NOTICE TO MARINERS
No. 35 of 1985

AUSTRALIA—VICTORIA
Port Phillip
Queenscliff Boat Harbour Entrance

Former Notice No. 31 of 1985 refers.

Reference Position: Queenscliff High Light (Lat. 38° 16' 25" S., Long. 144° 39' 44" E.)

The position of the two buoys described in Notice No. 31 of 1985 should be altered to:

1. Port Hand 071°20', 1350 metres from reference position.

2. Starboard Hand 069°30', 1420 metres from reference position.

These buoys lie 15 metres south and 70 metres north of the leading line respectively. Light characteristics remain unchanged.

Mariners are warned of the unpredictable and rapid change in the nature of the boat harbour entrance channel between the two buoys described above and the seaward ends of the north and south training walls. Regular daylight dredging operations take place within this area in the vicinity of the leading line to maintain a depth of 2.5 metres. However shoaling to lesser depths frequently occurs and sometimes crosses from the southern side to north of the leading line. Generally at the seaward end of the approach channel, when shoaling occurs, deeper water will be found to the north of and close to the leading line.

Two small intermediate lit port and starboard lateral buoys are positioned between the two outer buoys and the training walls and mark the limits of navigable water. The position of these buoys relative to the leading line are altered without notice.

Charts Affected: Aus 143, Aus 158.
