiers of all land contiguous to that on which the firebreak is intended to be burnt.

(b) Persons approved by the *Forests Commission* as being fit and proper to burn firebreaks in grass lands shall be issued with a certificate in the form contained in Schedule B hereto, which shall entitle the said person from time to time to apply to a forest officer for a permit as aforesaid.

Form No. 392. SCHEDULE A. No. Forest District.
SCHEDULE.

REGULATIONS FOR THE MANAGEMENT OF THE CLUNES UNITED BOROUGH AND GOLDFIELD COMMON.

IN pursuance of the Regulations relating to commons made by the Governor in Council on the 5th day of August, 1930, the Managers of the Clunes United Borough and Goldfield Common, having drafted the following Regulations for the management thereof, submit the same for revision by the Board of Land and Works, and approval by the Governor in Council in lieu of the Regulations heretofore in force in respect of such Common:—

REGULATIONS.

1. Ratepayers, holders of miners' rights, business licences, or carriers' licences, and farmers residing within five miles from the Common may respectively depasture thereon four (4) head of large cattle or the equivalent of the whole or portion thereof in small cattle, on the basis that one head of large cattle be deemed equivalent to three (3) head of small cattle.

A farmer having under cultivation not less than one-tenth portion of the land occupied by him may depasture on the Common one additional head of large cattle or the equivalent in small cattle for every ten (10) acres of such land cultivated by him.

2. No person shall depasture on the Common stock of which he is not the bona fide owner.

3. The Managers of the Common shall be at liberty to appoint certain times and places for registering and branding or renewing registration of such stock, and shall give due notice thereof, and the Managers or herdsman shall attend at such times and places for the purpose aforesaid.

Every person entitled to commonage shall, before depasturing any stock on the Common, give the herdsman thereof a true and correct description of such stock, and their brands or other distinctive marks, and having paid the prescribed commonage fees shall obtain from the herdsman the necessary number of badges and chains, which shall be at all times the absolute property of the Managers. Every such person shall then be responsible and liable to be charged for stock equivalent to the number of badges and chains from the time of receiving such badges and chains until they are returned to the herdsman.

No person shall use other than the authorized or registered badge and chain in connexion with stock legally depasturing on the Common.

In addition to the fee for depasturing such stock, the sum of One shilling shall be paid to the herdsman, at the time of registration, for the hire of each badge and chain, but should any person cease at any time to depasture stock on the Common, the amount paid for each badge and chain shall be refunded to such person, provided the badge and chain be returned to the herdsman in good order and condition.

Should any badge be from any cause removed or lost from any stock, every such badge so removed or lost shall be at once replaced by a new badge at the sole expense of the owner of the stock, and the sum of One shilling shall be paid to the herdsman for such extra badge, but no refund shall be made by the Managers for any badge removed or lost.

No person shall place, or allow to be placed, or remain, on any stock on the Common, a lost badge, or one removed from another animal, without the authority of the herdsman, and any stock wearing or carrying a lost badge, or one feloniously removed from another stock, shall be treated as illegally depasturing on the Common, and shall be liable to be impounded by the herdsman without notice to the owner.

4. The Managers shall be at liberty from time to time to call upon the owners of stock on the Common, by advertisement in any newspaper circulating in the district, to muster their stock at the appointed yards, for the purpose of registration, or to see that all the stock depasturing on the Common are duly registered and carrying the correct badges, and the herdsman shall give every assistance at every such mustering.

5. All fees as hereinafter set forth shall be paid on registration of stock, and unless the prescribed fees are paid for renewal of registration within seven days (7) from the due date, the unregistered stock remaining on the Common shall be liable to at once be impounded by the herdsman.

6. The financial year of the Common shall commence on the first day of June, in each year, and all registrations shall be made and fees paid within seven days from the said first of June.

No rebate or reduction shall be made in the fees for the registration of stock for a portion or portions of the said financial year.

7. The fees for depasturing stock on the Common shall be as follows, and shall be payable annually in advance of the first day of June in every year:—

For every calf; Two shillings and sixpence (2s. 6d.) per annum; for every horse, mare, gelding, colt, filly, ass, or mule, Thirty shillings (30s.) per annum; for every head of other large cattle, Five shillings (5s.) per annum; calves under the age of six (6) months the progeny of cows legally depasturing on the Common, free.

8. No bull, entire horse, or swine shall be allowed to depasture on the Common without the special permission, in writing, of the Managers, and all other swine found on the Common shall be liable to be impounded, and all geese thereon shall be liable to be destroyed.

9. All unregistered stock found on the Common, with or without badges, shall be liable to be forthwith impounded.

10. The licences to depasture stock on the Common and the badges shall not be transferable.

Substitution licences may, however, be granted in respect of stock placed on the Common in lieu of stock permanently removed therefrom, but only in cases in which the owner shall give notice in writing to the herdsman of such removal, as well as the full description and brands or marks of the new stock.

11. Whenever the Managers have reason to believe that any animal on the Common is affected with any contagious disease, the owner of such animal shall, within six (6) hours after receiving notice in writing to that effect from the Managers or herdsman, remove such animal from the Common, and in case of neglect or refusal to remove such animal, the Managers shall be at liberty to order its immediate destruction and burial (if necessary) at the expense of the owner thereof; and the Managers may be at liberty to refuse registration of any other stock of such owner until he shall have paid the expense so incurred.

No compensation shall be allowed for the destruction of any diseased animal.

12. No dead animal shall be allowed to remain on the Common, and if the carcass has not been removed after six (6) hours' notice has been given to the owner thereof, the Managers shall be at liberty to cause such carcass to be removed and buried (if necessary) at the expense of the owner thereof, and to refuse the registration of any other stock of such owner until the expense so incurred has been paid.

13. The Managers shall not be responsible for the safe custody of stock depasturing on the Common, or for the loss or damage sustained through neglect or mistake of the herdsman, or from any other cause whatever.

Every person offending against any of these Regulations for the management of the Clunes United Borough and Goldfield Common shall, on conviction before any justice, forfeit and pay a penalty not exceeding Twenty pounds (£20) for each offence.

Dated this tenth day of January, 1931, at Clunes.

ALFRED GOLDSWORTHY,
JAMES JORGENSEN,
ERNEST TALBOT,
EDWIN P. CARTER,
THOMAS H. NELSON, } Managers.

Approved by the Governor in Council,

PRIVATE ADVERTISEMENTS.

TOWN OF HAMILTON.

BUILDING BY-LAW No. 60.

A By-law of the Town of Hamilton, made under the provisions of the *Local Government Act 1928* and every other power it thereunto enabling, and numbered 60, for—

- (a) Regulating and restraining the erection and construction of buildings, erections, or hoardings, or of fences abutting upon or within ten feet of any street or road.
- (b) Requiring the pulling down and removal of buildings, erections, or hoardings, or of fences abutting upon or within ten feet of any street or road.
- (c) Authorizing the Council to pull down and remove buildings, erections, hoardings, and fences erected or constructed contrary to this By-law, or not pulled down or removed as required by or under this By-law, and to sell the materials and apply the proceeds in reimbursing the expenses of pulling down and removing such buildings, erections, hoardings, or fences, and in paying into the municipal fund any fees or penalties due by the owner thereof. For the purposes of this paragraph and paragraphs (a) and (b) hereof, "hoarding" means structure used for the exhibition of advertisements, and includes sky-signs.
- (d) Regulating and controlling all advertisements attached to, or fixed to, or painted on any hoardings, or on any building, or on any fence, rock, cliff, or tree.
- (e) Appointing fees which may be charged and received by the Council for any act done or to be done by any of its officers under this By-law, and for any permit or licence to be issued by the Council.
- (f) Regulating and restraining the removal and re-erection within the municipal district of wooden buildings.
- (g) Prescribing the minimum area and the minimum depth and width of frontage of the land upon which any dwelling house, or any shop, or any dwelling house and shop combined, may hereafter be erected.
- (h) Providing that every dwelling house hereafter erected shall have attached thereto, for the exclusive use of the occupiers thereof, a prescribed area of open land.
- (i) Prescribing the distance of buildings from boundaries.
- (j) Providing, with respect to buildings hereafter erected, for—
 1. Regulating or limiting the height of buildings.
 2. The ventilation and lighting of buildings.
 3. The minimum size of any dwelling rooms.
 4. The minimum area to be covered by any dwelling house or dwelling house and shop combined.
- (k) Requiring any work or thing to be executed or done, of such materials, within such time, or in such manner as may be directed or approved in any particular case by the Council, or any officer or person authorized in that behalf by the Council.
- (l) Carrying out of purposes provided for in the Thirteenth Schedule of the *Local Government Act 1928*.
- (m) Leaving any matter or thing to be done from time to time determined, applied, dispensed with, or regulated by the Council by resolution, or by any officer authorized in that behalf by the Council, either generally or for any class of cases, or in any particular case.
- (n) Repealing By-laws, Regulations, and Parts thereof respectively heretofore in force in the municipality inconsistent with or repugnant to this By-law.
- (o) Regulating the height, thickness, construction, and materials of the party walls of buildings adjoining each other, and of the external walls of buildings, and of chimneys, and the materials for and mode of enclosing same.
- (p) Exercising all, any, and every of the powers of the said Council under the *Local Government Act 1928*, and the Thirteenth Schedule thereto, or otherwise it enabling in connexion with the foregoing.

IN pursuance of the powers conferred by the *Local Government Act 1928* and every other power them thereunto enabling, the Mayor, Councillors, and Burgesses of the Town of Hamilton order as follows:—

REPEAL.

1. By-law number 55, made by the Council of the Borough of Hamilton on the thirteenth day of September, One thousand nine hundred and twenty-three, is hereby repealed, but this repeal shall not revive or give any force, or effect to any By-law or Regulation repealed by such By-law.
2. By-law number 37 of the Council of the Borough of Hamilton is hereby repealed.

OPERATION.

This By-law shall apply to and have operation throughout the whole of the municipal district of the Town of Hamilton.

DATE OF COMING INTO OPERATION.

This By-law shall come into operation and have effect immediately on publication in the *Victoria Government Gazette*.

PART I.

DEFINITIONS.

(1) In this By-law, unless repugnant to or inconsistent with the text or subject-matter—

"Alteration" means any change in the construction or plan of a building or erection, or any change in the purpose for which any building or erection, or any part thereof, shall be used.

"Approved" shall mean approved by the Council or (in cases where the Surveyor is authorized by the Council so to do) approved by the Surveyor.

"Building" means any structure capable of affording protection or shelter, either roofed or intended or adapted to be roofed, and whether enclosed by walls or not, and whether such structure be completed or in course of construction; but does not include any greenhouse, aviary, fence, or other similar building or erection.

