## THE SWAN HILL SEWERAGE AUTHORITY.

## BY-LAW No. 1.

By-law relating to the levels, dimensions, construction, maintenance, ventilation, and cleansing of sewers and house connexions.

**T**HE Swan Hill Sewerage Authority, pursuant to and in exercise and execution of the powers and authorities conferred on it by the Sewerage Districts Acts, and of any and every other power or authority in any wise enabling it in that behalf, doth hereby make and prescribe the following By-law, that is to say:—

In the construction of this By-law, unless inconsistent with the context or subject-matter—

1. "Authority" shall mean the Swan Hill Sewerage Authority. "Engineer" shall mean the engineer of the said Authority. "The Acts" shall mean the Sewerage Districts Acts. "Sewerage District" shall mean the Swan Hill Sewerage District.

2. No person shall cause or permit the admission to any drain or sewer of the Authority of any land drainage, surface or otherwise, or rain water from roofs, yards, streets, or other surfaces, whether by inlets specially designed to admit it, or by any other inlets or openings so placed that such water may get access thereto. Any opening or inlet placed or permitted to remain in such a position that any extraneous water from any river, lake, gully, or creek or any other source whether in flood or otherwise has access to any drain or to any sewer of the Authority shall be fitted with a suitable valve approved of and installed under the supervision of the engineer.

*Works.*

3. (a) All drains, sinks, traps, urinals, water-closets, grids, water or sewerage pipes, apparatus, appliances, stables, cow houses, yards and other works or places on any premises within the sewerage district shall be made, affixed, and constructed in compliance with the requirements of the Acts and any Regulations thereunder and this By-law, but any drain, sink, trap, urinal, water-closet, grid, water or sewerage pipe, apparatus, appliance, stable, cow house, yard, or other work or place on any such premises, at the date of this By-law which the owner may desire to remain unaltered, and which, in the opinion of the engineer, is so constructed and kept so as not to be a nuisance or injurious to health, and so that there is no overflow or leakage, or soakage therefrom, may, with the consent of the Authority, remain unaltered until the Authority otherwise orders, notwithstanding that it does not comply with any of such requirements.

(b) Save as provided by sub-clause (a) of this clause, if any drain, sink, trap, urinal, water-closet, grid, water, or sewerage pipe, apparatus, appliance, stable, cow house, yard, or other work or place on any such premises (whether made or affixed, or constructed before or after the date of this By-law) does not comply in every respect with the requirements of the Acts and all Regulations made thereunder, and this By-law, the owner and occupier of such premises shall (without affecting the liability of any other person) be severally guilty of an offence against this By-law.

4. All drains in and from properties to and as far as the point of connexion of the branch drain with the sewer must be repaired and cleansed by, or at the cost of, the owner or owners.

4A. Every property, shop, and lock-up shop must be provided with at least one water-closet, and a gully-trap, or sink with trap over same, unless by special permission of the Authority.

5. In the case of any obstruction taking place in a combined drain, the Authority will determine between the respective owners or occupiers of the premises drained thereby, by whom and in what proportion the cost of removing any such obstruction shall be paid.

6. Application for the Authority's consent to connect with the sewerage system, or to do plumbing and drainage work connected therewith, must be made in writing by the owner of the property to be so connected, or by his authorized agent. Such application shall give the precise location of the property, the name of the owner, and the name of the person employed to do the work, and shall be made in form prescribed by the Authority. No person shall in any such application knowingly make any untrue or incorrect statement. No consent shall be deemed to authorize anything not stated therein.

An approval by the Authority of a plan under section 133 of the *Sewerage Districts Act 1928*, or any consent under section 121, shall not be deemed to authorize or to confer or grant the right to lay a drain through any land intervening between the premises proposed to be connected and the sewer of the Authority, and any owner or applicant for the approval of such plan or consent shall satisfy himself as to his legal right to drain through such intervening land, and shall be solely responsible for any trespass or damage thereon or thereto.

Consents to make connexions with the sewerage system will be issued only when the plumbing and draining in the property to be connected is planned to be made in accordance

with the rules for plumbing and draining hereinafter prescribed and after such plan has been inspected and approved of by the inspector appointed by the Authority for the purpose, or, in the case of new buildings, when a proper plan of the plumbing and of the drainage of the building into the branch, of which the Authority shall have fixed the position, has been approved of in writing by the Authority. All connexions with drains or sewers and all plumbing and drainage connexions therewith shall be made under and in accordance with the directions of the engineer or the superintending officer of the Authority.

Consent will not be given for the performance of any such work except upon condition that no person shall be engaged or employed as a workman in the actual performance of any plumbing or drainage work unless he be the holder of a "working plumber's licence" or "drainer's licence" from the Authority.

No person shall at any time, or at any place make up, form, affix, alter, or repair any fitting, pipe, bend, trap, or other thing connected or intended to be connected with the Authority's sewerage system unless he be the holder of a licence from the Authority authorizing him to do such work.

No person, whether licensed as aforesaid or not, shall alter, remove, or in any way interfere with any drain, fitting, pipe, bend, trap, or other thing connected with the Authority's sewerage system, unless the Authority's previous written consent to do such work has been given.

*Master Plumbers' Licences.*

7. "Master plumbers' licences" may be granted by the Authority to any person who is a master plumber who shall satisfy the Authority either by passing an examination by examiners appointed by the Authority or in such other manner as the Authority may from time to time or in any particular case direct, that he has a thorough knowledge of sanitary and general plumbing and of the By-laws and provisions of the Acts relating thereto. The general conditions under which working plumbers' licences are issued shall also apply to master plumbers' licences.

*Working Plumbers' Licences.*

8. The conditions under which "working plumbers' licences" will be issued by the Authority are—

(a) That every such licence will be subject to suspension or cancellation at the will of the Authority, and that all such licences will be granted to expire on the 31st day of December of each year.

(b) A special condition of every consent issued to an owner or agent shall be that if a licensed plumber in his employ upon any such work prove, according to the judgment of the Authority's inspecting officer, to be incapable as a workman or transgress the By-laws or Regulations of the Authority and the "working plumber's licence" of such workman be for any such cause suspended or cancelled by the Authority, and notice of such suspension or cancellation, in the form prescribed by the Authority, or to the like effect, be given by the Authority in writing, by registered letter addressed to the said owner or agent, the said owner or agent shall cease to employ such workman upon any such work immediately after and during the continuance of such suspension or cancellation. And any such owner or agent who shall neglect or fail to comply with this condition shall be guilty of an offence against this By-law.

(c) "Working plumbers' licences" will be issued at the discretion of the Authority to persons who hold and produce to the Authority a certificate of competency issued by the Sanitary Plumbers Examination Board of Victoria on payment of a fee of 20s. for original licence and for each renewal 5s. Such licence will permit the holder to do practical work as a working plumber upon and in connexion with the sewers, drains, and all fittings, appliances, and apparatus appurtenant thereto within the Swan Hill Sewerage District subject to and in accordance with the Authority's By-laws or Regulations. And he will likewise be furnished with a certificate from the Authority that he is duly qualified to do the work in connexion with the sewerage system under the control of the Authority and in accordance with the Authority's Regulations. "Working plumbers' licences" will, at the discretion of the Authority, be issued without previous examination to any practical plumber who shall be the holder of, and shall produce, a licence from any other sewerage authority equal in value to the standard established by the Authority, and who shall satisfy the Authority that he is conversant with the By-law according to the judgment of the Authority's examiners, which shall be final. Prior to the issue of any "working plumber's licence" the person to whom the same is to be issued must sign a register containing a declaration that he accepts such licence subject to and in conformity with the conditions

thereof and the By-laws or Regulations of the Authority, and that he will carry out all contract work according to the conditions of contract and general specifications of which he has received copies, and that he will conform to and comply therewith.

Whilst none but the holders of "working plumbers' licences" are allowed to be engaged or employed in the performance of plumbing work for sewerage, the holders of licences for water supply work may do water supply work necessary to the sanitary work, such as fixing cisterns and water-closets in outside buildings where lead is not used, and work for water supply.

#### *Drainers' Licences.*

9. Drainers' licences will be issued to candidates who have successfully passed an examination in the following subjects:—

Plans.—How to read plans; meaning of scales—the scales commonly used in drainage plans; meaning of elevation, plan, and section drawings.

Levels, &c.—Laying off levels for drains, the straight edge, spirit level, and boning rods, tools generally used in drain laying, preparing bottom of trenches to receive pipes.

Excavating, Timbering, and Re-filling.—Protecting the trench by timbering; different treatment of different soils, as loam, clay, loose and wet sand, &c.; tunnelling and tunnel timbering; precautions when near buildings; importance of care in re-filling trenches and tunnels.

Drain Laying.—Junctions to sewers, laying and jointing of stoneware or cement concrete pipes, cement joints, bitumen joints, self-fitting joints, drains under houses and in soft ground; cast-iron drains, laying and jointing, method of jointing stoneware and cast-iron drains; minimum depth below surface for safety.

Drainage Details.—Disconnecting traps; diminishing of pipes by various methods; gully-traps or sinks, self-cleansing form and arresting form, and where each should be used; the reflux gully-trap; grease or grease interceptor trap; S trap; pedestal water-closet access eyes and access pipes; cast-iron drainage details.

Materials.—Salt-glazed stoneware; qualities of lime mortar and cement mortar, and where each should be used, concrete, proportioning mixing and usage, brick, brick bond for junction pits, manholes, &c., cast-iron pipes.

Hints on Work.—Laying off work, drain testing by water, smoke, air pressure, &c., clearing of chokages.

The condition under which working plumbers' licences are issued will also apply to drainers' licences.

#### *Persons Authorized to Carry out Works.*

10. No person shall tender for or enter into a contract for any plumbing or draining work relating to sewerage within the sewerage district who does not hold either a master plumber's licence or a working plumber's licence unless by permission of the Authority.

No person other than a holder of a working plumber's licence issued by the Authority shall actually do or perform any such plumbing work.

No person other than the holder of a working plumber's or a drainer's licence issued by the Authority shall actually do or perform any such draining work.

