“Field Practice” — the making of a survey of a route or site nominated by the Board and the preparation of appropriate records.

“Practical Levelling” — the determination of elevation of points nominated by the Board and the preparation of appropriate records.

“Professional Practice” — an oral examination concerning the responsibilities and obligations of a surveyor in respect of professional practice, legislation, and the community.

Prerequisites to Examination

Under Regulation 16 prospective examinees in any of the above Assessment Projects must, at the time of the examination:

- have completed the required course of training in surveying as prescribed in Regulations 3 to 9 and have submitted to the Board a certificate or certificates of training;

Prospective candidates for the examination in the above Assessment Projects who have not been previously credited with a pass in each of or been exempted from the Practical Projects as prescribed are required to submit to the Board for examination or re-examination any required Practical Projects at or before 12 noon on 3 February 1984.

Notwithstanding that the closing date for submission of Practical Projects is 3 February 1984, the Surveyors Board strongly urges prospective examinees to submit Practical Projects at least 8 weeks prior to that date (i.e. not later than 1 December 1983) so that they might have sufficient time to attend to any requisitions on the projects.

Applications for Examination

The Board will consider all applications for examination in the above Assessment Projects which have been lodged in accordance with Regulation 19 (3) at or before 12 noon on 24 February 1984.

Where a prospective examinee has not met the requirements of Regulation 17 (c) but has submitted Practical Projects (as indicated above) that person should submit an application for examination in the above Assessment Projects in the expectation of meeting the requirements of Regulation 17 (c).

REPORT ON THE FIRST PUBLIC MEETING OF THE PUBLIC SERVICE BOARD

The first Public Meeting of the Public Service Board was held on 3 May 1983.

The three issues dealt with at the meeting were:

- Aboriginal Employment and recruitment in the Victorian Public Sector,
- Audit of the Delegation System, and
- Rationalisation of Establishment Usage and Board Policy on Establishment Management.

(i) *Aboriginal Employment and recruitment in the Victorian Public Sector*

An outline of the aims of the Board's strategy for increasing the employment of Aborigines in the Victorian Public Service was delivered by the Director of the Board's Staffing Division.

A number of submissions, questions and observations were received by the Board, mainly from members of the public in the audience.

From issues raised at the Meeting, the Board agreed to consider:

1. Consultation with aboriginal community groups on the nature and content of training programs arranged under the Aboriginal Employment and recruitment Policy.

2. The need to acquaint non-aboriginal supervisors and colleagues of aboriginal trainees with aboriginal needs and problems.

3. Amendment to the definition of "aboriginality" for the purposes of the Board's strategy.

4. The introduction of administrative arrangements to monitor the progress of trainees and to determine suitable future placements.

5. The need to address the problem of converting temporary or exempt positions affected by the Board's programs in this area to permanent positions, including cases where such conversion may be impeded by funding difficulties.

Since the Meeting, appropriate modifications incorporating a number of the suggestions made at the Meeting have been made to the Board's action plan for the implementation of its Aboriginal Employment Strategy.

(ii) *Audit of the Delegation System*

The Director of the Board's Policy Division outlined the strategy which had been adopted for reviewing progress in the development of the delegation system and auditing the exercise of delegated Board powers.

Although some questions in relation to particular delegations were raised, the Board's initiatives were generally perceived as having an important and encouraging impact on the improvement of personnel administration in the Victorian Public Service.

It was agreed at the Meeting that action to be taken as result of discussion on this item would include:

1. The development of training programs and documentation guidelines to ensure Departments understand and can apply the Board's standard documentation for submission of organisation and classification proposals.

2. The provision of assistance to Departments in devising methods to overcome systems and records keeping problems associated with the documentation necessary for delegated decision-making.

3. A review of Delegation 5.1 (dealing with the variation of duties and qualifications) in the context of the current overall review of qualifications policies and practices within the Service.

4. The scheduling and commencement of a delegations audit program in the remaining unaudited Departments within three months.

(iii) *The Rationalisation of Establishment Usage and the Board's Policy on Establishment Management*

The Acting Director of the Board's Operations Division described the strategy behind the rationalisation exercise and the key elements of the Board's policy.

Concerns raised about the PERSYST Data Base were noted, and particular attention is now being paid to this in the implementation of the rationalisation policy.

Conclusion

The results achieved at the meeting illustrate the scope for such meetings to contribute to the policy development and decision-making processes of the Board. In particular, the level of interest in the Board's Aboriginal Employment and Recruit-

ment Strategy amply demonstrated that public meetings provide an opportunity for valuable public involvement in the Board's policy development processes and a higher level of employee, organisation and departmental contribution to the development and application of policies in areas of general community interest.

STANDARD TARIFF CONDITIONS FOR VICTORIA

Includes Areas Supplied by the State Electricity Commission and Municipal Electricity Supply Authorities

1 GENERAL

1.1 Charges for electricity shall be in accordance with standard rates as determined by the Supply Authority from time to time and which are as shown in the current schedule of electricity tariffs.