"Bressummer" means a beam of reinforced concrete or a wrought-iron or steel girder which carries a wall.

"Builder" means the master builder or other person employed to execute any work, or, if there is no master builder or other person so employed, then the owner of the building or other person for whom or by whose orders such work is to be done.

"Building line" means a line beyond which property owners or others have no legal or vested right to extend a building or any part thereof without the consent of the Council.

"Cement concrete" means an approved mixture of high-grade Portland cement, clean sharp sand, and aggregates consisting of fragments or particles of hard stone or gravel thoroughly clean and entirely free from combustible matter and from volcanic scoriae, furnace slag, coke breeze, or any material containing any trace of sulphur.

"Concrete cased steel" means a form of construction in which the steel is designed to support or resist the whole of the loads and stresses of whatever kind arising in the structure, such steel being encased in and entirely covered with cement concrete as hereinafter provided, such concrete being designed as taking no part in the support of and resistance to the loads and stresses.

"Cross wall" means any internal wall (partitions excepted) not being less than two-thirds the thickness of the external or party walls, and in no case less than nine inches in thickness, built in connexion with any external or party wall and bonding them together.

"Council" means the Council of the Town of Hamilton.

"Cubical extent" applied to the measurement of a building means the space contained within the external surface of its walls, the upper surface of the floor of its lowest story, and the ceiling or tie of its topmost story.

"Dwelling house" means a building used or constructed or adapted to be used wholly or principally for human habitation.

"External wall" means an outer wall or vertical enclosure of any building not being a party wall.

"Factory" means a factory as defined in the *Factory and Shops Act 1928*, or any statutory amendment thereof.

"Fire resisting," used with reference to any materials, includes—

- (a) Brickwork constructed of good bricks, well burnt, hard and sound, properly bonded, and solidly put together with good lime or cement mortar, or terracotta lumber; and
- (b) any stone suitable for building purposes by reason of its solidity and durability; and
- (c) sheet metals when used for roof coverings; and
- (d) Iron and sheet and (when used for columns, girders, or wall framing) encased in cement concrete or other non-combustible or non-conducting external coating as hereinafter provided; and
- (e) slate, tiles, brick, and terra cotta when used for covering or corbels; and
- (f) Concrete composed of broken bricks, stone chippings or ballast, and lime cement or calcined gypsum.

"Foundation" applied to a wall means the solid ground thereunder or artificially formed support thereof.

"Frame-building construction" means the form of construction in which the design provides that the whole of the vertical forces due to the weight of the structure itself, the whole of its structural contents, and the whole of the added loads hereinafter stipulated are carried down to the foundations solely by means of columns (comprising wall

columns and, where requisite, interior columns) in such a manner that neither the external nor the internal walls, if any, are required to assist in supporting such loads.

"Frontage" means the boundary line of any street or road on which an allotment of land abuts, or to which any building faces or fronts.

"Height" in relation to any building means measurement taken from the level of the footway (if any), or, when there is no such footway, from the level of the ground immediately in front of the centre of the face of the building to the level of the top of the parapet, or, where there is no parapet, to the level of the top of the external wall or (in the case of a gable building) to the base of the gable.

"Lane" and "right-of-way" mean a street or road less than thirty-three feet wide.

"Level of ground" means the mean level of the ground as determined by the Surveyor.

"Main room" shall be deemed to mean and include all rooms used or intended or adapted to be used as bedrooms, dining-rooms, or ordinary living-rooms, including kitchens.

"New building" includes—

(a) Any building commenced after the date of this By-law coming into force.

(b) Any building which for more than one-third of its cubical extent has been taken down or destroyed by fire, tempest, or otherwise, and is re-erected or commenced to be re-erected wholly or partially on the same site after the date of this By-law coming into force.

(c) Any building or erection removed or transported wholly or in sections into the municipal district, or from one part of the municipal district to another part of the same after the date of this By-law coming into force.

(d) Any addition to or alteration of any building after the date of this By-law coming into force.

"Party wall" means a wall built to be used as a separation of two or more buildings or a wall forming part of a building built upon the dividing line between adjoining premises for their common use.

"Person" shall include a corporation.

"Prescribed" means prescribed by this By-law or by the Council or the Surveyor (as the case may be) pursuant to this By-law.

"Reinforced concrete" means a form of construction in which cement concrete is reinforced with steel, these materials being so combined that the steel will take up and resist substantially the whole of the tensional stresses, and assist in the resistance to shear, while the concrete will take up and resist substantially the whole of the compressional stresses and assist in resistance to shear.

"Surveyor" means the Engineer Building Surveyor or Acting Surveyor, or other officer for the time being authorized to discharge the duties of Engineer or Building Surveyor to the Town of Hamilton.

"Shop" means a building in which goods are regularly offered or exposed for sale or in which meals or refreshments are regularly offered or provided for payment, and also includes the saloons or shops of barbers and hairdressers, and offices of agents and auctioneers, and other businesses or trades. A bona fide private boardinghouse shall not be included in this definition by reason only to the fact that meals or refreshments are occasionally supplied for payment to persons other than boarders.

"Square" applied to the measurement for any area means the space of one hundred square feet.

"Street" or "road" means and includes "street" and "road" and "private road" and "private street" as respectively defined in the *Local Government Act 1928*, section 3.

For the purposes of this By-law, buildings shall be divided into three classes:—

Class A.—"Domestic class," which includes all buildings subject to small vibration and light loading of floors, such as residences, residential shops, offices, hotels, hospitals, private schools, club houses, and studios.

Class B.—"Warehouse class," which includes all buildings subject to vibration and heavy loading of floors, such as warehouse emporiums, factories, shops, public motor garages, mills, and places for the storage and manufacture of goods.

Class C.—"Public building class," which includes all buildings designed to accommodate an assemblage of people, such as theatres, churches, chapels, assembly halls, museums, libraries, and public schools, the large assembly rooms of hotels, offices exceeding 800 square feet in area, hospitals, and schools, and class rooms, but not the residential and office portion of such last-mentioned buildings.

Words importing the plural shall include the singular, and words importing the singular shall include the plural.

PART II.
SECTION I.

Minimum Area, Depth, Width of Frontage, Open Spaces.

It is hereby prescribed that the minimum area and the minimum depth and width of frontage of land upon which any dwelling house, or any shop, or any dwelling house and shop combined may hereafter be erected shall be as follows:—

1. *Dwelling Houses.*—Save as hereinafter provided, the minimum area of land upon which any dwelling house may hereafter be erected is 6,860 square feet, the minimum width of frontage of the said land is 49 feet, and the minimum depth of the said land is 140 feet.

Land may, however, be subdivided into allotments of a less depth than is hereinbefore mentioned, provided that the width of frontage is proportionately increased to give the required area.

2. Where land has been subdivided prior to the coming into operation of this By-law, and such subdivision has been approved by the Council, or where a Crown allotment is less in area than 6,860 square feet, the Council may grant permission for the erection of a dwelling house where the minimum area of land is 5,280 square feet, the minimum width of frontage of the land 44 feet, and the minimum depth of the land 120 feet. Provided, further, that where the frontage is greater than 44 feet the depth may be proportionately less, but so that the area is not less than 5,280 square feet.

3. *Shops and Dwelling Houses and Shops Combined.*—Save as hereinafter provided, the minimum area of land upon which any shop or dwelling house and shop combined may hereafter be erected is as follows:—For a shop 1,188 square feet, and for a shop and dwelling house combined 1,584 square feet: the minimum width of frontage of the said land to some street or road is, for a shop, 12 feet, and for a shop and dwelling house combined, 16 feet, and the minimum depth of the said land is 99 feet.

4. *Open Spaces.*—Every dwelling house hereafter erected shall have attached thereto for the exclusive use of the occupiers thereof an area of land not less than 3,430 square feet. Nor shall any addition or alteration be made to any dwelling house hereafter erected that would reduce such open space to a less area than 3,430 square feet. Verandahs and outbuildings shall in the calculation of space be included as part of the dwelling house to which they belong.

5. For the purposes of this part of this By-law, the width of frontage shall be measured by taking the shortest distance between the terminal posts of the sides of the land where such sides meet the line of the street, and the depth shall be measured at right angles to the middle point of the frontage.

SECTION II.

Minimum Area to be Covered by any Dwelling House.

1. *Dwelling House.*—Every building hereafter erected or constructed upon any land within the municipal district that is used or intended or adapted to be used as a dwelling house shall cover on the ground floor not less than 200 square feet in superficial area.

2. *Ascertainment of Area.*—In the ascertainment of area covered, the area of the verandah forming part of the main building, but not exceeding 100 square feet in area, and the thickness of the external walls will be allowed as part of the area covered, but no detached outbuilding or verandah area in excess of 100 square feet shall be included.

SECTION III.

General.

1. Where a dwelling house in existence at the time of this By-law coming into operation is wholly or partly destroyed by fire, or where the owner desires to replace such dwelling house or part thereof existing at the time of this By-law coming into operation, a dwelling house may be erected, or such dwelling house may be replaced or restored notwithstanding that the land has not the frontage depth or area referred to in the preceding clauses of this By-law.

2. Save as in this By-law otherwise provided, the dwelling house and other buildings to be erected, built, and constructed upon any site and curtilage shall not cover more than one-half of the superficial area of such site or curtilage.

3. *Shops and Public Buildings.*—No person shall, outside the area described in Schedule II, to this By-law, build or cause or permit to be built any building intended or adapted for use as a shop, residential, or otherwise, or any building of the class described in Class B or Class C of this By-law, or any addition to any such building within 15 feet from the building line of any street or road, or within 8 feet of any side street or road, or within 4 feet of any right-of-way or land not in the same occupation in the case of single-story building, or within 6 feet of any right-of-way or land not in the same occupation in the case of two-story buildings, unless the external walls of such buildings or additions are of brick, stone, or concrete.

4. *Attached Buildings.*—Two, but not more, dwelling houses may be erected together in one block having a frontage of 49 feet by a depth of 140 feet, provided they shall be separated

from each other by a wall of concrete or of brick or stone at least 9 inches in thickness, projecting, in the case of wooden houses, at least 1 inch through the woodwork front and back, and in all cases projecting 2 ft. 6 in. at least through the roof covering or gutter adjoining the same, whether belonging to the same owner or not. Each dwelling house in a block shall be subject to the provisions of the By-law relating to buildings of its class. But the site or curtilage of such buildings shall have a superficial area of at least 6,860 square feet and a frontage of at least 49 lineal feet to a street or road, and a depth of at least 140 feet, or, where the depth is less than 140 feet, the frontage shall be larger proportionately to give the required area.

