NOTICE TO MARINERS.

AT the request of the Honorable the Government of the Presidency of Bengal, His Excellency the GOVERNOR has been pleased to direct the republication of the following Notice, touching the Pilot station for the River Hooghly during the S.W. Monsoon of the year 1843.

By His Excellency's Command,
E. DEAS THOMSON.

MEMO.—Charts of part of the River Hooghly may be obtained at the Port Master's Office, at four shillings each.

*Fort William,
21st November, 1842.*

NOTICE TOUCHING THE PILOT STATION FOR THE RIVER HOOGHLY DURING THE S. W. MONSOON OF THE YEAR 1843.

NOTICE is hereby given, that the same causes existing which during last S. W. Monsoon rendered necessary the removal of the Pilot Station from off Point Palmyras to a position 6 or 8 miles S. W. of the outer Floating Light, and in from 16 to 20 fathoms water, this latter Station will be continued during the next S. W. Monsoon, viz., from 15th March to the 15th September.

During the last S. W. Monsoon, no difficulty would appear to have been experienced by Vessels passing from False Point Light House to the New Station, nor can any be felt, if common attention be paid to the lead and to the following directions, prepared by Captain Lloyd, late Officiating Marine Sur-

veyor General, after a careful survey of the ground between the two Points.

False Point Light House is in Latitude $20^{\circ} 19\frac{1}{2}'$ N., and Longitude $86^{\circ} 47'$ E.; and that of the South Channel Buoy in Latitude $20^{\circ} 59'$ N. and Longitude $88^{\circ} 4'$ E., and bears from the former N. 61 E., true N. E. by E. $\frac{1}{2}$ E. by Compass, distant 83 miles, and is laid in 12 fathoms.

A Bank of Soundings extends from off Point Palmyras, in a direction towards the tail of the Western Sea Reef, and the nature of the bottom (as distinguished from that of the Hooghly deposit, which is sand and mud, with shining specks,) is a gravelly substance composed of sand shells and small pebbles discharged from the "Kunka," and other Rivers, near Point Palmyras, the lighter material of which being carried further out, is deposited, and forms what is called the Pilots' Ridge, which in crossing to the N. Wd. shews a little less water than on either side. In coming from seaward you shoal rather suddenly from 28 to 23 fathoms upon its Eastern Edge. It is composed of a shelly sand or minute gravel of a reddish or rusty brown colour.

The best guide therefore to enable a Vessel to direct her course from False Point to the Vessels at the New Station, will be to run down the Edge of the Pilots' Bridge which can readily be done by making the Light House and bringing it to bear about W. S. W. or S. W. by W., distant by computation from 10 to 15 miles; then steering to the E. N. Ed., and having gradually increased the depth of water to 23 fathoms upon the Eastern Edge of the Ridge, regulate the course to keep between it and 27 fathoms, when by attention to the lead and nature of the Soundings, course and distance run from the Light House, it is almost impossible to miss the Pilot Vessels, (if the above limits are kept within) either by getting too far to Windward or falling to Leeward; for the Soundings increase so rapidly to seaward from the proposed New Station, that 28 fathoms will not be more than 3 or 4 miles to the Southward of it, and 23 fathoms the same distance to the Westward of it.

The Soundings to seaward of the Ridge are in general a greenish or olive coloured mud, with occasionally a few bits of broken shells mixed with it.

Vessels approaching the Station during the day are required to shew the usual Signal for a Pilot, and by night to give as early and as much warning as possible by firing Guns, burning Blue Lights, and by exhibiting two Lights in a vertical position, where best seen; but Commanders are recommended to avoid as much as possible making the Station during the night. To mark the Station one of the Pilot Vessels will shew during the day a large St. George's Jack (white with red cross) at the Main Top Gallant Mast Head and a good Mast Head Light during the night, and will burn a Blue Light and a Maroon alternately every half hour, and fire a gun at 8, p.m., at midnight, and at 4, a.m. Vessels approaching the Station and while there, as well as when approaching the Light,* and Buoy Station Vessels, are warned to be careful in avoiding collision by night or by day; and in communicating with either of the above Vessels, either at anchor or hove to, when it is necessary to cross her, to pass under the Stern, several

* The Light Vessels are directed, when another Vessel is approaching during the night, to shew a light at the gaff end, to mark the way they are riding.

† Probably 19 $\frac{1}{2}$ was meant.

instances of serious damage having occurred during the S. W. Monsoon, whereby the outer Floating Light was more than once compelled to leave her Station for repairs, to the great inconvenience and risk of Vessels entering and quitting the River.

A Vessel will be stationed off False Point Light House, keeping it according to circumstances W. by S. to N. W. by N., in from 10 to 15 fathoms water.

She will exhibit during the day, when Vessels are in sight, a large Danish Jack at the Main Top Gallant Mast Head (red with white cross) and during the night a good Mast Head Light in the same place, and will burn a Blue Light every half hour.

This Vessels will have no Pilot on board, and is only intended generally to furnish information touching the Course to the New Station, but particularly to do so to Vessels which may be in ignorance of the position of the New Station.

By order of the Marine Board,

C. B. GREENLAW, *Secretary.*
