*At the Executive Council Chamber, Melbourne, the

PRESENT:

His Excellency the Governor of Victoria.

Mr. Scully

Mr. Gladman.

REGULATIONS RELATING TO THE PRECAUTIONS TO BE
TAKEN IN ENTERING INTO CONFINED SPACES.

WHEREAS the presence in certain confined spaces of certain gases or vapours or fumes or mists or dusts, or the absence of oxygen or a reduction in the amount of oxygen present in such confined spaces, is likely to cause injury to or the death of a person who enters such a space:

And whereas the entry of any person into such confined spaces, may, unless adequate precautions are taken, endanger life or impair health: And whereas it is provided amongst other things by section 95 of the *Health Act* 1928, as re-enacted by section 10 of the *Health Act* 1941, that the Governor in Council may make Regulations safeguarding the public health and the health of persons engaged in dangerous trades, or in such occupations and processes as are likely to endanger or impair health:

Now, therefore, by virtue of and pursuant to such powers and all other powers enabling him in that behalf, the Governor of the State of Victoria, by and with the advice of the Executive Council thereof, doth hereby make the Regulations following (that is to say):—

1. These Regulations may be cited as the "Entry into Confined Spaces Regulations 1954" and shall come into operation upon publication thereof in the *Government Gazette*.

2. In these Regulations unless inconsistent with the context or subject-matter:—

"Fumes" shall mean gas, vapour, fume, mist, dust or smoke.

"Confined space" shall mean any vat, tank, pit, pipe, flue, silo, container, reaction vessel or receptacle which contains or has contained any harmful fumes, or substances capable of producing them, or which contains or has contained or is made of or lined or coated with any substance or substances capable of causing the amount of oxygen present to be reduced to a dangerous extent, but shall not include any mine within the meaning of the *Mines Acts*.

"Properly made harness" shall mean a harness so constituted that the point of attachment of the harness to the rope is between the head and the centre of gravity of the body and with shoulder and crutch straps to prevent the body slipping through the harness.

"Distant Breathing Respirator" means a respirator consisting of a face piece equipped with appropriate valves, and attached to a hose through which air can be inhaled, the hose being of such a length that the end distant from the face mask can be placed in fresh air, and remain therein during the period of use in any particular circumstance.

"Positive Pressure Respirator" means a respirator consisting of a face piece equipped with appropriate valves, and attached to a hose through which fresh air may be supplied by compressor, or air blower, or air pump.

"Self-contained breathing apparatus" means a face piece equipped with appropriate valves and attached to a supply of compressed air or oxygen carried on the person.

3. No person shall cause, permit or suffer any person in his employ to enter any confined space unless either—

- (a) the person entering the space is equipped with one or other of the following types of breathing apparatus in efficient working order, namely—
 - (i) a suitable distant breathing respirator;
 - (ii) a suitable positive pressure respirator;
 - (iii) a self-contained breathing apparatus; or
- (b) immediately prior to the entry fresh air has been blown into the confined space for a time sufficient to remove dangerous amounts of any harmful fumes or to supply sufficient oxygen which time shall in no case be less than ten minutes.

4. (1) When any person equipped with a positive pressure respirator enters a confined space the employer shall see that the compressor, air blower or air pump supplying such respirator is kept operating throughout the period during which the wearer of the respirator remains in the confined space.

(2) When fresh air is blown into a confined space for the purposes of regulation 3 the employer shall see that the following procedure is followed:—

- (a) The fresh air shall be blown in through a hose having its outlet inside the confined space at a point as remote as possible from the manhole or opening through which entry is to be made, and the blowing shall be such that a positive current comes out of the confined space through the said manhole or opening.
- (b) The blowing shall be continued throughout the period during which any person not equipped as set out in paragraph (a) of regulation 3 hereof remains in the confined space.

5. No person shall cause, permit or suffer any person in his employ to enter any confined space—

- (a) unless the person entering the space is equipped with properly made harness and rope by means of which he may be quickly removed from the space;
- (b) unless another person or persons is or are outside the space and holding the rope so that at the first sign of danger to the person inside the space he may be at once removed from the space;
- (c) unless a person skilled in the application of artificial respiration is in attendance and readily available.

6. (1) In every case where it is known from the use to which a confined space has been put prior to the proposed entry that fumes of any of the substances listed in Column One of the Schedule hereto or of any other dangerous substance are likely to be present or that the air in the confined space is likely to be deficient in oxygen, entry shall not be made until the air within the space has been tested by appropriate means for the substance or substances likely to be present or for the lack of oxygen, as the case may be, and has been shown to be safe.

(2) In the case of the substances listed in Column One of the Schedule the air shall not be deemed to be safe if it contains concentrations in excess of the quantities set out in Columns Two, Three and Four respectively of the said Schedule.

(3) The provisions of regulations 3, 4 and 5 shall be applicable notwithstanding that the air has been tested and found to be safe.

7. In any premises where entry into confined spaces occurs there shall be prominently displayed in the vicinity of each such space a notice setting out the danger of entry, the fumes likely to be encountered, the presence of inflammable or explosive gases or vapours, or the absence of adequate oxygen, as the case may be.

8. The apparatus for blowing out, the harness and ropes, the breathing apparatus, the testing apparatus, shall be tested at intervals and kept in good order.

9. Where entry to the confined space is through a manhole the size of the manhole shall be not less than 18 inches long by 16 inches wide if rectangular, and not less than 18 inches in diameter if circular, except in the case of tank wagons when the dimensions shall be not less than 16 inches long by 14 inches wide if rectangular and not less than 16 inches in diameter if circular.

10. Any person doing any act forbidden to be done or failing to do any act directed to be done by these Regulations shall be guilty of an offence against these Regulations and shall be liable to a penalty of not more than Twenty pounds, and in the case of a continuing offence to a further daily penalty of not more than Five pounds, but so that the total of such penalties shall not exceed One hundred pounds.
