(Circular No. 65.)

Department of State,  
Washington, D.C., August 13, 1867.

To the Consular Officers of the United States

Your attention is called to the 25th section of the Act entitled  
*An Act further to prevent Smuggling, and for other Purposes*,  
approved July 18, 1866, which is as follows:—

"Sec. 25. And be it further enacted, That, on and after the  
first day of July next, the several provisions of the Act entitled  
*An Act to regulate the collection of Duties on Imports and Ton-  
nage*, approved March two, seventeen hundred and ninety-nine,  
relating to manifests, shall apply as well to vessels owned in  
whole or in part by foreigners as to vessels of the United States;  
and that the Secretary of State send copies of this section to all  
consular officers of the United States in foreign countries."

Your attention is also called to the fact that, by section 3 of  
chapter 42 of the laws of the second session of the 39th Congress,  
the section above quoted was amended by inserting the word  
"March" in place of the word "July" therein.

It will be seen that the law has already gone into effect, which  
places vessels owned in whole or in part by foreigners upon the  
same footing as vessels owned by citizens of the United States,  
so far as the production of manifests is concerned.

You are, therefore, instructed to inform the masters of all  
vessels leaving your port for the United States, that they are  
required to produce manifests in accordance with the provisions  
of section twenty-three (23) of the Act to regulate the collection  
of duties on imports and tonnage, approved March 2, 1799, a  
copy of which is hereto annexed. (Statutes at Large, vol. i.  
p. 644.)

WILLIAM H. SEWARD.

"Sec. 23. And be it further enacted, That no goods, wares, or  
merchandise shall be brought into the United States from any  
foreign port or place, in any ship or vessel belonging in the  
whole or in part to a citizen or citizens, inhabitant or inhabi-  
tants of the United States, unless the master or person having  
the charge or command of such ship or vessel shall have on  
board a manifest or manifests in writing, signed by such master  
or other person, containing the name or names of the port or  
ports, place or places, where the goods in such manifest or  
manifests mentioned shall have been respectively taken on board,  
and the port or ports, place or places, within the United States,  
for which the same are respectively consigned or destined, par-  
ticularly noting the goods, wares, and merchandise destined for  
each port or place respectively, and the name, description, and  
build of such ship or vessel, and the true admeasurement or  
tonnage thereof, the port or place to which such vessel belongs,  
with the name or names of each owner, according to the  
register of the same, together with the name of the master or  
other person having the charge or command of such ship or  
vessel, and a just and particular account of all the goods, wares,  
and merchandise so laden or taken on board, whether in  
packages or stowed loose, of any kind or nature whatsoever,  
together with the marks and numbers as marked on each  
package, and the number or quantity and description of the  
packages, in words at length, whether leaguer, pipe, butt,  
puncheon, hoghead, barrel, keg, case, bale, pack, truss, chest,  
box, handbox, bundle, parcel, cask, or package, of any kind or  
sort, describing the same by its usual name or denomination,  
together with the name or names of the person or persons to  
whom the same are respectively consigned, agreeably to the  
bills of lading, signed for the same, unless when the said goods  
are consigned to order, when it shall be so expressed in the said  
manifest or manifests, together with the name or names of the  
several passengers on board the said ship or vessel, distinguishing  
whether cabin or steerage passengers, or both, with their  
baggage specifying the number and description of packages  
belonging to each, respectively, together with an account of the  
remaining sea stores, if any; and a form of a manifest for goods  
and merchandise imported in a vessel of the United States  
shall be as follows, to wit:—  
"Report and manifest of the cargo laden on board of the [here  
insert the denomination and name of the vessel], whereof [insert

Tenders for schedules Nos. 1, 2, and 3 will be accepted or rejected separately for each district.

Printed forms of tender and conditions of contract may be obtained from the Inspector of Stores, Melbourne; the Sheriffs at Geelong, Ballarat, Castlemaine, Kilmore, Sandhurst, and from the officer in charge of the Industrial School, Point Nepean, by whom also information will be afforded to persons tendering.

The value of all packages, whether in bulk or otherwise, is to be included in the price demanded (except flour and meat bags, which will be returned when empty). Prices to be filled in in words as well as in figures.