PART III.

SPECIAL.

Brick Area.

1. *Construction of External Walls.*—No building shall be built or erected on land fronting or abutting on or within 100 feet of any of the portion or portions of Gray, Thompson, and Brown streets set out in the Second Schedule to this By-law, or within or in the area set out in the said Second Schedule, unless such building is enclosed by walls of brick or stone laid in mortar or concrete or other approved hard and incombustible material, and unless all external walls are constructed of brick or stone laid in mortar or concrete or other approved hard and incombustible material.

2. The foregoing restrictions shall, however, not apply to outbuildings, stables, and private motor garages, or additions or alterations to existing wooden buildings. But such buildings or alterations shall be otherwise constructed or erected in compliance with this By-law.

3. Every such wall shall be properly bonded and put together with mortar.

4. Outside the area of land specified in the Second Schedule hereto, all workrooms, workshops, hay and/or chaff, and/or produce stores, and blacksmith shops, and wheelwright shops, anything to the contrary notwithstanding, shall be built of substantial wood or iron framing covered with galvanized iron, or of brick, stone, or concrete.

5. Nothing, however, hereinbefore in this part contained shall preclude the continuance of the use of any land or any building for any purpose for which the same was used immediately before the coming into operation of this By-law, or the enlargement, rebuilding, or extension of any building used for any such purpose, whether or not such enlargement, rebuilding, or extension involve the use of adjoining land which immediately before the coming into operation of this By-law was in the same ownership, or for such other purposes as the Council thinks reasonable in the circumstances.

PART IV.

NOTICE OF INTENTION TO BUILD OR DEMOLISH AND LODGMENT OF PLANS.

1. Six (6) days at least before the commencement of any building, erection, or structure, or any addition to or alteration of any existing building, or the reinstatement of any building after being partially destroyed by fire or by any other cause, the builder shall—

(a) *Notice.*—Deliver at the office of the Surveyor a written notice of intention to build, or add to, or alter any existing building, or to reinstate any building (as the case may be).

(b) *Plans and Specifications.*—Submit to the Surveyor for his approval properly prepared plans and specifications of such buildings, erection, structure, addition, alteration, or reinstatement, and also a block plan, drawn in ink to scale, showing the boundaries and dimensions of the allotment of land, and clearly indicating whether such allotment of land is at the intersection of two streets or not, also the position and dimensions of the proposed building, erection, structure, addition, alteration, or reinstatement, and the position and distance of such building in relation to such boundaries, and to any other existing buildings on the same or on adjoining allotments.

(c) *Copy of Plans.*—Furnish the Surveyor with a tracing or copy of all plans, with full details of sizes, dimensions, and qualities of all materials intended to be used, and also enumerating any old materials proposed to be used in the construction of such building, erection, structure, addition, alteration, or reinstatement.

(d) Deliver to the Surveyor a statement, in writing, of the purpose for which such building, erection, structure, addition, alteration, or reinstatement is intended to be used.

(e) Deliver such further particulars, in writing, as shall be necessary and required to enable the Council or its Surveyor to determine if all the provisions of this By-law applicable thereto are being complied with.

2. All plans and specifications approved by the Council shall be kept at the building, or erection, or structure therein referred to, and shall be available for inspection by the Surveyor or the accredited officer of the Council at all reasonable times on demand during the construction, or erection, or alteration, or addition, or reinstatement, as the case may be, and for fourteen days after the completion thereof.

3. *Originals to be Returned.*—The original plan and specifications, when approved and signed by the Surveyor, will be returned to the builder or his agent, but the tracing or copy of the plans detail of materials and block plan will be retained by the Surveyor on behalf of the Council.

4. *Plans not to be Varied.*—No variation or alteration from the plan and specification which has been approved by the Surveyor shall be made by the builder without the consent, in writing, of the Surveyor having first been obtained.

5. *Demolition of Buildings.*—When a building is about to be demolished or removed, the owner or contractor shall give to the Surveyor 24 hours' notice, in writing, of such intended demolition or removal.

6. *Method of Demolition.*—In carrying out the work of demolition, story after story shall be completely removed. No material shall be placed upon the floors of such building whilst in course of demolition, but the bricks, timbers, and other structural parts of each story shall be lowered to the ground immediately on displacement, and removed, unless special exemption, in writing, from this condition is granted by the Surveyor.

7. *External Walls.*—No portion of any external wall abutting on any street or road shall be pulled down or demolished except with the written consent of the Surveyor.

8. *Nuisance to be Avoided.*—During the demolition of any brick or masonry walls or other works the materials shall be kept well sprayed with water to prevent any nuisance from dust, or falling debris.

(2) PAYMENT OF FEES AND PERMIT.

9. No builder or other person shall commence to erect, build, or construct any new building, erection, or structure, or alter, add to, reinstate, or demolish and pull down any existing building, erection, or structure without having first obtained from the Surveyor permission, in writing, to commence such work, and without having first paid to the proper officer of the Council the fees in respect thereof as set forth in the First Schedule hereto, having regard to the class of building, erection, structure, addition, alteration, reinstatement, or demolition to be carried out. Such permission shall only remain in force and have effect for twelve calendar months from the date on which such permission was granted, unless extended by resolution of the Council, or unless the works covered by such permission have been duly completed.

10. The Surveyor may at any time, and from time to time, stop the progress of any building and withdraw or suspend any permission given by the Council under this By-law in the event of his not being satisfied that all the provisions of this By-law are being complied with, and on such withdrawal or suspension any person who continues, or builds, or erects, or works on the site after notice from the Surveyor to desist shall be guilty of an offence against this By-law.

11. The Surveyor shall have power to condemn and to order the removal of, or to remove, at the expense of the builder or owner thereof, any material which is not suitable for the use or for the purpose for which it is intended to use the same, and no person shall use any material so condemned for any such building, erection, alteration, addition, or reinstatement.

(3) DUTIES OF SURVEYOR.

12. *Surveyor to Cause By-law to be Observed.*—The Surveyor shall, upon receipt of any such notice as aforesaid, and also upon any work being observed by or made known to him which is affected by the provisions of this By-law, but in respect of which no notice has been given, and also from time to time during the progress of any work affected by such provisions, as often as may be necessary for securing the due observance of such provisions, inspect any such building, erection, structure, or work, and cause all such provisions to be duly observed.

13. *Power to Enter and Inspect.*—The Surveyor or the building inspector, at all reasonable times during the progress, and during the thirty days next after the completion of any building, erection, structure, or work affected by any of the provisions of this By-law, or by any terms or conditions on which the observance of any such provisions may have been dispensed with, may enter and inspect such building, structure, or work.

14. *General Power of Entry.*—The Surveyor, for the purpose of ascertaining whether any building, structure, or erection is in such a situation or possesses such characteristics as are required in order to exempt it from the operations of any of the provisions of this By-law, may at all reasonable times and after reasonable notice enter any premises, and he may do therein all such things as are reasonably necessary for that purpose.

PART V.

GENERAL PROVISIONS AS TO BUILDINGS.

1. *Exemptions.*—The following buildings shall be exempt from the provisions of this By-law:—

- (a) All Government, railway, and municipal buildings.
- (b) Temporary offices and sheds used by builders on or about the site of any building being erected, repaired, altered, or reinstated, or used by contractors in carrying out works for any public body or corporation and used exclusively for the purpose of such building or work. Such exemptions shall, however, only continue during the time occupied in completing such building or work, and in any case shall not exceed a period of twelve months, except by special permission of the Council.
- (c) Any building the plans of which were passed by the Surveyor prior to the date of this By-law coming into force, provided that such building is completed within six calendar months from the date on which the plans were passed by the Surveyor, or such further time as may be allowed in writing by the Surveyor.

2. *Distance from Boundary.*—Wherever in this By-law any distance from a boundary is provided for, such distance shall be measured horizontally from the boundary to the line of the outer edge of the overhanging eaves or to the outer edge of any verandah, whichever is nearer the boundary, and in every case to the point of greatest projection of the building.

3. *Old Buildings in Contravention of By-law.*—No building in existence prior to the date of this By-law coming into force shall be altered or added to in such a way as to contravene the provisions of this By-law.

4. *New Classes of Materials.*—The Council may permit the use of any new materials or methods of construction which may be approved by the Surveyor as being equal to or superior to those provided for in this By-law.

5. *Efficient Drainage of Site.*—No building to be used or that is adapted to be used as a dwelling-house shall be built or erected upon any land liable to be flooded or inundated by water from any watercourse, nor upon any land the surface of which does not admit of being efficiently drained at all times by gravitation into some adjoining street, lane, right-of-way, or channel, and, where necessary, the ground under any building shall be filled to the satisfaction of the Surveyor with suitable material to prevent the lodgment of water.

6. *Drains.*—Drains shall be provided at all new buildings to the satisfaction of the Surveyor for the interception and collection of storm water and surface drainage from the site or curtilage of such building and of water discharged from roofs, and for its conveyance to the nearest street, lane, or drainage easement on to or through or over which such drainage may lawfully be discharged.

The position of such drains and the material of which they are to be constructed shall be shown on the block plan to be lodged with the Surveyor under the provisions of this By-law.

7. *Dampness of Site.*—Where the Surveyor considers it necessary, he may direct that the ground surface of the site of any building shall be properly asphalted or covered with a layer of cement concrete not less than four inches in thickness, or covered with some other approved damp-resisting material.

The floors and walls of all basements and cellars shall be rendered impervious to moisture by such means as may be approved of by the Surveyor.

8. *Subsoil Drainage.*—Where the Surveyor considers it necessary owing to the dampness of the site of any new building, he may direct that the subsoil shall be drained by means of suitable earthenware field pipes properly laid to an approved outfall. The water from such drains shall be disposed of by pumping or by such other effective means as may be approved of by the Surveyor.

9. *Prohibited Sites.*—No building shall be erected on or adjoining to any land impregnated or contaminated with faecal, animal, or vegetable matter or other refuse until the same has been removed or rendered innocuous to the satisfaction of the Council's medical officer of health.

PART VI.

(1) DISTANCE OF BUILDINGS FROM BOUNDARIES.

1. *Dwelling Houses.*—No person shall erect or construct, or cause to be erected or constructed, any building that is intended or adapted to be used as a dwelling house only, or make any addition or alteration to any existing dwelling house, or to any other building, so as to adapt it to be used as a dwelling house, unless such building, or erection, or addition, or alteration—

- (a) shall be detached from any other building occupied by any person other than the person for whom such building is erected;
- (b) shall be distant not less than fifteen feet from the building line of any street or road;

(c) shall be distant not less than four feet from the side and rear boundaries of the land on which the same stands, or is erected, or constructed, or added to as aforesaid, or intended to be so erected, or constructed, or added to, or from the boundary of land not in the possession or occupation of the same person as that for whom such building is being so erected, constructed, or added to.