#### *Fees for Plan of Drainage Design and Inspection.*

11. Copies of the Authority's plans of individual house drainage will be furnished by the Authority upon application and payment for the same, as follows:—

- (a) Plan of drainage, including surveys, &c., for every house, hotel, shop, factory, or other building, a minimum charge of 10s., plus 2s. 6d. for each fitting, as specified.
- (b) For the supply of a block plan, where the owner desires to design his own house drainage, a fee of 2s. 6d. shall be charged.
- (c) For making or examining any alterations or addition to a plan previously issued or approved of by the Authority, a minimum charge of 5s. shall be made by the Authority.
- (d) For the examination of owner's plan of drainage a minimum charge of 7s. 6d. shall be made.
- (e) Plumbing inspection, 10s. per tenement.
- (f) Drainage inspection, 10s. per tenement.
- (g) In all cases where the sewerage of a property is not carried out by the Authority there will be a minimum fee for inspection by engineer and charting of 10s., payable to the Authority by the owner on completion of the work.
- (h) In cases of fittings installed prior to the adoption of this By-law a fee of 1s. per fitting in addition to the fees prescribed in above clauses shall be charged for inspecting and testing such fittings.
- (i) Where the Authority designs the work and has same carried out for the owner, a charge shall be made equal to the amount incurred by the Authority in the designing and supervising all details in connexion with such works.

#### *Inspection.*

12. The owner or his authorized agent, or the plumber, drainer, or contractor carrying out the work must give at least 24 hours' notice to the Authority of his intention to commence work and also when any work is ready for inspection. All work must be left uncovered and convenient for examination until inspected and approved of by an inspector appointed by the Authority. Such inspection shall be made within 24 hours of such notification being received at the office of the Authority, except when notification is received on Saturdays, when 60 hours must be allowed.

The inspecting officer may apply the ether, peppermint water, smoke, or air test, the air test to be applied at a pressure of not less than 3 inches of water, and the plumber or drainer shall furnish all the necessary tools, apparatus, labour, and assistance required for such tests. The owner or his authorized agent shall remove or repair any defect when so ordered by the inspecting officer, and if he neglects to do so shall be liable, upon conviction, to a penalty not exceeding Five pounds, and to a penalty not exceeding One pound for every day thereafter during which such neglect or failure shall continue.

Before the fittings are connected with the plumbing of any house or building, or after, if so ordered, and before the soil or waste pipe is connected with the sewer, the outlet of the soil or waste pipe and all openings into it below the top shall be hermetically sealed. The pipes shall then be filled with water to such height as may be ordered, or with smoke, &c., as the superintending officer of the Authority may direct, and every joint and pipe carefully examined for leaks. Defective pipes must be removed and replaced by sound ones, and all defective joints made tight, and every part of the work made to conform to this By-law, and subject to the approval of an officer appointed by the Authority.

House drains, whether laid by the Authority's workmen or others, must be thoroughly tested in every case before being passed by the Authority's officers. When being tested with water there must be a head of at least six (6) feet above every part of the drain.

Before a licensed plumber or drainer commences to clear a stoppage in a drain he must notify the Authority in writing of the time when he intends to clear the stoppage, so that an inspector may attend and pass the work in accordance with the provisions of this By-law.

#### *Defective Fittings.*

13. Any drain pipe, soil pipe, trap, water-closet, urinal, sink, or other fitting laid, used, or constructed otherwise than in accordance with this By-law, or which shall, in the opinion of the Authority, be or become bad, or of defective quality, shall, upon notice in writing from the Authority to the owner or occupier of the property, be by such owner or occupier removed or repaired in the manner determined and within the time fixed by the Authority; and in case such owner or occupier fails to comply with the requirements of such notice he shall be liable to prosecution and penalty for an offence against the Acts or the Authority will, if it think fit, remove or repair the said defective fitting and charge such owner or occupier of the premises with the cost so incurred, and will proceed for recovery of the same in manner provided by the said Acts.

#### *Quality of Materials.*

14. All materials used must be of good quality and free from defects. All pipes and sewerage fittings of every description must be tested and branded by the Authority. All work must be executed in a thorough and workmanlike manner, and to the satisfaction of the Authority. No sanitary fitting shall be allowed to be connected to the sewers of the Authority unless it be of a type previously approved by the Authority, or unless special permission has been given by the engineer for connexion of such fitting.

The utmost care must be exercised on all house connexion work to insure that only materials which are in accordance with the Authority's By-laws and Regulations are used.

#### *Drains.*

15. The drainage of each house is to be arranged for separately unless, in the Authority's opinion, special reasons exist for draining by a combined operation.

Owners desiring to have the drainage of their properties combined must sign a request for a combined drain.

When the drainage of more than two properties is combined, an inspection chamber must be provided, if shown on plan or ordered.

Boundary traps will only be allowed by permission of the engineer. All the drains must, wherever considered necessary by the Authority, join in a manhole at least three feet (3 feet) long and two feet (2 feet) wide, fitted with a closed cover. The portions of the drains crossing the floor of the manhole must be in a straight line or by curved junctions in the floor of the manhole. All manholes to be cement rendered (two parts sand and one part cement) to a smooth surface and made watertight.

The manhole must be provided with a closed cover, and special ventilation must also be provided if considered necessary by the engineer.

All steps in manholes must be galvanized.

The drains outside of the house or building, or from isolated water-closets, to the street sewer shall be constructed of pipes of approved quality and manufacture.

Cast-iron pipes jointed with lead as is usual in water pipes, or reinforced cement concrete pipes where approved by the engineer, or other approved pipes surrounded with at least four inches (4 inches) of Portland cement concrete must be used, such concrete to be composed of one part of Portland cement, two parts of clean sand, and four parts of stone of 1½-in. gauge, or gravel approved by the inspector shall be used in the following cases:—

- (a) In yards or places liable to heavy traffic where the cover over the drain is less than 2 ft. 6 in.
- (b) In cases where the construction of drains under buildings is unavoidable.
- (c) Where drains and fittings are to be laid and fixed at a distance of less than 6 feet from any cellar, water tank, or other excavation.
- (d) In soft, bad, water-logged, or made-up ground.
- (e) Adjacent to trees where damage to drain is likely to be caused by roots.

#### *Pipe Trenches.*

16. The trenches for the drains from all properties shall be dug so as to meet the public sewers at the position of the branches and O.B.'s indicated by the Authority. The material from the trench shall be placed so as not to obstruct and so as to cause the least possible inconvenience to the public. Proper barriers and lights must be maintained on the banks of the trenches during the progress of the work, to guard the public against accident. In refilling the trench the earth must be rammed or flooded carefully, so as to keep the pipe in position and avoid settling. No stone shall be used in refilling until there has been a depth of at least 2 feet of earth or gravel placed over the pipe.

#### *Subsoil Drainage.*

17. Subsoil drainage connexions to the sewerage system are prohibited.

#### *Basement and Cellar Drainage.*

18. No water-closet or urinal shall be placed in any cellar, basement, room, or apartment unless at least 5 feet of the walls of such cellar, basement, room, or apartment are above the surrounding land. In all cases, where it is proposed to place a water-closet or urinal below the level of the surrounding land, plans and sections showing provision for light and ventilation must be lodged with the application, under section 133 of the *Sewerage Districts Act 1928*, for approval of plan or with the application under section 122 as the case may be.

Where any house shall have its lowest floor, cellar, or basement at a lower level than the sewer of the Authority into which such house would otherwise drain, the owner shall, pending pulling down or alteration of such house, cause the drainage from such lowest floor, cellar, or basement to be raised by means of a syphon, or some other method approved by the Authority, so that it shall discharge into a drain communicating with the sewer of the Authority.

Where, in the opinion of the Authority, a cellar or basement is so situated that it can be drained by gravitation to the Authority's sewers free from any risk of backflow in the event of the sewers becoming surcharged, the Authority may permit such connexion, provided a sluice valve be fixed between the cellar or basement connexion and the sluice valve to be kept closed as hereinafter mentioned; and provided the owner apply in writing for same, and furnish the Authority with an undertaking that such connexion is made at his risk, and indemnify the Authority against all damage in connexion therewith. In such cases the soffit of the pipe draining the cellar shall at its highest point be at least 1 ft. 6 in. below the cellar or basement at its lowest point.

Sluice valves must be kept closed, and only opened when it is necessary to allow an accumulation of water to drain to sewers. Spindles of sluice valves must be fitted with permanently attached extension rods of sufficient length and diameter to enable the valves to be opened or closed from above the level of the ground floor of building.

#### *Rain Water.*

19. Rain-water conductors shall not be connected with the sewers.

#### *Stables, etc.*

20. All stables, loose-boxes, dairies, cow sheds, and all areas considered by the engineer polluted areas must be paved with approved material, graded, and drained to the satisfaction of the Authority, and the drain therefrom must be trapped with an approved silt trap connected with the drain inside the boundary line. The joints of stable floors and paved areas connected with the sewers of the Authority must be filled to full depth with either (1) good cement mortar in the proportion of one part of cement to not more than two and a half parts of clean sharp sand, or (2) an admixture of pitch and sand, mixed as directed, or (3) with other jointing material which may be approved by the engineer.

All stables, loose-boxes, and cow sheds in actual use must be paved and graded to the satisfaction of the Authority and connected with the Authority's sewers. The drainage of those not in use must be provided for, but they need not be connected with the sewers while they are unused.

The drainage from stable floors must discharge over an approved silt trap, which must be provided with a top of brickwork or Portland cement concrete, and fitted with a heavy grating.

All stables, loose-boxes, dairies, cow sheds, and polluted areas must be roofed over to the satisfaction of the Authority.

#### *Manure Bins.*

21. Manure bins must be provided for all stables or cow yards where the local Council's By-law demand their construction or where the locality is closely built on.

All the manure bins must have the inside surfaces rendered with cement mortar, and must be made impervious throughout, and provided with an approved close-fitting cover. Walls of new manure bins must, unless otherwise approved, be at least 9 inches in thickness, built of brick work laid in cement mortar.

Branches in house drains must be provided in all cases where manure bins exist, for their connexion whenever the Authority shall deem it necessary.

#### *Laying Drains.*

22. All drain pipes must be either approved stoneware or reinforced concrete, and must be at least 4 inches in diameter, except where otherwise ordered by the Authority, and must be taken to the Authority's depot to be tested by the officer appointed by the Authority in the machines provided for the purpose.

The cover of the branch on the sewer shall be carefully removed so as not to injure the socket.

The first length of the pipe attached to the branch and O.B. shall be curved and set so as to give a good fall into the sewer, and shall be provided with a cleaning eye.

An inspection opening attached to the drain, inside, and within 5 feet of the boundary line or such other distance as may be deemed necessary by the engineer, must be provided. A manhole giving access to the inspection opening at the sewer end of the drain to be provided if considered necessary by the engineer.

All pipes shall be carefully bedded on the barrel in the solid ground.

Where in the opinion of the Authority it is necessary, cast-iron pipes, or approved reinforced cement concrete pipes, must be used, or stoneware pipes bedded in concrete of dimensions approved by the engineer, such concrete to be composed of one part of Portland cement, two parts of clean sand, and four parts of stone of 1½-in. gauge or gravel approved by the inspector.

