Also, that during the time the intermediate light-vessel is not on her station (i.e., from the 1st December to 31st January), the Lower Gasper lightship will, from sunset to sunrise, burn a blue-light at the hour, in addition to the one now burnt at the half-hour.

HYDROGRAPHIC MEMO.—No. 2.

THE following Hydrographic information is herewith published for general information and guidance.

J. C. WILSON,
Commodore.

The respective Captains and officers,
&c., &c.

Samoa.—H.M.S. *Danae* reports:—Apolima Island is placed on chart No. 1730 two miles too far to the north-eastward; when the vessel was one mile south of Paluale Sea Reef, the right (or south) extreme of Savaii was in line with the centre of Apolima Island, S. 83° E. mag.

The following shoals have been reported by various trading vessels, and the information supplied by the pilot at Apia:—
7 to 9 fathoms—3 to 4 miles N.E. from the N.E. point of Apia Harbor Reef. Position tolerably correct.

8 to 10 fathoms—2½ to 3 miles N.E. ½ N. from E. point of Fagalob Bay. Existence probable, but position doubtful.
6 to 8 fathoms—1 to 1½ miles S.S.W. from Rocky Point, western end of Tutuila Island.

6 to 8 fathoms—about 12 miles E. by N. from 6. Matutula, eastern end of Tutuila Island.
4 to 5 fathoms—about 25 miles S.E. by S. ¼ S. from Pango Pango Harbor entrance, Tutuila Island.

Existence of these shoals probable, but position doubtful.
Saluafata Harbor is the best harbor in Upolu Island; the northerly swell, which makes vessels roll considerably in Apia, in the rainy season, has little effect on vessels anchored in Saluafata. A plan of the harbor, on a large scale, has been made by the officers of H.I.G.M.S. *Bismark*.

The entrance may be recognized by two sandcays situated on the outer and western reefs, and by Albatross Island; the harbor reefs show plainly, but care must be taken coming from the eastward to avoid the dangerous Saluafata Bank. Albatross Island, about 70 feet high, does not show against the dark background; it would be of great convenience if it were marked by a white beacon or whitewashed hut, as it is well situated for giving a bearing to lead in.

Saluafata Bank is connected with the coast reef; it is full of coral nobs, the shortest of which is reported to be only 1½ fathoms under water. Saluafata Bank breaks in a north-easterly swell, and should not be crossed by any vessel.

Suva Harbor.—Two white beacons have been erected as leading marks into Suva Harbor, the lower beacon is placed on the beach, 2½ cables east of Nukumareoko Island; the upper is about three-quarters of a mile north of the lower beacon. These beacons in line lead through the entrance, but rather close to the eastern reef. H.M.S. *Danae* found that the upper beacon, its breadth west of the lower beacon, led near mid-channel. A

vessel leaving Suva at night can have lights placed on the beacons by applying at Na Mbukalou. The upper beacon was blown down in the beginning of the hurricane season, and not erected until the season was over. Two white buoys mark the inner elbow of the eastern reef, at the turning point, W. ¼ S., 1½ miles from Na Mbukalou store; another white buoy marks the 2-fathom patch, lying S. 88° W. one mile from Na Mbukalou. A black buoy marks the extreme of the spit, S. by W. ¼ W., 6 cables from Low Clifty Point. These buoys cannot always be depended on.

Keppel and Boscawen Islands.—A dangerous off-lying patch, on which the sea breaks, lies about two miles from the coast, with S. W. peak of Keppel Island bearing S.E. by E.; the width of the break was about 200 yards, but, as well as could be seen with an indifferent sun, there were several shoal patches, off-lying the break, one to two cables; as this reef lies right under the lee of the island, it probably does not always break. The white inhabitants live at the S.W. end of large Keppel Island, where there are two flagstays, flying respectively the German and English flags.

Boscawen and Keppel islands lie N. by E. and S. by W. from each other, their nearest points being 5 or 6 miles apart.

Louisiade Archipelago.—Lieutenant Bower, of H.M.S. *Conflict*, reports a group of 22 islets, the same as published in Hydrographic memo. No. 2 of 10th May 1879, as 18 islets, seen by H.M. ship *Cormorant*. The *Conflict* ran for seven miles along the northern edge of the reef, forming the southern edge of the group. One mile and a half S.W. of Imbert Island there is a circular reef awash, about three-quarters of a mile in diameter.
