DEPARTMENT OF PUBLIC WORKS.

PRAYER OF PETITION REFUSED.

HIS Excellency the Governor of the State of Victoria, by and with the advice of the Executive Council thereof, in exercise of the discretionary power given by sections 16 and 35 of the *Local Government Act* 1915 (6 Geo. V. No. 2686), has this twenty-fifth day of March, 1924, after consideration, refused the prayer of the petition under the provisions of the Act aforesaid presented by certain ratepayers of a portion of the Shire of Whittlesea (notice of which was duly published in *Government Gazette* of the 9th January, 1924), praying that the area therein described be severed from the said shire and constituted a new municipality under the name and title of the Shire of Epping.

F. W. MABBOTT,
Clerk of the Executive Council.

At the Executive Council Chamber,
Melbourne, the 25th March, 1924.

SHIRE OF McIVOR.

PROPOSED SEVERANCE FROM SHIRE OF McIVOR AND
ANNEXATION TO SHIRE OF GOULBURN.

IN pursuance of the provisions of the *Local Government Act* 1915 (No. 2686, section 46), the substance and prayer of a petition in accordance with the 36th and 44th sections of the said Act, which has been presented to His Excellency the Governor in Council, are published, viz.:—

The petitioners purport to constitute a majority of the ratepayers in the portion of the Shire of McIvor described in the petition, and they desire that the area so described may be severed from the Shire of McIvor, and constituted (together with additional area proposed to be severed from the Shire of Waranga) a new Riding to be called the Western Riding of the Shire of Goulburn.

Area described in petition:—

Commencing at a point in the boundary between the Counties of Rodney and Dalhousie at the intersection of the Whroo to Graytown road; thence southerly by that road, Corbett-street in the Township of Graytown, Parish of Moornbool East, and the Graytown to Kilmore road to the north-east corner of Compton's Creek pre-emptive right; thence south by the east boundary of said pre-emptive right and allotments 4, 29, and 29A to the south-east corner of the last-mentioned allotment; thence south by a road forming the west boundary of allotments 35, 34, and 33 to the boundary between the Parishes of Moornbool East and Puekapunya; thence easterly by said boundary to the eastern boundary of Parish of Moornbool East; thence south-westerly by Gardiner's Creek to the south-west corner of allotment 17g, Parish of Mitchell; thence easterly by the boundary between the Parishes of Mitchell and Northwood to the south-east corner of allotment 31, Parish of Mitchell; thence north by a road forming the east boundary of that allotment to the north-west corner of allotment 30c; thence east by a road forming the north boundary of that allotment to the Goulburn River; thence northerly by that river to Sandy Creek; thence westerly and north-westerly by that creek to the commencing point.

The petitioners state that, owing to the geographical situation of the area above described, a large majority of the ratepayers residing therein have the Town of Nagambie in the Shire of Goulburn as their centre for commercial, marketing, and social purposes. The greater part of the traffic of all kinds from the said area leads to the said Town of Nagambie (which is the seat of the municipal government of the Shire of Goulburn) and the railway stations at Nagambie and Tabilk in the Shire of Goulburn and near Nagambie. For the reasons aforesaid the Council of the Shire of Goulburn would be a more suitable and proper body than the Council of the Shire of McIvor to administer the income arising from the rates raised upon the rateable property in such area.

The petitioners, therefore, humbly pray that His Excellency the Governor in Council may be pleased to sever the area above described from the Eastern Riding of the Shire of McIvor, and constitute such area (together with additional area proposed to be severed from the Shire of Waranga), a new Riding to be called the Western Riding of the Shire of Goulburn.

Notices for the petitioners may be served on Mr. William Edward Vearing, farmer, Mitchellstown.

H. I. COHEN,
Commissioner of Public Works.

SHIRE OF NARRACAN.

PROPOSED SEVERANCE FROM SHIRE OF NARRACAN AND
ANNEXATION TO SHIRE OF BULN BULN.

IN pursuance of the provisions of the *Local Government Act* 1915 (No. 2686, section 46), the substance and prayer of a petition in accordance with the 36th and 44th sections of the said Act, which has been presented to His Excellency the Governor in Council, are published, viz.:—

The petitioners purport to constitute a majority of the ratepayers in the portion of the Shire of Narracan described in the petition, and they desire that the area so described may be severed from the North Riding of the Shire of Narracan and annexed to the North Riding of the Shire of Buln Buln.

