SHIRE OF FRANKSTON AND HASTINGS.

BY-LAW No. 72.

A By-law of the Shire of Frankston and Hastings under section 197 of the *Local Government Act 1928*, as amended by section 9 of the *Local Government Act 1938*, and numbered 72, for the purpose of prohibiting regulating and controlling excavating operations.

IN pursuance of the powers conferred by the Local Government Acts the President, Councillors and Ratepayers of the Shire of Frankston and Hastings order as follows:—

1. No person shall, on any land situate within the Municipal District of the Shire of Frankston and Hastings, commence or carry on any excavating operations (other than quarrying or blasting operations, or excavating operations connected with works commenced before the 10th day of November, 1938) for the removal of rock, stone, gravel, clay, soil or sand from such land unless such person is the holder of, and except within the limits of, a current permit so to do issued to him by the Council of the Shire of Frankston and Hastings prescribing—

(a) the area to which the permit relates;

(b) the duration of the permit; and

(c) the depth above sea level to which excavating operations may be carried on upon the area described in the permit (such depth to be ascertained by reference to and on the basis of the levels shown on contour survey plans).

2. Every person to whom any permit may be issued by the Council to commence or carry on excavating operations shall, within three months after the expiration of such permit (unless in the meantime a new permit shall have been issued to him in respect of the same area) fill in the area excavated under such permit with such material and to such level as the Council, by its Shire Secretary or Engineer, may prescribe by notice in writing to be given to the holder of such permit within one calendar month after the expiration thereof.

3. The Council may, before issuing any permit to commence and carry on excavating operations, require the person applying for the permit to enter into such bond, or deposit or give such security as it may think sufficient to secure compliance with the requirements of paragraph 2 hereof.

4. No excavating operations (whether connected with works commenced before the 10th day of November, 1938, or not) shall be carried on within a distance of 50 feet from any street or road, or any land set out or reserved as a street or road, on any plan of subdivision lodged in the Office of Titles, or any land which is in fact used as a street, road, lane, or passage, or within a distance of 30 feet from any land the ownership or occupation

whereof is in some person other than the owner of the land on which such excavating operations are being carried on.

5. Every person carrying on excavating operations (hereinafter called the excavator) (whether such operations are connected with works commenced before the 10th day of November, 1938, or not), shall observe the following rules as to such operations:—

(a) If such excavating operations are carried on by manual power, the excavator shall carry on the same, using either one of following methods:—

(i) the wall or face of such excavation may be terraced, but the vertical wall or face of each step in such terrace shall not be more than 6 feet in height, and the horizontal face of every terrace other than the step at the floor of such excavation shall be of not less width than one half of the height of the vertical wall or face immediately above it; or

(ii) the banks or sides of all such excavations shall be sloped down so that the batter of such banks or sides shall be maintained at a slope ratio of one horizontal to one vertical.

(b) If such excavations shall be carried on by means of a hydraulic nozzle or power shovel or similar method, then the excavator may work with a vertical wall or face, subject to the following conditions:—

(i) the excavator shall not permit any person, whether employee or otherwise, to be within a distance of 10 feet from such wall or face; and

(ii) the excavator shall not allow any overhang to exist in such wall or face;

(iii) every excavator working upon a vertical wall or face of a greater depth than 6 feet shall erect a fence of not less than 4 feet in height, either upon the boundary line of the land occupied by the excavator or in such position in relation to the brink of such wall or face as will protect persons on ground level from falling into the pit worked by the excavator. Such fence shall be of substantial construction, and may be of posts and rails or of posts not less than 22 feet apart, with two droppers equally spaced between posts, and of not less than three strands of wire (two of barb and one of eight-gauge plain). The top wire shall be barbed and shall not be more than six inches from the top of each post. The bottom wire shall be not more than 15 inches above ground level, and the intermediate wire shall be equidistant from the top and bottom wires. The bottom wire may be barbed or plain—according to the option of the excavator.

(iv) a wall or face which is not sloped down so that the batter of the banks or sides of the excavations shall be maintained at a slope ratio of one horizontal to one vertical shall be deemed "a vertical wall or face."

6. Every person carrying on excavating operations (whether connected with works commenced before the 10th day of November, 1938, or not), and using any mechanical or hydraulic power for such operations shall, within fourteen days from the publication of this By-law in the *Government Gazette*, notify the Council of the place where such power is used or intended to be used, and in such notice shall furnish the Council with full information of the type and nature of such power.

7. Every person carrying on excavating operations, and whether using manual power or mechanical or hydraulic power, and whether working upon a vertical or a sloped or a terraced face, shall work or carry on all such excavations in such a manner that when any part of any excavation made by him is, at ground surface level, 50 feet from a street or road, or 30 feet from land not in the ownership or occupation of such person (which are the limits provided in clause 4 hereof), the banks or sides of such excavations, and of all parts of such excavations, shall be sloped down so that a slope or batter of one horizontal to one vertical is maintained.

8. Any person guilty of any wilful breach of any of the provisions of this By-law shall be liable for every such breach to a penalty of not less than Five pounds, nor more than Twenty pounds, and if such offence be a continuing

offence to a further penalty of not more than Five pounds per day for each day of which such offence is continued after a conviction or order by any Court.

Carry on excavating operations without a permit or otherwise than in accordance with the limits of a permit (where a permit is required) shall be deemed a continuing offence.

9. This By-law shall apply to and have operation throughout the whole of the municipal district of the Shire of Frankston and Hastings.

10. This By-law shall come into operation and have effect immediately on its publication in the *Victoria Government Gazette*.

Resolution for passing this By-law agreed to by the Council on the 7th day of June, 1946, and confirmed the 19th day of July, 1946.

