## REGULATIONS RELATING TO TREATMENT OF MATERIAL AT STATE BATTERIES AND CYANIDE PLANTS.

## INTERPRETATION.

1. "State Battery" or "Cyanide Plant" means any testing plant as defined by section 3 of the Act.
- "Battery Foreman" means any person employed as a Battery Foreman or Battery Foreman and Cyanider and appointed under the *Public Service Act 1946*.
- "Bona fide prospector" means a person who is the holder of a current Miner's Right and is engaged solely in prospecting or mining and is following no other occupation but does not include a syndicate or company.
- "Crushing" includes smelting and treating.
- "Minister" means the Minister of Mines.
- "Tailings or Dump material" means any gravel slime or slum produced as a result of the puddling washing or crushing of gold bearing material and includes waste material brought to the surface in connexion with any mining operations.
- "Ton" means 22 cubic feet of material by measurement or 2,240 pounds by weight.

## CRUSHING.

2. Fees to be paid for crushing material at any State Battery shall be as follows:—

- (a) For crushing material other than tailings or dump material—

	Per ton.
	£ s. d.
Five tons or less .. .. .	2 10 0
Over five tons .. .. .	0 10 0

Provided that the following concession rates shall be charged to "bona fide" prospectors only and for only one parcel of not more than five (5) tons of material from any one mine or location:—

Where the Yield of Gold per ton is—	Charge per ton.	Minimum Charge (as for 5 tons).

- (b) Tailings and/or Dump Material—

The fee to be charged for crushing such material is to be at the rate of 10s. per ton with a minimum charge of £5. Should it be necessary to open a battery to crush or treat such material, an additional fee of £5 must be paid prior to the opening of the battery. No parcel of such material in excess of 30 tons will be accepted for crushing at any one time.

3. Fees to be paid for smelting and treating gold not produced from material crushed by a State Battery:—

	s. d.
Where the weight of smelted gold does not exceed 50 ozs. ..	2 6
Where the weight of smelted gold exceeds 50 ozs. ..	10 0
—plus a further charge of 5s. for every 25 ozs. or part thereof in excess of 100 ozs.	

4. All tailings resulting from material crushed at a State Battery shall become the property of the Minister unless removed from the Battery site within fourteen (14) days from the date of completion of the crushing.

5. Every applicant for a crushing at a State Battery must make application in writing in the form of Schedule "A," giving all particulars required, to the Battery Foreman, and such Foreman shall forthwith record such application in a book provided for that purpose.

6. Parcels of material will be crushed according to priority of application as set out in record of applications as provided for in clause 5.

7. Each parcel of material will be crushed separately and a complete battery clean-up will be made in each case.

8. The owner of the material, or his deputy, may be present during the crushing of his material and will be given every opportunity to see the whole treatment; but he shall not interfere in any way with the operations.

9. The owner of the material shall provide his own battery feeders and shall clean up the battery immediately after the crushing is completed. If the owner fails to clean up immediately after the crushing is completed, the Battery Foreman will do so, and his wages will be charged against the gold obtained.

The Battery Foreman must do all the retorting and smelting of the gold and will issue the prescribed "Gold Smelter's Certificate" as required by section 37 of the *Gold Buyers Act* 1938, without any further fee.

10. On the completion of crushing, the prescribed crushing charges must be paid to the Battery Foreman, or sufficient gold as in his opinion will cover such charges must be retained by the Battery Foreman and forwarded by him to the Secretary for Mines for sale. Any surplus over such charges on the sale of such gold is to be refunded to the owner of the material.

11. The Battery Foreman shall have the right to sample and have assayed, or otherwise tested, any parcel of material submitted for crushing, and if in his opinion it does not show sufficient gold value to pay the prescribed fees for crushing, he must demand payment of such charges before commencing crushing such material.

The Battery Foreman shall have power to clean up during the progress of any crushing if in his opinion the material proves too poor to pay the crushing fees.

12. The Battery Foreman shall not permit the use of chisels or any other sharp metallic tool in cleaning plates; hard rubber or other similar material only to be used. The plates shall not be treated with acids or fire. Parties may use their own copper plates provided such plates are placed on top of those belonging to the Battery.

13. All material will be received for crushing absolutely at the owner's risk, and the Minister shall not be responsible for any suspension of operations, delays in treatment, or for any loss or damage arising from any cause whatsoever.

14. No charge will be made for any assays done or gold smelted in connexion with material or tailings under treatment.

#### CYANIDING.

15. Where there is a cyanide plant attached to a State Battery, tailings may be treated by cyanide for 10s. per ton.

16. The owners of material being crushed at State Batteries, where a cyanide plant is installed, should advise the Battery Foreman if they wish to have the tailings cyanided.

In all such cases, the Battery Foreman will take two identical samples as the tailings leave the Battery, one being handed to the owner and the other forwarded to the Mines Department Laboratory for assay by cyanide process.

17. In all cases where the assay value is more than 10s. per ton and there is a sufficient quantity available for treatment, the Minister may treat the material, sell the gold obtained to the Royal Mint, Melbourne, and after deducting the prescribed treatment fee of 10s. per ton, distribute the net proceeds of realization, *pro rata*, among the owners of the tailings, according to the assay value and tonnage treated for each owner.

18. Where the tonnage of any one owner is sufficient to be treated separately, after the tailings have been treated and the owner has paid the prescribed fee of 10s. per ton, the Battery Foreman will deliver the gold produced direct to the owner.

19. On receipt of a recommendation by the Chief Mining Inspector that any State battery or cyanide plant or part or parts thereof is not immediately needed for use by the local miners, the Minister may hire, let or lease any such State battery or cyanide plant or part or parts thereof to any mine owner or mining company in that district on such terms and under such conditions as he deems fit.

12. The Council shall appoint a Market Inspector whose duties shall be as follows:—

13. No person shall obstruct the Market Inspector in the performance of his duty, or release or remove any cattle from the said market, or release or remove cattle from one part of the said market to another part of the said market without the consent of the Market Inspector, nor shall any person wilfully break down or damage any of the gates, fences, buildings, or appurtenances of the said market, or cause any riot or disturbance, or curse or swear, or use any indecent language, or be guilty of any indecent conduct within the said market, or upon the immediate approaches thereto.

14.
