SURVEYORS BOARD, VICTORIA.

REGULATIONS FOR THE GUIDANCE OF SURVEYORS.

Under the *Transfer of Land Act 1915*.

THE following Regulations for the Guidance of Surveyors under the *Transfer of Land Act 1915*, made under the provisions of the *Land Surveyors Act 1915*, section 9 (f), are hereby promulgated in lieu of the Regulations approved by the Governor in Council, 19th December, 1898, which are hereby rescinded.

1. Every survey, resurvey, or subdivision made or used for the purposes of any application or dealing in the Office of Titles must be made by or under the immediate personal supervision of a surveyor licensed under the *Land Surveyors Act 1915*, and every plan submitted to the Office of Titles purporting to represent the same respectively must be signed by the same surveyor by whom or under whose immediate personal supervision such survey, resurvey, or subdivision was made, and every such survey, resurvey, or subdivision, with these Regulations, and the surveyor shall sign a certificate written on the face of the plan in the form given in the Appendix hereto numbered One.

2. No surveyor shall sign any certificate required by these Regulations in respect of any survey or plan not actually made by him or under his immediate personal supervision, and a surveyor acting in contravention of this rule will be liable to have his plans rejected and his licence suspended or cancelled under the provisions of section 8 of the *Land Surveyors Act 1915*.

3. The statutory declaration required of licensed surveyors for plans under the 211th section of the *Transfer of Land Act 1915* shall be in the form hereto appended, numbered Two, and shall be made on the margin of the plan to which it refers.

4. The surveyor will be expected to disclose all doubts, discrepancies, and difficulties, and to afford all other information obtainable by him relative to the property that may aid in securing accuracy and completeness in the certificate of title to the land. In these matters he will consider himself rather an agent and adviser of the Government than of the person incidentally employing him, nor will he regard for the interests of such employer be considered as excusing in any degree the withholding of any information affecting the merits of the application, even though the description supplied be literally and technically correct.

5. The surveyor must adhere to the principle of the unchangeableness of original lines and corners established by Government or other duly authorized surveyors, done in good faith; in other words, where the lines and corners have originally been established on the ground by a proper officer, in pursuance of the survey system authorized by the law of the time, and can be identified, they must be regarded as the true lines and corners which they represent, even if subsequent surveys show that the posts, pegs, or marks are out of line, and that the corners are out of position, according to the original description contained in the Crown grant or title.

6. If a resurvey or subdivision of the whole of any original Crown allotment is made for the purposes of the *Transfer of Land Act 1915*, the boundaries must be taken as originally marked on the ground, and the lines re-marked where necessary, so that the boundaries may be easily traced, and the several corners identified.

7. The surveyor shall, if practicable, chain the actual boundaries of blocks under survey; but should insuperable difficulties render this impossible, the method observed in measuring and obtaining distances shall be clearly shown in the field notes.

8. The bearing of one of the sides of the original allotment, as given on the public maps, is to be taken as the datum of the bearings for a resurvey or subdivision of same; and where discrepancies are found to exist in the original bearings, preference is to be given to the longest side, abutting on a street or road. Tie lines, in lieu of angles, may be given in the subdivision of small pieces of land; such tie lines must be sufficient to determine the exact form and area of the allotment.

9. When an irregular boundary is defined by offsets and insets measured thereto from traverse lines, such traverse lines must form part of the geometrical figure used in computing the area, and the areas of the portions lying between the traverse lines and the boundary are to be computed from such offsets and insets.

10. The names and widths of all streets, roads, or rights-of-way adjoining the block under survey must be recorded in field notes and on plan, the greatest care being taken to ascertain correctly the actual lines and widths of such streets, roads, &c. The widths of footpaths where defined must also be noted.

11. The actual measurements made in the field must be given, notwithstanding that they may not agree with the Crown grant or public charts; and should the difference be greater than the maximum of error allowable under the *Real Property Act 1915*, in addition to a complete survey of the allotment or parcel being dealt with, the entire frontage or frontages of the section from street to street or road to road must be measured, as well as any other check line that may be deemed necessary by the Office of Titles, in order to determine whether any encroachment exists, or whether the differences arise from defects in the former surveys.

12. All bearings must be observed with a serviceable theodolite in good adjustment, and all measurements must be made with a Chesterman's steel tape, adjusted to the standard of the Survey Department.

13. All plans lodged or deposited at the Office of Titles must be prepared on drawing paper of good quality, in no case cut to less than foolscap size, and the quality of the drawing, printing, figuring, and writing must be satisfactory to the Chief Draughtsman. Plans on which erasures or alterations have been made or which in any way have become damaged or defaced will be liable to rejection.