2. *Shops or Dwelling and Shops Combined.*—Shops or combined dwelling houses and shops may be built up to the building line of the street or road, and up to the side boundaries on which they stand, provided—

- (a) that such buildings are otherwise in conformity with the provisions of this By-law;
- (b) that the roof of such buildings is covered with fire-resisting material;
- (c) that such buildings are sufficiently lighted and ventilated to the satisfaction of the Surveyor.

3. *Space to be provided at the sides of Wooden Buildings.*—Except as hereinafter provided, no building with an external wall of wood which is intended to be used or which shall be used as a dwelling house, and no addition with an external wall of wood to any building which is intended to be used, or which is adapted to, or shall be used as dwelling house shall be built, constructed, or erected—

- (a) within a distance of eight feet measured horizontally of any lane or right-of-way at the side of any such building; or
- (b) within a distance of four feet measured horizontally of land not in the same possession or occupation; or
- (c) within a distance of eight feet measured horizontally of another building or erection with an external wall of wood. Provided always that any such building or addition may abut on the building line of any lane or right-of-way at the side of such building, or be less than the prescribed distance therefrom or from a building or erection with an external wall of wood, provided that the wall or walls which abut on or face within the prescribed distance such lane or right-of-way, or land, or building, or erection, as the case may be, shall be of concrete at least four inches and one-half of an inch in thickness, or of brick or stone at least nine inches in thickness projecting in all cases at least one inch beyond the woodwork front and back, and at least one foot through the roof covering or gutter adjoining the same.

4. Where, however, any such building is erected, or constructed, or added to as aforesaid on any land situated at the corner of any two streets, the distance of such building from the building line of one of such streets may be fifteen feet from the front facing one such street, and on the side facing the other such street eight feet.

OUTBUILDINGS.

1. Outbuildings (except stables, fowlhouses, and cowsheds) of not more than two squares in area, and not exceeding nine feet in height, may be erected on any boundary, provided—

- (a) That any such outbuilding is fifty feet distant from the frontage of any road or street.
- (b) That any such outbuilding is twenty-five feet distant from the frontage of any side road or street.
- (c) That any such outbuilding is ten feet distant from any building used as a dwelling house on the same allotment or on any allotment adjoining.

2. Outbuildings exceeding two squares in area or nine feet in height, including roof structures or erections, for storage of timber or other materials may be erected, provided—

- (a) That any such outbuilding complies with all the conditions and limitations of this By-law.
- (b) That any such outbuilding complied with the requirements in regard to outbuildings set forth in the preceding clause 1.

3. Stables, fowlhouses, and cowsheds may be erected, provided—

- (a) That any such stable, fowlhouse, or cowshed is one hundred feet distant from the frontage of any road or street; and
- (b) That such stable, fowlhouse, or cowshed is twenty-five feet distant from the frontage of any side road or street.
- (c) That such stable, fowlhouse, or cowshed is twenty-five feet distant from any building used as a dwelling house on the same allotment or on any allotment adjoining.
- (d) That such stable, fowlhouse, or cowshed is five feet distant from land not in the same occupation, or, if less than five feet distant from land not in the same occupation, is built with a nine-inch brick dividing wall having a parapet twelve inches high above its own roof or gutters.
- (e) That manure pits are suitably covered to the satisfaction of the Surveyor and comply with the foregoing conditions as to stables, fowl houses, and cow sheds.

4. No wooden outbuildings or stable may be extended in such a way that such outbuilding and a dwelling shall be within ten feet of each other or such stable and a dwelling shall be within twenty feet of each other, but this provision shall not prevent the owner of a building or dwelling on land adjoining that on which such outbuilding or stable has previously been erected from extending such building or dwelling subject to the provisions of this By-law.

5. Motor garages of single story may be built in wood, iron, stone, or concrete on the boundaries of adjoining occupations, provided:—

- (a) That any such motor garage is at least fifty feet distant from the frontage of any road or street.
- (b) That any such motor garage is at least twenty-five feet distant from the frontage of any side road or street.
- (c) That the floor area does not exceed three squares.
- (d) That a parapet wall of brick, stone, or concrete shall be erected on the boundary.

6. Motor garages with a floor area exceeding three squares may be built in wood, iron, brick, stone, or concrete anywhere in the municipal district, provided that they comply with clauses (a), (b), and, where erected on a boundary, (d) of the preceding clause and the conditions and limitations of this By-law in regard to buildings.

PART VII.

MATERIALS, CONSTRUCTIONS, ETC.

(1) *Materials.*

1. Bricks used in any building shall be good, hard, and well burnt. When old bricks are used in any wall they shall be thoroughly cleaned before being so used, and shall be whole and good, hard, well-burnt bricks.

2. Sand used for mortar in any building shall be clean and sharp, free from loam, dirt, and salt or organic matter.

3. Lime mortar shall be composed of freshly-burnt lime and sand in the proportions of at least one part by measure of lime and not more than three parts by measure of sand.

All lime intended to be used for mortar shall be thoroughly burnt, of good quality, and be properly slacked before being mixed with the sand.

4. Cement mortar shall be composed of good Portland cement or other cement of equal quality approved of by the Surveyor, mixed with clean sharp sand in the proportions of at least one part by measure of cement and not more than four parts by measure of sand.

5. Concrete for foundations and concrete blocks shall be composed of clean broken stone or other hard material approved by the Surveyor, broken to a gauge not exceeding two inches, and sand well mixed on a wooden floor with freshly burnt lime, hydraulic lime, or cement in the proportions of one part by measure of lime to not more than five parts, or one part of cement to not more than six parts of the other material.

6. All timbers and wooden beams used in any building shall be good, sound material, free from rot, large or loose knots, shakes, or any other imperfections whereby the strength may be impaired, and shall be of such sizes, dimensions, and spacings as set forth in Schedule III. to this By-law.

7. Roofs shall be covered with tiles, slates, metal, or other materials approved by the Surveyor.

8. In the construction of all wooden buildings except sheds, vermin plate shall be used.

9. Stucco or rough-cast work will not be allowed in walls and gables unless such walls and gables are first covered with waterproof materials and expanded metal to the satisfaction of the Surveyor.

10. Stucco or rough-cast work will not be allowed below the window sill line on timber buildings and the base course in buildings other than timber.

11. The interior of all walls and ceilings of every building which is intended to be used, or shall or may be used, as a dwelling-house shall be finished in plaster, wood, or other approved material.

(2) *Excavations—Foundations and Footings.*

1. All excavations for footings of buildings other than wood shall be taken down to a solid bottom to be approved by the Surveyor, but not less than the average of eighteen inches in depth below the natural surface of the ground, except in the case of construction of footing approved by the Surveyor; and no footing or foundation shall, except with the written consent of the Surveyor, be of less width than eight inches wider than the wall standing thereon. Should the excavation for foundation finish on a clay bottom the excavated trenches shall be covered with a layer of three inches of approved sand before the concrete is put in. No footing or foundation shall be commenced to be placed in position until at least twenty-four hours' notice, in writing, shall have been given to the Surveyor that the trenches are ready for inspection and have been inspected and approved of by him. If the trenches, in the opinion of the Surveyor, are not ready and additional inspections become necessary, such fees as set out in Schedule I. shall be paid for each additional inspection.

2. The surface of the ground between all walls of buildings shall be levelled up higher than the finished surface outside and evenly graded to prevent any accumulation of water or drainage beneath the floors.

3. Every pier and story-post, as well as every external wall and every party wall, shall have footings.

4. Every building must have a footing which by itself or with a foundation is at least twenty-one inches in height.

5. In the case of wooden buildings where wooden stumps are used for the foundations, such stumps shall consist of red gum or jarrah, and be not less than four inches by four inches, spaced not more than four feet apart, sunk not less than eighteen inches below the natural surface of the ground, and shall rest on sole plates of a size and upon a bottom approved by the Surveyor.

(3) *Thickness of External and Party Walls for all Brick, Stone, or Concrete Buildings.*

1. The external and party wall of buildings of the domestic and warehouse classes respectively shall not be built, if in lime mortar, of less thickness than as set forth in Schedule IV. to this By-law for their several grades, which grades are determined according to the heights and lengths of such external and party walls, such lengths being measured from the centre of one return wall to another or from the centre of a return wall to a cross wall.

2. No cellar wall shall be less than nine inches in thickness; but where a cellar is, in the opinion of the Surveyor, too great in length for such thickness it shall be increased up to eighteen inches or be strengthened by piers.

3. When the piers between the openings in any wall are less in area than one-third of the area of such wall if there were no openings the piers shall be increased in thickness to an extent determined by the Surveyor, or the piers built in cement mortar, in which latter case the area of the piers need not exceed one-fourth of such area of the wall. This provision shall not apply to shop fronts or show windows approved by the Surveyor.

4. Where piers are specified for any story of a wall, that story shall be strengthened by building piers projecting four and a half inches, such piers shall not be spaced further apart than twelve times the thickness of the wall, and in no case more than twelve feet apart, and shall not be less in width than one-fourth of their distance apart.

5. In the domestic and warehouse classes of buildings no story shall be of greater height from floor to lowest part of ceiling or from floor to roof-plate than fourteen feet, except with the permission of the Surveyor.

6. Where it is not desired to have projecting piers the wall may be built flush if built four and a half inches thicker than specified in Schedule IV. to this By-law without altering the rating of the stories below it.

7. In the case of a party wall, any projecting piers required by Schedule IV. to this By-law shall be built on both sides of the wall, or the whole wall shall be built four and a half inches thicker than specified in the tables in the said Schedule IV. appropriate to the class of building to which it belongs. In either case the wall shall be built central on the wall below.

8. If walls are built of cement mortar instead of lime mortar they may be of thickness one grade lower than those set forth in Schedule IV. to this By-law.

9. Where it is desired to alter or raise or increase the size of an old building, if the walls are, in the opinion of the Surveyor, sound and well consolidated for the purpose and are approved by the Surveyor and the new work is to be built in cement mortar, the Surveyor shall have power to treat the whole building as if built in cement mortar and approve of walls of thickness one grade lower than those given in Schedule IV. to this By-law.

10. When any building is raised in accordance with the last preceding clause, a steel bond shall be built in on top of the old wall, such bond to be three-sixteenths of an inch in thickness and hooked together at all intersections, the width to be equal to one and a half inches for every four and a half inches in thickness of the wall built upon it if so directed by the Surveyor.

