- (c) During each future successive period beginning with the first pay period to commence in a May, an August, a November, or a February, the amount of the basic wage shall be adjusted by the following method, namely, by multiplying the last published Commonwealth Statistician's "all items" retail price index number by the factor 103 taken to one place of decimals, the resultant whole number being the amount of the basic wage expressed in shillings, but should the decimal number reach 5 or more the basic wage shall be taken to the next higher shilling.
- (d) Adult females:—The basic wage snau oc taken to the next higher shilling.

 (d) Adult females:—The basic wage for adult females shall be 75 per cent. of the basic wage for adult males working in the same locality. Such 75 per cent. shall be calculated to the nearest 6d., any fraction of 6d. in the result not exceeding 3d. to be disregarded.
- (e) Juniors:—The wages of junior employees shall be the appropriate percentages as set out in clauses 3, 4 and 5. Such wages shall be calculated to the nearest 6d., any fraction of 6d. in the result not exceeding 3d. to be disregarded.