Area described in petition:—
Commencing at the junction of Hawthorn Creek with the Latrobe River at the eastern angle of allotment 174, Parish of Fumina; thence easterly and northerly by the road forming the eastern boundary of allotments 49, 50, 51, 52, and 56, Parish of Fumina, to its junction with the road known as the Moe-road; thence easterly along that road to the south-east angle of allotment 130, Parish of Fumina; thence northerly and north-easterly by boundaries of allotments 130 and 122, Parish of Fumina, to Ley Creek; thence easterly by Ley Creek to its junction with the Taujil River; thence northerly by that river to the northern boundary of the Parish of Fumina; thence westerly by that boundary to the north-east angle of allotment 102, Parish of Fumina; and thence southerly by the present boundary between Municipalities of Narracan and Buln Buln to the commencing point.

The petitioners state that, with the opening of the Neerim Railway extension to Noojee Station, and the construction of a new road connecting Fumina with that station, the properties of the petitioners will be more conveniently served by Noojee Railway Station than by Moe Railway Station; but this will compel the petitioners to use the roads in the Municipality of Buln Buln for a distance of about ten miles, and it will be to the interests of the petitioners to have the whole of their road traffic controlled by the Municipality of Buln Buln.

The petitioners, therefore, humbly pray that His Excellency the Governor in Council may be pleased to sever the area above described from the North Riding of the Shire of Narracan, and annex such area to the North Riding of the Shire of Buln Buln.

Notices for the petitioners may be served on Mr. F. W. Mitchell, farmer, North Fumina, *vis* Moe.

H. I. COHEN,
Commissioner of Public Works.

Department of Public Works (Local Government Branch),
Melbourne, 25th March, 1924.

DEPARTMENT OF PUBLIC WORKS.

ORDER AMENDED.

HIS Excellency the Governor of the State of Victoria, by and with the advice of the Executive Council thereof, has, by Order made on the 25th day of March, 1924, revoked the following provision in the Order of the 6th March, 1924, approving of the construction of a tramway track and turn-out in Hanna-street, South Melbourne.

Maximum Speed.

That the maximum speed of the progression of the cars while travelling on the said tramway and turn-out shall not exceed five (5) miles an hour;

and has inserted the following provision in lieu thereof:—

Maximum Speed.

That the maximum speed of the progression of the cars upon the said tramways with hand-brake equipment on the cars shall be at the rate of 15 miles per hour, and with magnetic, air, or other approved power brakes and life guards the maximum speed shall be at the rate of 20 miles per hour.

ROSEDALE WATERWORKS TRUST.

RATING BY-LAW FOR THE YEAR 1924.

THE Commissioners of the Rosedale Waterworks Trust hereby make the following By-law, pursuant to and in exercise of the powers and authorities conferred by the Water Acts:—

A By-law for making the rate for the year 1924 on the rateable property within the Waterworks District of the Rosedale Waterworks Trust, also for dealing with the sale of water by measure from the works of the Trust.

A rate of Three shillings in the pound shall be paid on the net annual value of all the rateable property within the Waterworks District, according to the valuation for the time being, of all lands and tenements for the municipal rates for the Shire of Rosedale, within the said district, but no such rate shall be less than Two pounds.

For every piece or allotment of unoccupied land, a rate of Ten shillings shall be paid.

When water is supplied by measure for domestic or other than domestic purposes, a charge of Two shillings and sixpence per thousand gallons shall be made, and the minimum quantity to be charged for shall be the quantity which, at the price named, would be equal to the price payable in respect of such property if the water were supplied otherwise than by measure.

When the water is supplied for other than domestic purposes solely, the charge shall be Two shillings and sixpence per thousand gallons, and the minimum quantity to be supplied shall be ten thousand gallons for the year ending 31st December, 1924, and the charge hereby made shall be payable on the demand of the Trust.

The Trust may, by notice in writing, intimate to any owner or occupier using water for other than domestic purposes solely that the water to be used is to be charged for by measure, and may by such notice require such owner or occupier to provide a meter within one month of such notice at his own expense.

In all cases not herein provided for, the Trust shall make special provision as may be deemed necessary.