11. In buildings within Class "C" of several stories the external or surrounding walls shall not be of less thickness than those specified in Table "B" in Schedule IV. to this By-law for similar heights and lengths, and if the span of the floor girders or roof girders or trusses exceeds thirty feet pieces of an extra thickness of at least four and a half inches shall be provided in number and width to the satisfaction of the Surveyor.

12. In buildings within Class "C":—

(a) Where the ceilings or roofs are carried on trusses or girders or otherwise, the thickness of the surrounding walls shall not be less than those specified in Table "C" in Schedule IV. of this By-law.

(b) Where the length of the wall exceeds one hundred feet, or in case there shall be one or more stories built above such hall, theatre, or like building, the thickness of the wall shall be increased four and a half inches and the wall must be strengthened by piers or buttresses to the satisfaction of the Surveyor.

(c) Where solid masonry or brick in cement buttresses are employed and placed sixteen feet or less apart and extended to the foot of the trusses or girders above, or if iron or steel pillars are inserted in the walls in lieu of masonry and at distances not exceeding eighteen feet apart, the thickness may be reduced in proportion to the increase of strength afforded by such buttresses or pillars, but in no case shall any wall be less than thirteen and a half inches thick in the topmost portion, and four and a half inches shall be added going downwards for each story or for each gallery or for each twenty-five feet in height of wall. Where iron or steel pillars are introduced in such walls the brickwork round the pillar shall be bonded into that of the connecting wall, and each of such pillars shall have not less than 9 inches of brick wall around its extreme dimension.

(d) In the case of buildings divided into naves and aisles by walls, of which the upper portions are external and the lower portions internal and pierced by arched openings carried on piers or columns, the thickness of the nave walls shall not be less than that specified in Table "C" in Schedule IV. to this By-law for external and surrounding walls of similar heights, lengths, and spans; and the external walls of the aisles shall be of the same thickness unless strengthened by buttresses or piers to the satisfaction of the Surveyor, in which case the walls may be four and a half inches less in thickness.

13. Where a wall is built in cement mortar or with projecting piers, the height may be one-fifth greater than shown in Schedule IV. to this By-law.

14. Where it is proposed to convert or alter any building erected for a purpose other than a public purpose into a public building, such conversion or alteration shall be carried into effect in such manner as may be approved by the Surveyor, and the provisions of this By-law shall apply to the public buildings thereby formed.

15. Except where otherwise provided in this By-law, all external party and cross walls shall be constructed of brick, masonry, or concrete, and shall be subject to all the provisions of this By-law.

16. Where a cross wall becomes in any part an external wall such cross wall shall be of the thickness required for an external wall of the same height and length and belonging to the same class of building.

17. No building of the warehouse class shall extend to more than four hundred and fifty thousand cubic feet unless divided by party walls or floors of fire-resisting construction in such manner that no division thereof extends to more than four hundred thousand cubic feet.

18. No addition shall be made to any building of the warehouse class or to any division thereof so that the cubical content of any such building or division shall exceed four hundred thousand cubic feet unless the whole construction thereof is of fireproof material and the thickness of the walls is of the extra first rating.

19. All buildings of more than two stories must be provided with sufficient staircases made fireproof to the satisfaction of the Surveyor.

PART VIII.

CONSTRUCTION OF BUILDINGS.

Unless where otherwise sanctioned in this By-law, all buildings and structures shall comply with the following conditions:—

(1) Walls.

1. Every external party and cross wall constructed of brick, stone, concrete or reinforced concrete, or other similar material approved of by the Surveyor shall be properly bonded and solidly put together with mortar, and shall contain not less than two rows of hoop iron or other approved bond.

2. In the case of walls that are built as hollow walls the same quantity of stone, brick, or concrete shall be used in their construction as is provided in this By-law for solid wall, and no hollow walls shall be built unless the parts of the same are connected by proper ties, either of brick, stone, or iron, placed not more than three feet apart in every fourth course. No hollow wall shall be greater in superficial extent than two squares in any one story unless strengthened by a cross wall, fireplace, or projecting pier in each such area and to the satisfaction of the Surveyor.

3. All hollow walls shall be bonded longitudinally by the laying of hoop iron or other approved reinforcing material one strand to each half brick in thickness of wall. The strands shall be laid for the full length of the wall and turned up and down at ends and openings interlaced at angles. The cavity separating the inner and outer parts of a hollow wall shall in no case be of a width greater than two and a half inches nor less than one and a half inches.

4. Hollow concrete blocks may be used for the construction of walls of buildings of one story provided that such walls are not required by these Regulations to exceed nine inches in thickness.

The thickness of the concrete at face and back of such blocks shall be not less than two and a half inches with four-inch cavity between, and the thickness of the cross ties shall not be less than two inches for the full height of the block. Ties shall be placed not more than fifteen inches apart. Blocks requiring to be built up of sections shall be rebated, dove-tailed, or tongued together to the satisfaction of the Surveyor.

Concrete blocks shall not be used green, and unless special permission is obtained no block shall be used within fourteen days from the date of construction. The blocks shall be bedded and jointed in cement mortar. Joists and beams shall not be let into hollow concrete walls.

5. In buildings of the warehouse class the thickness of such parapet shall be equal to the thickness of such wall in the topmost story, and in any other building of a thickness of eight and a half inches at the least.

6. Every party wall shall be carried up for a height of fifteen inches above the roof measured at right angles to the slope thereof, or fifteen inches above the highest part of any flat or gutter, as the case may be, and of a thickness (in buildings of the warehouse class) equal to the thickness of such wall in the topmost story, and in any other building of a thickness of eight and a half inches at the least. Except that in the case of domestic buildings where not more than four buildings are erected under one roof, it shall be sufficient if the party wall is carried up to the under side of the roof covering and of a thickness of eight and a half inches at the least.

7. Every party wall shall be carried up of the thickness aforesaid above any turret, dormer, lantern-light, or other erection of combustible materials fixed upon the roof or flat of any building within four feet from such party wall, and shall extend at the least fifteen inches higher and wider on each side than such erection, and every party wall shall be carried up above any part of any roof opposite thereto and within four feet therefrom, and to have the necessary damp course.

8. Every wall and fireplace constructed of brick, stone, or other similar material except reinforced concrete construction shall have a damp-proof course of impervious material laid throughout its entire length and thickness in a position to be approved by the Surveyor, but such damp course may be turned vertically upwards within the thickness of the wall to a higher level on the outside. Where, owing to a change of level, it is not practicable to lay the same on a level plane throughout the walls of a building, the same may be laid on two or more level planes. Where a damp-proof course is laid on more than one level plane, the ends of the damp-proof courses on each level shall overlap the ends of the damp-proof course of the next level, and each of such layers shall be connected by vertical connexions of the same material.

(2) Recesses and Chases.

9. Recesses may be made in external walls, provided:—

- (a) The backs of such recesses shall not be of less thickness than eight and a half inches.
- (b) That over every recess so formed there shall be an arch of at least two rings of brickwork or an approved lintel extending in each case through the whole thickness of the wall. Every such lintel shall have a bearing on each side of such recesses of at least four and a half inches if the width of the recess does not exceed three feet, and otherwise of at least nine inches.
- (c) That the area of such recesses and opening shall not taken together exceed one-third of the whole area of the wall of the story in which they are made. No recesses shall be made under girders or points of special pressure.

The word "area" as used in this clause means the area of the vertical face or elevation of the wall or recess to which it refers.

10. Recesses in party walls shall not come within thirteen and a half inches of the inner face of the external walls.

11. In an external or party wall a chase shall not be made wider than thirteen and a half inches nor more than four and a half inches deep from the face of the wall nor so as to leave less than eight and a half inches in thickness at the back or opposite side thereof, and a chase shall not be made within a distance of seven feet from any other chase on the same side of the wall nor within thirteen and a half inches from the nearest external wall.

(3) Projections from Buildings.

12. No coping, cornice, string-course, fascia, window, window-dressing, balustrade, and architectural projection or decoration shall project beyond the building line of any street or alley unless it be of brick, tile, stone, artificial stone, slate, cement, or other fire-resisting material.

13. No projection shall extend more than three inches beyond the building line at any height less than nine feet from the level of the public footpath.

14. Every porch, gangway, outside landing, and outside steps shall be of fire-resisting material and shall not project beyond the building line of any street or alley.

15. Every balcony, cornice, or other projection of or from any external wall shall be tailed into the wall of the building and weighted or tied down to the satisfaction of the Surveyor, and no cornice, window, or balcony shall, without special permission of the Council, exceed four feet in projection over the public way in streets over thirty-three feet in width or more than two feet in streets of thirty-three feet or less in width.

16. No shop front shall exceed two stories in height above the level of the pavement of the public footpath in front of the shop. No part of the woodwork of any shop front shall be fixed nearer than four inches to the centre of the party wall where the adjoining premises are separated by a party wall, or nearer than four inches to the face of the wall of the adjoining premises where the adjoining premises have a separate wall unless a pier or corbel of stone, brick, or other incombustible material four inches wide at the least be placed as high as such woodwork and projection throughout an inch at the least in front thereof between such woodwork and the centre of the party wall or the separate wall, as the case may be. Woodwork wholly encased with metal not less than twenty-two gauge may be fixed flush with the face of the wall.

(4) WOODWORK IN EXTERNAL WALLS.

17. All woodwork fixed in any external wall, except bressummers and story posts under the same, and frames of the doors and windows of shops on the ground story of any building, shall be set back four inches at the least from the external face of such wall, but frames of doors and windows of redgum or other approved hardwood may be fixed flush with the face of any external wall.

18. Every bressummer shall have a bearing in the direction of its length of four inches at least at each end upon a sufficient wall, pier of brick or stone, or upon any iron story post fixed on a solid foundation, and the Surveyor shall have power in his discretion to require that every bressummer shall have such story posts, iron columns, stanchions, or piers of brick or stone, or corbels as may be sufficient to carry any superstructure. Every bressummer bearing upon a party wall shall be borne by a templet or corbel of stone or iron tailed through at least half the thickness of the wall and of the full breadth of the bressummer.

19. At each end of every metallic bressummer a space shall be left equal to a quarter-inch for every ten feet, and also for any fractional part of the length of such bressummer to allow for expansion.

20. The ends of wooden beams, wood plates, or joints bearing on party walls shall be at least one and a half inches distant from the centre line of such party walls.

PART IX.

(1) FIREPROOF CONSTRUCTION.

1. None of the provisions contained in any other part of this By-law as to the materials and mode of construction of external party and cross walls, or the thickness of same, shall apply to any building erected or constructed in accordance with the provisions of this part of this By-law.