Unless otherwise directed by the engineer, stoneware or reinforced cement concrete pipes must not be laid less than fourteen (14) inches deep from the surface of the ground to the top of the socket of the pipe. Where this amount of covering cannot be obtained, the stoneware or reinforced cement concrete pipes must be entirely surrounded with not less than 6 inches of Portland cement concrete, as previously specified, or the surface of the ground must be raised to the satisfaction of the Authority's inspector.

All stoneware or cement concrete pipe drains near roots of trees must be surrounded with not less than 4 inches at all points of cement concrete as previously specified.

Jump-ups, where allowed, must be bedded on and surrounded with 6 inches of Portland cement concrete to full height of drop, if so ordered by the engineer.

The drain pipe shall be laid and jointed by a method approved by the engineer, and on an even grade of not less than 1 in 40 if a 4-in. pipe be used, or of 1 in 60 if a 6-in. pipe be used, unless by special permission of the engineer, in which case special provision must be made for regular and efficient flushing.

As far as possible, all drains shall be laid in straight lines, where changes of direction occur they shall be made either by suitably curved pipes with inspection openings or in manholes.

Stoneware pipes may be substituted for cast-iron or cement concrete drain pipes in every case except where the ground is soft or liable to heavy traffic; but in all cases where stoneware or cement concrete is substituted for cast iron, the pipes must be entirely surrounded by not less than 6 inches of Portland cement concrete, as previously specified. Notwithstanding as heretofore, cast-iron pipes only to be used under buildings, except where the pipe is laid in the earth or by the special permission of the engineer.

All drain pipes carried through walls must have a space of about 3 inches clear left over the pipes.

If a pipe be cut out to clear a stoppage, or if a pipe be broken, it must be replaced by a new inspection opening pipe. The old pipe must not be patched up.

Portland cement concrete brought to a smooth surface must be used in each of the following cases:—

- (1) Around and under gully basins, the exposed surfaces to be rendered in cement mortar, two parts sand, one cement.
- (2) Around the top and for 6 inches below the surface of the ground of vent-pipe sockets where exposed.
- (3) Around the top and for 6 inches below the surface of the ground of disconnection traps when the surface is exposed.
- (4) Under and around bends rising vertically off oblique branches, and under all drainage traps.

Cement concrete stops to be provided in all cases where the slope of the drain is such that it may be deemed necessary by the engineer.

In all cases where concrete is mixed, approved mixing boards to be used where an approved concrete mixer is not provided. All cast-iron pipes must be sound, free from holes or cracks, and coated with tar or asphaltum.

The following weights will be accepted as standards for cast-iron drainage pipes:—

- 4-in. diameter, 16 lb. per lineal foot.
- 5-in. diameter, 20 lb. per lineal foot.
- 6-in. diameter, 23½ lb. per lineal foot.

All fittings used in connexion with such pipes shall correspond with them in weight and quality. All junctions must be curved. Right-angled junctions must not be made.

Where outside closet buildings require repairing or removing, the necessary work within the space covered by the closet buildings must be carried out before the water-closet branch is laid; but other portions of the drain may be laid, provided provision be made for effectually testing the closet branch when laid.

Whenever a paved, asphalted or tar-paved yard or space has been broken in connexion with house drainage, the surface so broken must be restored as nearly as possible to the same condition as it was in previously, unless the owner in writing otherwise requires.

#### *Joints—Drainage.*

23. Cast-iron pipes shall be jointed with gasket and lead, and caulked to make the joint gas and water tight. The gasket shall not after being caulked into the socket exceed ¼ inch in depth. Wrought-iron pipes shall be screw-jointed with white lead and hemp.

All connexions of lead pipes with iron pipes must be made with a brass sleeve or ferrule of the same size as the lead pipe, put in the socket of the branch of the iron pipe, and caulked with lead. The lead pipe must be attached to the sleeve or ferrule by a wiped joint.

Joints of stoneware and cement concrete pipes shall be made with cement or other approved joints; gaskets will not be allowed unless by permission, and in no case will cement or other projection extend from inside the joint.

The ends of all private drains not immediately connected with the plumbing fixtures shall be securely closed with water-tight, imperishable materials. If stoneware or cement concrete a stoneware, cement concrete or cast-iron disc must be cemented in; if wrought-iron, a plug must be screwed on the end; if cast iron, a cast-iron plug must be caulked in with lead.

Connexions of galvanized sheet-iron vent pipes to cast iron do not require a brass sleeve, unless ordered by the engineer.

#### *Vent Pipes—Drainage.*

24. The main drain must be vented at its upper end by a pipe or shaft erected vertically to such a height that the mouth of the pipe or shaft shall be at least 6 feet higher than any window, door, or other opening situated within a distance of 30 feet therefrom.

Branch drains need not be vented if the drainage traps be within 15 feet of the main drain.

When two or more vents are fixed on the same line of drain the diameter of one may be reduced to 3 inches by permission of the engineer.

Every vent pipe extending upwards from a soil or drain pipe must be carried to such a height as may be deemed necessary by the engineer, and in any case at least 2 feet above the highest part of the roof or coping whichever is the higher.

Every vent pipe must be of undiminished size, without return band, with educt or induct cowl as may be ordered, and it must not open near a window, a chimney, or an air-shaft which ventilates living rooms.

All vent pipes in an extension of a main building, when otherwise they would open within 30 feet of the windows, doors, or other openings into the main building or the adjoining building, must be extended to such a height above the roof of the main building as may be deemed necessary by the Authority.

All the main educt vents on house drains shall be of the same diameter as the drains, unless special permission be given to vary their dimensions.

No chimney flue shall be used as a sewer ventilator, or to ventilate any drain, soil, or waste pipe.

All inlets to drains or openings for ventilating shall be efficiently protected by proper gratings of ample area. The aggregate area of the apertures in any grating covering a ventilating opening shall not be less than the sectional area of the pipe or drain to which such grating is fixed. All openings for ventilation made in accordance with this By-law, or upon order of the Authority, shall at all times be kept open and perfectly free from obstruction.

All galvanized sheet-iron vent pipes used to ventilate the drainage system, or used as anti-syphonage pipes to soil or waste pipes from closets, slop sinks, or urinals, must be coated with hot tar or asphaltum inside before erection.

All drainage sheet-iron vent pipes must be double galvanized. Whenever vent pipes from drains are not more than 9 feet above the offset they will not require staying; if longer they must be stayed with ½-in. galvanized wrought-iron pipe.

When a galvanized sheet-iron pipe, with or without an offset, is carried up above the brick wall of a building a galvanized wrought-iron pipe clip shall be used, leaded to the wall near the top wherever possible, and bolted against vent pipe. All band iron clips of vent pipes to brick walls must be fastened with nuts and bolts, leaded in.

A length of 15 feet of straight vent pipe without offset may be fixed without stays.

The minimum height measured from the ground level of all vent pipes to be not less than 21 feet net.

There shall be at least one pipe hook or clip to each 6 feet length of vent pipe.

When vent pipes terminate more than 6 feet from chimney openings at the same level, the ordinary rules as to height are to apply; but when the distance is 6 feet and under, the vent pipe must terminate 2 feet below the chimney opening. Vents must, as far as possible, be kept away from chimneys.

When it is not possible to carry a vent pipe above the parapet or ridge, the pipe must be carried up as high as it will stand without staying, provided it is 30 feet from a window or door. When it is at a less distance than this it must be carried up 6 feet higher than any window or door opening within a radius of 30 feet of the vent pipe, and have sufficient stays to support it.

Wooden blocks for vent pipes will not be allowed on posts or walls.

#### *Traps—Drainage.*

25. Traps of three (3) classes shall be used—

- (a) "Traps" for intercepting gases only, to be of round section and self-cleansing form, but not so easy as to empty by momentum or suction.
- (b) "Silt traps" for intercepting both gases and solids to have slightly tapering sides, flat bottom, and rounded, not sharp angles, and provided with trays fitted with handles for catching and removing solids.
- (c) "Grease traps" for solidifying and collecting grease or other semi-fluid matter liable to foul the pipes to be of such form as may from time to time be approved. "Triple interceptor traps" for collecting oil.

The term "gully" is applied to traps (a) and (b) in cases where they are used externally and fitted with dishd tops and gratings. In such case the dish must be in one piece with the trap, or jointed thereto spigot and socket, and the depth of the dish from the top to the grating must not be less than 6 inches, and the grating must be removable. Gully-traps must be fixed within 15 feet of back or kitchen door where possible.

The term "disconnector" is applied to traps in cases where provision has to be made for inlet ventilation to the pipe or pipes discharging therein.

No gully or disconnecting trap must be enclosed by any building or walls or fixed under any roof.

All traps must have a water-seal of at least half the diameter of the outlet pipe, but in no case of less than 2½ inches.

Unless a slop sink be fixed inside the building a gully-trap must be provided in the yard of every house, placed as near as possible to the kitchen door with a tap placed over it at a height of about 2 feet, except in cases where the owner desires the tap to be placed higher.

Gully-trap basins and tops of silt traps must be surrounded with concrete neatly rendered inside and on top with cement mortar. The internal diameter of concrete around gully-traps measured from face of cement rendering must not be less than 15 inches, and must be neatly rounded to meet the gully top. The walls at rear of gully and silt traps, if of brick or stone, must be cement rendered to height of tap; if traps abut against a wooden wall, a sheet of galvanized iron apron must be fixed.

The top of all traps must be at least 6 inches above the surface of the surrounding ground.

Gratings to gully-traps must not be less than 6½ inches over all, and the gratings to all disconnector traps to be convex in section, with openings of suitable outlet capacity. (See type drawings.)

All gratings must be fixed down in an approved manner with bitumen or wedges of lead.

When the connecting drain is considerably deeper than the depth at which the private drain will be required to be laid to provide for existing or future cellar drainage, the private drain, instead of being connected directly to the connecting drain, may, if approved, be connected to a jump-up or vertical extension from the same.

#### Water Supply.

26. All water-closets and other plumbing fixtures must be provided with a sufficient supply of water for flushing purposes to keep them at all times in a proper and cleanly condition. All water pipes to be laid in the ground unless by permission of the engineer.

Every owner of property who shall desire, or who shall have been ordered by the Authority to provide sanitary appliances for his property, and to connect the same with the sewers of the Authority, must, prior to or at the commencement of the work of making such connexion, provide piping approved by the Authority for the conveyance of water, and cause the same to be joined to the most convenient water supply main, or, with the permission of the engineer, to some pipe already joined thereto, which piping must be of capacity sufficient to supply all sanitary fittings on the premises freely and continuously and convey to the flushing cistern of each water-closet upon the property enough water to fill cistern within five minutes, and he shall cause such piping to be connected with such cistern prior to the completion of the work.

No water service pipe shall be laid to supply any sanitary fitting in any property in the drainage area unless such fitting be connected with the sewers of the Authority; or unless the special permission of the Authority in writing shall have been previously given to lay on such water supply.

