## BY-LAW No. 19.

A By-law of the Shire of Croydon made under the provisions of Sections 197 and 198 of the *Local Government Act 1958* and numbered 19 for—

- (a) carrying out the purposes provided for in Part 1 Division 4 of the Fifteenth Schedule to the *Local Government Act 1958*;
- (b) declaring any streets or roads or parts thereof within the municipal district to be roads of limited access and—
  - (i) prohibiting the provision without the consent of the Council of any further facilities for vehicles to enter or leave any land which abuts on any such road of limited access and to which reasonable alternative means of vehicular access are or can be made available;
  - (ii) prohibiting any person from entering or leaving with a vehicle or from permitting any person to enter or leave with a vehicle any such land except by a passage in regular use before the commencement of the By-Law or subsequently approved by resolution of the Council.

IN pursuance of the powers conferred by the *Local Government Act 1958* the President Councillors and Ratepayers of the Shire of Croydon order as follows—

1. In this By-Law unless inconsistent or repugnant to the context or subject matter—

"Approval of the Council" means approval by proper resolution of the Council.

"Consent of the Council" means consent by proper resolution of the Council.

"Council" means the Council of the Shire of Croydon.

"Engineer" means the engineer to the Council and includes his deputy.

"Municipal District" means the municipal district of the Council.

"Premises" includes vacant land.

2. By-Laws numbered 122 and 131 of the Shire of Lillydale so far as they are applicable within the Municipal District are hereby repealed.

3. No person shall cause or permit any vehicle to cross the kerb and channel or the watertable of any street or road except on a crossing constructed in accordance with this By-Law.

4. If it is intended that a vehicle shall be taken across any kerb and channel or watertable of a street or road to any premises adjoining such street or road then the owner of such premises shall provide a crossing from the kerb and channel or watertable to such premises constructed in accordance with this By-Law.

5. No crossing shall be within 25 feet of the nearest point of the junction or intersection of two or more streets or roads.

6. Except with the approval of the Council—

(a) all premises zoned as residential under any interim development order or planning scheme made by the Council under the provisions of the *Town and Country Planning Acts* shall have one crossing only;

(b) all other premises shall have no more than two crossings.

7. (1) The owner of any premises to be served by a crossing may request that the crossing be located in a position indicated by such owner.

(2) If the Engineer is of the opinion that the location should be at any place other than that requested to facilitate movement of traffic then the owner shall be given notice of the proposed location of the crossing.

(3) An owner who is given such a notice may appeal in writing within 7 days of the service of such notice to the Council and the decision of the Council on such appeal as to the location of the crossing shall be final and conclusive.

8. (1) If any crossing is to lie across a footpath which is constructed of asphalt bitumen concrete or stone that crossing must be constructed of concrete.

(2) The Council may permit a crossing to be constructed of asphalt or bitumen instead of concrete if it is satisfied that the footpath will not be damaged by traffic using such crossing and if the existing crossings in the locality are other than concrete.

9. A concrete crossing must have a minimum depth of six inches or such greater depth as the Engineer determines to be necessary having regard to the use to be made of the crossing.

10. (1) A bitumen crossing must be constructed of gravel or crushed rock to a minimum consolidated depth of 6 inches or to such greater depth as the Engineer determines to be necessary having regard to the use to be made of the crossing and sealed with two coats of bitumen and aggregate.

(2) An asphalt crossing must be constructed to a minimum consolidated depth of 6 inches pre-mix or such greater depth as the Engineer determines to be necessary having regard to the use to be made of the crossing.

11. (1) Subject to this clause every asphalt bitumen or concrete crossing must be designed and constructed to run directly from the channel or watertable to the relevant premises and at right angles to the alignment of the carriageway.

(2) The Council may dispense with the requirements of this clause if the Engineer reports that it is desirable to do so having regard to the use to be made of the crossing.

12. If any crossing is to lie across any part of any street or road reserve which is commonly used as a footpath (other than a footpath constructed of asphalt bitumen concrete or stone) that crossing may be constructed of gravel or crushed rock of a minimum consolidated depth of 4 inches or of such greater depth as the Engineer determines to be necessary having regard to the use to be made of the crossing.