2. Wherever in this part of this By-law it is provided that buildings or specified portions of buildings shall be fire-resisting or fireproof, the employment for columns or girders of steel alone unprotected by a casing of concrete in the manner hereinafter provided will not be permitted.

(2) FRAME BUILDING CONSTRUCTION.

3. The adoption of frame building construction will be permitted for all classes of buildings, whether required by this By-law to be fireproof or otherwise, subject to the employment in combination of cement concrete and of steel as the sole component materials for the frames of such buildings, and provided that the conditions and stipulations hereinafter contained are complied with.

4. Provided that all subordinate or appurtenant parts, such as walls, partitions, stairways, bulkheads, lift wells, and the like, not necessarily forming part of the structural frame, may be carried in other materials, unless prohibited by other provisions of this part of this By-law.

5. The supporting columns shall be spaced so that the distance in plan to the nearest adjacent column shall in no case be more than twenty feet in one direction nor more than thirty feet in a direction at right angles thereto, these distances being measured from face to face of the columns.

6. Every column shall be rigidly connected to the floor system at every floor level in a manner to satisfactorily resist wind or other lateral pressure.

7. The external walls of frame buildings may be carried out as curtain walls designed to support only their own weight, and to resist only wind or other lateral pressure, provided that—

- (a) If carried out in brick work, or stone work, or terra cotta they shall be not less than nine inches thick exclusive of any surface treatment where the least free span does not exceed fifteen feet, and not less than fourteen inches thick exclusive of any surface treatment where the least free span exceeds fifteen feet;

(b) if carried out in reinforced concrete they shall be not less than four and a half inches thick exclusive of any surface treatment where the least free span does not exceed fifteen feet, and not less than six inches thick exclusive of any surface treatment where the least free span does exceed fifteen feet.

8. In frame buildings internal walls required to be fire-resisting may be carried out in reinforced concrete, provided they shall be not less than three inches thick exclusive of surface treatment if the span does not exceed fifteen feet, and otherwise than four and a half inches thick, exclusive of any surface treatment.

9. In all frame buildings there shall be provided at every floor level a complete system of wall girders so designed as to wholly relieve the underlying external wall or curtain wall of any vertical load other than the weight of such walls.

(3) STRESS CALCULATIONS.

10. For all forms or modes of construction dealt with in this Part of this By-law, all designs shall be based upon the following loadings, being added loadings over and above the full actual structural or dead loads, viz.:—

For residential or office buildings a minimum of eighty-four pounds per square foot of floor area.

For shops, stores, and warehouses, a minimum of one hundred and twenty pounds per square foot of floor area.

For public buildings and all areas in any building subject to the load of moving crowds, a minimum of one hundred and fifty pounds per square foot of floor area.

11. The bending moments of all girders shall be computed as being one-eighth part of the product of the total equivalent distributed load and the net span, but where the girders are satisfactorily "fixed" at their ends by reason of continuity or appropriate attachment to columns, such calculated bending moments may be reduced by 20 per cent. Beyond this allowance, however, no further reduction of bending moments by reason of continuity of girders will be permitted.

12. In computing columns, any column which exceeds in unbraced height fifteen times its least diameter or least width shall be regarded as a long column subject to flexure, and shall be designed accordingly.

13. In buildings comprising a plurality of stories, the total loading of the columns shall be computed as follows:—

(a) For any number of stories up to three stories, upon the assumption that all the floors will be simultaneously loaded with the full dead and full live load.

(b) For a greater number than three stories, upon the assumption that the three uppermost floors will be simultaneously loaded with the full dead and full live loads, while the remaining floors will be at the same time loaded with the full dead and one half the live loads.

(4) CONCRETE-CASED STEEL.

14. Wherever concrete-cased steel is employed, the work shall be so designed that the steel alone shall support and resist the whole of the loads and stresses without any assistance from the concrete.

15. The following stress intensities upon the steel will be permitted as maximum, provided that the calculation of external forces has been made in accordance with the rules herebefore provided, viz.:—

For all joists, beams, bars, or members—

in direct compression, direct tension, or cross bending, fifteen thousand pounds per square inch of net section;

in shear, fifteen thousand pounds per square inch of net section.

16. The cement concrete employed in casing the steel shall be so proportioned that there shall be used not less than one cask of Portland cement, weighing three hundred and seventy-five pounds net for each twenty-two cubic feet of net finished concrete measured in place.

17. The steel shall be encased with approved bonding, and then wholly embedded in and surrounded with concrete upon all sides in such manner that there shall be in the case of girders, a thickness of not less than one inch of concrete upon the exposed sides or edges of the steel; in the case of columns, a thickness of not less than two inches of concrete upon the exposed side or edges of the steel, such respective thickness of protecting concrete being exclusive of any plastering, veneer or other surface treatment.

18. All steel employed in and in combination with cement concrete shall be clean and free from paint, oil, grease, or tar of any kind, and shall also be free from scaly rust.

(5) REINFORCED CONCRETE.

19. In all cases where reinforced concrete is employed, whether in buildings as a whole or specified positions of buildings required or not required by this part of this By-law to be fire-

proof or fire-resisting, the reinforced concrete work shall be designed in accordance with the rules and carried out under the conditions hereinafter contained.

20. Before the actual carrying out of the work, or any portion thereof, complete drawings of such work, or portion thereof shall be filed with the Surveyor, showing all details of the construction, and the size, spacing, and arrangement of all the reinforcing members.

21. The Surveyor shall have power to require that loading tests provided for in this By-law be actually applied in his presence by the builder in such cases as the Surveyor may think fit.

22. The cement concrete employed in reinforced concrete work shall be so proportioned that there shall be used not less than one cask of Portland cement weighing three hundred and seventy-five pounds net for each eighteen cubic feet of net finished concrete measured in place.

23. The steel employed in reinforced concrete work shall be clean and free from paint, oil, grease, or tar of any kind, and shall also be free from scaly rust.

24. The following stress intensities upon the several materials will be permitted as a maximum, provided that the calculations of external forces have been made in accordance with the rules herebefore provided, viz.:—

(a) For all steel reinforcing members employed substantially as they come from the rolls—

In tension or compression—fifteen thousand pounds per square inch;

In shear—ten thousand pounds per square inch.

(b) for all steel reinforcing members where forged or welded—

In tension or compression—fifteen thousand pounds per square inch;

In shear—ten thousand pounds per square inch;

(c) For the adhesion between the concrete and the steel—seventy pounds per square inch.

(d) For concrete—

In compression—five hundred pounds per square inch;

In shear—seventy pounds per square inch;

In tension—nil.

25. The detailed design of all parts of the reinforced concrete work subject to cross bending or direct stresses shall proceed upon the basis of the latest methods, subject, however, to the following requirements:—

(a) The steel shall take the tensile stresses.

(b) The ratio of the modulus of elasticity of steel to that of concrete shall be taken as fifteen.

(c) Where the concrete is of insufficient section to take up the shearing stresses, sufficient steel shear bars shall be provided to take up the residue of the shearing stresses.

(d) In columns, all main reinforcing bars shall be held together by horizontal steel ligatures spaced not further apart than twenty diameters of the main bars.

(e) The extremities of all tension bars employed in all girders shall be cogg'd or swelling in all cases where such bars exceed half-inch in diameter.

26. In the execution of reinforced concrete work no concrete in any column or main girder shall be left uncompleted at the end of the day. Whenever concreting operations are resumed, the surfaces of completed work against which fresh concrete is to be placed must be thoroughly washed, cleaned, and grouted with neat cement. No concrete work shall be carried out during any period when the shade temperature is higher than one hundred degrees Fahrenheit nor lower than thirty-five degrees Fahrenheit.

27. The steel reinforcements shall be wholly embedded in and surrounded with cement concrete. The following shall be the minimum thickness of concrete upon the exposed sides or edges of all steel reinforcements, viz.:—

In floors, slabs, or plates—three-quarters of an inch.

In girders and ribs—One inch.

In columns—One and a half inches.

Such thickness being exclusive of any plastering, veneer, or other surface treatment.

28. The following shall be the minimum thickness of concrete in any portions of the work required by this By-law to be fire-resisting, viz.:—

In floor plates not exceeding six feet net span—three inches;

In floor plates not exceeding eight feet net span—four inches.

In floor plates not exceeding ten feet net span—five inches.

In floor plates exceeding ten feet net span—six inches.

In external walls not exceeding fifteen feet net span—four and a half inches.

In external walls exceeding fifteen feet net span—six inches.

In partitions—two and a half inches.

No internal wall shall be deemed to be fire-resisting unless four and a half inches in thickness. Such respective thickness shall be exclusive of any plastering, veneer, or other surface treatment.

PART X.

VENTILATION, LIGHTING, AND DRAINING.

1. Rooms—heights of walls:—

- (a) All main rooms in every building hereafter built or rebuilt shall be in every part not less than ten feet from floor to ceiling:
- (b) Provided that in the case of buildings of more than one story hereafter built or rebuilt living rooms wholly or partially in the roof may be less than ten feet in height from floor to ceiling throughout not more than two-thirds of the area, with a minimum height of eight feet. For all attic rooms the minimum height under rafters shall be six feet, and for the flat of ceiling eight feet.
- (c) No main room shall have less floor area than One hundred square feet, notwithstanding for rooms having walls ten feet high the minimum floor area of the room shall be sixty square feet, and for attic rooms the minimum floor area shall be eighty square feet.

Windows.

- (d) Every main room and kitchen in a building intended to be used, or which shall or may be used as a dwelling house shall have one or more windows opening directly into the external air, with a total superficies of glass clear of sash frames free from obstruction to light equal to at least one-tenth of the floor area of the room, and so constructed that a substantial part of the windows equal to at least one-twentieth of the floor area can be opened for ventilation. Every window in any main room or kitchen of such building shall have at least four feet of unobstructed lighting space provided from a light court opposite its whole superficial area, and over land in the same occupation as the building of which it forms a part. This provision does not apply to windows facing a street.

The provisions of this clause in reference to the height, lighting, and ventilation of main rooms in dwellings shall, as far as applicable, be extended and apply to all shops, save that the windows need not be constructed so as to open if other approved provision for ventilation is made.

2. *Floors.*—Floors shall be fixed level, and in all dwellings shall be in no part less than nine inches above the surface of the ground.

3. *Space under Floors.*—The space under the ground floor of every building shall have a sufficiency of openings through all walls under the floor to thoroughly ventilate same.