The piping to convey a supply of water to the tenement for sanitary uses shall not, for the purpose of obtaining such supply, be joined to the piping which conveys water to another tenement for general purposes.

Water supply pipes to storage tanks for internal closets must be  $\frac{1}{2}$  inch diameter for tanks of up to 20 gallons, and  $\frac{3}{4}$  inch for tanks of larger size, and be provided with high-pressure ball-taps, except where the height of the storage tank is not sufficient to allow of high-pressure ball-taps being used when low-pressure ball-taps may, with the consent of the engineer, be used.

Outlets from storage tanks must not be less than  $\frac{3}{4}$  inch when supplying one or two cisterns and 1 inch for three to six cisterns. Whenever a larger number than six cisterns is fixed, the size of the outlet must be increased. The overflow from storage tanks must be  $1\frac{1}{2}$  inches in diameter, and a stop-tap must be fixed on the rising supply pipe to tank. Full-way valves must be fitted to all outlet pipes.

Where any deviation from these provisions is desired, in special circumstances, an application in writing (in addition to the plumber's notice) must be made, and must distinctly state the reasons why such deviation is required, and pending the consent of the Authority the work must not be undertaken.

In all water-closets a piece of lead pipe not less than 12 inches in length, or specially approved copper connexion must be used between the flushing cistern and the supply pipe unless allowed to be dispensed with by the engineer after special application.

#### Plumbing Rules—General.

27. Separate internal wastes shall be provided for each of the following classes of polluted waters, except by permission of the engineer:—

- (1) Dirty water from baths, pantry, and china-closet sinks, lavatories, and wash-troughs, and other waters with a small proportion of soap and dirt.
- (2) Greasy water from kitchen and scullery sinks where grease-traps are required.
- (3) Soil water from closets and other water containing faecal matter, and urinal water from housemaids' slop sinks and public and private urinals.

Each of these separate waste pipes, except those specified in class (3) must be connected with the drains through a gully or disconnector trap, unless by permission of the engineer. No waste or water pipe must be fixed on any portion of gully apron.

The ends of waste pipes discharging into gully basins to finish flush with the internal face of the basin.

No waste pipe shall be laid on the ground outside any building unless by special permission, and then surrounded with 3 inches of concrete.

No material shall be used within the building for soil, vent, or waste pipes other than wrought or cast-iron pipes with securely screwed or leaded joints or lead pipes with wiped joints. Cement or putty joints, or tin or sheet-iron pipes, whether galvanized or not, shall not be used.

In all cases the upward extension from the soil pipe for ventilation must pass in as direct a manner as possible above, and, if necessary, through the roof.

All sinks and other fittings fixed in basements or below surface level must have full-way stop-tap fixed on waste pipe. The following are the minimum sizes of soil, waste, and vent pipes and weights of lead, soil, waste, and vent pipes

which must be used throughout unless otherwise specially ordered by the superintending officer:—

Fitting.	Diameter of waste pipe.	Minimum weight of lead waste pipe.	Diameter of vent pipe.	Minimum weight of lead vent pipe.
	Inches.	lb. per foot.	Inches.	lb. per foot.
One wash basin ..	$1\frac{1}{2}$ to $1\frac{1}{2}$	6	$1\frac{1}{2}$	6
Row of wash basins ..	$1\frac{1}{2}$ to 2	6	$1\frac{1}{2}$	6
Wash basin overflow ..	$1\frac{1}{2}$ to $1\frac{1}{2}$	6	..	..
One bath ..	2	6	$1\frac{1}{2}$	6
Combined waste for baths ..	2 to 3	6	2 to $2\frac{1}{2}$	6
Bath overflows ..	$1\frac{1}{2}$ to 2	6	..	..
Wash tub ..	2	6	$1\frac{1}{2}$	6
Set of tubs ..	2	6	$1\frac{1}{2}$ to 2	6
Kitchen sink ..	2	6	2	6
Pantry sink ..	2	6	2	6
Slop sink ..	3 to $3\frac{1}{2}$	7	2 to $2\frac{1}{2}$	7
One urinal ..	$1\frac{1}{2}$	7	$1\frac{1}{2}$	7
Row of urinals ..	2	7	$1\frac{1}{2}$ to 2	7
Soil pipes ..	4	7	2 to 3	7

All cast-iron pipes must be sound, free from holes and cracks, and coated with Dr. Angus Smith's solution, tar, or asphaltum or other coating approved by the engineer.

The following weights will be accepted standards:—

2 inches diameter,  $5\frac{1}{2}$  lb. per lineal foot.

3 inches diameter, 8 lb. per lineal foot.

4 inches diameter,  $13\frac{1}{2}$  lb. per lineal foot.

All wrought-iron pipes must be of approved standard weight and quality and galvanized or coated to the satisfaction of the Authority.

All fittings used in connexion with such pipes shall correspond with them in weight and quality. All junctions must be curved; right-angled junctions must not be made.

Where lead pipe is used for waste or vent pipes, such lead pipe must weigh not less than 6 lb. per foot; but where, in the opinion of the engineer, a heavier weight may be required, such heavier weight as the engineer shall desire must be used.

No cast-iron pipe laid in the ground shall be less than the standard weights given in this By-law, but for cast-iron soil, waste, and vent pipes in other positions and for glass-enamelled pipes, the following modifications will be allowed, viz:—

Cast-iron soil and waste pipes, minimum thickness  $\frac{1}{4}$  inch.

Cast-iron ventilation pipes, 2 inches, 3 inches, and 4 inches diameter; minimum thickness, 3-16th inch.

Glass-enamelled pipe, if not under heavy pressure, may be 3-16th inch in thickness, without coating, for 3 or 4-in. soil or waste pipes. Glass-enamelled pipes shall be measured without enamel.

All soil pipes shall be at least 4 inches in diameter.

Where lead, cast-iron, wrought-iron, soil, waste, or vent pipes are fixed outside a wall for upstairs fittings, the cast-iron, lead, or wrought-iron pipes must be carried up above the level of the highest fitting attached to the pipe.

Sufficient inspection and cleaning eyes must be provided in such positions on cast or wrought-iron or lead wastes as to be easy of access for proper cleansing of every part or portion of these wastes.

Where inspection openings are provided to cast-iron soil and waste pipes, preference must be given to insertion cloth washers before red lead and the inspection openings must have a flange at least  $\frac{1}{2}$  inch wide.

All cast-iron inspection openings must be of M.M.B.W. pattern.

The soil, waste, and vent pipes and traps must, where practicable, be exposed to view at all times for ready inspection and for convenience of repairing. When unavoidably placed within partitions or recesses of walls, soil, waste, or vent pipes must be covered with woodwork so fastened with screws as to be readily removable.

Bolted Clips.—Soil, waste, and vent pipes must be fixed to brick or stone walls with approved bolted clips, to be let into wall and properly run with molten lead and well caulked.

The arrangements of soil and waste pipes must be as direct as possible.

The following are the minimum gradients to be adopted:—

Size of Pipes, Gradients.	Size of Pipes, Gradients.
6 inches, 1 in 60.	$1\frac{1}{2}$ inches, 1 in 15.
4 inches, 1 in 40.	$1\frac{1}{2}$ inches, 1 in 12.
3 inches, 1 in 30.	1 inch, 1 in 10.
2 inches, 1 in 20.	

No variation will be allowed except by permission of the engineer.

The area of openings in gratings to any waste must not be less than will fully charge the waste pipe to which it is attached, and must be in accordance with the Authority's standard drawings.

Traps to be connected to outlets of fittings by means of a full-way cap and lining where possible.

A main waste pipe into which lavatories, baths, or sinks discharge must be at least 2 inches in diameter.

External vent pipes of galvanized sheet-iron must be of not less gauge than the following:—

Diameter—  
 $1\frac{1}{2}$  inches, 2 inches, and  $2\frac{1}{2}$  inches, 22-gauge galvanized iron.

3 inches and 4 inches, 20-gauge galvanized iron.

6 inches, 18-gauge galvanized iron.

Vent pipes, if inside a building, must in all cases be of cast or wrought-iron or lead. Grooved or riveted double galvanized iron vent pipes may be used where they are entirely outside a building, and these must be connected with the traps or waste pipes with brass ferrules, or other joints approved by the engineer.

The various vent pipes may be branched into a soil or waste pipe of the same class above the level of the highest fixture. They may be combined by branching together those which serve several traps of the same class.

In cases of combined 2-in. waste pipes the vent pipe must not be less than 2 inches in diameter.

Vent pipes must always have a continuous slope, to avoid collecting water by condensation.

Vent pipes shall not be used as waste or soil pipes.

Galvanized sheet-iron vent pipes may be used inside stables or open sheds in place of cast-iron pipes, except where liable to blows from vehicles or other external damage.

In all cases where the vertical stack of soil pipe provides for closets 4 feet or more above ground level, a short length of pipe, with inspection opening cover close to the ground, clamped to a flange on the pipe with bolts, must be fixed. All vertical soil pipes branched into a horizontal soil pipe must do so at an angle of 45 degrees, unless by special permission.

All junctions on soil or waste pipes fixed horizontal must not be less than 45 degrees and fitted with inspection openings.

Lead pipes must not be used under ground floors where they are inaccessible or in the soil. In such places cast or wrought-iron must be used.

Anti-syphonage vent pipes of fittings discharging into gully or disconnector traps must be carried above the eaves of the building, unless special permission to the contrary be granted by the engineer. These vent pipes must be branched to the waste as near as possible to the trap.

Where an additional vent branch is required to a galvanized sheet-iron vent pipe already fixed, a brass saddle piece, bolted and soldered to the existing vent, must be used.

Waste pipes from disconnected fittings need not be ventilated unless they exceed 12 feet inclined or 18 feet vertical in length (or their equivalent); branch wastes to such fittings, if connected with the ventilated main waste, provided there be no other fittings attached to the line of waste, may be 6 feet in length without being ventilated, unless syphonage occurs in a trap in which case a vent pipe must be supplied to the waste of that trap.

Concealed standing wastes are not allowed.

Spacing of lead tacks must be arranged as nearly as possible, thus—

4-in. vertical lead pipes, 2 ft. 6 in. centres.

4-in. horizontal lead pipes, 2 feet centres.

Less than 4-in. vertical lead pipes, 3 feet centres.

Less than 4-in. horizontal pipes, 2 ft. 3 in. centres.

One pair of tacks fixed opposite is sufficient for lead-flush pipes for cisterns with lugs; in other cases an extra tack must be fixed as near to the cistern as possible.

All sinks and lavatory basins, if constructed with overflows, such overflows must be of the weir type.