The service pipes from the main being the property of the owners or occupiers, the owners or occupiers of the tenements supplied by such service pipes shall in every instance in which any damage is caused by such service pipes being leaky, broken, or otherwise out of repair, be guilty of an offence.

If any person neglect to repair such service pipes conveying water from the pipes of the Trust into the premises of such person after having received notice from the officer of the Trust that such service pipe required repairing, the Trust may stop the water from flowing into such premises, either by cutting off the service pipe or otherwise, until the necessary repairs are effected.

The Trust may at any time, when found necessary, repair or renew a pipe or stop-cock laid for supplying a supply of water to any tenement, and may charge the owner with the cost of providing, and laying, repairing, or renewing the same, and such cost shall be a debt due to the Trust, and shall be recoverable in any Court of competent jurisdiction.

The foregoing rates are made payable on the first day of March, 1924, and such persons or person as the Trust may appoint from time to time shall be authorized to demand and collect such rates and charges.

Passed this 20th day of February, 1924.

(SEAL) JAMES T. WALKER, Chairman.
J. REYNISH GREEN, Commissioner.
JAMES STEEL LESTER, Secretary.

Railways Classification Board Act 1919.

REGULATION No. 4.

HIS Excellency the Governor of the State of Victoria, with the advice of the Executive Council thereof, doth hereby, in the exercise of the powers conferred in that behalf by the *Railways Classification Board Act 1919*, make the regulation following, that is to say:—

1. The fees to be paid to members of the Board shall be as follows, namely:—

(a) In the case of an appointed member who is an officer, the amount of the salary payable to such member in respect of his office in the railway service with, in addition, such an amount as will be necessary to bring the total fee payable to such member, including his salary above-mentioned, up to the amount of One thousand pounds per annum.

(b) In the case of an appointed member who is not an officer or employee:—

i. A retaining fee of Five hundred pounds per year, with a proportionate payment for any portion of a year; and

ii. In respect of each occasion upon which a member actually attends for a period in excess of one hour at a morning session or at an afternoon session of the Board, a fee of One pound eleven shillings and sixpence. Provided that the maximum fee payable in respect of attendance on any one day shall not exceed the sum of Three pounds three shillings.

(c) In the case of an elected member who is an officer or employee, while the member is, in the judgment of the Commissioners, engaged in carrying out the duties of his office as a member, the amount of the salary or wages payable to him in respect of his office in the railway service, or a fee of One pound ten shillings per day to be payable in respect of six days per week, whichever is the greater.

2. The Secretary to the Board shall:—

(a) Keep an accurate account of the occasions upon which each member (whether an appointed member or an elected member) attends at a session of the Board, and of the duration of each such attendance.

(b) Upon as nearly as may be the first day of each calendar month, supply the Commissioners with a return setting out the number of occasions upon which each member attended at a session of the Board during the calendar month immediately preceding the month in which the return is supplied, and the duration of each such attendance.

3. Regulation No. 3 made the tenth day of August, One thousand nine hundred and twenty, and published in the *Government Gazette* of the eighteenth day of August in that year, is hereby repealed.

4. This Regulation shall be deemed to have become effective on the first day of January last.

FRED. W. EGGLESTON,

Minister of Railways.

Office of the Minister of Railways,
Melbourne, 28th February, 1924.

Approved by the Governor in Council,
the 25th March, 1924.

F. W. MABBOTT,
Clerk of the Executive Council.

THE BALLARAT SEWERAGE AUTHORITY.

BY-LAW No. 2.

THE Ballarat Sewerage Authority, pursuant to and in exercise and execution of the powers and authorities conferred on it by the District Sewerage Act No. 2761, and pursuant and in exercise and execution of any other powers and authorities in any wise enabling it in that behalf, doth hereby make and prescribe the following By-law, that is to say:—

Interpretation.

- "Authority" in the By-law shall mean the Ballarat Sewerage Authority.
 "Engineer-in-Chief" shall mean the chief engineer of the said Authority.
 "Sewer" shall be as defined in the Act.
 "Drain" shall mean a drain as defined in the *Sewerage Districts Act 1915*.
 "The Act" shall mean the *Sewerage District Act 1915*.
 "Sewerage District" in these Regulations shall be the Ballarat Sewerage District.

General.

