CITY OF OAKLEIGH.

REGULATION No. 9.

A Regulation of the City of Oakleigh, made under the provisions of the Local Government Acts, by virtue of By-law No. 34 of the City of Oakleigh, and numbered 9, relating to the construction of crossings over footways and channels.

IN pursuance of the powers conferred by the Local Government Acts and of any and every other power thereunto enabling, the Mayor, Councillors, and Citizens of the City of Oakleigh order as follows:—

1. Regulation No. 8 is hereby repealed.

2. Definitions: Wherever appearing in this Regulation—

"Approved" means approved by the Council's engineer.

"Council" means the Council of the City of Oakleigh.

"Crossing" means a carriageway or drive for providing access with horses or other animals or vehicles from any street or road to any land which fronts to adjoins or abuts upon the footway of such street or road.

"Engineer" means the Council's Engineer.

"Entrance served by crossing" means the particular driveway, doorway, gateway, or other entrance to a property by which animals or vehicles passing over the said crossing may enter the said property.

"Light duty crossing" means a crossing not intended for use by any vehicle over 2 tons in weight, including the weight of the load therein.

"Street" includes road and highway.

"Street intersection" means the area embraced within the prolongation of the property lines of two or more streets which join at an angle whether or not such streets cross.

3. Crossings over footways and channels shall be constructed only in accordance with the details specified hereunder, and shall be completed to the satisfaction of the Engineer.

4. Except as hereinafter provided all crossings shall be constructed of concrete.

5. Subject to the limitations set out hereunder each crossing shall be the same width as the entrance served by that crossing and shall, as to position, correspond with that of such entrance.

Where a crossing is constructed for an entrance not then defined on the site such crossing shall be at least 9 feet wide.

Except with the consent of the Council first obtained no crossing shall be more than 25 feet in width.

Except where skewed to be parallel to the side boundaries of the property being served thereby each crossing shall be constructed at right angles to the frontage of such property.

Except with the consent of the Council first obtained no crossing shall be constructed within or partly within any street intersection.

6. Concrete to be used in the construction of crossings shall consist of at least one part Portland cement to each two parts of good quality concrete sand or clean stone dust and four parts of good quality suitably graded crushed stone and each crossing shall be finished with a smooth even surface and be graded so that it will not hold water thereon or be in any way a danger to the public. In no case shall any crossing or part thereof be made or left with a surface which is slippery or will be slippery when wet.

7. The minimum finished thickness of concrete in crossings shall be at least 4 inches in the case of light duty crossings and at least 6 inches in the case of other crossings.

8. If in any crossing concrete of the thickness specified in clause 7 hereof will not carry the traffic to use it without causing damage to such crossing such crossing shall be constructed of such greater thickness of concrete as will carry the said traffic.

9. Except as hereinafter provided each side of any crossing shall be constructed and finished with a concrete side kerb the top surface of which shall correspond with the surface of the footway at that part. The edges of these kerbs and their junctions with other works shall be neatly rounded to the Engineer's approval. Each of such side kerbs shall approach to and join the street kerb and channel in gentle curves outwards.

10. Except as hereinafter provided the surface of any crossing between the side kerbs referred to in clause 9 hereof shall (a) as to the part thereof between the frontage of the property being served thereby and a line 6 feet therefrom correspond with the levels and gradients of the surface of the street footway at that part; (b) as to the part thereof between the aforesaid line and the invert of the street channel be graded from the surface level at the aforesaid line to the level of the said invert or where required by the Engineer to a level 1 inch above the said invert; and (c) as to the remainder thereof be graded to correspond with the levels and sections of the street channel at that part and so as not to interfere with the flow of water in the said channel.

11. If the Engineer considers it advisable or necessary to order or authorize a modification of the requirements of clause 10 hereof to be made in the case of any crossing for the purpose of better serving the traffic requiring to use such crossing and/or in the interests of public safety the Engineer may, in writing, order or authorize such modification as he considers necessary and the crossing concerned shall be constructed as so ordered or authorized by the Engineer.

12. If in the opinion of the Engineer it is not practicable or desirable that any proposed crossing shall be constructed by grading down to the invert of the channel an approved reinforced concrete pipe or box culvert may be laid along the channel line and the crossing constructed by grading from the building line to a level above such pipe or culvert in such a manner as will provide sufficient cover for the passage of vehicles over the same without causing damage thereat. The ends of all pipes or culverts shall be finished in such a manner as will permit of a free inlet to and discharge of channel drainage.

In cases where the Engineer authorizes the installation of a pipe or culvert in a crossing the Engineer may modify the provisions of clauses 9 and 10 hereof to permit the satisfactory installation of the said pipe or culvert.

13. Notwithstanding anything hereinbefore contained a crossing may, with the written consent of the Council first obtained, be constructed in approved asphaltic materials. This clause shall only apply where the street path at the site is of asphaltic materials and the Engineer approves of the specification for the construction of the crossing. Provided, however, this clause shall not apply if either the street kerb or channel at the site is of concrete or is unpaved.

The Resolution for making and passing this Regulation was agreed to by the Council at a meeting held on the 2nd day of February, 1953, and confirmed at a meeting held on the 2nd day of March, 1953.

In witness whereof the common seal of the Mayor, Councillors, and Citizens of the City of Oakleigh was hereunto affixed, this 3rd day of March, 1953.