14. All plans must be drawn to a scale sufficiently large to admit of the necessary details and dimensions being clearly inserted. The dimensions to be in links or feet and inches.

15. Every plan must bear upon its face a full description of what it purports to represent, for example:—Plan of survey of (part of) Crown allotment (section or portion, as the case may be), city or town of _____, parish of _____, at (as suburb or locality within the parish), and county _____, and be dated.

16. Every plan of an allotment must show the nature of the boundaries of the date of survey, whether buildings, walls, fences, roads, natural features, pegs, &c. If the boundary is a wall, whether a party wall; and if the boundary line runs through the centre or otherwise.

17. Every plan of a subdivision must exhibit, distinctly delineated, all roads, streets, passages, thoroughfares, easements, squares, or reserves set apart for public use; and also show all allotments, with measurements and area, into which the land may be divided.

18. The parcel being dealt with is to be coloured pink.

19. The area of every allotment must be calculated by the surveyor, and inserted distinctly on the face of the plan.

20. Proper field notes of all surveys are to be kept in books of convenient form, and any corrections in the entries made for practical errors are to be shown in red, with an explanatory note on the page on which they occur. Such field books shall be given up for inspection when asked for. A certified copy of the field notes, including corrections, to be furnished with the plan, and, if required by the Chief Draughtsman, a copy of the surveyor's computation sheets to be supplied.

21. All surveys for the purposes of the *Transfer of Land Act* are, where practicable, to be marked on the ground in the same manner as the original surveys of Crown lands by the Department of Lands and Survey, by substantial pegs and trenches; such pegs to be not less than 2 by 2 inches scantling of sound seasoned hardwood, not less than 14 inches long, driven 12 inches into the ground. At the pegs, where practicable, trenches at least 6 feet long, 5 inches deep, and 8 inches wide, commencing 1 foot from the pegs, are to be cut in the direction of the boundary lines.

22. The position of new pegs and trenches are to be shown on plan by small black circles and lines; the position of old pegs and trenches, when identified, to be shown by red circles and lines, thus—

23. The boundaries or subdivisions in cities or towns, where the ordinary method of marking by pegs and trenches is impracticable, must be marked by iron spikes, or in such other manner as may be ordered by the Commissioner of Titles, and surveyors shall observe and comply with any special directions from time to time given by the Commissioner of Titles in respect to the mode of marking and conducting any survey.

24. The necessity for the greatest possible accuracy in surveys and plans cannot be too strongly impressed upon surveyors, as, in many cases, no means exist by which errors can be immediately detected. If it is found, therefore, that the work of any surveyor is not up to the standard of accuracy required by the Office of Titles, or that he has in other respects neglected to comply with the foregoing Regulations, his plans will be rejected, and he will be dealt with under the provisions of section 8 of the *Land Surveyors Act 1915*.

APPENDIX NUMBER ONE.

I certify that this plan, and also the survey and field notes on which it is based, have been made by me, or under my immediate personal supervision, and in strict compliance with the Regulations made under the *Land Surveyors Act 1915*, and that this plan is accurate in every particular.

Surveyor licensed under Act 2679.

APPENDIX NUMBER TWO.

Certificate Required on Plans of Subdivision.

I [name in full] _____, a surveyor duly licensed under the *Land Surveyors Act 1915*, do solemnly and sincerely declare and certify that the parcels of land herein delineated and coloured (red) have been surveyed, pegged on the ground, and plotted by me or under my immediate personal

supervision, and in strict accordance with the Regulations for the guidance of surveyors made under the said Act, and that this map is in all respects accurate.

And I make this solemn declaration conscientiously believing the same to be true, and by virtue of the provisions of an Act of the Parliament of Victoria rendering persons making a false declaration punishable for wilful and corrupt perjury.

Declared at _____, in the State of Victoria, this _____ day of _____ 19____, before me,

Justice of the Peace in and for the
Bailiwick of the State of Victoria.

Land Surveyors Act 1915 (Section 9(f)).

REGULATIONS FOR THE GUIDANCE OF SURVEYORS ENGAGED ON SURVEYS UNDER THE LAND ACTS.

THE Regulations approved by the Governor in Council, 21st January, 1897, are hereby rescinded, and the following Regulations are substituted therefor:—

(1) Every surveyor, when making surveys, shall conform to the following requirements, that is to say:—All bearings shall be observed with a serviceable theodolite in good adjustment, and all measurements made with a Chesterman's steel tape maintained at the true standard length by comparison when in use with a standard tape kept exclusively for such purpose; the standard itself to be compared at intervals with that recognised by the Department of Lands and Survey.