1. If any person wilfully throws or casts, or causes or allows to be thrown or cast, or to flow or fall into any of the rivers, creeks, and water-courses, storm-water channels, drains, or sewers within the sewerage district of the Sewerage Authority any refuse or any garbage, offal, dead animal, vegetable peelings, ashes, cinders, rags, hair, wool, sand, refuse from factories, or filth, dirt, grease, decomposed substance or substance liable to decompose, or any poisonous, noxious, offensive, or unwholesome matter, or any matter or thing liable to cause a stoppage in any drain or sewer, or to injure a drain or sewer, plant, machinery, or undertaking of the Authority, or any part thereof, he shall without prejudice to any other proceedings to which he is liable therefor be liable to a penalty for the first offence of not more than Twenty pounds, and for every subsequent offence to a penalty of not more than Fifty pounds, and in cases of a continuing offence to a further daily penalty not exceeding Five pounds.

2. (1) If any person knowingly erects or constructs any building, wall, bridge, fence, mound, embankment, excavation, tunnel, or work in, upon, over, or under any sewer vested in a Sewerage Authority without the previous consent in writing of the Sewerage Authority—

- (a) the Sewerage Authority may demolish and remove the same and perform any works necessary for restoring or reinstating the sewer; and
 (b) such person and the person who has directed the same to be done shall each be guilty of an offence against this Act, and shall be jointly and severally liable for the expenses incurred by the Sewerage Authority, and such expenses may be recovered in any Court of competent jurisdiction or in a Court of Petty Sessions as a civil debt recoverable summarily.

(2) Every person who—

- (a) knowingly erects or places any obstruction, annoyance, or encroachment in, upon, over, or under any sewer vested in a Sewerage Authority; or
 (b) obstructs, fills in, or diverts any sewer or drain vested in the Sewerage Authority without the previous consent in writing of the Sewerage Authority,

shall, in addition to any other proceeding to which he may be liable therefor, be liable to a penalty not exceeding Twenty pounds for every such offence, and to a further daily penalty not exceeding Five pounds.

(3) Nothing herein contained shall extend to prevent or impede the maintenance, repair, or renewal of any building, wall, bridge, fence, or other structure under which a sewer or drain has been constructed, but so nevertheless that the same does not injure or obstruct the sewer or drain.

3. Any person who sweeps, rakes, or places any house refuse, soil, rubbish, or filth, or any other thing into or in any sewer or drain vested in the Sewerage Authority, or over or contiguous to any grate communicating with any such sewer or drain, or into any dock or inlet communicating with the mouth of any such sewer or drain, or into which any such sewer or drain discharges its contents, or into any river contiguous thereto, shall for every such offence be liable to a penalty not exceeding Ten pounds.

4. No gully or ventilating shaft immediately connected with or appertaining to any sewer vested in the Sewerage Authority shall be trapped, covered, or closed up by any municipality without previous notice in writing being given to the Sewerage Authority, nor if the Sewerage Authority or its proper officer within one week after the receipt of such notice expresses in writing its or his objection to the same.

5. Any person who—

- (a) takes up, removes, demolishes, or otherwise interferes with, or who causes to be taken up, removed, demolished, or interfered with any sewer or part of a sewer vested in the Sewerage Authority without previously having obtained the permission in writing of the Sewerage Authority;
 (b) wilfully damages any sewer, bank, defence wall, penstock, grating, gully, side entrance, tide valve, flap, work, or thing vested in the Sewerage Authority;

(c) causes or permits to be discharged into any sewer of the Sewerage Authority any solid or liquid (other than ordinary domestic sewage) liable to cause the generation of gases injurious to human life or health, or to cause injury to the Sewerage Authority's sewers or purification works, or to lessen the carrying capacity of the sewers, or to interfere with the treatment of the sewage;

(d) causes or permits to flow or pass or be carried from any manufactory or business or other premises of any such person into any sewer of the Sewerage Authority, or any drain or pipe communicating therewith—

- (1) any benzine, naphtha, ether, or carbon disulphide, or
 (2) any inflammable or explosive materials which will not readily mix with water, or
 (3) any other material or materials which, separately or in conjunction or in combination with water or sewage or other materials, are liable to form inflammable or explosive compounds, or

(e) does any act by which the sewerage or drainage or the sewerage district, or any part of such district, may be obstructed or injured,

shall for every such offence be liable to a penalty not exceeding Twenty pounds, and to a further daily penalty not exceeding Five pounds.