The common seal of the President, Councillors, and Ratepayers of the Shire of Frankston and Hastings was hereto affixed this 19th day of July, 1946, in the presence of—

(SEAL) J. E. GRICE, President.
J. L. PRATT, Councillor.

SHIRE OF GLENLYON.

REGULATION No. 11.

A Regulation of the Shire of Glenlyon, numbered 11, made under Part 1, sub-division 4, of the Fifteenth Schedule to the *Local Government Act* 1946, in force in the shire, by virtue of a By-law of the above-named shire, numbered 3, for regulating the width, depression, and inclination of crossings across or over footways and channels, and the materials for making and constructing the same, the mode of laying and bedding such materials, the length, width, size, strength, and fall of bridge crossings, and the said inclination and fall, either absolutely or with relation to the levels, inclination or fall of the footway or channel or otherwise in like manner.

IN pursuance of the powers conferred by the *Local Government Act* 1946, the President, Councillors, and Ratepayers of the Shire of Glenlyon make the following Regulation which shall apply to and have operation throughout the following part of the municipal district, that is to say:—

The Water Supply district of the Hepburn Waterworks Trust.

1. *Definitions*.—Wherever appearing in this Regulation—
"Approved" means approved by the Council's Engineer.

"Commercial Vehicle" means any vehicle (including a motor vehicle) used for carrying goods in the course of trade or business.

"Crossings" means a carriageway or drive for providing access for horse-drawn or motor vehicles from any street or road to any land which fronts to, adjoins, or abuts upon any such street or road whether or not there is a constructed footway between the roadway and such land.

"Engineer" means the Council's Engineer.

"Light Vehicle" means any vehicle other than a "Commercial Vehicle," and includes a motor car of the ordinary passenger or pleasure type.

"Council" means the Council of the Shire of Glenlyon.

2. Crossings over footways and/or channels shall be constructed only in accordance with the details specified hereunder, and shall be constructed to the satisfaction of the Engineer.

3. Except as hereunder provided, all crossings within the Water Supply District of the Hepburn Waterworks Trust shall be constructed as open invert types, that is to say that the surface of the crossing shall be graded down from the building (or property) line to invert of the channel, keeping the surface flush with the surface of the adjacent footway or as near as practicable thereto, and in conformity with such grades or slopes as may be directed by the Engineer. Where, in the opinion of the Engineer, the contour of the ground renders such action necessary or desirable, and where it is practicable to do so, the property owner may be authorized by the Council to grade or regrade the surface of the carriageway or driveway within the boundaries of the land served by the crossing in such manner as to cause no abrupt obstruction or depression on the public footway.

4. Where the footway is paved with concrete, except as hereinafter provided, all crossings shall be constructed of concrete, and, in no case, shall be less than 9 feet in width.

5. Where the footway is paved with concrete, concrete to be used in the construction of crossings required for the passage of commercial vehicles or any other vehicle which, in the opinion of the Engineer, requires a similar type of construction, shall be not less than 6 inches in depth throughout, and, in the construction of crossings required for the passage of other than commercial vehicles, the concrete shall be not less than 4 inches in depth throughout. Concrete shall consist of one part of Portland cement, two parts of approved clean sand, and four parts of approved crushed stone. If required by the Engineer in any particular case, the concrete shall be reinforced with No. 5 gauge steel rods, spaced 6-inch centres both ways.

6. In streets or roads in which, at the site of any proposed crossing, there is a kerb along the outer edge of the footway, and where the footway is paved with concrete, the crossing, so far as the footway extends, shall have on both sides a kerb not higher in any part of the surface of the footway at that part, and such kerb shall approach to and join the street kerbing in gentle curves outwards.

7. Notwithstanding anything hereinbefore contained, crossings for carrying horses or other animals or carts or light vehicles may be constructed of materials other than concrete, provided such materials are similar to those used in the paving of the footway where such footway will immediately adjoin such crossings, and, in the opinion of the Engineer such crossing would be capable of carrying the class of traffic referred to without being damaged thereby.

8. If, in the opinion of the Council it is not practicable or desirable that any proposed crossing shall be constructed by grading from the building line to the invert of the channel, an approved reinforced concrete pipe or box culvert may be laid along the channel line, and the crossing constructed by grading from the building line to a level above such pipe culvert in such a manner as will provide sufficient cover for the passage of vehicles over the same without causing damage thereto. The ends of all pipes or culverts shall be finished in such a manner as will permit of a free inlet to and discharge of channel drainage.

9. Except where such crossing has been constructed in accordance with subdivision (4) of Part 1 of the Fifteenth Schedule of the Local Government Act, the Council may direct that any existing crossing deemed by the Engineer to be unsatisfactory be reconstructed or altered so as to conform to the provisions of this Regulation at the expense of the owner of the property served.

If, at the expiry of a period of twenty-eight days after the service of written notice given by the Council on the owner requiring such alteration, the owner fails to have the requisite alterations effected to the satisfaction of the Engineer, the Council may cause the work to be carried out, and the Council may recover the cost so incurred from the said owner.

Alternatively, the owner may authorize the Council, in writing, to carry out the work at the cost of the said owner. Where any existing crossing has been constructed in accordance with the provisions of subdivision (4) of Part 1 of the Fifteenth Schedule, but contrary to the provisions of this Regulation, if, for any reason, the Council requires the crossing to be altered to make it to conform to this Regulation, the Council may cause such alteration to be made at the cost of the Council.

Resolution for passing this Regulation agreed to by the Council the 11th day of December, 1950.

Confirmed the 7th day of June, 1951.

The common seal of the President, Councillors, and Ratepayers of the Shire of Glenlyon was hereto affixed this 7th day of June, 1951, in the presence of—

(SEAL) FOREST S. ORR, President.
J. S. GOUGH, Councillor.
M. B. WATSON, Shire Secretary.