Security will be required, either in Government debentures, bank deposit-receipt, or cash deposit, as the tenderer may elect. Tenders must be accompanied by bank notes, or a bank draft in favor of the Chairman of the Tender Board, for ten per cent. of the amount of security required, which will be returned within ten days to unsuccessful tenderers. Such deposit to be forfeited in the event of the successful tenderer failing to complete the security within the prescribed period.

The security must be completed within ten days of acceptance of the tender, failing which the contract may be again advertised, or another tender accepted.

Tenderers failing to take up their accepted tenders will be disqualified from tendering for Government supplies for a period of twelve months.

The Government will not necessarily accept the lowest or any tender.

All tenders must be enclosed in a separate envelope, marked "Tenders for —" (as the case may be), and be deposited in the Tender-box at the Government Stores, King street; or (if sent by post) must be addressed to the Chairman of the Tender Board, Stores and Transport Office, Melbourne.

#### CONDITIONS.

1. All the articles are to be of the best quality of the several kinds, in the best condition, and to be delivered in sound packages.

2. Bread. A sample of the best ordinarily retailed to the public will be considered as a test loaf for first quality. Second quality to be made of flour known in the trade as "best seconds" and the third quality (that issued for prisoners of the Crown) to be made of flour, the produce of prime wheat, from which twelve per cent. has been extracted in bran and waste.

3. Fresh meat is to be supplied in such proportions as may be required, and when the quantity admits, to be delivered in fore and hind quarters alternately. When shins of beef form a portion of the supply, a fair proportion of the bone, not less than five inches, must have been cut off.

4. The supplies coming under the head of Rations and Medical Comforts are to be delivered direct to the establishment entitled thereto on the written order of the officer in charge. All other supplies will be ordered by the head of department, either for delivery at the Stores and Transport Office, or at the office of the department concerned, as may be stated in the order.

5. The order issued by the head of department must accompany the goods, and the account is to be rendered simultaneously with delivery of the supplies. In other cases the account is to be rendered monthly. The rates quoted in the orders cannot be exceeded.

6. Should the contractor fail to supply any articles at the time mentioned in the order they will be otherwise procured, and the expense over and above the contract price will be deducted from his account.

7. In the event of a difference of opinion between the contractor and the officer receiving the supplies as to the quality, the same to be decided, in cases where the article is not of a perishable nature, by a Board of Survey composed of persons named by the head of the department, and the decision of the board is to be considered final.

8. If the board shall decide that the article is not of proper quality, it must be immediately replaced by the contractor; failing which, it will be procured by the person requiring it, and the expense charged as in clause 6.

9. In cases where the article is of a perishable nature, or when from some other cause injury would be sustained either by the person to whom the rations are due, or to the contractor in waiting for Board of Survey, the head of the department, or officer in charge of the station, will have power to reject such article or articles as are obviously of inferior quality, it being understood that he will be responsible to the Government for so doing, and that the contractor must take back the rejected article and supply good in its stead; failing which, it will be obtained by the officer requiring it, and the expense charged as in clause 6.

10. A repetition of irregularity in the quantity or quality of the supplies, or delay in delivering or replacing them when required, will subject the contractor, upon report of the Tender Board, to such mulct, not exceeding £50, as the Government may direct. It will also be in the power of the Government to terminate the contract forthwith.

11. Contractors are not at liberty to transfer their contracts under cover of power-of-attorney, coupled with an interest or otherwise, and no such transfer will be recognised by the Government.

12. It will be competent for the Inspector of Stores, on behalf of the Government, or the contractor, on his own behalf, to terminate the contract, by giving, in writing, a notice of three full calendar months, it being understood that such notice can be given only from the first day of the month. It will also be competent for the Inspector of Stores to terminate the contract, without notice, on infringement of condition No. 11, or should there be reason to know that the contractor takes advantage of his contract to communicate improperly with a prisoner.

13. In the event of any alteration in the Tariff affecting any of the items included in these contracts, the Government or the contractor, as may be the case, will make a proportionate allowance, by way of deduction from or increase of the price of the item so affected.

14. The contracts entered into under this notice are not to be considered as being infringed or vitiated by the importation of stores for the Government service, or by any contracts made by the Imperial Commissariat, or on account of other Governments; or by the consumption of the produce or surplus stock of any Government establishment.

## NAVIGATION OF TORRES STRAITS.

THE accompanying Notice, which has been issued from the Hydrographic Office, Admiralty, London, is published for general information.