6. No person shall cause or permit the admission to any drain or sewer of the Authority of any land drainage, surface or otherwise, or rain-water from roofs, yards, streets, or other surfaces, whether by inlets specially designed to admit it, or by any other inlets or openings so placed that such water may get access thereto, and no inlet or opening shall be placed or permitted to remain in such a position that any extraneous water from any river, lake, gully, or creek, or any other source, whether in flood or otherwise, has access to any drain or to any sewer of the Authority.

Preparation of Plans and Execution of House Connexion Works.

7. All connexions of plumbing work, drains, or sewers with the sewers of the Authority, and all work connected in any way with the drainage of any premises, shall be executed in accordance with this By-law.

8. All drains in and from properties to and as far as the point of connexion of the branch drain with the sewer must be repaired and cleansed by, or at the cost of, the owner or owners.

9. All the works of sewerage and drainage must be carried out in accordance with the provisions of the Act and By-laws or Regulations thereunder.

In the case of any obstruction taking place in a combined drain, the Authority will determine between the respective owners or occupiers of the premises drained thereby, by whom and in what proportion the cost of removing any such obstruction shall be paid.

10. Every person who, by a notice from the Authority, issued in accordance with the Act, or any By-law or Regulation thereunder, shall be required to do or not to do anything, including a requirement to make any sewer or drain, or branches, works, or arrangements for the better sewerage or drainage of his house, building, or ground, and who fails to comply with such notice, shall be guilty of an offence.

Application for Consents, &c.

11. Application for the Authority's consent to connect with the sewerage system, or to do plumbing and drainage work connected therewith, must be made in writing by the owner of the property to be so connected, or by his authorized agent. Such application shall give the precise location of the property, the name of the owner, and the name of the person employed to do the work, and shall be made in form prescribed by the Authority. For any wilful misrepresentation in such application the owner or authorized agent as aforesaid shall be guilty of an offence against this By-law. No consent shall be deemed to authorize anything not stated therein.

Any approval by the Authority of a plan under section 133 of the Act, or any consent to connect any premises with any sewer of the Authority, shall not be deemed to authorize or to confer or grant the right to lay a drain through any land intervening between the premises proposed to be connected and such sewer of the Authority, and any owner or applicant for the approval of such plan or consent shall satisfy himself as to his legal right to drain through such intervening land, and shall be solely responsible for any trespass, or damage thereon or thereto.

Consents to make connexions with the sewerage system will be issued only when the plumbing and draining in the property to be connected is planned to be made in accordance with the rules for plumbing and draining hereinafter prescribed, and after such plan has been inspected and approved of by the inspector appointed by the Authority for the purpose, or, in the case of new buildings, when a proper plan of the plumbing and of the drainage of the building into the branch, of which the Authority shall have fixed the position, has been approved of in writing by the Authority. All connexions with drains or

sewers, and all plumbing and drainage connexions therewith, shall be made under the direction of the engineer-in-chief or the superintending officer of the Authority.

Consent will not be given for the performance of any such work except upon condition that no person shall be engaged or employed as a workman in the actual performance of any work unless he be the holder of a "Working Plumber's Licence" or "Drainer's Licence" from the Authority. Any person who shall at any time, or at any place, make up, form, affix, alter, or repair any fitting, pipe, bend, trap, or other thing connected or intended to be connected with the Authority's sewerage system, unless he be the holder of a licence from the Authority authorizing him to do such work, shall be liable to a penalty not exceeding Ten pounds.

Any person, whether licensed as aforesaid or not, who shall alter, remove, or in any way interfere with any drain, fitting, pipe, bend, trap, or other thing connected with the Authority's sewerage system, unless the Authority's written consent has been previously issued to do such work at the premises concerned, shall be liable to a penalty not exceeding Ten pounds.

Master Plumbers' Licences.

12. "Master Plumbers' Licences" may be granted by the Authority to any "Master Plumber" residing in and carrying on business within the drainage area for a period of six months prior to the date of this By-law coming into operation, who shall satisfy the Authority within six months of the said date, either by passing an examination by examiners appointed by the Authority or in such other manner as the Authority may from time to time or in any particular case direct, that he has a thorough knowledge of sanitary and general plumbing and of the By-laws and provisions of the Act relating thereto. The general conditions under which Working Plumbers' Licences are issued shall also apply to Master Plumbers' Licences.

