- 2.2 The location of new aerodromes in areas of greater long term value to the community for other purposes shall be avoided.
  - 2.3 The location of aerodromes, the growth they generate, the nature and limits of development in their vicinity and the surface transport system required to serve them shall be planned as an integrated operation.
  - 2.4 In the planning of areas in the vicinity of aerodromes:—
    - (a) any new use or development of land which could prejudice the safety or efficiency of the aerodromes shall be precluded; and
    - (b) the detrimental effects arising from aircraft operations shall be taken into account in regulating and limiting the use and development of land.
  - 2.5 Any use or development of land, particularly on the surface approaches to any aerodrome, shall be planned to ensure that visual amenity is consistent with the status of the aerodrome.
3. The major factors influencing this Statement of Planning Policy are:—
- 3.1 The importance of air transport to the community, and the accelerating demand for it.
  - 3.2 The increasing size of major aerodromes, and the number of aerodromes of all types stimulated by the rapid growth in air traffic and changes in aviation technology.
  - 3.3 The urban growth generated by aerodromes.
  - 3.4 The magnitude of the surface transport network and operations required to support a major aerodrome.
  - 3.5 The economic importance of ensuring the optimum use of aerodromes.
  - 3.6 The desirability of preserving opportunity for expansion of existing and proposed aerodromes in preference to duplication of airfields with added economic and social cost and community conflicts.
  - 3.7 The need to protect aerodromes from incompatible developments in their vicinity and against demands for curtailment of operations which such development would engender.
  - 3.8 The need to regulate the use and development of land in the vicinity of aerodromes:—
    - (a) to safeguard the operational safety of aircraft; and
    - (b) to preclude developments inconsistent with the health and welfare of the community.
  - 3.9 The detrimental effects of aircraft operations on land use and development in the vicinity of aerodromes.
  - 3.10 The need to protect areas which are desirable for developments of other descriptions against aerodromes and their inhibiting effects.
4. In implementing this Planning Policy special attention shall be given to the following:—
- 4.1 Consultation between planning and airport authorities in assessing the need for additional aerodromes or extensions to existing aerodromes.
  - 4.2 Evaluation of the likely influence of additional or extended aerodromes on other development, land use patterns and traffic generation.
  - 4.3 The integration of long-range planning for the location of new aerodromes and aerodrome extensions and planning of the use and development of land in their vicinity, having regard to present, prospective and desirable patterns of urban growth.
  - 4.4 Regulation of the use and development of land to facilitate the safe approach and take-off of aircraft.
  - 4.5 Assessment, in conjunction with aviation authorities, of the noise levels arising and anticipated from present and prospective aircraft operations in areas affected by aerodromes.

- 4.6 Restriction and regulation of the use and development of land and its reservation or acquisition where appropriate to preclude residential development and to discourage other incompatible uses and developments in areas likely to be affected by high levels of aircraft noise.
- 4.7 Securing appropriate changes in land use or land use designation, particularly when redevelopment is contemplated, of existing urban areas near to aerodromes which may be exposed to high levels of aircraft noise.
- 4.8 Formulation of standards appropriate to the status of the aerodrome for the location and external appearance of new buildings and the landscaping of approaches to aerodromes.