(2) He shall conspicuously mark on the ground by pegs (split from sound timber and squared on top) and trenches all the boundary lines of each allotment surveyed by him, and shall distinctly blaze all trees within 3 feet (or further if necessary) of such lines, and at all angles of such allotment; if a tree is available within 2 chains radius, remove a square foot of bark from it and grave with a chisel or scribe in the solid wood the number of the allotment or a broad arrow, the bearing and distance of number or arrow from the angle peg being carefully entered in the field book. All pegs shall be not less than 2 inches square and where practicable 12 inches long. Intermediate pegs and trenches shall be placed at regular intervals of 10 chains along the lines on plains or flat country, but where hilly and undulating, in such position that from each peg one other peg, at least, on either side, will be visible, the distance apart not to exceed 10 chains; the position of each peg to be correctly given in field notes. When the slope of ground exceeds 5 degrees a clinometer shall be used for correction of chainage, and all measurements reduced to the horizontal plane. All pegs shall be driven level with the ground. Corner trenches shall be 15 links long from the corner stake, cut exactly in the direction of the several boundary lines, and the trenches at the intermediate stakes shall be 5 links in length, cut in the direction of the line on each side of the peg, leaving a spit 12 inches long between the trenches, thus = \square =. All such trenches shall be not less than 8 inches wide and 5 inches deep. In places where, on account of rock, such trenches cannot be cut, the corner and intermediate pegs shall be protected by piles of stones placed around them.

(3) The surveyor shall in all cases chain the actual boundaries of allotments, unless there be insuperable difficulties in the way, such as a wide river, lake, &c. In such cases the method observed in measuring the distance and prolonging the line should be clearly shown in the field book. Running new boundary lines by traverse will not be permitted, but the principle of parallel offsets wherever practicable should be observed, and only where trees over 18 inches in diameter obstruct the true line will any departure be allowed.

(4) In establishing a connexion with a previous survey, the most reliable line of that survey shall be adopted as a datum for bearings, and the surveyor will be careful, before adopting any line for such purpose, to verify its position by angular measurement, and also by chainage, if necessary. If no Government survey has been made in the immediate neighbourhood of the site, the surveyor shall establish a datum for his bearings, and shall connect his survey by traverse with some permanent survey mark or large tree suitably marked on or near the most remarkable feature in the vicinity.

(5) In making the permanent survey of a road, grades over 5 degrees must be given on field notes, and, as far as possible, the approximate centre-line gradient shall be deduced and indicated on the plan; both sides are to be marked by pegs and trenches, trees along the run side and nearest to the laid-off pegs on the other side blazed as specified for boundary lines.

(6) Any previously surveyed roads, lines, blocks, or allotments that may adjoin or be adjacent to the area or allotment under survey shall be connected by tie lines with such survey, and be shown on plan and field notes.

FIELD NOTES, ETC.

(7) Proper field notes of all surveys are to be recorded in books of a convenient size, and any correction in the entries made for practical errors is to be shown in red, with an explanatory note on the page in which it occurs. The dates on which survey was commenced and completed must also be entered in the field book. Field notes must show clearly and distinctively all new marks of the survey, and all old lines (if any) along previously surveyed lines; also all methods of running the lines, clinometer readings, reductions of chainage, closing angle, and full detail description of country, character of soil, vegetation, &c. He must also certify on the field book that his notes as recorded are the actual results of his or his assistant's observations and measurements on the ground. With the plan must be sent in the original field notes, if required by the Surveyor-General, or a copy certified as follows:—I certify that this is a correct copy of the recorded observations and measurements made by me personally (or by my assistant), together with a copy of the computations of the figure and its area in the usual form adopted for computation by reduction of traverse and double areas.

(8) Plans are to be drawn in accordance with the specimen plans prepared by the Department of Lands and Survey for the guidance of surveyors.

(9) Any authorized surveyor employing an assistant will be held responsible for any work performed by him, and both shall certify all plans and field notes of surveys made by such assistant.

The following are the rates and charges which the occupiers or owners of lands and tenements within the Trust District shall pay for water supplied by the Trust for the year 1921.

11. All water supplied by the Trust by measurement shall be charged for at the rate of One shilling and threepence (1s. 3d.) per thousand (1,000) gallons, but in no case shall the amount to be paid be less than which would be payable for the premises under its municipal assessment.

12. For every public water trough supplied with water from the works of the Trust, the sum of One shilling (1s.) per annum shall be paid.