Working Plumbers' Licences.

13. The conditions upon which "Working Plumbers' Licences" will be issued by the Authority are:—

(a) That every such licence will be subject to suspension or cancellation at the will of the Authority, and that all such licences will be granted to expire on the 30th day of June of each year.

(b) A special condition of every consent issued to an owner or agent shall be that if a licensed plumber in his employ upon any such work prove, according to the judgment of the Authority's inspecting officer, to be incapable as a workman or transgress the By-laws or regulations of the Authority, and the "Working Plumber's Licence" of such workman be for any such cause suspended or cancelled by the Authority, and notice of such suspension or cancellation, in the form prescribed by the Authority, or to the like effect, be given by the Authority in writing, by registered letter addressed to the said owner or agent, the said owner or agent shall cease to employ such workman upon any such work immediately after and during the continuance of such suspension or cancellation. And any such owner or agent who shall neglect or fail to comply with this condition shall be guilty of an offence against this By-law.

(c) "Working Plumbers' Licences" will be issued on payment of a fee of 10s. to candidates who shall have successfully passed an examination by examiners appointed by the Authority in the following subjects, that is to say:—

Materials.—The use of lead, tin, copper, and their alloys, wrought and cast iron, stoneware or cement concrete, bricks, tiles, Portland cement, and other materials used by the plumber and drainer.

Plumbing Practice.—As to solder and soldering, lead burning, lead laying, pipe and joint making, pipe bending, and general plumbers' practice.

Water Supply Work.—Knowledge of the Act and Water Supply By-laws, general water supply works, water supply fittings, hot-water connexions.

Sewerage Work.—Knowledge of the Act and Sewerage By-laws or Regulations thereunder, in so far as the same relate to the work and duties of plumbers or others in regard to the construction, maintenance, and protection of the general sewerage system, construction and use of traps, soil, waste, and vent pipes, house fittings, water-closets, kitchen sinks, baths, lavatories, house-maids' sinks, urinals, latrines, and other sewerage apparatus and appliances.

General Principles of Sanitary Work, Flushing, Ventilation, Disconnection.—Candidates for examination in plumbing practice must provide themselves with their own tools, and may be required to submit samples of work done by themselves, and also to make any pipe, bend, joint, or other plumbing appliance which may be required to satisfy the examiners.

(d) Candidates for "Working Plumbers' Licences" must give notice in writing to the secretary of the Authority of their intention to submit themselves to examination at such time as shall be appointed for the same by the Authority's examiners.

Every candidate who shall have successfully passed the before-mentioned examination and given proof to the satisfaction of the examiners of practical ability as a plumber, will be furnished with a licence from the Authority to do practical work as a working plumber upon and in connexion with the sewers, drains, and all fittings, appliances, and apparatus appurtenant thereto with the Ballarat Sewerage District, subject to and in accordance with the Authority's By-laws or Regulations. And he will likewise be furnished with a certificate from the Authority that he is duly qualified to do work in connexion with the sewerage system under the control of the Authority, and in accordance with the Authority's Regulations.

"Working Plumbers' Licences" will, at the discretion of the Authority, be issued without previous examination to any practical plumber who shall be the holder of, and shall produce, a licence from any other sewerage or water supply authority equal in value to the standard established by the Authority's examination, and who shall satisfy the Authority's examiners that he is conversant with the By-law according to the judgment of the Authority's examiners; which shall be final. Prior to the issue of any "Working Plumbers' Licence," the person to whom the same is to be issued must sign a register containing a declaration that he accepts such licence subject to and in conformity with the conditions thereof, and the By-laws or Regulations of the Authority, and that he will conform to and comply therewith.

Whilst none but the holders of "Working Plumbers' Licences" are allowed to be engaged or employed in the performance of plumbing work for sewerage, the holders of licences for water supply work may do water supply work necessary to the sanitary work, such as fixing cisterns and water-closets in outside buildings where lead is not used, and work for water supply.

The examination for a "Working Plumber's Licence" or for a "Drainer's Licence" only may be held by the Authority separately or in conjunction with the School of Mines as may be determined by the Authority.

Drainers' Licences.

