10. **COMPANIES (AUDITORS AND
LIQUIDATORS DISCIPLINARY BOARD)
(AMENDMENT) REGULATIONS 1986**

It is proposed to amend the Companies (Auditors and Liquidators Disciplinary Board) Regulations 1983 to alter the method by which Board members and their deputies are remunerated. A regulatory impact statement has been prepared in accordance with the requirements of the *Subordinate Legislation Act 1962*. The statement concludes *inter alia* that the amendment is necessary to make the method of remunerating the Board accord with the practice adopted in other States participating in the Companies and Securities Co-operative Scheme, to provide substantial cost savings and to provide a means by which the remuneration paid to the members more adequately remunerates them for days lost from their income earning activities when they actually sit.

A copy of the regulatory impact statement may be obtained from the Policy and Legislation Division, Corporate Affairs Office, 471 Little Bourke Street, Melbourne.

Comments and submissions are invited from the public and will be received up to 21 days from the publication of this advertisement.

Deputy Commissioner for Corporate Affairs

NATURAL RESOURCES AND
ENVIRONMENT COMMITTEE—INQUIRY
INTO ASPECTS OF ELECTRICITY SUPPLY
AND DEMAND BEYOND THE MID 1990's

Whereas section 4 (f) (1) (a) (ii) of the *Parliamentary Committees Act 1968* provides (*inter alia*), that Governor in Council by Order published in the *Government Gazette* may refer any proposal, matter or thing relevant to the functions of the Joint Investigatory Natural Resources and Environment Committee under the said Act for inquiry, consideration and report to the Parliament.

Now therefore, His Excellency the Governor of the State of Victoria, by and with the advice of the Executive Council thereof, and in the exercise of

the powers conferred on him by the said Act, doth hereby refer to the said Committee the following matter, namely:

To inquire into and consider and report to the Parliament by 1 October 1987 on the most appropriate sequencing of future power supply options to follow Loy Yang B Units 1 and 2 in order to meet the forecast range of load growth for the decade beyond the mid 1990s, as part of the development of long-term strategies for balancing electricity supply and demand.

In particular, the Committee should—

1. Take into account—

- (a) State Economic Strategy and Government Energy Policy, the SEC's statutory obligations and Corporate objectives, including social, employment, infrastructure, environmental and economic factors;
- (b) current and proposed initiatives in demand planning and the potential impact of plant refurbishment programs;
- (c) consideration of the strategic role and economics of investment in conservation, co-generation and load management, and progress with development of renewable energy resources;
- (d) the desirable mix of future fuels for generation in the Victorian electricity system (other than nuclear power, excluded under the *Nuclear Activities (Prohibition) Act 1983*), in the light of potential economic, business, and regional/State employment implications, and the location, nature and extent of potential fuel resources;
- (e) the development of the three-State South East Australia interconnected power system and its potential for future extension/expansion; and
- (f) the extent to which the possible requirements for future steam supplies or other services to new industrial applications for coal, including the future requirements for briquetting, might impact on the sequencing of future Latrobe Valley power generation projects.
