GOVERNMENT NOTICES

**ROAD SAFETY (SIDE PROJECTION)
REGULATIONS 1990**

In accordance with the provisions of the *Subordinate Legislation Act 1962*, notice is given of the proposal to make regulations to be known as the Road Safety (Side Projection) Regulations 1990.

A regulatory impact statement has been prepared as required by the Subordinate Legislation Act.

The objectives of the proposed regulations are to—

- (a) achieve uniformity of regulations throughout Australia regarding the projection of loads from vehicles (uniformity of regulations already exists regarding front and rear projections and amongst New South Wales, Queensland, Western Australia and Northern Territory regarding side projections);
- (b) improve the economic efficiency of interstate freight transport;
- (c) reduce the likelihood of accidents being caused by projections of loads.

The regulatory impact statement concludes that the proposed amendments to the Road Safety (Vehicles) Regulations 1988 to restrict loads from projecting more than 15 centimetres either side of the extreme outer portion of the body of the vehicle are the most cost-effective and practicable means of achieving the objectives.

Comments and submissions are invited from interested parties and should be forwarded to the Legislation Officer, Roads Corporation, Legal Services Department, 4th Floor, 60 Denmark Street, Kew 3101.

Copies of the regulatory impact statement may be obtained either by writing to the Legislation Officer at the above address or by phoning Mrs Rose Ferma on 860 2889.

Any inquiries regarding the content of the statement should be directed to Ms Lorna Heiman on 345 4664.

The closing date for submissions is 21 days from the date of this notice.

Chief Executive, Roads Corporation

**ROAD SAFETY (LARGE VEHICLES)
REGULATIONS 1990**

In accordance with the provisions of the *Subordinate Legislation Act 1962*, notice is given

of the proposal to make regulations to be known as the Road Safety (Large Vehicles) Regulations 1990.

A regulatory impact statement has been prepared as required by the Subordinate Legislation Act.

The objectives of the proposed regulations are—

- to reduce excessive speed and driver fatigue so as to reduce the risk and severity of collisions involving prime movers, long distance buses and large trucks carrying dangerous goods
- to require operators to be accountable for the speed at which their vehicles are driven and the hours of work of drivers
- to improve driver behaviour by monitoring large vehicle speed
- to deter unsafe driving of large vehicles by increasing the penalties for the more dangerous offences
- to enable enforcement resources to be used more effectively.

The proposed regulations will require owners of specified large vehicles to limit the maximum speed capability and to monitor the operations of their vehicles and ensure that their drivers comply with speed and driving hours regulations. The regulations also increase penalties for drivers of large vehicles who commit speeding and other offences related to road safety.

The regulatory impact statement concludes that the proposed measures are justified and that possible alternatives such as industry self-regulation or increased enforcement would be ineffective and more costly.

Comments and submissions are invited from interested parties and should be forwarded to the Legislation Officer, Roads Corporation, Legal Services Department, 4th Floor, 60 Denmark Street, Kew 3101.

Copies of the regulatory impact statement may be obtained either by writing to the Legislation Officer at the above address or by phoning Mrs Rose Ferma on 860 2889.

Any inquiries regarding the content of the statement should be directed to Mr Warwick Pattinson on 345 4782.

The closing date for submissions is 21 days from the date of this notice.

Applications

Applications for the award of a permit over any of the above areas are required to be made in the approved manner, submitted in duplicate and should be accompanied by:

(a) Details of—

- (i) the applicant's assessment of the petroleum potential of the area, including a geological and geophysical review and technical assessment of the area and the concepts underlying the proposed exploration programme;
- (ii) the applicant's minimum guaranteed proposal (in terms of operational activity and the indicative minimum expenditure) for data evaluation, seismic surveys and exploration wells to be drilled, on the basis that none of the wells drilled encounters significant hydrocarbons, for each year of the first three years of the permit term. This proposal, to be known as the "minimum guaranteed dry hole work programme", should only include work expected to involve a substantial exploration component—appraisal work should not be included;
- (iii) the applicant's proposal (in terms of operational activity and indicative minimum expenditure) for data evaluation, seismic surveys and exploration wells to be drilled, for each of the remaining three years of the permit term. This proposal, to be known as the "secondary" work programme, should only include work expected to involve a substantial exploration component—appraisal work should not be included.

(b) Particulars of—

- (i) the technical qualifications of the applicant and of its employees;

- (ii) the technical advice available to the applicant;
 - (iii) the financial resources available to the applicant, including evidence of the applicant's ability to fund the work programme proposal, a statement of other exploration plans and commitments over the next six years, and a copy of the latest annual report for each applicant company;
 - (iv) where relevant, the viability of the consortium lodging the application, including evidence that a satisfactory settlement has been, or can be, reached on a joint operating agreement (a copy of a Heads of Agreement dealing will generally suffice);
 - (v) the percentage participation interest of each party to the application; and
 - (vi) the business address for service of notices in respect of each applicant.
- (c) Such information as the applicant wishes to be taken into account in consideration of the application including, for example, past performance and future intentions as to the sourcing of goods and services to be used in operations; evidence of recent willingness to apply for "frontier" exploration areas, such as previously unavailable areas, deeper water prospects, hostile environments; proposals to improve technical capabilities through research to be undertaken in Australia or overseas and, in the case of foreign companies, proposals to transfer technology and skills to Australians.
- (d) A fee of \$3000 payable to the Commonwealth of Australia through an Australian bank or by bank cheque is required for each area [see section 21 (1) (f) of the *Petroleum (Submerged Lands) Act 1967*].

Further details of the modified work programme bidding system outlined above, including the criteria for assessment of applications and the conditions to apply following the award of a permit, are available from the Director Energy, Department of Industry and Economic Planning in Melbourne and from the Petroleum Division, Department of Primary Industries and Energy in Canberra.

It should be noted that any income derived in the future from the recovery of petroleum from these areas will be subject to the Commonwealth Government's Resource Rent Tax.

Applications together with relevant data should be submitted in the following manner to the

Director-General, Department of Industry and Economic Planning, 6th Floor, 151 Flinders Street, Melbourne, Victoria 3000, *Attention: Director Energy* before 4.00 p.m. Friday, 26 October 1990. The following special instructions should be observed:

two copies of the application and supporting data, together with a fee of \$3000 payable to the Commonwealth of Australia through an Australian bank or by bank cheque, should be enclosed in an envelope or package—

the application should then be sealed and clearly marked "Application for Area Commercial-in-Confidence".

this envelope or package should then be enclosed in a plain covering envelope or package and delivered by hand or posted to the relevant address above.

35. The Trustees at the request of the personal representative may retain the cremated remains for up to twelve months from the date of cremation subject to a holding fee being payable in advance to the Trustees for any retention period longer than three months. Cremated remains still uncollected twelve months after the date of cremation may be disposed of in the manner deemed appropriate by Trustees.

36. The Trustees may provide positions for the placement and memorialisation of cremated remains, upon payment of the prescribed fees, at locations they consider appropriate. The term for which cremated remains are accepted for lodgement in such positions shall be as determined by the Trustees, who shall also determine the specifications of memorials or monuments they will approve to mark such positions.