Where water might otherwise percolate to the floor, baths, troughs, and the like fittings must be flashed with sheet-lead of not less than 4 lb. per square foot weight, or other approved material. All flashings must be turned up walls at least 4 inches, properly secured, and made watertight. This provision shall not apply to the sinks, which are specially provided for under this By-law.

Whenever a fitting is abolished, the soil, waste vent, and water supply pipes to such fitting must be removed, or if allowed by the Authority to remain, the ends of pipes must be sealed with watertight, imperishable materials. Wrought-iron pipe must be sealed with screwed plug; a cast-iron pipe must have cast-iron plug caulked in with lead; lead pipe must have end securely closed with properly wiped joint; stoneware or cement concrete pipe must have a disc cemented in.

All hotels and bars must have approved glass washers in addition to bar sinks.

#### *Joints—Plumbing.*

28. All connexions of lead waste and vent pipes shall be made by means of wiped joints.

All connexions of galvanized sheet-iron pipes to cast-iron pipes shall be made with molten lead, and be lightly caulked.

Brass sockets or sleeves must be used in connecting galvanized sheet-iron to wrought-iron pipes, and proper brass sleeves must be used in connecting galvanized sheet-iron pipes to lead pipes. Sheet-iron pipes must not be soldered to lead pipes.

In connecting galvanized wrought-iron waste pipes, the ends of the pipes must be butted by means of short sockets of a minimum length of 1½ inches, and the pipes must be sufficiently threaded to allow of the butting being done, and all burrs must be removed before the pipes are fitted.

The flushing pipe from cistern to water-closet must be connected by a lead bend and cap-piece with red lead packing.

Vent pipes must be connected to the vent horn of the water-closet trap by a lead cap-piece with red lead packing.

#### *Trapping Fittings.*

29. Every water-closet, urinal, lavatory, slop, bar, or other sink, bath, and wash trough or set of wash troughs must be separately and effectively trapped.

Traps must be placed as near to the fittings as possible, and in no case shall a trap be more than 2 feet from a fitting, unless specially allowed by the engineer.

In the event of trap syphoning, it must be prevented by a special pipe connected to the waste pipe at a point not less than 3 nor more than 12 inches from the highest part of the trap, and on that side of the water seal which is nearest to the soil or waste pipe.

All lead traps must be drawn lead pipe weighing 7 lb. to the foot.

All traps must have a water seal of at least half the diameter of the outlet pipe, but in no case of less than 2½ inches.

The P form of traps, with wastes above floors, and with joints visible and accessible all round, must be used in all internal fittings where possible.

The S form of traps, with wastes under floors, shall only be used by special permission. Where used, facilities for periodical inspection must be provided.

In detached closets and urinals approved S forms in earthenware, with joints visible and accessible all round, may be used.

All closet pans and slop hoppers must be provided with a vent horn attached to the trap.

All fittings must be trapped.

#### *Grease Traps.*

30. Every grease trap shall be fixed outside the premises wherever possible, and (if not portable) must be of stoneware, slate, or cement concrete, and attached directly to the drain or disconnector trap.

The size of grease traps in ordinary cases must be as nearly as possible the following, viz:—Portable copper, 21 inches in length; stoneware or cement concrete, 27 inches in length; or otherwise, as ordered by the engineer.

Wherever a copper grease trap is used inside a building it must be fitted so as to be easily movable.

The size of grease trap discharge pipes, except in special cases, must not be less than 3 inches for copper and 4 inches for stoneware or cement concrete.

All large grease traps which are built in brick concrete or slate must be constructed according to the Authority's drawings and specifications, and must have provision made for inlet and outlet ventilation.

Sinks in all such places as food-packing houses, butchers' shops, lard-rendering establishments, hotels, restaurants, boardinghouses and laundries, and wherever ordered by the engineer, shall be provided with suitable approved grease traps.

#### *Water-Closets and Latrines.*

31. The area of any external water-closet must not be less than 13½ square feet, with a minimum internal dimension of 3 feet inside measurements. The minimum heights to be not less than 8 feet at back and 7 feet at front measured from the floor to the top of wall plate. The floors of all water-closets must be constructed of concrete, tiles, or other approved impervious and non-absorbent material. Seats must be either flap or hinged tip-up. The area of any internal water-closet must not be less than 15 square feet, with a minimum internal dimension of 3 feet inside measurements, except by permission of the engineer.

Every internal water-closet shall be constructed in such a position that one of its sides at least shall be an external wall which shall abut immediately upon the street, or upon a yard, or garden, or open space of not less than 100 square feet of superficial area, measured horizontally at a point below the floor of such closet. Such water-closet shall not be constructed so that it is entered directly from any room used for the purpose of human habitation, or for the manufacture, preparation, or storage of food for man, or used as a factory, workshop, or work place. Such water-closet shall be constructed so that on any side on which it would abut on a room intended for human habitation, or use for the manufacture, preparation, or storage of food for man, or used as a factory, workshop, or work place, it shall be enclosed by an air-tight partition of brick or other approved material, extending the entire height from floor to ceiling. Such water-closet apartment must be entered only from a well-lighted and well-ventilated hall, passage, lobby, or staircase; or, if proposed to be fixed in or adjoining a room used for the purpose of human habitation, or as a factory, workshop, or work place, must be cut off from such room, factory, workshop, or work place by a separate enclosure adjoining the closet apartment. Such enclosure must have a floor area of at least 20 square feet per closet, and must be enclosed on all sides with air-tight partitions extending from floor to ceiling, or ceiled over with an airtight ceiling at an approved height from floor. Such hall, passage, lobby, staircase, or enclosure must be provided with a window having an area of at least 2 square feet, opening directly into the external air. If such method of lighting enclosure be impracticable, other methods of naturally lighting same must be provided. Such water-closet apartment must be provided with a window of such dimensions that an area of at least 2 square feet, exclusive of frame, shall open directly into the external air. In addition to a window, such water-closet apartment, and such hall, passage, lobby, staircase, or enclosure must be provided with independent, adequate means

of constant inlet and outlet ventilation by means of air bricks built in external wall of such water-closet apartment, hall, passage, lobby, staircase, or enclosure, or by combination of an air-brick and an air-shaft louvred openings, or by some other effectual method or appliance for ventilation. The effective area provided for outlet ventilation of each water-closet, apartment, hall, passage, lobby, staircase, or enclosure must not be less than 27 square inches, and where the level of the floor of closet is lower than the outside surface of the ground, exhaust ventilation must be provided by means of a tube at least 6 inches in diameter, carried up through roof and furnished with cowl.

All internal water-closets and air locks must have separate 6-in. diameter ventilating shafts and cowls and bell mouths covered with fine mesh wire.

The water-closets shall be furnished with a basin of non-absorbent material of such shape, capacity, and mode of construction as to receive and contain a sufficient quantity of water, and to allow all filth which may from time to time be deposited in such basin to fall free of the sides thereof and direct into the water received and contained in the basin. To prevent fouling of pan the closet seat openings must not be larger than 10½ inches x 9 inches, and seats with holes so large as to cause fouling of the pan must not be used. Pans must measure at least 12 inches between the lower edge of the front and back faces of flushing rims. Water-closet seats must be provided with four approved buffers to prevent damage to the pan, and an approved buffer clip must be fixed to the flush pipe at a suitable height from the pan.

All seats to be fitted with caps and risers.

Closet pans and fittings thereto must be entirely open to inspection without any enclosure.

A suitable apparatus must be provided for the effective application of water to the basin of the water-closet, and for the effective flushing and cleansing of such basin, and for the prompt and effective removal therefrom of any solid or liquid filth which may from time to time be deposited therein.

Every closet pan shall be furnished with a separate approved cast-iron flushing cistern fitted with cast-iron cover or other apparatus approved by the Authority of 3 gallons capacity, which shall be so constructed, fitted, and placed as to admit of the supply of water for use in such closet pan without any direct communication with any service pipe upon the premises.

The flush pipe from such cistern shall in no case be less than 1½ inches internal diameter, and shall be fitted as straight as possible under the circumstances. The bottom of every such cistern shall be at least 5 feet above the closet seat, but in cases where this distance cannot be obtained in existing buildings without structural alteration 4 feet will be allowed; but the internal diameter of the down pipe must then be 1½ inches. Every cistern must be fixed so that the ball-tap shall be accessible. Cisterns of all closets must have a separate stop-tap to each. Cistern boards must be in one piece, not less than 10 inches deep and 1½ inches thick.

All water-closets inside a main building must be vented either by a soil vent pipe or, if considered necessary by the engineer, by back venting the trap at a point near the crown of the trap where directed.

All flush pipes must have a short lead bend on bottom end of same.

In every case where there is more than one closet on an upstairs floor, provision must be made for ventilating in an approved manner to prevent syphonage, and so as to have a current of air continually passing through the soil pipes.

Where a closet branch does not exceed fifteen 15 feet in length a two (2) inch back vent may be substituted for soil vent pipe.

Where there are more than three closets on the ground floor, special provision must be made to prevent syphonage.

Where the branch from the closet to the main soil pipe is not more than 3 feet in length, and such closet is the only one attached to the soil pipe, the branch may be allowed to remain without any further ventilating.

Internal water-closets must be provided with storage tanks with covers capable of holding 6 gallons of water for each occupant of the building. These tanks may be of 22-gauge galvanized sheet-iron, or 24-gauge corrugated-iron. The storage tanks may be placed in the closet room itself, on the roof over a flat or gutter, or in an accessible place between the ceiling and the roof, in which latter case a galvanized sheet iron or lead safe, with overflow, must be fixed under the storage tank, unless the owner in writing otherwise requires.

In wooden closet buildings the base must be constructed or repaired according to the Authority's drawings and specifications. Such closets must be made rigid, and not attached to fences.

All concrete floors of water-closets must be 4 inches thick and reinforced with approved fabric.

On tiled floors the pan must be secured to approved wooden plugs fixed in the floor. On concrete floors the pan to be secured by cast-lead dowels. In each case the pan must be bedded on cement mortar and neatly pointed up. External closet doors to be saw-toothed on top, and a space of 3 inches left between bottom of door and floor, or other approved means of ventilation provided.

In hotels and lodging houses one water-closet must be provided for every ten lodgers the house can accommodate, placed in suitable positions for males and females separately; and in hotels urinal conveniences must also be provided for the

public frequenting the premises. In all other cases water-closets must be provided where required, and in accordance with orders issued by the Authority.

A pedestal pan must be used wherever combined water-closet, housemaid's slop sink, and internal urinals are required, and in such case must be provided with hinged tip-up seat. A lead safe of suitable area must be fixed under the pan.

All hotels, clubs, large boardinghouses, halls, places of amusement, and any other places considered necessary by the Authority must install one or more urinals as considered adequate.

