The Government will not necessarily accept the lowest or any tender.

Tenders, enclosed in a separate envelope, and having the words "Tender for Coal or Coke at _____" (as the case may be) written thereon, must be deposited in the Tender-box at the Pay Office, Treasury, Melbourne.

CONDITIONS OF CONTRACT.

1. As the exact quantity of coal which may be required cannot be stated, the estimate being approximate only, the Government will not be bound by the quantity stated in the schedule, but will be at liberty to order more or less according to circumstances, and the contractor will be bound to supply the same at contract rates.

2. The coal supplied must have been screened at the pit's mouth, and must be the best of its kind. The house coal must be free from shale, small coal, dust, ashes, or other impurities, and the smith's coal must be free from dust, ashes, shale, or other impurities. No other coal will be received. In case of the rejection or return of any supplies the contractor shall bear the whole cost of replacing the coal so rejected or returned.

3. The orders will be issued by the departments requiring the coal.

4. Coal shall be delivered as may be directed by the officer ordering the supply, and when supplied in bags the bags remain the property of the contractor, and must be removed by the contractor at his own expense within three months after delivery.

5. Melbourne District will include a radius of 6 miles from the General Post Office.

6. At the time of delivering the coal the contractor shall produce the order for the same to the officer authorized to accept delivery, and such officer shall acknowledge thereon the receipt of the coal accepted, and shall return the order to the contractor.

7. If after the delivery of the coal has been taken any deficiency or defect is discovered therein, such coal may be returned to the contractor.

8. The contractor must produce the pit certificate if requested to do so by the officer receiving the coal.

9. The contractor will be bound to weigh the house coal and coke on delivery at such establishments as are provided with weighbridges. In other cases the tickets of the public weighbridges are to be accepted as the weight to be charged for. Coal to be delivered in the places set apart therefor.

10. The contractor will be bound to deliver coal for vessels, except in the case of dredges, into the vessels' bunkers.

11. When baskets are used in the delivery of coal they are all to be of one size, and the contractor will be bound to tare the baskets when so required by the officer taking delivery. In other cases the contractor will be bound to satisfy the officer receiving that the weight or quantity is correct.

12. Coal must be put on board at a rate of not less than ten (10) tons per hour.

13. In the event of the officer ordering the coal not requiring the same to be put into the vessel's bunkers, as required by condition No. 10, a rebate of 1s. per ton to be made by the contractor.

14. Should an order not be complied with within 48 hours it will be competent for the department concerned to purchase, at the contractor's risk, and the extra expense (if any) over and above the contract price may be deducted from the contractor's account or the security money, but coal for steam vessels must be supplied on demand. No more delay will be allowed than is sufficient to give the necessary order and get the bulk or vessel alongside. Bad weather to be the only excuse.

15. As soon as the orders shall have been completed the contractor will be required to furnish to the department supplied his account in the prescribed form, with the receipted delivery order attached thereto. Accounts will be payable at any Receipt and Pay Office that the contractor may desire.

16. In the event of a difference of opinion between the contractor and the officer receiving the coal as to the quality, the same is to be decided by a board of survey, composed of persons named by the head of the department, and the decision of the board is to be considered final.

17. If the board shall decide that the coal or coke is not of proper quality it must be immediately replaced by the contractor, failing which it will be procured elsewhere, and the extra expense (if any) will be deducted as in condition 14.

18. If from any cause injury would accrue to the public service by waiting for a board of survey the head of the department, or officer in charge of station, will have the power to reject such coal or coke as is obviously of inferior quality, it being understood that he will be responsible to the Government for so doing, and the contractor must take back the rejected coal or coke and supply good in its stead, failing which it will be procured elsewhere, and the extra expense (if any) will be charged as in condition No. 14.

19. A refusal to execute orders, irregularity in the quality or quantity of the coal, &c., or delay in delivering or replacing the coal when required, will subject the contractor to such mulct, not exceeding £50, as the Treasurer of the State for the time being may direct; and the amount may be deducted as in condition 14. It will also be in the power of the said Treasurer, upon such refusal, irregularity, or delay, to terminate the contract forthwith and forfeit the whole or any portion of the security money.

20. Contractors are not at liberty to transfer their contracts under cover of power of attorney, coupled with an interest or otherwise; and no such transfer will be recognised by the Government.

21. In the event of a general strike occurring at the colliery or collieries, any contract entered into under these conditions after the expiry of fourteen days' notice being given may be suspended, such contract to come into full force and effect again ten (10) days after such cause of suspension shall be discontinued.

22. The contracts entered into under this notice are not to be considered as being broken, infringed, or vitiated by any purchase of coal by the Commonwealth Government.

23. Under no circumstances will a contractor be permitted to abandon his contract. In the event of the contractor failing to carry on the contract, the contract security money will in that case be absolutely forfeited, and in addition the contractor will be held liable for any loss which the Government may sustain in consequence of such failure.

