Vegetation and Vine Diseases Act 1958 (No. 6407).

DECLARING A PROCLAIMED AREA.

PROCLAMATION

By His Excellency the Governor of the State of Victoria and its Dependencies in the Commonwealth of Australia, &c., &c., &c.

Whereas by section 25 of the *Vegetation and Vine Diseases Act 1958 (No. 6407)*, it is provided that where the Governor in Council is of opinion that it is necessary to protect the fruit industry of Victoria against the introduction or spread of the insects of the family *Trypetidae* (commonly known as fruit flies), he may by Proclamation declare any portion of Victoria specified therein to be a proclaimed area, and prohibit the planting on any land in the proclaimed area of any tree, plant or vegetable specified, and prohibit the removal from any place in the proclaimed area to any place outside that area or from any place in the proclaimed area to any other place in that area of any fruit fly or any fruit or vegetables of a kind or species which in his opinion may provide a host for fruit flies or any package which has or is reasonably suspected of having contained such fruit or vegetables and require occupiers and owners of land in the proclaimed area to take such action for the eradication or prevention of the spread of fruit fly as is specified in the Proclamation: Now therefore, I, the Governor of the State of Victoria, in the Commonwealth of Australia, being of opinion that it is necessary to protect the fruit industry of Victoria against the introduction or spread of the insects of the family *Trypetidae* (commonly known as fruit flies) and by and with the advice of the Executive Council of the said State, do by this my Proclamation hereby—

1. Declare that portion of Victoria described in the First Schedule to this Proclamation to be a proclaimed area.

2. Prohibit the removal from any place within the proclaimed area to any place outside that area or to any other place in that area of any fruit fly or any fruit or vegetables of a kind or species named in the Second Schedule to this Proclamation or any package which has contained or is reasonably suspected of having contained such fruit or vegetables unless such removal is made on the instruction of an Inspector or with his written permission, provided that fruit or vegetables passing through the proclaimed area may leave the proclaimed area without such instruction if such fruit or vegetables are completely enclosed within a fly-proof cover and the vehicle carrying such fruit or vegetables does not come to a halt within the proclaimed area except as required by traffic regulations.

3. Require occupiers and owners of land, not being a commercial orchard, in the proclaimed area to—

(a) Thoroughly spray all trees and plants of the kinds and species named in the Second Schedule of this Proclamation at intervals of not more than fourteen days commencing at the time fruit has set and continuing until the fruit is harvested with a solution containing either:—

(i) Six hundred (600) parts of fenthion to one million (1,000,000) parts of water (0.06 per cent.), or

(ii) Six hundred (600) parts of dimethoate to one million (1,000,000) parts of water (0.06 per cent.).

(b) Pick up from the said land before noon each day all fallen fruits of the kinds and species specified in the Second Schedule to this Proclamation, and dispose of all such fruits as prescribed in paragraph 4 (c) below.

4. Require occupiers and owners of land in the proclaimed area to take action as and when directed by a notice served on such occupier or owner by an Inspector and within the time specified in such notice—

(a) To remove and destroy all plants of:—

Tomato (*Lycopersicum* sp.),
Pepper (*Capsicum* sp.),
Egg Plant (*Solanum melongena*),
Ornamental Solanum (*Solanum* sp.),
Rock Melon (*Cucumis* sp.),
Sweet Melon (*Cucumis* sp.),
Cucumber (*Cucumis* sp.),
Cape Gooseberry (*Physalis edulis*),
Brambles (except cultivated varieties),
Box thorn (*Lycium* sp.), provided that where box thorn is grown as a hedge along a boundary or dividing fence the occupier or owner may continue to so grow it on the following conditions:—

(i) that the hedge is cut back forthwith and periodically as necessary to retain it within a height not exceeding six (6) feet from the ground level and a width not exceeding two (2) feet, and

(ii) that when such a hedge has been cut back to within the foregoing dimensions, he shall thoroughly spray it forthwith to cover all parts of the plants forming the hedge with a solution containing two thousand (2,000) parts of two-four Dichlorophenoxy-acetic acid (2-4b), or one of its derivatives to one million (1,000,000) parts of water (0.2 per cent.) and he shall spray it thereafter as often as is necessary to prevent the plants from forming fruit, and refrain from planting such plants while this Proclamation remains in force.