#### Urinals.

32. Internal cradle urinals will only be allowed by permission of the engineer, and, where permitted, they must be small, free from projecting ornament, and of non-absorbent material. The waste pipes shall be of pottery ware, lead, or glass enamelled, or coated cast-iron, and be kept as short and free from bends as possible. The waste pipes must be trapped and discharge direct into the drain or soil pipe, except where special permission is given to do otherwise. The urinals must be provided with approved flushing apparatus.

The floors under urinals must be covered with non-absorbent material. The floors of the urinals must be tiled or paved with a fall towards the drain against the wall. The walls behind and screens between urinals must be of a non-absorbent material, and of approved height. The screens must also be free from the floor for a portion of the width of the division, must project at least 1½ feet, and be of not less than 2 feet apart. Approved forms of stall urinals will be allowed.

The following materials will be considered impervious:—

- (1) For Urinal Walls.—Slate, white or brown porcelain, enamelled fireclay or stoneware, salt-glazed stoneware, and enamelled cast-iron, Portland cement mortar composed of equal parts of cement and sand, finished with approved material.
- (2) For Floors.—Glazed tiles, Portland cement mortar composed of equal parts of sand and cement brought to an approved finish with an approved finishing material, slate, and marble.

Urinals inside a building must only be fixed in well-lighted and well-ventilated rooms having at least one external wall, and separated from any portion or portions of building by a well-lighted and well-ventilated passage or air chamber.

The positions, approaches, arrangement of lighting, ventilation, &c., for internal urinals must comply as nearly as possible with this By-law as to internal closets.

In outside urinals, where a floor or urinal disconnecting trap is used, the waste water from a single urinal must discharge into the drain or soil pipe.

Outside urinals may discharge into open channels leading to disconnector traps without further trap.

All cast-iron gratings must be galvanized.

Open channels must not be provided for urinals inside main buildings, except where approved by the engineer, and where there is ample ventilation and light. Wherever inside urinals are provided the traps must be fitted with ventilating pipes having an internal diameter of not less than 1½ inches.

Urinal wastes must be connected directly to the drain if no soil pipe is convenient, and must be trapped and vented in an approved manner.

Wherever urinals are provided with wastes and traps and drippings may become a nuisance, provision must be made to prevent the nuisance by one of the following methods:—

- (a) By a urinal floor trap, with the floor graded to the trap where the floor is tiled or cemented.
- (b) By a suitable sunken trap, trapped and connected with the waste, where the floor is covered with lead.

In either case suitable provision must be made for retaining the seal of the floor trap, and for flushing the surface of the trap.

A separate trap must be provided to each urinal basin.

#### Urinal Cisterns.

33. Flush pipes for cisterns generally must not exceed—

- |                                    |  |
|------------------------------------|--|
| 1-gallon cistern, 3-in. diameter,  | } with branches as directed by the engineer. |
| 2-gallon cistern, 1½-in. diameter, |  |
| 3-gallon cistern, 1¼-in. diameter, |  |

The height of cisterns must, except by special permission, be at least 6 ft. 6 in. from the floor to the bottom of the cistern. The cistern must be so fixed that the ball tap shall be accessible.

Pull and chain flushing cisterns approved of by the Authority or other approved apparatus operated by hand must be fixed on all urinals.

The discharge must be equal to one gallon for each urinal stall, except where otherwise allowed by the engineer.

In a combination of two urinals, one 2-gallon cistern may be allowed.

A separate stop-tap must be provided for each urinal cistern.

Where the sparge pipe system of flushing urinals is adopted, such sparge pipes must be of brass or copper, with gun-metal fittings and unions.

Flush pipes connecting urinal cisterns to spreaders must be of brass or copper tube, and connected to the brass union coupling, attached to the cistern with a brass reducing socket screwed to the coupling.

*Housemaids' Slop Sinks.*

34. Slop sinks must be of approved material, and be provided with approved flushing arrangements.

The waste pipes from slop sinks must be branched into a soil pipe, or connected directly and independently to the drain. Draw-off taps must not be used directly over slop sinks unless at least 18 inches above the sink.

A slop sink must be treated in the same way as a closet.

All insanitary slop sinks must be abolished.

Only approved pedestal slop sinks with hinged grids will be allowed.

All hotels, hospitals, and large boarding-houses must be provided with one or more slop sinks, as found necessary.

*Hotel, Kitchen, Scullery Sinks, and Troughs.*

35. Unless where otherwise specially approved, kitchen, hotel bar, and scullery sinks and wash-troughs must discharge into the open air over a gully-trap or into a disconnector trap. The trap, main, and branch waste pipes must not be less than two inches in diameter.

The brass strainer must be sunk to the level of the trough. The grating openings must be of ample size to fill the waste pipe full bore.

All sink wastes must discharge under the grating if discharging into gully disconnector trap.

Where sinks and draining boards thereto abut against walls or partitions of living rooms they must, except by special permission, have suitable lead flashing weighing not less than 5 lb. per square foot carried up the walls not less than four inches, and securely fastened and made watertight. Sinks may be fixed on brackets, and the space between floor and the under portion of sink must be entirely open, without any enclosure.

Where the distance between the outlets of troughs exceeds 21-in. centres, and lead pipe is used, the pipe must be supported either by a lead tack wiped on the top of the pipe or by wooden blocks screwed to the bottom of the trough and clamped to the pipe. The pipe passing through the troughs must have a lead flange wiped on.

Wherever the end of a wash-trough abuts against or is within 4 inches of the brickwork of washing copper, the space between the end of trough and the brickwork must be made thoroughly watertight.

The use of unlined wooden boxes as kitchen or scullery sinks is prohibited. Before their connexion with the Authority's sewers will be permitted, wooden boxes must be lined inside with sheet lead weighing not less than 6 lb. per square foot, or with sheet copper weighing not less than 1½ lb. per square foot.

*Baths and Lavatories.*

36. The waste-pipe from a bath or set of lavatories must be at least 2 inches in diameter, properly trapped and provided with a 1½-in. vent pipe for the bath and 1½-in. vent pipe for the lavatory. The waste pipe must be carried separately to the open air, and delivered over a gully-trap or into a disconnector trap.

All baths fixed on concrete or tiled floors must have hospital-traps attached to same and provision left in floors for cleaning trap and waste.

The waste pipe and trap from a single lavatory must be at least 1½ inches in diameter, and the area of the grating must be sufficient for the water to effectually scour the waste pipe. The waste pipe must be as short as possible, and discharge over a gully-trap or into disconnector trap.

From two to six lavatories must have at least 1½-in. combined waste pipe; and from seven to twelve, a 2-in. waste.

In all internal lavatories where syphoning occurs separate trap ventilation must be provided.

The erection or use of tip-up basins is prohibittel.

Where it is necessary to fix new waste to galvanized-iron baths, the bottoms of which are unsupported, efficient supports for the bath must be provided before the wastes are fixed.

Where a bath trap is fixed on the outside of a wall, it must in no case be more than 2 feet from the outlet of bath, unless with special permission of the engineer.

Where pedestal baths are to be fixed, and it is not desired to flash them, they must be fixed with a space of at least 6 inches clear of walls. If less than 6 inches is desired special permission may be granted.

*Safes, Overflows, &c.*

37. Unless where otherwise allowed by the engineer, every safe under a water-closet, urinal, lavatory, bath, refrigerator, sink, or other fixture, must be drained by special pipe not directly connected with any waste pipe, soil pipe, drain, or sewer. It must be provided at the outlet into the open air with flap valves of brass or other approved metal.

All lead safes must be laid with sheet lead weighing not less than 5 lb. per square foot, and where the whole floor is not laid with lead the safe to extend 12 inches beyond the sides and 15 inches beyond the front of the pan, measured from the outside of the basin, and shall extend back to and 3 inches up the wall, and overflowed if necessary.

In the case of baths, sinks, and lavatory basins, the lead where directed to extend 6 inches beyond the end or sides, measured from the extreme edge of the fitting, and to be carried back to and up the wall as for closets.

Pipes draining safes may discharge into the open air only when the discharge will not cause any inconvenience or nuisance. In all other cases the pipes must be brought to the ground surface, or be arranged to discharge where they will not prove a source of annoyance or inconvenience.

Pipes for bath safes must be of 2 inches diameter and those from closet and urinal safes must be of 1½ inches.

A brass grating must be fixed to the inlet of each safe pipe.

No steam exhaust, blow-off, or drip pipe shall be connected with the drain or sewer, or with any soil or waste pipe.

Such pipes must discharge into the rain water channels.

On special application of the owner, lead safes already in position may be retained only under the conditions stipulated for existing fittings.

Lead safes for slop sinks to be laid the same as for closets.

It shall be compulsory to fix a lead safe or other impervious material under a bath or basin on an upstairs floor.

Existing bath floors must be regraded, if necessary in the opinion of the Authority's inspecting officer, and a proper waste pipe and flap valve must be fixed.

On ground floors where cisterns are fixed over concrete or tiled floors graded to drain outside of the room, the overflow may discharge on to them, provided no damage is likely to arise therefrom.

Overflows from cisterns wherever possible must be taken through external walls, and must discharge inside the owner's property, but in exceptional cases permission may be given to discharge into a slop sink or other fitting, or on to a lead safe which has a drainage pipe attached.

*Gratings.*

38. The entrance to exit pipes to all fixtures, except water-closets, shall be furnished with suitable permanently attached gratings.

*Consent, Sanction, &c., of the Authority.*

39. Where the sanction, permission, authority, consent, approval, satisfaction, order, direction, opinion, indication, or notice of or from the Authority is necessary, whether special, in writing, or otherwise, with regard to any act, matter, or thing mentioned in this By-law, the same may be given by and under the hand of the chairman of the Authority, or of the engineer personally or through an inspecting officer appointed under him, who severally shall be competent to give the same and authorized on behalf of the Authority to prescribe any conditions attaching thereto, and subject to and in accordance with which only the same shall be deemed to have been given.

*Power of Exemption.*

40. In any case in which the Authority shall be of opinion, owing to the configuration of the ground or the distance, height, or character of adjoining buildings or for any other reason (whether similar in character to the instances above given or not) that a compliance with any of the foregoing provisions of this By-law would in the particular case be vexatious or needless in the interests of public health or the Authority, or injurious to the public health, it shall be lawful for the Authority by resolution, to dispense with or forbid such compliance in whole or in part as it shall think fit, or to authorize or direct such a modification or alteration of such provisions as shall in its opinion most nearly adapt the principle of such provision to such particular case. It shall be unlawful to comply with any provision or part thereof compliance whereof shall have been forbidden as aforesaid, or to act contrary to or otherwise than as directed by such modification or alteration as aforesaid.