J. G. FRANCIS,  
Commissioner of Trade and Customs.  
Department of Trade and Customs,  
Melbourne, 2nd May, 1868.

The information in this Notice is to be carefully considered, to be noted in the Sailing Directions, and compared with the chart when the ship is navigating the parts to which it refers.

Hydrographic Notice.—[No. 2.]  
AUSTRALIA DIRECTORY, VOL. II.

### NOTICE 2.

THE following additional information, having reference to the navigation of the Inner route to Torres Strait, and corrections for the charts of the east coast of Australia, has been received from Commander George S. Nares, of H.M.S. *Salamander*, 1867:—

#### SHEET XVI.—MAGNETIC ISLAND TO DOUBLE POINT.

The Zebra Shoal, and the shoals marked "E.D." (or existence doubtful), and "P.D." (or position doubtful), in its neighbourhood, have been carefully looked for in fine clear weather without success.

The discolored water, which is very prevalent in this part of the Inner route, has been, it is believed, frequently mistaken for reefs.

Northward of Brooke islands a current sets to the northward with varying strength, dependent on that of the S.E. trade wind.

Southward of the islands the tides are regular, the flood setting to the southward.

#### SHEET XVII.—DOUBLE POINT TO CAPE TRIBULATION.

A vessel coming from the N.W. in misty weather, which is very prevalent on the whole of the coast, is liable to mistake the point west of Cape Grafton for the real cape.

This point is therefore now named False Cape, and the hill, 1,371 feet high, immediately S.W. of Cape Grafton peak, Grant hill.

The Trepang fishers frequenting this part of the coast have lately reported a harbour a few miles northward of Double point, but it was not examined by Commander Nares. Commander Simpson, R.N., who assisted in the survey of this coast, in H.M.S. *Rattlesnake*, states that there was only one fathom water on the bar.

The current running to the northward towards Green island reef and the Trinity opening is very dangerous, and requires to be guarded against in misty weather or at night. Green island and the vegetated sand-bank N.W. of it are good marks by day.

#### SHEET XVIII.—CAPE TRIBULATION TO CAPE FLATTERY.

The peak of Monkhouse point open eastward of Mount Cook leads clear of C. and D. reefs.

The *Salamander* frequently passed close to the shoal marked "P.D. 1855," between E. and Turtle reefs, and the shoal marked "E.D." east of Conical rock, both the commander and navigating officer being at the masthead, without any appearance of a reef being seen.

#### SHEET XIX.—CAPE FLATTERY TO CAPE SIDMOUTH.

Vessels proceeding by the route between No. 1 reef (dry) and Lookout point, should, in order to clear the shoal north of Cape Flattery and the foul ground south of No. 1 reef, keep Capes Bedford and Flattery in one until High rock is seen between South Direction island and Rocky islets (wooded); then steer west until the Two isles (low and wooded) touch Cape Flattery; then N.W. for Lookout point, passing about a mile from the point, or midway between the point and sand-bank.

No. 54.—MAY 5, 1868.—1.

Round hill kept on with "End of Range" westward of it clears the shoal ground on the north side of Lookout point: when Lookout peak is seen between the two peaks of Cape Flattery, keep it so, and this mark will lead up to the Howick group.

There appears to be a good channel between No. 1 sand-bank and No. II. reef (covered), but it requires to be examined. No. II. reef, which formerly appeared on the charts, does not exist.

The sand-bank on No. 1 reef shifts; it usually shows well above water, but it may occasionally be covered at high tide.

All the sand-banks on the reefs in the Inner route that are not vegetated are liable to shift; therefore complete dependence cannot be placed on them as sea marks. They are sometimes seen well above high-water, and on again passing in a month's time, the sand having been distributed over the reef, the bank is scarcely seen, even at low water.

The sand-patch on the coast inside Lookout point is not readily distinguished from a number of similar ones, except when seen from the northward.

The neighbourhood of the Megera rock, whose exact position is doubtful, and the shoal marked "E.D." south of L. reef, has not been examined.

The rock reported off Barrow point has been searched for without success. Commander Nares believes in its existence, having confidence in the judgment of Captain Edwards, of the ship *Woodlark*, who reported it.

The high rock between Cape Melville and the Channel rock is now named the Boulder rock. It is about 30 feet high, and should not be mistaken by strangers for the Channel rocks north of it.