(b) To remove from all trees and plants growing upon the said land and to pick up from the said land all fruits and vegetables of the kinds and species named in the Second Schedule to this Proclamation, including all such fruits and vegetables which shall form on such trees and plants after the service of the said notice during such time as this Proclamation remains in force.

(c) To dispose of all such fruits and/or vegetables by boiling for fifteen (15) minutes, or burning them so as to destroy all eggs and larvae of the fruit fly or burying them under a depth of soil at least three (3) feet after having applied to the upper layer of such buried fruit or vegetables a dust containing 1 per cent. of the pure gamma isomer of Benzene hexachloride at the rate of not less than two (2) ounces per square yard, and/or by giving such other treatment as is specified in the said notice, in such a manner as to kill all eggs, larvae and pupae of fruit flies.

(d) To spray all trees and plants growing on the said land not being a commercial orchard as provided under section 3 (a) of this Proclamation, or in the case of a commercial orchard with a power spraying plant approved by an Inspector, with a solution containing six hundred (600) parts of fenthion or dimethoate to one million (1,000,000) parts of water (0.06 per cent.) at intervals not exceeding fourteen days during the time specified in such notice, and/or with such other solution as is specified in the same notice and at times specified therein.

(e) To treat the soil beneath and around trees and plants known or suspected by an Inspector to be infested or to have been infested with fruit fly by applying uniformly to the surface of an area or areas marked by an Inspector a dust containing 1 per cent. of the pure gamma isomer of Benzene hexachloride at the rate of not less than two (2) ounces per square yard, and/or by giving such other treatment as is specified in the said notice.

(f) To reduce the size and height of trees and plants (except for fruit trees growing in a commercial orchard) to a size and height which will in the opinion of an Inspector enable effective spraying, stripping and other treatment of such trees and plants to be carried out.

(g) To apply to an Inspector for a permit to remove from any place within the proclaimed area to any place outside that area or to any other

place in that area any plant or soil and to refrain from such removal until a permit is granted.

5. Require occupiers and owners of land in the proclaimed area to give access to such land at all times to an Inspector with or without assistants for the purpose of inspection and/or applying on such properties any spray material and/or for the purpose of removing any fruit or vegetables or prohibited plant, and/or performing such other acts which in the opinion of an Inspector are necessary for the eradication or prevention of the spread of fruit flies.

"36. (1) Subject to the provisions of this Sub-Division, a member to whom the provisions of paragraphs 33, 34 and 39 do not apply who performs overtime duty shall be—

(a) paid for such overtime duty; or

(b) subject to the exigencies of the service given time off in lieu thereof in accordance with this and the following paragraphs of this Sub-Division.

(2) A member who performs overtime duty shall have the right to elect to be either paid for such overtime duty or to be given time off in lieu thereof.

(3) As soon as practicable after the completion of each period of overtime duty the member who performed it shall submit a claim in respect thereof in the form and in the manner directed by the Chief Commissioner in which

the member will express his election either to be paid for that overtime duty or to be given time off in lieu thereof. The claim shall be signed by the member making the claim and by the Officer or Officers who authorized or approved of the performance of the overtime duty (for which payment is claimed) and by the Senior Officer who approved of the performance of the overtime duty (as the case may be).

(4) A member who has elected to be paid for any period of overtime duty, may, at any time before his claim for payment is forwarded to the Pay Branch, as hereinafter provided, change his election to that of being given time off in lieu of payment.

(5) A member who has changed his election pursuant to sub-paragraph (4) hereof, shall notify his change of election in writing to his Officer in Charge, through the appropriate channels, and thereupon he shall be entitled to time off in lieu of payment for that overtime duty.

(6) Claims for payment for overtime duty shall be submitted to the Pay Branch by the Officer in Charge of each District or Branch or such other appropriate Officer as the Chief Commissioner directs as soon as practicable at the end of each pay fortnight, and shall include all claims for payment in respect of overtime duty performed during that fortnight by the members of his District or Branch, or as the case may be.

