All words used in this By-law, which are also used in the Acts, shall have the meanings assigned to them by the Acts.

Part II.—Construction and Arrangement of Works.

2. No person shall execute any works (except such works as are authorized by sections 191 and 194 of the Water Act 1928) without having given to the Trust three days prior to the commencement of the execution of such works notice in writing of his intention so to do, specifying the tenement in or in respect of which it is proposed to execute such works and the nature and extent of such works and the time or times (being between the hours of 7 a.m. and 5 p.m. on any week day except a public holiday or a Saturday, or between the hours of 7 a.m. and 12 noon on any Saturday other than a public holiday) during which it is proposed to execute such works.

3. No person shall lay, construct, repair, or alter any private service unless every service pipe forming part thereof for such portion of its length as lies in or on the same is at all points at a depth of not less than 10 inches below the surface of the ground, nor unless every such service pipe for such portion of its length as lies in or on any street, or where it may be exposed to vehicular traffic, is laid and constructed in such manner that the same is at all points at a depth of not less than 18 inches below the surface of the ground.

4. No person shall connect any lead pipe to any iron pipe except with a brass union coupling.

5. No service pipe which supplies (for domestic purposes otherwise than by measure) water to any tenement shall have a bore exceeding $\frac{1}{2}$ inch. No service pipe which supplies by measure water to any tenement shall have a bore exceeding 1 inch, except by special consent of the Trust.

6. No person shall—

(a) lay, construct, or alter any private service or any part thereof,

(b) erect or construct any building, erection or structure—in such place, position, or manner that the whole of such private service is not easily accessible for the purpose of inspection, repair, and renewal.

Part V.—Repair.

13. Any person using any private service or service pipe shall at all times keep same in proper repair.

Part VI.—Meters.

15. No person shall use any private service or service pipe save for the supply of water for domestic purposes solely unless the whole of the water supplied to such private service or service pipe passes through a duly approved meter.

16. No meter shall be affixed to or used in connexion with any private service or service pipe unless—

(a) it is capable of registering at least 1,000,000 gallons;

(b) in the case of a meter attached to a $\frac{1}{4}$ -in., $\frac{3}{8}$ -in., or 1-in. private service it is capable of registering any flow of not less than 10, 15, and 30 gallons per hour respectively;

(c) it is properly and securely affixed to such private service or service pipe by means of lead connexions or quarter bends of wrought iron or copper alloy;

No person shall connect any service pipe to any steam boiler for the purpose of feeding or supplying the same with water, without first affixing on such service pipe between such boiler and any meter which records the quantity of water passing through such service pipe a self-acting valve in such manner and position as will prevent the pressure of the steam reversing or otherwise affecting the mechanism or dial of such meter.

Part VII.—Waste and Misuse.

20. No person shall use or permit or suffer the use of any private service for the supply of water to more than one tenement.

21. No person shall use or permit or suffer the use of any private service or service pipe or any part thereof for the supply of water to any cistern, tank, or water trough, unless such cistern, tank, or water trough is watertight and is provided with an equilibrium ball valve or other mechanism efficiently regulating the flow of water thereto in such manner that such water shall not overflow such cistern or tank. No person shall affix any overflow pipe to any cistern or tank in such manner or position that is not open to inspection. In this clause water trough means a water trough used for the supply of water to animals.

22. No person shall construct, lay, or use any service pipe which communicates directly or indirectly with or supplies water to any urinal or water closet or any part thereof save through a cistern or tank.

24. No person shall affix an overflow pipe to any bath.

25. Where water is being wasted the Trust may, by its Secretary or Engineer (without prejudice to any remedy against him in respect thereof), close or cut off any of the pipes by or through which such water is supplied by it to him or for his use and may cease to supply him with water so long as the cause of injury remains or is not remedied.

26. No person shall take or carry away or permit or suffer any other person to take or carry away any water from any premises supplied with water by the Trust, and no person shall sell any water supplied by the Trust.

27. No person other than a servant or agent of the Council of the Municipality of Alexandra or the Alexandra Fire Brigade in execution of his duty as such servant or agent shall, without the written permission of the Trust, open, close, or otherwise interfere with any hydrant attached to any main.

28. No person other than a servant or agent of the corporation or body having the care and management of a public park or garden shall, without the previous consent of the Trust, open, close, or otherwise interfere with any tap, valve, or other like regulator in on or connected with any service pipe used for the supply of water to such public park or garden.

Part VIII.—Inspection.

29. Any person authorized by the Trust in that behalf, either generally or for any class of cases, or in any particular case, may at all reasonable times—

- (a) enter into or upon any premises for the purpose of inspecting and may inspect any private service or any part thereof or any works in course of execution therein or thereon; and/or
