Transport Regulation Act
TRANSPORT REGULATION BOARD
Notice No. 121

*Fitting of Protective Screens and Warning Devices in
Certain Commercial Passenger Vehicles*

Take notice that pursuant to powers conferred on the Board by the provisions of Regulation 22 of Part VIII. of the Transport Consolidated Regulations 1977, the Board hereby requires in accordance with the provisions of Regulation 5 of Part I. of the said Regulations that the protective screen to be fitted to vehicles the licences of which are classified as either a "Metropolitan Taxi-Cab" or a "Suburban Taxi-Cab" and, where the Board so requires, any other taxi-cab or private hire car, shall be in accordance with the following specifications.

Protective Screens

The required screen shall consist of a transparent section above and fitting close to the front seat back, any necessary framing and attachments to the seat and suitable protective padding; designed and fitted to allow movement of the seat through its range of adjustment and minimize the potential danger to the vehicle occupants.

The screen shall be produced from transparent mar-resistant polycarbonate sheet of at least 6 mm thickness or other material approved by the Board, and shall be mounted inclined approximately 10 degrees rearward from vertical. All edges and corners of the screen shall be suitably radiused and the near-side vertical edge shall be fitted with an approved protective strip to decrease the injury potential of this edge.

The screen shall follow the driver's seat top contour and extend upwards to within 15 mm of the head lining with the seat in its foremost position and from the vicinity of the off-side door pillar to midway along the top of the seat in the case of bench seats or to the vicinity of the near-side edge of the driver's seat back at the lower edge of the screen. The screen must not foul the seat belt or attachments.

Any framework and attachments above the bottom of the upper seat back frame member shall be covered by a suitably shaped impact protection pad of moulded semiflexible integral skin polyurethane foam of at least 20 mm thickness.

Any framework below the upper seat back frame member should not be more than 150 mm wide at the lower seat back frame member. This lower framework shall be trimmed with vinyl over high density foam at least 12 mm thick.

There shall be no obstruction to forward vision from the rear seat other than is necessary for attachment and support of the upper screen around the head restraint to the degree determined by the largest head restraint to be catered for. This provision is to allow for standardization of relevant components where possible. It is envisaged that the same size impact protection pad would be used for almost all installations including those on bucket seats.

Further, pursuant to the same powers conferred on the Board by the provisions of Regulation 22 of Part VIII. of the Transport Consolidated Regulations 1977 aforesaid, the Board hereby approves in accordance with the provisions of Regulation 5 of Part I. of the said Regulations, the following emergency warning devices and optional emergency equipment:—