37. (1) Payment for overtime duty shall be calculated at an hourly rate based on the member's fortnightly salary according to the appropriate formula set out hereunder—

(2) A member may be given time off due to him in one or more periods and from time to time.

(3) If at the end of any calendar month a member has not been given time off in lieu of all or any of the overtime duty performed by him during that month and for which he has elected to be given time off, he shall be given that time off to which he is still entitled within the two calendar months then next ensuing.

(4) If at the end of that period of two calendar months a member has not been given all the time off for overtime duty to which he was entitled at the beginning of that period, he shall be paid at the appropriate rate specified in sub-paragraph (1) of paragraph 37 for that overtime duty for which he has not then been given time off.

(5) When a member has to be paid pursuant to the provisions of sub-paragraph (4) hereof, the member's appropriate Sub-Officer or Officer will forthwith submit a claim for payment to the Officer in Charge of the District or Branch, or as the case may be, in such form and with such particulars as the Chief Commissioner may direct. The Officer to whom the claim is forwarded will include such claim in the next fortnightly claims for payment for overtime duty to the Pay Branch.

The Warracknabeal Sewerage Authority pursuant to and in exercise of the powers and authorities conferred upon it by the Sewerage Districts Act and of any and every other power and authority in any wise enabling it in that behalf doth hereby make and prescribe the following By-law (that is to say):—

PART I.—MATERIALS.

Section 1—Pipes.

Pipes shall comply with Australian Standard K.138-1969—Rigid P.V.C. Pipe for Pressure and Non-Pressure Applications—and shall be Type N Heavy Duty. Pipes shall be stored away from direct sunlight, on a flat surface clear of the ground.

Section 2—Fittings.

Fittings shall comply with Australian Standard A.160-1969—Moulded Rigid P.V.C. Fittings for Solvent Welding to Rigid P.V.C. Type N, Non-Pressure Pipe and be tested and stamped to the approval of the Authority.

Section 3—Expansion Fittings.

P.V.C. expansion fittings shall comply with all the relevant requirements of Australian Standard A.160-1969 and be of an approved design, tested and stamped to the approval of the Authority. An expansion joint may be incorporated in a junction or other fitting.

Section 4—Solvent Cement.

The solvent cement shall be of a distinctive colour, and, subject to the Authority's approval, be that recommended by the manufacturer of the pipes and fittings used in the installation.

Section 5—Clips.

Clips shall be approved by the Authority and comply with the following:—

- (a) Fabricated from mild steel, galvanized, or given other approved corrosion resistant treatment, or other approved corrosion resistant material.
- (b) That part of the clip in contact with P.V.C. if of metal, shall be coated with an approved resilient material, compatible with P.V.C. and securely bonded to the clip.
- (c) Pipe clips shall be so constructed that when completely tightened, longitudinal movement of the pipe is permitted.
- (d) Fitting clips at fixed points shall be so constructed that when tightened the fitting is securely and evenly clamped to prevent movement. The shank of the clip shall be securely anchored to provide rigid support.

Section 6—Cement Mortar.

Cement mortar shall contain one part of Portland Cement and two parts of sand, by volume, which shall be thoroughly mixed with clean water to a just freely workable consistency, to the satisfaction of the Proper Officer.

Section 7—Epoxy Resin.

Epoxy Resin compounds shall be compatible with P.V.C. Copper, Brass and Cast Iron, and be approved by the Authority.

Section 8—Sealing Rings.

Expansion sealing rings shall be manufactured from approved synthetic rubber having good compression set, resistance to oils and abrasion at high and low temperatures, and shall have a Shore Durometer hardness of $70^{\circ} \pm 5^{\circ}$.

Section 9—Lubricant.

Lubricants for sealing rings and expansion joints shall be suitable for use at both high and low temperatures and shall be approved by the Authority.

PART II.—INSTALLATION REQUIREMENTS.**Section 10—General.**

In assembling P.V.C. pipes and fittings particular care shall be taken to establish proper grade and alignment before jointing. Pipes and fittings must not be stressed by straining to grade and/or alignment.