13. All public water troughs must be fitted with approved self-acting taps to prevent overflow; such taps to be approved by the secretary for the time being of the said Trust.

14. It shall be unlawful for any person to have an overflow waste pipe from any private bath.

15. The Trust may by notice, in writing, intimate to any owner or occupier using water for other than domestic purposes solely that the water supplied is to be charged by measure, and may by such notice require such owner or occupier to provide a meter within fourteen days after the receipt of such notice; and thereupon such owner or occupier shall, within the time specified, at his own expense, provide a meter.

16. No meter shall be affixed until it shall have been examined and approved, and a certificate from the Board of Works or other authorized person be produced for the inspection of the secretary of the Trust for the time being that such meter is in proper order.

17. Every person requiring to remove or alter the position of any meter shall give six days' notice, in writing, to that effect to the Trust, and a registration of the quantity of water used shall be taken before such removal or alteration is made.

18. If any person who has provided any meter fail to give the notice required of any repairs required for such meter he shall be liable to a penalty not exceeding Five pounds (£5).

19. If any person refuse or delay to have such meter properly repaired and put in correct working order after having been required by any officer of the Trust so to do, the Trust may shut off the supply of water from the premises of such person, either by cutting the service-pipe or otherwise, until such meter shall have been properly repaired and certified by some officer of the Trust as being in proper working order.

20. Any person supplied with water by the Trust who shall wilfully or negligently allow the same to run to waste, or who shall use or allow the water to be used in an unauthorized manner, or who is in arrears with the payment of his water rate, the Trust may, after one hour's notice, cut off the supply of water from the premises of such person either by cutting the pipes by or through which the water is supplied or by any other means that are available, and may cease to supply such premises with water so long as the Trust may think fit.

21. It shall be lawful for any person appointed by the Trust for such purpose to request permission from any owner or occupier to make an inspection of the water service to ascertain if the water is being allowed to run to waste, and, if such occupier or owner refuse permission for such inspection, the Trust may, if it think fit, refuse to supply such premises with water; and such refusal on their part will in no way relieve the owner or occupier from payment of any rate or rates as may be levied on such property.

22. If the person appointed for such inspection shall ascertain that any owner or occupier is allowing water to waste by reason of leaky taps or otherwise, he shall be empowered to authorize the repair of such taps or pipes and to notify such owner or occupier that the waste of water must at once cease.

23. No person shall affix any service-pipe to any pipe of the Trust, or alter or repair or in any way interfere with any pipe of the Trust or any service-pipe, cock, or fitting connected with the pipes of the Trust until he shall have obtained from the Trust permission to execute such works, and such permission shall be at and during the pleasure of the Trust, who may at any time cancel such permission.

24. Any person, whether licensed or permitted as aforesaid or not, who shall require to affix any service-pipe to any pipe of the Trust, or to make any repairs to pipes under the control of the Trust, shall give notice to the secretary of his intention so to do.

25. All connexions from the Trust mains to property shall be made at the expense of the owner or occupier of the property to be supplied, and all repairs or renewals shall, when necessary, be made by the owner or occupier, and such pipes shall at all times be under the control of the Trust.

26. All connexions, pipes, and fittings shall be of the best quality, and approved by the secretary and chairman of the Trust.

27. The service-pipes from the main being the property of the owner or occupier of the tenements supplied by such service-pipes, the occupier (if any), and, if none, the owner, shall, upon receiving notice that his service-pipe requires repairing, immediately proceed to repair the same, and he shall be responsible for any loss of water or other damage which shall be caused by reason of such service-pipe being leaky or otherwise out of repair or broken, and the Trust may stop the water from flowing into such premises in any way it may seem fit until such repairs have been effected.

28. Fire plugs shall not be used except for the purpose of extinguishing fires unless any other use of them be allowed by the Trust, and they shall at all times be under the control of an officer of the Trust.

29. Any person watering any street or footpath by means of a hose except under the direction of an officer of the Trust shall be guilty of an offence against these Regulations.

30. For any breach of these Regulations a penalty not exceeding Five pounds (£5) shall be imposed.

31. The above-mentioned rate is made for one year, commencing on the 1st day of January, 1921, and ending on the 31st day of December, 1921, and shall be payable in two instalments; the first instalment shall be due and payable on the 1st day of May, 1921, and the second instalment on the 1st day of November, 1921. Such person or persons as the Commissioners of the Ballan Waterworks Trust may from time to time appoint for that purpose shall be authorized to demand and receive and collect and recover the said rate.

Dated this 15th day of November, 1920.

JOHN V. PORTER, Secretary.