*Offences and Penalties.*

41. Where anything is by this By-law directed to be done, or forbidden to be done, or where any authority is given to the Authority or any of its officers to direct or to forbid anything to be done, and such act so directed to be done remains undone, or such act so forbidden to be done is done, then, and in every such case, the person making default as to said direction or prohibition respectively, shall be guilty of an offence against this By-law. Every person guilty of an offence against this By-law not otherwise specially provided for by or under the authority hereof shall be liable for every such offence, beside any costs or expenses which may be incurred in the taking of proceedings against such person guilty of such offence, as well as any costs or expenses which may be incurred in remedying such default, as particularly provided for in this By-law or the Act to a penalty not exceeding Twenty pounds, and to a further penalty of One pound for each day during which such offence is continued by such person after notice of the offence shall have been given by the Authority to him, and such penalty shall be recoverable, notwithstanding that the Authority may not have chosen to exercise any power given to it by the Acts or by this By-law to remedy such default.

*Interpretation.*

42. In the construction of this By-law the meaning which in the Acts is assigned to any word shall be the meaning of the same word where occurring in this By-law, unless inconsistent with the subject-matter or context.

The foregoing By-law was made and passed by the Swan Hill Sewerage Authority on the nineteenth day of May, 1933, and was confirmed on the second day of June, 1933.

In witness whereof the common seal of the said Authority was affixed hereto in the presence of—

## FURTHER AMENDMENT OF BOOT TRADES REGULATIONS (No. 2).

WHEREAS, in pursuance of the *Apprenticeship Act 1928* (No. 3636) the Governor in Council did, on the 26th day of July, 1932, make Regulations entitled *Boot Trades Regulations* (No. 2): And whereas it is expedient to amend the said Regulations: Now therefore, in pursuance of the powers conferred upon him by sub-section (3) of section 29 of the *Acts Interpretation Act 1928*, and of any other powers him thereunto enabling, His Excellency the Lieutenant-Governor of the State of Victoria, by and with the advice of the Executive Council thereof, doth hereby amend the said Regulations as follows, that is to say:—

## ADDITIONS TO TERMS AND CONDITIONS OF INDENTURES OF APPRENTICESHIP.

At the end of paragraph (c) (i) of the Employers' Covenants contained in the Second Schedule to the General Regulations (No. 2) as incorporated by Regulation 5 of the *Boot Trades Regulations* (No. 2), add the following proviso:—

Provided that where he is temporarily unable to provide such work as will keep the apprentice fully employed during any ordinary working week or month he may, with the approval of the Apprenticeship Commission of Victoria, employ the apprentice for such less time in any such week or month as may, on the application of such employer, be determined by the said Commission, at wages proportionate to those which he is required under the provisions of this paragraph to pay to the apprentice when employed during the whole of any ordinary working week or month:

And at the end of paragraph (3) of the Mutual Agreements contained in the said schedule as incorporated by the aforesaid Regulation 5, add the following proviso:—

Provided, further, that where the apprentice is required under the provisions of the proviso to paragraph (c) (i) hereof to work for less time than full time in any ordinary working week or month, the time so lost may, at the option of the apprentice, either be included in or excluded from the computation hereinbefore referred to.

The aforesaid provisos shall come into operation on and from the 1st day of July, 1933.

## FURTHER AMENDMENT OF CARPENTRY AND JOINERY REGULATIONS (No. 2).

WHEREAS, in pursuance of the *Apprenticeship Act 1927* (No. 3546), the Governor in Council did, on the 26th day of March, 1929, make Regulations entitled *Carpentry and Joinery Regulations* (No. 2): And whereas it is expedient to amend the said Regulations: Now therefore, in pursuance of the powers conferred upon him by sub-section (3) of section 29 of the *Acts Interpretation Act 1928*, and of any other powers him thereunto enabling, His Excellency the Lieutenant-Governor of the State of Victoria, by and with the advice of the Executive Council thereof, doth hereby amend the said Regulations as follows, that is to say:—

## ADDITIONS TO TERMS AND CONDITIONS OF INDENTURES OF APPRENTICESHIP.

At the end of paragraph (c) (i) of the Employer's Covenant contained in the Second Schedule to the General Regulations (No. 2) as incorporated by Regulation 5 of the *Carpentry and Joinery Regulations* (No. 2), add the following proviso:—

Provided that where he is temporarily unable to provide such work as will keep the apprentice fully employed during any ordinary working week or month he may, with the approval of the Apprenticeship Commission of Victoria, employ the apprentice for such less time in any such week or month as may, on the application of such employer, be determined by the said Commission, at wages proportionate to those which he is required under the provisions of this paragraph to pay to the apprentice when employed during the whole of any ordinary working week or month:

No. 128.—6902.—2

And at the end of paragraph (3) of the Mutual Agreements contained in the said schedule as incorporated by the aforesaid Regulation 5, add the following proviso:—

Provided, further, that where the apprentice is required under the provisions of the proviso to paragraph (c) (i) hereof to work for less time than full time in any ordinary working week or month, the time so lost may, at the option of the apprentice, either be included in or excluded from the computation hereinbefore referred to.

The aforesaid provisos shall come into operation on and from the 1st day of July, 1933.

## AMENDMENT OF ELECTRICAL TRADES REGULATIONS (No. 2).

WHEREAS, in pursuance of the *Apprenticeship Act 1927* (No. 3546), the Governor in Council did, on the 21st day of October, 1929, make Regulations entitled *Electrical Trades Regulations* (No. 2): And whereas it is expedient to amend the said Regulations: Now therefore, in pursuance of the powers conferred upon him by sub-section (3) of section 29 of the *Acts Interpretation Act 1928*, and of any other powers him thereunto enabling, His Excellency the Lieutenant-Governor of the State of Victoria, by and with the advice of the Executive Council thereof, doth hereby amend the said Regulations as follows, that is to say:—

## ADDITIONS TO TERMS AND CONDITIONS OF INDENTURES OF APPRENTICESHIP.

At the end of paragraph (c) (i) of the Employer's Covenants contained in the Second Schedule to the General Regulations (No. 2) as incorporated by Regulation 5 of the *Electrical Trades Regulations* (No. 2), add the following proviso:—

Provided that where he is temporarily unable to provide such work as will keep the apprentice fully employed during any ordinary working week or month he may, with the approval of the Apprenticeship Commission of Victoria, employ the apprentice for such less time in any such week or month as may, on the application of such employer, be determined by the said Commission, at wages proportionate to those which he is required under the provisions of this paragraph to pay to the apprentice when employed during the whole of any ordinary working week or month:

And at the end of paragraph (3) of the Mutual Agreements contained in the said schedule as incorporated by the aforesaid Regulation 5, add the following proviso:—

Provided, further, that where the apprentice is required under the provisions of the proviso to paragraph (c) (i) hereof to work for less time than full time in any ordinary working week or month, the time so lost may, at the option of the apprentice, either be included in or excluded from the computation hereinbefore referred to.

The aforesaid provisos shall come into operation on and from the 1st day of July, 1933.

## FURTHER AMENDMENT OF ELECTRICAL TRADES REGULATIONS (No. 3).

IN pursuance of the *Apprenticeship Acts* and the *Acts Interpretation Act 1928*, His Excellency the Lieutenant-Governor of the State of Victoria, by and with the advice of the Executive Council thereof, doth hereby make the following Regulations, that is to say:—

1. Regulation 4 of the *Electrical Trades Regulations* (No. 3) as amended by Order of the Governor in Council made on the twentieth day of April, 1931, shall be and the same is hereby rescinded as on and from the 30th day of June, 1933.

2. Such rescission shall not affect any right accrued or accruing to any person or any liability of any person under the said rescinded Regulation before the commencement of these Regulations.

3. For the said rescinded Regulation substitute the following:—

“4. The minimum rates of pay to be paid to apprentices as wages in each year of their apprenticeship course shall be as follows, and shall commence on the 30th day of June, 1933, on, from, and after which date all indentures of apprenticeship heretofore executed under the provisions of the Act and the Regulations made in respect of the aforesaid trades shall be deemed to be amended accordingly:—

1st year—at the rate of 15s. 6d. per week.  
2nd year—at the rate of 20s. 4d. per week.  
3rd year—at the rate of 32s. per week.

## ORDER APPROVING OF A NEW DEVELOPMENTAL ROAD IN THE SHIRE OF WODONGA.

WHEREAS the Country Roads Board constituted under the *Country Roads Act 1928* (No. 3662) has represented to His Excellency the Governor in Council that it appears to it desirable that the new Beechworth-Wodonga road in the Shire of Wodonga should be made by the said Board: And whereas the said Board in accordance with the requirements of section 19 of the said cited Act has caused to be prepared a map plan and estimate showing the points between which and on and through what land the said new road is proposed to be made and the cost of acquiring the land and constructing the said new road: And whereas on an inspection of the

said map and plan and a consideration of the said estimate His Excellency the Governor in Council is satisfied that there are funds legally available for acquiring the land and constructing the said new road: Now therefore be it known by this present Order that His Excellency the Lieutenant-Governor of the State of Victoria with the advice of the Executive Council thereof doth hereby approve of the said road being made, that is to say:—

All that piece of land in the Parish of Baranduda the boundaries of which are as follow:—Commencing at the southern angle of allotment 1A, section 13, of the said parish; thence by lines bearing respectively 326 deg. 0 min. 48 links, 258 deg. 33 min. 58 links, 47 deg. 22 min. 305 links, and 210 deg. 57 min. 274 links to the point of commencement—which said piece of land is particularly delineated and shown coloured red on survey plan No. 2885 lodged in the office of the Country Roads Board.

## DECLARATION OF A DEVIATION FROM THE ALLAMBEE-CHILDERS ROAD IN THE SHIRE OF NARRACAN.

WHEREAS by section 58 of the *Country Roads Act 1928* (No. 3662) it is amongst other things enacted that when the Country Roads Board under the provisions of the *Country Roads Act* has by Resolution declared a deviation to be a main road the said Board may also declare that such deviation shall be in lieu of any existing road or part thereof named in such Resolution and that on publication in the *Government Gazette* of the Order confirming such Resolution the existing road or part thereof shall cease to be a main road or be discontinued as provided in the Resolution: And whereas the said Board has by Resolution declared the deviation on the land described in the First Schedule to such Resolution to be a main road and has also declared that such deviation shall be in lieu of the part of the existing road being the land described in the Second Schedule to the said Resolution and that such part of the existing road as is described in the Third Schedule to such Resolution shall be discontinued: Now therefore His Excellency the Lieutenant-Governor of the State of Victoria by and with the advice of the Executive Council thereof doth hereby confirm the said Resolution.