4. *Drainage.*—No person shall build or erect, or cause or permit to be built or erected, any building or erection, or addition to any building or erection on any land, unless such building, erection, or addition, and the site and curtilage thereof, can be properly drained, and the Council may refuse permission to build or erect any building, erection, or addition unless and until it is satisfied that the proposed building, erection, or addition, and the site and curtilage thereof, can be properly drained.

5. *Drains.*—Proper provisions shall be made and maintained for effectively removing water and sanitary and other drainage away from every building. The materials and construction of such drains shall be such as shall be approved by the Council or its Surveyor.

PART XI.

HOARDINGS.

1. Save as hereinafter provided, no person shall erect, build, or construct, or alter, or add to, or cause to be erected, or constructed, or altered, or added to any hoarding without first obtaining the consent of the Council, and unless such hoarding is erected or constructed, or altered, or added to in accordance with the plan and specification prepared by such person and previously approved of by the Council. Hoardings shall be framed of substantial timber or angle iron members securely braced, strutted, and stayed, and covered with approved material, and shall rest on substantial foundations approved by the Surveyor.

2. All applications for the consent of the Council to the erection or construction of, or alteration, or addition to any hoarding must be accompanied by a proper plan and specification, which shall set forth the design, material, dimensions, and position thereof, and by the sum of One pound, which is hereby appointed as the fee to be charged and received by the Council for the consideration by and approval or otherwise of its surveyor of such plan and specification.

3. In the case of hoardings erected or constructed prior to the coming into operation of this By-law, the Council or its officer authorized for the purpose may serve upon the owner of the premises upon which any such hoarding is erected or

constructed a notice, in writing, requiring such owner to pull down and remove any such hoarding, and if such owner shall not comply with such notice or requirement within seven days from the service thereof he shall be guilty of wilful default contrary to this By-law, and liable as hereinafter mentioned.

4. In the case of hoardings hereafter erected or constructed—

- (a) without the consent of the Council, or
(b) otherwise than in conformity with such plan and specification

the Council or its officer authorized for the purpose may serve upon the owner of the premises upon which any such hoarding is erected or constructed a notice, in writing, requiring such owner to pull down and remove such hoarding, and if such owner shall not comply with any such notice, the Council is hereby authorized to pull down and remove such hoarding, and to sell the materials and apply the proceeds in reimbursing the expenses of pulling down and removing such hoarding, and in paying into the municipal fund any fees or penalties due by the owner thereof.

5. No hoarding shall be erected at a distance from the alignment of any street less than the number of feet and inches of its height, and laterally no hoarding shall be erected nearer than four feet from land not in the same occupation as the land on which such hoarding is erected.

6. No person shall, without the consent of the Council, attach or fix to, or paint any advertisement on any hoarding, or on any building, or on any fence, rock, cliff, or tree.

7. The Council may obliterate, abolish, or remove any advertisement upon any hoarding, building, fence, rock, cliff, or tree if the same is unsightly or objectionable.

PART XII.

PRIVIES, CLOSETS, ETC.

No privy, closet, or urinal shall be erected at a less distance than nine feet from any door or window of any dwelling house. In all other respects every privy, closet, and urinal shall comply with the conditions of this By-law governing outbuildings.

PART XIII.

PORTICOS AND VERANDAS.

Anything to the contrary notwithstanding, no person shall erect, or cause or permit to be erected, any portico, verandah, balcony, balustrade, or bridge connecting building over the footway of any street in the municipality without first obtaining the consent of the Council in writing.

PART XIV.

RUINOUS OR DANGEROUS BUILDINGS OR STRUCTURES.

1. *Survey and Report.*—When the Council has any reason to believe that any building, erection, structure, or hoarding, or any part thereof, is in a ruinous, dilapidated, or dangerous condition, it may require a survey of such building, erection, structure, or hoarding to be made by the Surveyor, who shall have power to enter upon any premises for the purpose of making such survey.

If the Surveyor reports that such building, erection, structure, or hoarding is in a ruinous, dilapidated, or dangerous condition, the Council may—

- (a) cause such building, structure, or hoarding to be secured to the satisfaction of the Surveyor;
(b) cause an order, in writing, to be served on the owner of such building, erection, structure, or hoarding requiring such owner to take down, secure, or repair such building, erection, structure, or hoarding to the satisfaction of the surveyor forthwith, or if such owner cannot be traced, or his name and address is not known by the Council, then such order may be affixed to some conspicuous part of such building, erection, structure, or hoarding, which in the absence of personal service shall be held to be sufficient legal intimation;

- (c) provided that in any case where, in the opinion of the Surveyor, any building, erection, structure, or hoarding is in such a ruinous or dangerous state that immediate action is necessary for the public safety, the Surveyor may cause such building, erection, structure, or hoarding to be shored up, secured, or wholly or partly taken down to his satisfaction, and shall report such action to the Council.

2. If such owner does not begin to take down, repair, or secure such building, erection, structure, or hoarding within three days after the service of such notice, and complete such work as speedily as the nature of the case will admit, the Council may cause all or so much of the building, erection, structure, or hoarding as is in a ruinous, dangerous, or dilapidated condition to be taken down, repaired, or otherwise made secure in such manner as may be requisite, and may, where such building, erection, structure, or hoarding is pulled down, sell the materials thereof and apply the proceeds in reimbursing the expenses of such pulling down and/or removal of such material, and in paying into the municipal fund any fees or penalties due by the owner of such building, erection, structure, or hoarding.

PART XV.

REMOVAL AND RE-ERECTION OF WOODEN BUILDINGS.

1. Where any person desires to remove or transport, or cause to be removed or transported, any wooden building or erection from any place, either within or without the municipality, to any place within the municipality for the purpose of erecting or using such building or erection within the municipality, he shall give notice of his intention to the Council, in writing, seven days at least before the date of intended removal or transportation, and shall therein set out the following particulars:—

- (a) The situation of the building or erection proposed to be removed.
- (b) The situation of the land on which it is proposed to re-erect or place such building or erection.
- (c) The external dimensions and height of such building or erection.
- (d) The purpose for which such building or erection is to be used when re-erected.
- (e) The purpose for which it was being used prior to its removal.

The Council, on the receipt of such notice and on payment of the fee prescribed by the Council for inspection, may cause the building or erection to be inspected by its Surveyor before removal, in order to ascertain whether the said building or erection is erected or constructed in accordance with the requirements of this By-law, having regard to the place at which it is intended to re-erect or use such building.

2. *Exemption.*—The foregoing requirements shall, however, not apply to temporary offices or sheds used by builders on or about the site of any building being erected, repaired, or altered, or used by contractors in carrying out works for any public body or corporation, provided that such offices or sheds are used exclusively for the purpose of such building or works. Such exemption shall, however, only continue during the time occupied in completing such building or work, and in any case shall not exceed a period of twelve months, except by special permission of the Council.

3. *Building to Comply with By-law.*—Every building or erection removed or transported into the municipality from any place outside the municipality, or from any one place to another within the municipality, shall, when re-erected, comply with all the provisions of this By-law.

4. *Wooden Buildings Defined.*—For the purpose of this Part, wooden buildings shall be deemed to include every building or erection the framework of which is of wood, whether covered with timber, iron, or other material.

5. Nothing, however, contained in the preceding clauses of this Part shall prevent the alteration of the position of any building or erection within the boundaries of the land on which the same stands, provided that such building or erection when so altered is otherwise in compliance with the provisions of this By-law.

6. *Pulling Down and Removal of Buildings.*—If the Surveyor shall certify in writing that any building or erection has been removed into and/or re-erected within the municipality contrary to any of the provisions of this By-law, or that any removed building or erection has been left in such dilapidated, ruinous, or unsafe condition as to be unsightly or dangerous to the public, the owner of such building or erection, upon receiving from the Council, its Town Clerk, or its Surveyor a notice in writing requiring him to alter, or repair, or pull down, or remove the said building or erection within the time limited by such notice, shall comply therewith. And if default shall be made in complying with such notice, the Council may, on the expiration of the time therein limited, cause such building or erection to be pulled down or removed, and may sell any of the materials thereof and apply the proceeds of such sale in reimbursing the costs and expenses of pulling down, removing, and selling such building or erection, and in paying to the municipal fund any fees or penalties due by the owner thereof.

PART XVI.

CARTING OVER FOOTPATHS.

1. No person shall, in connexion with any building operations of any other work done or to be done in connexion with the erection, removal, or demolition of any building or erection, drive or cause to be driven any horse, cart, or vehicle across or over any footpath, save and except over a wooden crossing.

2. Such crossing shall be erected over the footpath and any adjoining channel by and at the expense of the builder or owner, and shall be of such type and material as shall be approved by the Town Surveyor.

PART XVII.

SCAFFOLDING ON FOOTPATHS.

No person shall place or erect or cause to be placed or erected, any scaffolding upon or over, or so as to interfere with the free passage of pedestrians over any footpath without first obtaining the consent, in writing, of the Town Clerk, Town Surveyor, or the Council, and then only if and so long as

such person shall provide for pedestrians' crossings approved by the Surveyor over the adjoining street channels and approved footways for pedestrians in place of the obstructed footpath or footpaths.

PART XVIII.

ENFORCEMENT OF BY-LAW AND PENALTIES.

1. *Enforcement of By-law.*—If any person, after the coming into force of this By-law, erects or constructs, adds to, or alters, or causes to be erected, constructed, added to, or altered any building, erection, or structure that is erected or used, or adapted for use contrary to the provisions of this By-law, the Council may—

- (a) give the owner of such building a notice, in writing, under the seal of the Council, requiring the owner, builder, or occupier to bring such building, erection, or structure into conformity with the provisions of this By-law, or alternatively requiring the pulling down or removal of such building, erection, or structure within a reasonable time limited in such notice;
- (b) should default be made in complying with such notice within the time limited, and notwithstanding the imposition or recovery of any penalty, it shall be lawful for the Council, by its Surveyor, to enter upon such building, and upon the site thereof, or upon any part thereof with a sufficient number of workmen, and to demolish and pull down the said building, erection, or structure, and to do any other act that may be necessary for the purpose, and to remove the materials and apply the proceeds to reimbursing the expenses of pulling down and removing such building, erection, or structure.
- (c) All expenses incurred by the Council or its Surveyor in doing such acts as are hereby authorized, together with all fees and/or penalties due to the Council by the owners of such building, erection, or structure, may be deducted and retained by the Council out of the proceeds of such sale.

2. Should the Surveyor find that any material that is being used in the building, erection, or construction of any building, erection, structure, or fence is unsound or defective, or is not adapted for the purpose for which it is being used or is intended to be used, the builder, on being notified by the Surveyor to that effect, shall discontinue the use of such material, and shall, if so required by the Surveyor, have such material at once removed from the site of the building.

