MARINE BOARD OF VICTORIA.

INTERIM SPECIFICATION FOR LIFEJACKETS AND AIDS TO BUOYANCY.

THE following General Specification for Lifejackets and for Aids to Buoyancy are issued as an interim measure by the Marine Board of Victoria until fully detailed specifications are produced. They shall be applicable in the State of Victoria for the purposes of the *Motor Boating Act 1961*, and shall be additional to, but in no way conflict with the specifications of the Standard Kapok Lifejacket issued by the Department of Shipping and Transport under the Commonwealth Navigation Act.

1. *Lifejackets* shall be so designed and constructed, whether in cotton canvas or in a plastic material that:—

- (i) A garment intended to support an adult shall be capable of supporting a weight of 20 lb. of iron after floating in fresh water for 24 hours with 16½ lb. of iron attached; and
- (ii) a garment intended to support a person weighing up to 112 lb. shall be capable of supporting a weight of 12 lb. of iron after floating in fresh water for 24 hours with 10 lb. of iron attached.

Provided that, in the case of boats operating in Victorian Ports or Inland Waters only, a final weight of 18 lb. may be accepted instead of the 20 lb. specified in (i) above.

2. Each garment shall be clearly marked to indicate the usage by an adult or a person under 112 lb. in weight. The buoyancy element shall be so distributed in a life-jacket that when worn by a person lying inert in the water it shall comply with the following conditions:—

- (a) The head shall be maintained clear of the water.

- (b) Should the wearer become unconscious the head shall be supported so that it cannot fall forward or back allowing the face to become submerged.

- (c) Garments shall be so designed as to be either reversible or so that they cannot be worn in any way other than in accordance with the manufacturer's instructions.

- (d) The garment shall be coloured in strong contrast to the water to ensure good visibility.

3. *Aids to buoyancy* shall be so designed and constructed and the buoyancy element contained in the garment shall be so distributed in such a manner that, should the wearer become inert or unconscious on impact with the water, the garment will automatically turn the wearer on to his back.

Paragraphs 3 (c) and (d) of requirements for life-jackets shall also be applicable. Each garment shall be plainly marked to indicate that it is an aid to buoyancy only, and not a lifejacket.

4. Manufacturers or importers of lifejackets or aids to buoyancy, or their agents, shall submit samples of each type or design to the Marine Board of Victoria for flotation tests and practical demonstration of qualities. Samples of all materials used shall be submitted with the garments, together with written test details of the materials, whereupon, if satisfied with the practical tests, design, manufacturing technique and materials used, the Marine Board will issue a serial number applicable to that particular design of garment.

5. Marine Board Inspectors shall have access to the premises of the manufacturer or his agent at all reasonable times. Completed garments marked by the manufacturer as required above and with the serial number shall be submitted for inspection, and if satisfactory, will be stamped with the approved stamp and year of approval.

6. A fee of Seven pounds (£7) will be charged for the inspection and testing of the first sample made and submitted in each design, and a further fee of Two shillings (2s.) per dozen with a minimum fee of Three pounds (£3) for each batch of garments stamped.

C. O'MALLEY,
President.