A special look-out was kept for a newly reported rock between Clack island and Cape Flinders, whilst passing the locality at low-water spring tides on a fine day. Three patches of discolored water were seen S.W. of Clack reef, looking so like reefs that a boat was sent to examine the neighbourhood, but no shallow water could be found.

The *Salamander* has so frequently passed close to the spot indicated, that Commander Nares considers the reef does not exist.

The night course from Cape Flinders round Princess Charlotte bay requires revision. Instead of turning abruptly N.W.  $\frac{1}{2}$  N., as given in the chart, it is recommended to keep in 7 fathoms water, altering course as requisite, and the lead will guide the ship directly towards No. 1 islet—low and wooded. This track has been tried several times by the *Salamander*, and never found to fail.

The sets of the tide in the northern part of Princess Charlotte bay are irregular, and require care. Near the Claremont group the flood tide sets south, ebb to the N.E.

The shoal mentioned in the Australia Directory, Vol. II., page 187, and said to have been seen W. by S.  $\frac{1}{2}$  S.  $\frac{3}{4}$  miles from N. sand-bank, was not seen from the *Salamander*.

#### SHEET XX.—CAPE SIDMOUTH TO CAPE GRENVILLE.

The shoal marked "E.D." between the Dugdale and U. reef, was not seen from the *Salamander*, but a patch of reef extends north from the sand-banks on U. reef, or else the sand has shifted further south.

The beacon on Y. reef was standing when the *Salamander* passed it in July, 1867. The sand on the reef only shows at low water.

Mr. Bowman of the brig *Caroline* reports a rock on the following bearings:—Restoration island, W.  $\frac{1}{2}$  N., and Sandy isle, N. by W.

A single low mangrove bush marks the south-east extreme of the Piper islands reef, and is a good mark on entering the passage, except at high-water spring tides, when it must be covered.

Allowance should be made for a strong current setting N.W. towards the Home islands. A sailing vessel should keep well to windward after passing M. reef.

## SHEET XXI.—CAPE GREENVILLE TO BOOBY ISLAND.

Commander Nares recommends that the track north of Cockburn reef should be continued to the eastward of the  $\frac{1}{2}$  reef, the vegetated sand-bank on the north-west end of which is a good mark.

The north extreme of the Cockburn reef is very badly defined as seen from the deck or aloft, and therefore extremely dangerous. The wreck of the *Sir A. Campbell* has long disappeared. Another wreck is on the reef 2 miles further south; strangers might easily mistake this for the one marked on the chart, and haul up too soon.

As this new wreck will soon be broken up, it is recommended that it should not be marked on the chart, and that the wreck of the *Sir A. Campbell* be expunged.

There is foul ground close to the north-west end of Z reef. The two sand-banks in latitude  $10^{\circ} 57' S.$ , longitude  $143^{\circ} 9' E.$ , have a clear passage of  $1\frac{1}{2}$  miles between them; but there appear to be some inaccuracies in the chart in this neighbourhood. The sand-bank marked in the chart about 2 miles east of them is placed too far west; it has two small sand-banks to the northward of it, but their positions were not determined.

The Outer barrier reef between the Olinda and Pandora entrances are inaccurately delineated on the chart. There is no continuous reef between the two entrances, but a number of detached patches overlapping each other, which at a short distance at sea would appear continuous.

There is apparently deep water over the projecting reef in latitude  $11^{\circ} 20' S.$  and longitude  $142^{\circ} 4' E.$ ; but the tide race was very heavy on it as the *Salomander* passed to leeward.

The Pandora entrance is well defined and easily found, as the continuous reef from the southward ends abruptly at a vegetated sand-bank. The instructions in the sailing directions for entering cannot be improved.

The Olinda entrance is the northernmost opening in the Barrier reefs near Raine island passage; it is well marked by the continuous reef north of it, but this entrance cannot be recommended unless ships are very far to leeward. In entering, the reefs on the north side of the entrance should be kept close on board on the starboard hand; with a good look-out from the mast-head a ship can safely enter any time before noon, after which the sun will be too far ahead. The sand-bank five miles north of Raine island is on a detached reef, with a passage on each side of it, but coral mushroom heads are numerous in the neighbourhood.

The line of heavy breakers marked on the chart north of Raine island are reefs; the *Salomander* passed close to leeward of them.