Section 11—Cutting Pipes.

Spigot ends must be cut square, by the use of a mitre box and fine toothed panel saw, or by other approved means. Burrs and shavings shall be removed, and the external edge of the pipe slightly chamfered.

Section 12—Jointing.

12.1 Solvent cement joints P.V.C. to P.V.C. shall be made as follows:—

- (a) The pipe end and the fitting socket shall be cleaned with an approved cleaning fluid, or other approved method. Care shall be taken to ensure that all pipes and fittings are dry and free from moisture prior to applying solvent cement.
- (b) The depth of the socket is to be marked on the pipe end by using a pencil or similar marking device. Scoring of the pipe is not permitted.
- (c) For interference fit joints a liberal coating of solvent cement is to be applied evenly to the external surface of the spigots and a lighter coat to the internal surface of the socket for the full engagement length. While the surfaces are still wet the spigot shall be driven home into the socket and held in position for not less than 30 seconds. (The joint is an interference fit when in a dry condition, the spigot end is tight and does not bottom in the socket.)
- (d) For clearance fit joints a liberal coating of solvent is to be applied evenly to the external surface of the spigot and the internal surface of the socket, for the full engagement length, and left until touch dry. A second similar coating of solvent cement is then to be applied to the external surface of the spigot and a lighter coat to the internal surface of the solvent, and while the surfaces are still wet, the spigot end shall be driven home into the socket and held in position for not less than 30 seconds. (The joint is a clearance fit when the spigot end in a dry condition bottoms in the socket.)
- (e) Care must always be taken to ensure that the spigot is entered in the socket squarely, and in alignment and grade with the preceding pipe or fitting.

- (f) Any surplus solvent cement is to be cleaned off, and the joint is not to be subjected to any strain within three minutes of being made.

12.2 Joints between P.V.C. pipes and vitrified clay sockets shall be made by applying solvent cement evenly to the spigot for the full engagement length, and while wet, coat the surface with clean sharp sand, the joint shall then be finished by filling the annular jointing space with cement mortar, or by approved epoxy jointing compound. Both materials shall be neatly splayed off.

12.3 Joints between P.V.C. pipes and cast iron sockets shall be made as follows:—

- (a) For caulked joint sockets by filling the annular jointing space with an approved epoxy jointing compound, neatly splayed off.
- (b) For bolted gland joints by means of a gasket, gland, ring and bolts, all complying with Australian Standard A.88-1970—Part II—Cast Iron Non-Pressure Pipe Fittings.
- (c) Requisite size cast iron reducing sockets shall be used wherever necessary.

12.4 Joints between P.V.C. pipes and steel tubes shall be made by means of a threaded adaptor complying with Australian Standard 160-1969. Polytetrafluoroethylene (TFE) tape shall be used on the thread as a sealant, and hemp shall not be used.

12.5 Joints between P.V.C. pipes and copper or brass tubes, shall be made by means of a threaded adaptor complying with Australian Standard 160-1969 solvent cemented to the P.V.C. pipe and screwed using TFE tape and not hemp, into an approved brass adaptor, silver brazed to the copper or brass tube.

Section 13—Expansion Joints

Expansion fittings are to be fixed in the following positions:—

- (a) In vertical waste and soil pipes, at each floor excluding the top floor, at which fixtures are connected, and at the downstream end of the pipe.
When connected to a level inlet and the waste exceeds 4'-0" in length, a suitable plastic sleeve shall be provided in the cement mortar, to permit movement of the pipe, in lieu of an expansion joint. This provision does not include frogmouth back branches.
- (b) In vertical vent pipes at every floor where a branch vent is connected.
- (c) In soil, waste and vent pipes, close to and above the junction to which fixtures on that floor, or the branch vent therefrom, are connected. An expansion fitting may be a separate fitting or be combined with a bend or junction.
- (d) In graded pipes between fixed points, greater than 4'-0" and less than 20'-0" apart, an expansion fitting shall be provided at the downstream end of the pipe.

Additional expansion fittings shall be provided as appropriate when the length exceeds 20'-0".

