Pipelines Act 1967.

NOTICE OF VARIATION OF CONDITIONS OF A PIPELINE LICENCE.

Whereas sub-section (3) of section 30 of the *Pipelines Act 1967* provides that the Minister may by notice published in the *Government Gazette* amend vary add to or revoke any conditions stated or included in a licence, I,

James Charles Murray Balfour, Minister of Mines, do now hereby vary the conditions of Pipeline Licence No. 57 in the manner indicated in the Schedule hereto:—

SCHEDULE.

1. Delete the first paragraph of clause I (A) of the Schedule and substitute the following:—

(A) Design.

With the exception of the last stage between Boundary-road, East Geelong, and the main meter and pressure regulating station at Alcoa of Australia Limited, Point Henry, the pipeline shall be designed constructed and tested according to the USA Standard Code for Pressure Piping USAS B31.8-1968: Gas Transmission and Distribution Piping Systems. Welding of this portion of the pipeline shall be performed as specified in API Standard 1104, 11th Edition, January, 1968: Standard for Welding Pipelines and Related Facilities. The said last stage of the pipeline shall be designed, constructed, tested and, together with the remainder of the pipeline constructed under the licence, operated in accordance with the requirements of the Australian Standard CB28-1972: SAA Gas Pipeline Code.

2. In sub-clause (b) of clause I (B) (ii) of the Schedule, insert after the words "polyethylene coating" the following expression "or asbestos wrapped fibre glass reinforced coal tar enamel coating".

3. Delete clause I (F) of the Schedule and substitute the following:—

(F) Pressure Test.

After construction and before being placed in operation, the pipeline shall be subjected to a pressure test which, the exception of the said last stage of the pipeline, shall be in accordance with the procedure outlined in section 8 of the Construction Specification which accompanied the Pipeline Licence Application. The said last stage of the pipeline shall be subjected to a pressure test in compliance with Rule 7.4.3 of Australian Standard CB 28-1972: SAA Gas Pipeline Code according to a programme to be approved by the Director, Oil and Gas Division of the Mines Department.

During the said test, the pressure at the control point shall be measured at appropriate, but in no case greater than hourly, intervals using a calibrated and certified dead weight tester capable of indicating a pressure change of one lbf/in², and recorded.

In addition, continuous recording equipment shall be used to record the pressure in the pipeline during the whole period of pressure testing. This equipment and any other pressure gauges used in the said pressure test shall be checked immediately prior to and after the said test by the said dead weight tester. Water volume measurement during the pressure/volume plot where applicable shall be by suitably calibrated devices.

The licensee shall give the Director, Oil and Gas Division of the Mines Department seven days notice of intention to test, and shall within fourteen days of completion of the pressure test, forward to the said Director, a copy of the pressure chart including its calibration, and graphs of the said dead weight tester readings (as well as other pertinent factors) with time and water volume where applicable, all duly interpreted and witnessed by the licensee's engineer.

4. In clause III (B) of the Schedule, delete the expression "procedure qualification as required in the said API Standard 1104" and substitute the expression "and radiographic procedure qualification as required in the said API Standard 1104 or the said Australian Standard CB28 as appropriate".

5. Delete clause III (D) (i) of the Schedule and substitute the following:—

The pipeline shall be maintained in accordance with Rule 8.7 of the Australian Standard CB 28-1972: SAA Gas Pipeline Code to the extent that this standard is not inconsistent with the following:—

(i) Corrosion Control.

Subject to compliance with the State Electricity Commission Cathodic Protection Regulations 1970, the licensee shall—

(a) carry out a monthly check of the transformer and rectifier units or any impressed current systems used to ensure they are operating satisfactorily. A log of such checks, giving details of amperage output and meter readings shall be maintained by the licensee.

(b) at intervals not exceeding six months conduct corrosion surveys of the pipeline including tests for stray current electrolysis. Measuring instruments approved for the purpose by the Chief Electrical Inspector, State Electricity Commission of Victoria shall be used for these surveys which shall be carried out only after the licensee has used his best endeavours to ensure that no abnormal condition exists which is likely to affect the validity of the results.

(c) submit a summary of the results of these surveys annually to the said Chief Electrical Inspector for advice on action to be taken to maintain the cathodic nature of the pipeline so that corrosion is limited, and shall take all reasonable steps to give effect to the advice received.

(d) submit to the Director, Oil and Gas Division of the Mines Department an annual report outlining the results of the corrosion surveys, the recommendations made by the said Chief Electrical Inspector and the details of the resulting action taken by the licensee.

6. Delete clause III (D) (ii) of the Schedule and substitute the following:—

(ii) Pipeline Markers and Signs.

The licensee shall check the signs required by the Pipelines (Construction and Operation) Regulations 1971 at intervals not exceeding three months and shall where necessary forthwith replace, repair and repaint the same.

7. Delete clause III (D) (iii) of the Schedule and substitute the following:—

(iii) Patrol of Pipeline.

The licensee shall cause the pipeline to be patrolled by at least 5 daily patrols per week in accordance with the procedure laid down in Rule 8.7.9 of the Australian Standard CB 28-1972: SAA Gas Pipeline Code and shall on demand produce to the Director, Oil and Gas Division of the Mines Department a written report on the results of such patrolling.

8. Delete clause III (E) of the Schedule and substitute the following:—

(E) Alterations to Pipeline.

Except for emergencies, the licensee shall not affect any repairs or make any additions or alterations to the pipeline without the prior approval in writing of the Director, Oil and Gas Division of the Mines Department.

9. Delete the first sentence of clause III (F) of the Schedule and substitute the following:—

(F) Pressure Control.

The pressure control systems hereinbefore mentioned shall be maintained in accordance with Rule 8.2 of the Australian Standard CB 28-1972: SAA Gas Pipeline Code.