The light in the Great detached reef has good anchorage in 8 fathoms water, but the coral mushroom heads are numerous and require special care to avoid them. There are a greater number of patches and mushroom heads on the west edge of this reef, bordering the 103-fathom line of soundings than are marked on the charts.

The Middle bank—Blackwood channel—are a collection of small patches, with apparently deep-water channels between them.

The two easternmost sand-banks are small, and are covered at half-tide. The westernmost bank is the largest; the 3-fathom patch S.W. of this sand-bank has deep water round it, and is dangerous, being near the line of route. Shallow water was seen half-way between this patch and the Tynemouth rock, which latter is correctly placed.

A patch of discoloured water, apparently a reef, was passed, bearing N.E.  $\frac{1}{2}$  N. from the North Hardy island.

The sand-banks on the east extreme of Cockburn reef were dry at low water neaps. The shoal patches to the northward were indistinctly seen.

On passing the north extreme of Cockburn reef it was observed from aloft to be very badly defined, and consequently indistinct; it is therefore a bad turning point.

A clear passage was found east of  $\frac{1}{2}$  reef, the sand-bank at its north-west end being vegetated, is a good mark; but the passage requires further sounding. There is also apparently a clear passage south of  $\frac{1}{2}$  reef and bank, between it and the smaller sand-bank. Special care is required in proceeding either from the Ashmore or Middle bank, until clear of the Cockburn reef. If a passage south of Sir Charles Hardy islands were found to exist, which is probable, it would be most valuable.

Outer Barrier Reef.—The Raine island beacon being whitened by long exposure to the weather is very indistinct, and difficult to make out in hazy weather.

The Jardine river, in latitude  $10^{\circ} 55' S.$ , longitude  $142^{\circ} 13' E.$ , has at low tide fresh water close within the east side of the entrance, when boats can fill from alongside. There is good anchorage in 6 fathoms within 200 yards of the sand spit running off the east side of the entrance, with the end of the spit bearing from South to S.W. Mootee headland, about 200 feet high, being the west extreme of the high land which extends to the S.W. from Cape York, is very conspicuous. The entrance to the river is 23 miles west of the headland. There are no shoals south of a line from Barn island to the Jardine river; the coast may be safely approached, but between Mootee head and the river the 3-fathom line extends three-quarters of a mile from the shore. The sands inside the river shift with the tide, but there is no bar outside.\*

The Jardine river rises on the east coast near Padding Pan hill. It is subject to heavy floods during the N.W. monsoon (December to March), but when visited in the S.E. monsoon in 1866 it had an average depth of four feet above the tidal influence. Boats can only enter at half-tide, as at low-water the sand washing down by the stream forms numerous shifting bars, with not more than one foot water on them, for 3 miles from the entrance.

\* See Chart: Torres Strait, Western Channels, No. 2,375.

## WINDS AND WEATHER EXPERIENCED IN H.M. SHIP SALAMANDER DURING SEVEN VOYAGES IN THE INNER ROUTE BETWEEN SYDNEY AND CAPE YORK.

Between Sydney and Brisbane, within 30 miles of the coast, the winds are local, the belts extending north and south for about 100 miles.

The remarks at pages 233-4 of Vol. 2. Australia Directory, 1864, were found correct.

From latitude  $25^{\circ} 30' S.$  to  $21^{\circ} S.$ , strong S.E. winds, with misty weather and a heavy sea, blow for a period of two or three weeks, and are followed by calms and light easterly winds, with very fine clear weather for about the same time. With the barometer above 30.00 inches, S.E. winds may be expected, and when it rises to 30.20 inches, a strong breeze will set in from the same quarter for some days, usually accompanied by a bank of clearly defined white lumpy clouds with a misty horizon.

From lat.  $21^{\circ} S.$  to  $18^{\circ} 30' S.$  is a finer region, with south-easterly and northerly winds alternating.

From lat.  $18^{\circ} 30' S.$  to  $10^{\circ} S.$  a strong S.E. trade generally blows, except from December to March, when the winds are sometimes light and variable, with rain squalls as Cape York is approached.

The N.W. monsoon does not blow with any strength on the east coast, south of Cape York; but continuous rain may be expected in the neighbourhood of the cape from the middle of December to the end of March. In that season there is less rain and stronger N.W. winds at Darnley island.

The remark that the current to the southward of Moreton bay sets to the northward in winter was not found to be correct.