- (e) In graded pipes between fixed points, where the length of the graded pipe and offset comply with the table below, an expansion fitting may be omitted.

Nominal Diameter of Pipe.	Maximum Length of Graded Pipe. (L).	Minimum Length of offset. (O).
	feet.

5", 6"	7 10 20	3'-0" 3'-6" 4'-0"

Refer Drawings Appendix 'A', 'B', 'C'.

A fixed point is one at which a pipe or fitting is restrained, e.g.

- (i) at a junction into a vertical pipe,
 - (ii) connection to a drain,
 - (iii) at a change of direction after passing through a wall.
- (f) Expansion fittings shall not be fixed below ground.
- (g) Care must be taken to ensure that expansion fittings are correctly installed and that the pipe is not bottomed in the expansion socket. The following procedure is to be adopted where no temperature markings are provided on the moveable part of the fitting:—

- (i) the pipe is to be inserted in the expansion socket for the full depth and marked.
- (ii) it is then to be withdrawn and the temperature engagement depth marked on the pipe, between the socket depth mark and the end of the pipe. The length to be allowed for expansion shall be in accordance with the following:—

Cold weather (up to 50°F) $\frac{1}{4}$ inch
 Warm weather (up to 80°F) $\frac{1}{2}$ inch
 Hot weather (above 80°F) $\frac{3}{4}$ inch

- (iii) The pipe shall be held in this position until the next point upstream therefrom is secured.

Section 14—Supports

Pipes and fittings shall be supported in accordance with the following:—

- (a) On vertical and graded pipes at intervals not greater than three feet, and so placed to maintain the pipes truly vertical or on a uniform grade.
- (b) At every fitting incorporating provision for expansion and at the lower part of every separate expansion fitting to prevent movement of the fitting.
- (c) In graded pipes in which an expansion fitting may be omitted, no clip shall be fixed on the offset within 4 feet downstream of the bend.

Section 15—General.

15.1 Building into walls or floors. Any pipe or fitting built into or passing through any floor or wall shall have a suitable P.V.C. sleeve with an annular space of not less than $\frac{1}{4}$ inch provided between the pipe or fitting, and the sleeve.

15.2 Protection against damage. All piping shall be adequately protected where liable to damage.

15.3 Pipes and fittings under buildings. Soil, waste and combined waste pipes may be laid below ground under buildings to connect to a drain, except when:—

- (i) The building is of slab floor construction.
- (ii) Loading of the pipe could occur.

15.4 Vent Pipes. Only drainage vents may be constructed of P.V.C. pipes. Provision for thermal movement of vents pipes shall be made by the following methods:—

- (a) By securely fixing the pipe at its intersection with the roof, where an expansion joint is provided above the first fixed point below the roof junction to permit downward expansion of the vent pipe.
- (b) By leaving the vent pipe free to move upwards at the roof line, in which case, the flashing is not to be attached to the pipe and an approved weathering cowl is to be fixed to make the flashing watertight. The expansion fitting referred to in (a) above may be omitted with this method.

15.5 Concealment of Pipes. In all buildings, if soil, waste, combined waste or vent pipes are concealed within pipe ducts or recesses in walls, such pipe ducts or wall recesses shall:—

- (i) be provided with approved means of access and have an area of 9 inches by 9 inches, measured clear of all pipes and other obstructions.
- (ii) have at least one of its sides constructed of wood-work, brickwork in lime mortar, terra cotta or gypsum blocks, plaster on expanded metal lathing, or other approved material, so constructed and fixed as to be capable of being removed independently of, and without damage

to, any other part of the structure, and provided with access openings so placed as to allow ready inspection and maintenance of every straight line of soil, waste, combined waste or vent pipe. Openings provided in brick cavity walls are not acceptable as ducts.

- (iii) Soil, waste, combined waste or vent pipes in veneer construction may be placed in walls where—

- (a) the pipes are vertical.
- (b) auxiliary studs are provided each side of the pipes at 9 inch centres.

In all conditions pipes shall be fixed at least 3" clear of all heating pipes and/or conduits.