3. *Penalties.*—Any person who is guilty of any wilful act or default contrary to any of the provisions of this By-law shall be liable, on conviction, to a penalty of not less than Twenty shillings and not exceeding Twenty pounds for each and every offence, and in the case of a continuing offence to a further penalty of not more than Ten pounds for each day on which any offence against the By-law is continued after written notice has been given to the offender by the Council of the commission of the offence, or after a conviction or order of any court (as the case may be).

PART XIX.

DISPENSING WITH REQUIREMENT OF BY-LAW, ETC.

The Council, by resolution, may from time to time, either generally or for any class of cases, or in any particular case, dispense with any of the requirements of this By-law in so far as they regulate and/or restrain the erection or construction of buildings.

TOWN OF HAMILTON.
BY-LAW NUMBERED 61.

A By-law regulating the use of streets within the Town of Hamilton by street hawkers and itinerant traders dealing in foodstuffs or flowers, and prohibiting any such persons during particular hours from using certain streets or portions of streets within the said town, and numbered 61.

IN pursuance of the powers conferred by the *Local Government Act 1928*, and of every other power enabling it in that behalf, the Mayor, Councillors, and Burgesses of the Town of Hamilton, with the approval of the Governor in Council, doth hereby order as follows:—

1. No person, for the purpose of selling, or offering, or exposing for sale flowers, fruit, vegetables, fish, flesh, food, or any other foodstuffs, shall linger or loiter, or occupy any fixed stand in or upon any of the streets within the said town, but every such person using any of the said streets for any such purpose shall keep moving along such street, on the side situate on his left hand, at a reasonable walking pace, and shall not use any such street more than once in the same hour.

2. No person shall, without the consent of the Council of the said Town of Hamilton, carry on the business of a hawker or itinerant trader dealing in foodstuffs or flowers between the hours of Nine a.m. and Six p.m. on Monday, Tuesday, Wednesday, Thursday, and Saturday, and between Nine a.m. and Nine p.m. on Friday in each week, in or upon the undermentioned portions of the undermentioned streets within such town, namely:—

- Gray-street—between Cox and Kennedy streets.
- Thompson-street—between Lonsdale and French streets.
- Brown-street—between Lonsdale and French streets.

3. No child (as defined by the *Factories and Shops Act 1928*) shall be employed as a street hawker or itinerant trader, nor be permitted to manage or occupy a stand in any street, road, or public place within the said Town of Hamilton.

4. Any person who, by wilful act or default contrary thereto, shall offend against any of the provisions of this By-law, shall, on conviction for every first offence, be liable to a penalty not exceeding Five pounds, and for every subsequent offence, to a penalty not exceeding Twenty pounds.

Resolution for passing this By-law agreed to by the Council of the Town of Hamilton this twenty-eighth day of November, One thousand nine hundred and thirty, and confirmed the eighth day of January, One thousand nine hundred and thirty-one.

The common seal of the Mayor, Councillors, and Burgesses of the Town of Hamilton was hereto affixed the eighth day of January, 1931, in the presence of—

By-law under the *Petrol Pumps Act 1928*.
TOWN OF HAMILTON.
BY-LAW No. 63.

A By-law of the Town of Hamilton, made under Part VII. of the *Local Government Act 1928* and section 6 of the *Petrol Pumps Act 1928*, and numbered 63, for or with respect to—

- (a) the placing, fixing, and maintaining of petrol pumps in or on footways and of any apparatus, pipes, and appliances in, on, or under footways for the supply of motor spirit to such petrol pumps, and the removal of such petrol pumps, apparatus, pipes, and appliances;
- (b) the granting, renewal, and transfer of licences and applications therefor;
- (c) licences and conditions to be contained in licences;
- (d) prescribing fees—
 - (1) for the granting or renewal of a licence;
 - (2) for the transfer of a licence;
- (e) providing for a proportionate reduction of fees payable in respect of licences granted for any number of months less than twelve months; and
- (f) insurance by licensees against liabilities which may be incurred by them in respect of petrol pumps.

IN pursuance of the powers conferred by the *Local Government Act 1928* and the *Petrol Pumps Act 1928*, the Mayor, Councillors, and Burgesses of the Town of Hamilton order as follows:—

1. In this By-law—
“Council” shall mean the Council of the Town of Hamilton.

"Licence" shall mean a licence granted in accordance with the *Petrol Pumps Act 1928*.

"Licensee" shall mean a holder for the time being of a licence granted in accordance with the *Petrol Pumps Act 1928*.

"Municipality" shall mean the municipality of the Town of Hamilton.

"Petrol pump" shall mean any pump for supplying motor spirit and shall include a portable petrol pump.

"Portable petrol pump" shall mean a petrol pump which is constructed on wheels and is not fixed in or on the footway and is not allowed to remain on the footway.

"Regulations" shall mean the regulations from time to time made and in force under the *Petrol Pumps Act 1928*.

2. Any person may apply for a licence in respect of any petrol pump placed or to be placed in, on, or under any footway in any highway within the municipal district of the Town of Hamilton, used or to be used by such person for the purpose of the business carried on or to be carried on by such person of selling and supplying motor spirit. Every such application shall be in the form of the First Schedule to this By-law. Every licence granted shall be in the form of the Second Schedule to this By-law.

3. It shall be the duty of every person to whom a licence has been granted under the provisions of the *Petrol Pumps Act 1928* to maintain in a safe and efficient condition and free from leakage, and in accordance with this By-law, all petrol pumps, apparatus, pipes, and appliances in, on, or under footways for the supply of motor spirit to such petrol pumps.

4. Every licence shall expire on the 30th day of September next following the date of issue, and shall after such 30th day of September be of no force and effect.

(a) There shall be paid to the Council in respect of every licence for a petrol pump, other than a portable petrol pump, in or on any footway, a licence-fee of One pound one shilling per annum.

(b) There shall be paid to the Council in respect of every licence for a portable petrol pump which is used on any footway for the purposes of selling or supplying motor spirit a licence-fee of One pound one shilling per annum.

(c) Provided that where a licence is granted for any number of months less than twelve months a proportionate reduction of the fee, based on the number of months unexpired, shall be made by the Council.

5. No licence or renewal of a licence or transfer of a licence shall be granted unless the fee prescribed in such case has first been paid.

6. Where a licence granted under the provisions of this By-law is about to expire, the Council may, upon application being made to it in the form of the Third Schedule to this By-law, renew such licence for a further term of one year.

7. Every application for the renewal of a licence shall be lodged with the Council at least fourteen days before the expiration of the licence, and shall be accompanied by the annual licence-fee hereinbefore prescribed.

8. The Council may refuse to grant or renew or transfer any licence where the pump in respect of which an application for a licence or transfer or renewal of a licence is made is not placed or proposed to be placed in front of premises occupied or to be occupied by the applicant for the purpose of carrying on the business of selling or supplying motor spirit.

9. No licence shall be transferred, save in accordance with the following provisions:—The person desiring to transfer the licence shall first make application, in writing, to the Council for the approval of the Council to such transfer, and shall enclose with such application a transfer of the licence, in writing, signed by the licensee, and an acceptance of such transfer (conditional upon the approval of the Council being granted thereto) by the transferee, and shall pay to the Council a transfer of Two shillings and sixpence.

10. Immediately on the approval of the Council of any transfer of licence being given, the policy of insurance herein-after referred to taken out by the transferor shall be transferred to the transferee, or the transferee shall effect a new policy in a company of repute to the same effect.

11. Every licensee under the provisions of this By-law shall, before the petrol pump is erected in respect of which such licence is granted or if erected prior to the application, before the petrol pump is used for the sale or supply of motor spirit, insure himself, and thereafter at all times keep himself insured during the currency of such licence and any renewal thereof, in some insurance company of good repute, against all damages and liabilities for which he may become liable to any person arising from the use, control, or possession by him of such petrol pump in the sum of at least £1,000. Every licensee shall on demand produce to the Council or any duly-appointed officer of the Council the said policy of insurance, and the receipt for the premium for the then unexpired period of the licence.

12. A licensee shall make good any damage to conduits, drains, or pipes under any footway caused by or arising from

the installation or removal of a petrol pump, or any part thereof, or any apparatus, pipes, or appliances for the supply of motor spirit to such pump, and shall make good any portion of the footway broken up for the purpose of such installation or removal.

13. Every licensee whose licence shall have expired and has not been renewed, or whose licence shall have been cancelled under the provisions of the *Petrol Pumps Act 1928*, shall, within seven days after such expiry or cancellation, remove the petrol pump referred to in such licence, and all apparatus, pipes, and appliances connected therewith in, on, or under the footway.

14. No licensee shall cause or permit the petrol pump in respect of which his licence is granted, or the apparatus, pipes, or appliances connected therewith, to be altered in design or position without first obtaining the consent of the Council.

15. This By-law shall apply to and have operation throughout the whole of the municipal district of the Town of Hamilton.

THE "VICTORIA GOVERNMENT GAZETTE."

SUBSCRIPTIONS.—The Subscription, including Postage, is £1 10s. 4d. per annum, or 7s. 7d. per quarter, payable in advance.

Subscriptions are required to commence and terminate with a month.

A lesser period than three months cannot be subscribed for.

Subscribers do not receive the Acts of Parliament with the Gazette.

ADVERTISEMENTS are charged at the rate of EIGHTPENCE per line throughout.

The title (£5 Reward, Dissolution of Partnership, &c.) forms one or more lines, as a heading.

On an average, eleven words make a line.

Every signature must likewise be counted as a line.

The final words of a paragraph, though only portion of a line, must be counted as one line.

Signatures (in particular) and proper names must be written very plainly in the text; ONE SIDE ONLY of each slip of paper should be WRITTEN UPON.

ALL COMMUNICATIONS should be addressed to "The Government Printer, Melbourne."

ALL DOCUMENTS illegibly written will be returned unpublished, and, where brands occur unprovided for by the ordinary letters of the alphabet, a worded explanatory description must be furnished.

THE VICTORIA GOVERNMENT GAZETTE is published on WEDNESDAY EVENING in each week, and Notices for insertion will be received by the Government Printer at or before Two p.m. at ordinary rates, and late advertisements between Two p.m. and Five p.m., at double rates, on the day preceding the day of publication.

Single copies of the VICTORIA GOVERNMENT GAZETTE are Sixpence, posted Sevenpence, each.

No GAZETTES prior to January, 1902, in stock.

ALL PAYMENTS ARE REQUIRED IN ADVANCE. Remittances should be made by postal note, money order, or draft in favour of the Government Printer. Advertisements unaccompanied by a remittance sufficient to cover the cost of insertion will be returned unpublished.