1.2 The Supply Authority retains the right to —

- prepare schedules of conditions of supply;
- require customers to enter into agreements, including conditions deemed appropriate by the Supply Authority in special cases;
- vary the times applicable to prescribed hours tariffs;
- read meters at other than specified intervals;
- record meter readings and charge in multiples of 10 up to 5000 kilowatt hours, in multiples of 100 from 5000 to 100 000 kilowatt hours and in multiples of 1000 over 100 000 kilowatt hours in a normal billing period.
- require any customer who takes a large proportion or all of his consumption during prescribed hours to enter into a special agreement including conditions deemed appropriate by the Supply Authority to the particular circumstances.
- require any customer to give adequate security by way of a deposit or otherwise for payment of all sums which may be, or become, payable to it.

1.3 With respect to meter reading periods at any time during the supply agreement that are more or less than those normally applying between scheduled consecutive meter readings, the respective electricity charges (demand and/or energy) may be adjusted pro rata on a daily basis. The same will apply to supply charge, minimum charge and meter rental. In the case of the supply charge and minimum charge, an absolute minimum of \$1.00 shall apply to any account.

1.4 A customer shall not supply electricity to another council, company or person without the written approval of the Supply Authority.

1.5 The times nominated for prescribed hours tariffs are Eastern Standard Time.

2 TRANSFER BETWEEN TARIFFS

- 2.1 A customer wishing to transfer to a maximum demand tariff of the same supply voltage, or to Option 2 of a tariff, shall give the Supply Authority three months' notice of the required transfer.
- 2.2 A transfer from Option 2 to Option 1 is permitted only after a minimum of 12 months supply on that option.
- 2.3 A customer selecting a maximum demand tariff must remain on the selected option of that tariff for a period of not less than 12 months, and where high voltage is selected must take supply for a period of not less than five years.
- 2.4 Where a customer transfers to a maximum demand tariff, he may be required to pay the costs of the necessary metering modifications.
- 2.5 Seasonal changes between tariffs or options of tariffs will not be permitted.

3 SUPPLY VOLTAGE

- 3.1 Unless otherwise stated, tariffs are based upon supply at low voltage, viz, nominally 240/415/480 volts.
- 3.2 Customers who elect to take supply at high voltage must do so at a standard high voltage prescribed by the Supply Authority.
- 3.3 The Supply Authority reserves the right to decide whether high voltage supply shall be made available to any particular customer.
- 3.4 High voltage is defined as any nominal potential in excess of 240/415/480 volts and includes 6.6 kV, 11 kV, 22 kV, 66 kV, 220 kV, 330 kV and 500 kV.

4 STANDBY SUPPLIES

Standby conditions apply where a customer requires a supply of electricity from the Supply Authority as a standby to private generation or where the customer desires to operate private generators in parallel with the Supply Authority system.

- 4.1 For High Voltage Supplies
Tariffs and conditions are detailed on a separate schedule "Standby and Parallel Supplies — High Voltage" available from the Supply Authority.
- 4.2 For Low Voltage Supplies
Customers should contact their Supply Authority to determine current conditions.

5 STORAGE WATER/STORAGE SPACE HEATING: PRESCRIBED HOURS

The prescribed hours tariffs for storage water/storage space heating are available only in conjunction with domestic or residential tariffs.

The tariffs apply to electricity consumed by storage heating elements from a supply made available only during prescribed hours by means of a time switch or other form of control arranged and provided by the Supply Authority.

Electricity consumed by booster elements in storage water heaters, by auxiliary elements in storage space heaters, by fans or by pumps must be metered and charged under a general purposes tariff.

The hours applicable from time to time in respect of any customer or locality will be indicated on application but will generally be of eight hours duration nightly for storage water heating and seven hours nightly, plus three hours each afternoon for storage space heating.

The tariff(s) is applicable to permanently wired storage water heaters, including solar electric and to permanently wired storage space heaters which conform to the following conditions:

5.1 Storage Water Heaters

- a must be of a type and design for which the SEC has issued a test certificate indicating compliance with specified requirements of AS 1056 with regard to performance. Such approved water heaters carry a registered Testing Stamp affixed by the manufacturer; and
- b where only one water heater is installed, it must have a rated delivery of not less than 160 litres. Where additional or multiple heaters are installed in a premises the total of the individual rated deliveries of heaters supplied through a single meter shall be not less than 160 litres.

5.2 Storage Space Heaters

- a must comply with SEC requirements with regard to type and design, and with regard to total element wattage in relation to thermal storage capacity; and
- b shall have a total storage input rating of not less than 2 kW.

The availability of the abovementioned tariffs for storage water heating and/or storage space heating does not preclude customers connecting these heaters under any other appropriate tariff, viz, Option 2 of Tariffs B, C, D, E or N for night rate operation, or any continuous tariff for continuously energised operation.
