Soil Conservation and Land Utilization Act 1958.

ROSSLYNNE RESERVOIR (JACKSON CREEK) WATER SUPPLY CATCHMENT.

NOTICE OF DETERMINATION OF LAND USE.

Proclaimed 8th September, 1970, *Victoria Government Gazette* No. 85 dated 16th September, 1970, pursuant to Section 22 (1) of the *Soil Conservation and Land Utilization Act 1958*.

In pursuance of the provisions of Section 23, sub-section (1) of the *Soil Conservation and Land Utilization Act 1958*, the Soil Conservation Authority, after consultation with the Land Conservation Council, has determined the land use for all that land in the Parishes of Bullengarook, Coornmill, Gisborne and Macedon within the boundaries of the Rosslynne Reservoir (Jackson Creek) Water Supply Catchment delineated and marked on Plan No. 2396, the original of which is lodged at the Head Office of the Soil Conservation Authority. All land within this area shall be used in accordance with the particular category of land use to which the area has been assigned. The boundaries of land use categories shown on Plan No. S-362 are intended as a guide to persons and departments involved in the area, who should consult with the Soil Conservation Authority before making any changes in land use.

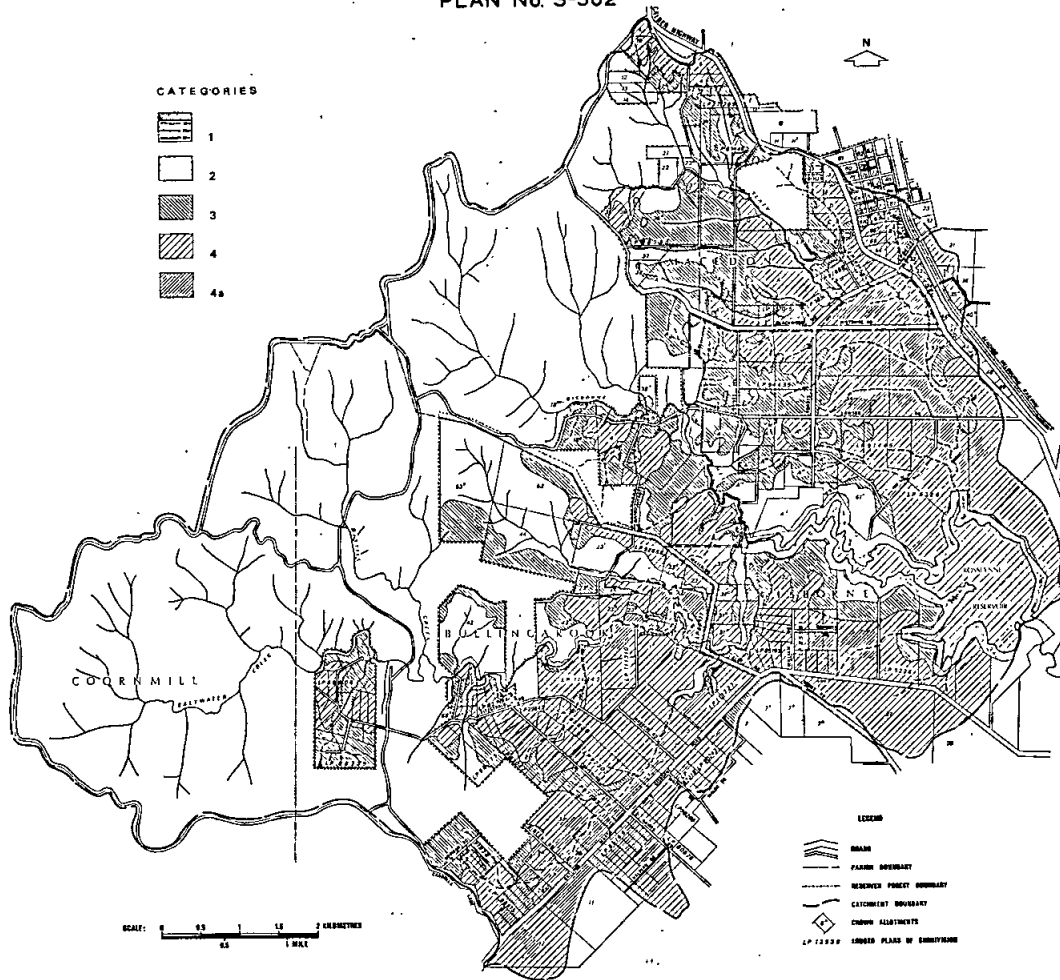

The provisions of individual land use categories are set out below and should be read in conjunction with the Determination plan.

Category Number.	Land Use Category.	Provisions of Category.
1	Land to be retained for the protection of the reservoir, streams and water-courses. Covers Land:— Adjacent to maximum operating level of Rosslynne Reservoir (minimum width 100 m); within 30 m, 20 m or 10 m of streams and watercourses (as shown on Plan No. S-362); within such greater distance of streams or watercourses as the Authority may specify.	A. Disturbance of soil and vegetation should be minimal on land in this category. B. The Authority may specify conditions for the construction of stream crossings, and for improvements in the location and design of existing crossings, or other conditions where necessary.
2	Land to be retained as forest. This land may be used for low intensity recreation, and parts of it may be suitable for residential use or more intensive forestry.	A. All forest operations are to be in accordance with forest management prescriptions made or approved by the Authority. B. Residential use is subject to Authority approval of site suitability, and imposition of conditions where necessary. C. Grazing of forested land in this category should be limited to that required to reduce fire hazard.
3	Land best suited to forest use, parts of which may be used for grazing, residential or recreational use.	A. All forest operations are to be in accordance with forest management prescriptions made or approved by the Authority. B. The Authority may specify conditions as to areas suitable for clearing, the timing of operations, soil conservation measures, and management of land after clearing. C. Residential and recreational uses are subject to Authority approval of site suitability, and imposition of conditions where necessary.
4	Land suitable for grazing or forestry, parts of which may also be suitable for other agricultural uses, or for residential or recreational use.	A. The Authority may specify conditions relating to stocking rates, clearing and development operations, the areas suitable for intensive uses, or other catchment protection measures. B. Residential and recreational uses are subject to Authority approval of site suitability, and imposition of conditions where necessary.
4A	Land suitable for grazing. (Land in this category has a significant limitation to intensive uses owing to excessive seasonal wetness).	A. The Authority may specify conditions relating to use of this land.

General Provisions Applying to all Categories:

- (1) Proposals for subdivision of land, development of land for recreation, extractive industries and mining operations, or other land uses not specified in this determination, require prior assessment by the Authority. Conditions may be imposed in these cases.
- (2) Further conditions may be imposed to ensure that no development or management practice causes erosion or otherwise presents a risk to water supply interests.
- (3) From time to time the Authority may require improvements in existing roads, roadside drainage and embankment stability in the catchment.
- (4) Disposal of domestic effluents is to be to the requirements of the *Health Act 1958*, the *Environment Protection Act 1970*, and the Shire of Gisborne.