## Resolution for Declaration of a Deviation under the Country Roads Act.

Whereas the land the site of the road the course of which is below set out was taken by the Board under the provisions of the *Country Roads Act 1928* for the purpose of constructing such a road deviation which road deviation has now been laid out and formed on the same: And whereas the said Board (being the Country Roads Board incorporated under the said Act) thinks that the road aforesaid is fit to be used as a public highway such Board at a meeting now holden acting under the authority conferred upon it by section 58 of the said Act doth by this present Resolution hereby declare the said road deviation the course of which is described in the First Schedule hereto with the commencing and terminating points thereof respectively specified to be part of a main road within the meaning and for the purposes of the *Country Roads Act 1928*: And the said Board doth also declare that such deviation shall be in lieu of the existing road or part thereof described in the Second Schedule hereto and further that such part of the existing road as is described in the Third Schedule hereto shall be discontinued.

## TENDERS FOR THE SERVICE 1933-34, ETC.

## GENERAL STORES OF COMMONWEALTH MANUFACTURE.

TENDERS will be received until Eleven o'clock a.m. on Friday, 14th July, 1933, from persons willing to furnish the undermentioned articles, in such quantities as may be ordered by the Victorian Government, for the eleven months commencing on 1st August, 1933:—

Schedule No.	Preliminary Deposit.
28. Clothing—Children's Welfare Department ..	£5
74. Timber (Sub-Schedule F) ..	5

The prices tendered must not include sales tax.

Security.—Ten per cent. on total amount of tender accepted, except when otherwise specified in the tender form, but in no case will security of less than £5 be received.

Schedules as above, with full particulars, may be obtained from the Secretary to the Tender Board, by whom also the samples will be shown and any information afforded to persons tendering.

In all cases the total cost of each item must be extended in the columns provided.

Tenders must be accompanied by the preliminary deposit, as shown above, by bank draft or marked cheque, in favour of the Secretary to the Tender Board. *Cheques, Savings Bank deposit books, fixed deposit receipts, State or Commonwealth Treasury bonds or Government debentures, or reference to securities on existing contracts will in no case be received or entertained as preliminary deposits.* Preliminary deposits will be returned within ten days to unsuccessful tenderers on their application.

The amount of the deposit required with each tender must be enclosed and the amount must be clearly written in and the designation stated, whether marked cheque or bank draft, as the case may be.

Security will be required, either in Bank Guarantee (Bank to be approved by the Tender Board), Victorian or Commonwealth Government debentures, Savings Bank deposit book, or deposit receipt in favour of the Secretary to the Tender Board, or cash deposit, as the tenderer may elect.

The security must be completed and contract signed within five days of acceptance of the tender, failing which the contract may be again advertised, or another tender accepted.

The Government will not necessarily accept the lowest or any tender.

In the event of tenderers withdrawing or attempting to withdraw their tenders before notification of acceptance of same, or failing to take up their accepted tenders within the prescribed period after notification of acceptance, the preliminary deposit will be forfeited, and, in addition, they may be disqualified from tendering or holding any future contracts for Government supplies for a period of twelve months, such disqualification to date from the notification of acceptance of tender. It is also stipulated that if a tenderer be a member of a firm and such firm be interested in the contract, then his tender is to be in the name of the firm and not in that of the individual; and that for a breach of this condition the preliminary deposit will be forfeited and the tender declared informal.

Tenders, enclosed in a separate envelope, and having the words "Tender for ——" (as the case may be) written thereon, must be deposited in the Tender-box at the Pay Office, Treasury, Melbourne, or, if sent by post, postage must be prepaid, and the tenders addressed to the Chairman of the Tender Board, Pay Office, Treasury, Melbourne, which office they must reach by first post on the date of closing of tenders.

The conditions of contract are those published in the *Victoria Government Gazette* of 8th February, 1933, pages 639 and 640.

STANLEY S. ARGYLE,  
Treasurer.

The Treasury,  
Melbourne, 30th June, 1933.

## TENDERS FOR THE SERVICE.

## PROVISIONS FOR 1933-34.

TENDERS will be received until Eleven o'clock a.m. on Friday, 14th July, 1933, from persons willing to supply meat in such quantities as may be ordered by the Victorian Government—delivery to be made at Geelong Gaol—during the eleven calendar months commencing on the 1st August, 1933.

## MEAT.

Schedule No. 9. Geelong, Meat. Preliminary deposit, £2. Security, £20.

Printed forms of tender and the conditions of contract may, in all cases, be obtained from the Secretary to the Tender Board, Gisborne-street, Melbourne; and from the Clerk of Courts at Geelong, by whom also any information or explanation will be afforded to persons tendering.

Tenders must be accompanied by a preliminary deposit, as shown above, in a bank draft or bank cheque, payable to the order of the Secretary to the Tender Board (*cheques, Savings Bank deposit books, fixed deposit receipts, State or Commonwealth Treasury bonds or Government debentures, or references to securities on existing contracts will in no case be received or entertained as preliminary deposits*), which will be returned within ten days to unsuccessful tenderers on their application. Such deposit to be forfeited in the event of the tenderer withdrawing the tender before notification of acceptance, or, in the event of being successful, failing to complete by lodging the security and contract form, duly signed, within the prescribed period. *It is also stipulated that if a tenderer be a member of a firm and such firm be interested in the contract, then his tender is to be in the name of the firm and not in that of the individual; and that for breach of this condition the preliminary deposit will be forfeited and the tender declared informal.*

The preliminary deposit required with each tender must be enclosed and the amount must be clearly written in and the designation stated on each, whether bank draft or bank cheque, as the case may be.

Security will be required, either in bank guarantee (bank to be approved by the Tender Board), Victorian or Commonwealth Government bonds or debentures, Savings Bank Deposit Book, or Bank Deposit Receipt, in favour of the Secretary to the Tender Board, or cash deposit, as the tenderer may elect.

The security must be completed and contract signed within ten days of acceptance of the tender, failing which the contract may be again advertised, or another tender accepted.

Tenderers withdrawing their tenders before notification of acceptance or failing to take up their accepted tenders within the prescribed period when notified of acceptance, may be disqualified from tendering or holding any future contracts for Government supplies for a period of twelve months, such disqualification to date from the notification of acceptance of tender.

*Preference will be given by the Tender Board to tenders for articles manufactured within the Commonwealth, provided the quality of such articles is satisfactory and the prices are considered reasonable.*

The Government will not necessarily accept the lowest or any tender.

Tenders, enclosed in an envelope, and having the words "Tenders for ——" (as the case may be) written thereon, must be deposited in the Tender-box at the Pay Office, Treasury, Melbourne, or, if sent by post, postage must be prepaid, and the tenders addressed to the Chairman of the Tender Board, Treasury, Melbourne, which office they must reach by first post on the date of closing of tenders.

Conditions of Contract are those published in the *Victoria Government Gazette*, 3rd May, 1933, pages 1325 to 1327.

A By-law of the City of Brighton made under Part VII, section 228, of the *Local Government Act 1928*, and section 6 of the *Petrol Pumps Act 1928*, and numbered 92, for altering the By-law No. 89 of the said City of Brighton.

IN pursuance of the powers conferred by the *Local Government Act 1928* and the *Petrol Pumps Act 1928*, the Mayor, Councillors, and Citizens of the City of Brighton order as follows:—

The said By-law No. 89 shall be altered as follows:—

1. As to clause 1.—The definition of "Portable Petrol Pump" is hereby repealed and the following definition of "Portable Pump" shall be substituted therefor:—

"Portable Petrol Pump" shall mean a petrol pump which is not fixed in, on, or under the footway and is not allowed to remain on the footway.

2. As to clause 2.—By substituting the word "or" for the word "and" after the word "selling" in the said clause.

3. As to clause 3.—By inserting the word "otherwise" after the words "leakage and" and adding the words "and the" after the word "pumps" where that word secondly appears in the said clause.

4. As to clause 4.—By inserting the words "or renewal as the case may be" after the word "issue" in the said clause.

As to clause 4 (a).—By inserting the words "or renewal of such licence" after the word "licence" first occurring, and by substituting the words "three" for the words "four" in each case, and the figures "3.3" for the figures "4.4" respectively in each case.

As to clause 4 (b).—By inserting the words "or renewal of such licence" after the word "licence" first occurring.

5. As to clause 12.—By inserting the word "of" after the word "or" where that word fifthly appears in the said clause.

6. This By-law shall come into force on the first day of October, 1933, and shall apply to and have operation throughout the whole of the municipal district of the City of Brighton.

Resolution for passing this By-law agreed to by the Council the fifteenth day of May, 1933, and confirmed the twelfth day of June, 1933.

The common seal of the Mayor, Councillors, and Citizens of the City of Brighton was hereunto affixed the twelfth day of June, 1933—

(L.S.) J. A. KENNEDY, Mayor.  
J. W. SATCHWELL, Councillor.  
J. H. TAYLOR, Town Clerk.

Approved by the Governor in Council,  
the 20th June, 1933.

## THE "VICTORIA GOVERNMENT GAZETTE."

SUBSCRIPTIONS.—The Subscription, including Postage, is £1 10s. 4d. per annum, or 7s. 7d. per quarter, payable in advance.

Subscriptions are required to commence and terminate with a month.

A lesser period than three months cannot be subscribed for. Subscribers do not receive the Acts of Parliament with the Gazette.

ADVERTISEMENTS are charged at the rate of EIGHTPENCE per line single column, and ONE SHILLING AND FOURPENCE per line double column.

The title (£5 Reward, Dissolution of Partnership, &c.) forms one or more lines, as a heading.

On an average, eleven words make a line.

Every signature must likewise be counted as a line.

The final words of a paragraph, though only a portion of a line, must be counted as one line.

Signatures (in particular) and proper names must be written very plainly in the text; ONE SIDE ONLY of each slip of paper should be WRITTEN UPON.

ALL COMMUNICATIONS should be addressed to "The Government Printer, Melbourne."

ALL DOCUMENTS illegibly written will be returned unpublished, and, where brands occur unprovided for by the ordinary letters of the alphabet, a worded explanatory description must be furnished.

THE VICTORIA GOVERNMENT GAZETTE is published on WEDNESDAY EVENING in each week, and Notices for insertion will be received by the Government Printer at or before Two p.m. at ordinary rates, and late advertisements between Two p.m. and FIVE p.m. at double rates, on the day preceding the day of publication.

Single Copies of the VICTORIA GOVERNMENT GAZETTE are Sixpence, posted Sevenpence each.

No GAZETTES prior to January, 1921, in stock.

\* \* \* ALL PAYMENTS ARE REQUIRED IN ADVANCE.—Remittances should be made by postal note, money order, or draft in favour of the Government Printer. Advertisements unaccompanied by a remittance sufficient to cover the cost of insertion will be returned unpublished.