24. No subletting will be allowed; all work must be carried out by the contractor, and the hours of employment of any person engaged therein are not to exceed 48 per week, and at a minimum wage of 7s. 6d. (clear of all deductions) per day of eight hours for miners, and 6s. per day for labourers; and a copy of these conditions shall be kept conspicuously and continually posted, in legible Roman characters, in the colliery. Any infringement of this condition, in the opinion of the Treasurer, will subject the contractor, upon report from the Tender Board, to such mulct, not exceeding Fifty pounds (£50), as the Treasurer may direct, and the amount will be deducted from the contractor's account or from the security money, and the Treasurer's decision shall be binding, final, and conclusive as to the fact of infringement and in all other respects.

SHIRE OF LEXTON.

BY-LAW NO. 11.

A By-law of the Shire of Lexton, made under sub-section 29 of section 197 of the *Local Government Act 1903*, and under section 594 of the said Act, and numbered 11, for prohibiting or regulating the use on any public highway of traction engines or other vehicles having projections on their wheels; and for regulating the hours during which, and conditions on which, traction engines may proceed over any public highway.

IN pursuance of the powers conferred by the *Local Government Act 1903*, the President, Councillors, and Ratepayers of the Shire of Lexton order as follows:—

1. No person shall use or cause or procure any other person to use on any public highway any traction engine or other vehicle having on its wheels any bars, spikes, grips, or other projections:

This prohibition, however, shall not apply to

(a) Any traction engine, used only for hauling agricultural machinery, or hauling a vehicle containing such machinery only, if the projections on the driving wheels of such engine consist only of bars at least two and three-quarter inches in width and not more than one and one-sixteenth of an inch in thickness, and the space intervening between such bars does not exceed five inches; or,

(b) Any traction engine the driving wheels of which are cylindrical and smooth soled, and having no projections thereon other than diagonal bars of not less than three inches in width nor more than three-quarters of an inch in thickness, and extending the full width of the tire, and the space intervening between such cross bars not exceeding three inches; provided in such last mentioned case—

- (i) That the owner of such engine has previously obtained from the Council or an officer of the Council duly authorized in that behalf a permit in writing specifying the public highways on which it may be used, and that the engine is being used on one of the highways so specified.
- (ii) That the owner has agreed in writing to pay to the Council the cost of making good any damage done to any roadway, bridge, or culvert by such engine or any vehicle drawn by it.
- (iii) That such engine is not being used (unless with the written consent of the Council or an officer of the Council duly authorized in that behalf) to haul more than two vehicles, exclusive of any vehicle solely used for carrying water for such engine.
- (iv) That the loading of any vehicle drawn by such engine does not exceed nine tons in weight, including the weight of such vehicle.
- (v) That the weight carried by any vehicle drawn by such engine (including the weight of such vehicle) does not exceed three hundredweight for each half inch of bearing surface of the tire or felloe of each wheel of such vehicle.

2. Every owner of a traction engine shall cause to be painted in legible letters not less than one inch long on a plate attached to the engine, or on a conspicuous place on the engine, the exact and true weight thereof, and the maximum weight of water and fuel necessary for its propulsion.

3. So long as the fires of a traction engine are alight, or the traction engine contains in itself sufficient motive power to move it, one person shall remain in attendance whilst it is on any public highway, although it is stationary.

4. No person shall take any traction engine across or along any bridge, culvert, or embankment so as to meet or pass thereon any other traction engine or any person with a horse or a vehicle drawn by a horse.

5. No person shall halt (unless through unforeseen circumstances, or unless actually engaged in loading or unloading) in any part of a road where the traffic way is narrowed by fences, excavations, embankments, dangerous depressions, or such like, but shall draw off at least twenty feet from the middle of the formation in the case of a made road, or the middle of the surveyed road if unmade.

6. No person shall permit any traction engine or any vehicle attached to or drawn thereby to stop on any bridge or culvert for the purpose of drawing water, or for any other purpose whatever.

7. No person shall drive any traction engine between sunset and sunrise, unless by written permission of the Council or an officer of the Council duly authorized in that behalf, defining the route to be travelled and the extended hours during which such travelling is permissible, such permission to be withdrawable at any time upon written notice to that effect being served on the owner or driver of the engine or being forwarded to him by registered letter. No person who has received such written permission shall drive any traction engine between sunset and sunrise, unless there shall be exhibited on such engine proper and sufficient carriage or other approved lights, one at each side on the front and one in the rear, or when a vehicle or vehicles are being drawn by such engine, then in the rear of the last vehicle.

8. No person shall use or cause or procure to be used on any public highway any traction engine unless there is carried on such engine or some vehicle drawn by the same at least four wooden planks twelve inches in width, four inches in thickness, and at least twelve feet in length, and when crossing any bridge or culvert the driver or the person in charge of such engine shall lay down such planks, and no engine shall be permitted to cross over any bridge or culvert except on such planks.

9. The driver of a traction engine shall shut off steam immediately the driving wheels of the engine commence to skid, and he shall not start the engine again until he has taken all necessary and proper means to prevent damage being done to the highway by the skidding of the wheels.

10. Any person shall for any wilful act or default contrary to this By-law be liable to the following penalty:—

- (a) For the first offence, a fine not exceeding Three pounds.
- (b) For the second offence, a fine not exceeding Five pounds.
- (c) For any subsequent offence, a fine not exceeding Ten pounds.

11. This By-law shall apply to and have operation throughout the whole of the municipal district.