A falling barometer, with dirty weather from the S.E., is the precursor of a circular storm travelling from the N.E. The wind commences at S.E. and will shift to the East and N.E., when the weather will clear up and be followed by a fine N.W. wind off the land. One of these storms was experienced in the neighbourhood of Port Denison on the 3rd and 4th March, 1867, doing much damage. Another storm passed north of Brisbane on 27th and 28th April, 1867, when the barometer fell from 29.90 in. to 29.80 in. in four hours, wind increasing from E.S.E., with very thick squally weather; it continued to fall for sixteen hours, when it was 29.27 in., blowing a very heavy gale from the eastward; the gale then shifted to north, and the barometer commenced rising; for sixteen hours it blew from the north in squalls, force 2 to 7, after which the gale passed off, leaving the barometer standing at about 29.70 in., with fine weather, and wind blowing from the N.W.

These latter observations were made whilst the ship was anchored under the lee of Morton island, Brisbane.

## CONDITIONS.

1. All the articles are to be of the best quality of the several kinds, in the best condition, and to be delivered in sound packages.

2. Bread. A sample of the best ordinarily retailed to the public will be considered as a test loaf for first quality. Second quality to be made of flour known in the trade as "best seconds," and the third quality (that issued for prisoners of the Crown) to be made of flour, the produce of prime wheat, from which twelve per cent. has been extracted in bran and waste.

3. Fresh meat is to be supplied in such proportions as may be required, and, when the quantity admits, to be delivered in fore and hind quarters alternately. When shins of beef form a portion of the supply, a fair proportion of the bone, not less than five inches, must have been cut off.

4. The supplies coming under the head of Rations and Medical Comforts are to be delivered direct to the establishment entitled thereto on the written order of the officer in charge. All other supplies will be ordered by the head of department, either for delivery at the Stores and Transport Office, or at the office of the department concerned, as may be stated in the order.

5. The order issued by the head of department must accompany the goods, and the account is to be rendered simultaneously with delivery of the supplies. In other cases the account is to be rendered monthly. The rates quoted in the orders cannot be exceeded.

6. Should the contractor fail to supply any articles at the time mentioned in the order they will be otherwise procured, and the expense over and above the contract price will be deducted from his account.

7. In the event of a difference of opinion between the contractor and the officer receiving the supplies as to the quality, the same to be decided, in cases where the article is not of a perishable nature, by a Board of Survey composed of persons named by the head of the department, and the decision of the board is to be considered final.

8. If the board shall decide that the article is not of proper quality, it must be immediately replaced by the contractor; failing which, it will be procured by the person requiring it, and the expense charged as in clause 6.

9. In cases where the article is of a perishable nature, or when from some other cause injury would be sustained either by the person to whom the rations are due, or to the contractor in waiting for Board of Survey, the head of the department, or officer in charge of the station, will have power to reject such article or articles as are obviously of inferior quality, it being understood that he will be responsible to the Government for so doing, and that the contractor must take back the rejected article and supply good in its stead; failing which, it will be obtained by the officer requiring it, and the expense charged as in clause 6.

10. A repetition of irregularity in the quantity or quality of the supplies, or delay in delivering or replacing them when required, will subject the contractor, upon report of the Tender Board, to such mulct, not exceeding £50, as the Government may direct. It will also be in the power of the Government to terminate the contract forthwith.

11. Contractors are not at liberty to transfer their contracts under cover of power-of-attorney, coupled with an interest or otherwise, and no such transfer will be recognised by the Government.

12. It will be competent for the Inspector of Stores, on behalf of the Government, or the contractor, on his own behalf, to terminate the contract, by giving, in writing, a notice of three full calendar months, it being understood that such notice can be given only from the first day of the month. It will also be competent for the Inspector of Stores to terminate the contract, without notice, on infringement of condition No. 11, or should there be reason to know that the contractor takes advantage of his contract to communicate improperly with a prisoner.

13. In the event of any alteration in the Tariff affecting any of the items included in these contracts, the Government or the contractor, as may be the case, will make a proportionate allowance, by way of deduction from or increase of the price of the item so affected.

14. The contracts entered into under this notice are not to be considered as being infringed or vitiated by the importation of stores for the Government service, or by any contracts made by the Imperial Commissariat, or on account of other Governments; or by the consumption of the produce or surplus stock of any Government establishment.