13. Notwithstanding that a crossing has been constructed of gravel or crushed rock pursuant to this By-Law the Council may require such crossing to be reconstructed in concrete if the footpath across which it lies is at any time constructed in asphalt bitumen concrete or stone.

14. Subject to the requirements set out in this By-Law the design and specifications in respect of every crossing to be constructed will be determined by the Engineer.

15. (1) Every asphalt bitumen or concrete crossing to premises zoned as residential under any interim development order or planning scheme of the Council made under the provisions of the Town and Country Planning Acts shall be a minimum of 9 feet wide, but not more than 12 feet wide.

(2) Every asphalt bitumen or concrete crossing to all other premises shall be not more than 24 feet wide, except for service stations where such crossings shall be not more than 30 feet in width.

16. Except in the case of a crossing over a channel by means of a culvert a crossing over a kerb and channel must connect with a road or street pavement with 4 feet 6 inches radius returns except where the footpath is closer to the kerb than 4 feet 6 inches in which case the radius shall be altered accordingly.

17. (1) If a crossing passes over a watertable it must do so by means of a culvert.

(2) If the Engineer is of the opinion that the depth of a channel requires any crossing passing over it to be by means of a culvert any crossing passing over that channel must be by culvert.

(3) Every such culvert shall consist of a reinforced concrete pipe of 12 inches diameter and 12 feet in length.

18. (1) The Council may dispense with the requirement of a culvert if it is satisfied that the watertable can be crossed by a vehicle without damaging the watertable and without placing anything in the watertable.

(2) The Council may permit a pipe of not less than 9 inches diameter if it is satisfied that a pipe of 12 inches diameter would interfere with the proper functioning of the watertable or would be unreasonable having regard to the nature of the watertable.

(3) The Council may permit a pipe to be of greater length than 12 feet but no pipe may exceed 20 feet in length or be closer than 12 feet to any other pipe.

(4) The Council may permit an open invert instead of a culvert but that invert must be constructed of concrete of 6 inches depth or of such greater depth as the Engineer determines having regard to the use to be made of the invert.

19. The minimum distance between any two crossings leading to premises zoned otherwise than as residential under any interim development order or planning scheme of the Council made under the provisions of the Town and Country Planning Acts shall be twenty-five feet.

20. (1) Except with the approval of the Council no person other than the Council may construct any crossing.

(2) The Council shall at the request of the owner of the premises concerned construct any crossing required to be constructed by this By-Law.

(3) A request for a crossing must be in writing signed by the owner of the premises concerned.

21. (1) The Council may at any time and from time to time carry out all necessary maintenance of or repairs to any crossing.

(2) All costs of any such maintenance or repair shall be paid to the Council by the owner of the premises served by the crossing.

(3) Such costs shall be the actual cost to the Council as certified by the Shire Engineer.

(4) The Shire Secretary will give written notice of the amount payable under this clause to the owner of the premises concerned who shall be bound to pay within 14 days of the date of notice.

22. The streets and roads and all parts thereof within that part of the Municipal District set out in the schedule hereto are hereby declared to be roads of limited access.

23. No person shall, without the consent of the Council, provide any further facilities for vehicles to enter or leave any land which abuts on any such road of limited access and to which reasonable alternative means of vehicular access are or can be made available.

24. No person shall enter or leave with a vehicle or permit any person to enter or leave with a vehicle any land which abuts on any such road of limited access except by a passage in regular use before the commencement of this By-Law or subsequently approved by resolution of the Council.

25. Every person who constructs a crossing or uses or permits to be used a crossing sited or constructed contrary to the provisions of this By-Law shall be guilty of an offence against this By-Law.

26. Every person guilty of a wilful act or default contrary to this By-law shall be liable to a penalty of not less than \$10.00 and not more than \$40.00 and in the case of a continuing offence to a penalty of not more than \$10.00 for each day on which an offence against this By-Law is continued after a conviction or order by any Court.