14. Drainers' Licences will be issued to candidates who have successfully passed an examination in the following subjects:—

Plans.—How to read plans; meaning of scales—the scales commonly used in drainage plans; meaning of elevation, plan, and section drawings.

Levels, &c.—Laying off levels for drains; the straight edge; spirit-level, and boning rods; tools generally used in drain laying; preparing bottom of trenches to receive pipes.

Excavating, Timbering, and Re-filling.—Protecting the trench by timbering; different treatment of different soils, as loam, clay, loose and wet sand, &c.; tunnelling and tunnel timbering; precautions when near buildings; importance of care in re-filling trenches and tunnels.

Drain Laying.—Junctions to sewers, laying and jointing of stoneware or cement concrete pipes, cement joints, bitumen joints, self-fitting joints, drains under houses and in soft ground; cast-iron drains, laying and jointing, method of jointing stoneware and cast-iron drains; minimum depth below surface for safety.

Drainage Details.—The boundary or main disconnecting trap; finishing of pipes by various methods; gully traps or sinks; self-cleansing form and arresting form, and where each should be used; the reflux gully trap; grease or grease interceptor trap; S trap; pedestal W.C.; access eyes and access pipes; cast-iron drainage details.

Materials.—Salt-glazed stoneware; qualities of lime, mortar, and cement mortar, and where each should be used; concrete, proportioning mixing and usage; brick; brick bond for junction pits, manholes, &c.; cast-iron pipes.

Hints on Work.—Laying-off work; drain testing by water, smoke, air pressure, &c.; clearing of clogages.

The conditions under which working plumbers' licences are issued will also apply to drainers' licences.

Persons Authorized to Carry Out Works.

15. No person shall tender for or enter into a contract for any plumbing or draining work relating to sewerage within the sewerage area who does not hold either a Master Plumbers' Licence or a Working Plumbers' Licence, unless by permission of the Authority. And no person other than the holder of a Working Plumbers' Licence or Drainers' Licence shall actually perform any plumbing and draining work or draining work respectively.

Plan of Drainage.

16. Copies of the Authority's plans of individual home drainage will be furnished by the Authority upon application, and payment for the same as follows:—

Plan of drainage, including survey, &c., for every house or building, a minimum charge of 5s., and an additional charge of 5s. for every water-closet more than one appurtenant to such house of building.

Plan of any alteration or addition to original plan, a charge of not less than 2s. 6d., except in cases where there may be additional closets, when the charge will be 5s. for each additional closet.

Copy of plan of completed drainage will be supplied on payment of an amount computed at the rate of 2s. 6d. per hour according to the time occupied thereon by the draughtsman, with a minimum charge of 2s. 6d.

Inspection.

17. The owner or his authorized agent, or the plumber, drainer, or contractor carrying out the work, must give at least twenty-four hours' notice to the Authority of his intention to commence work, and also when any work is ready for inspection. All work must be left uncovered and convenient for examination until inspected and approved of by an inspector appointed by the Authority. Such inspection shall be made within twenty-four hours of such notification being received at the office of the Authority, except when notification is received on Saturdays, when sixty hours must be allowed.

The inspecting officer may apply the ether, peppermint, water, smoke, or air test, the air test to be applied at a pressure of not less than 3 inches of water; and the plumber or drainer shall furnish all the necessary tools, apparatus, labour, and assistance for such tests. The owner or his authorized agent shall remove or repair any defect when so ordered by the inspecting officer, and if he neglects to do so shall be liable, upon conviction, to a penalty not exceeding Five pounds, and to a penalty not exceeding One pound for every day thereafter during which such neglect or failure shall continue.

Before the fittings are connected with the plumbing of any house or building, or after, if so ordered, and before the soil or waste pipe is connected with the sewer, the outlet of the soil or waste pipe and all openings into it below the top shall be hermetically sealed. The pipes shall then be filled with water to such height as may be ordered, or with smoke or air, &c., as the superintending officer of the Authority may direct, and every joint and pipe carefully examined for leaks. Defective pipes must be removed and replaced by sound ones, and all defective joints made tight, and every part of the work made to conform to this By-law, and subject to the approval of an officer appointed by the Authority.

House drains, whether laid by the Authority's workmen or others, must be thoroughly tested in every case before being passed by the Authority's officers. When being tested with water there must be a head of at least six (6) feet above every part of the drain.

Before a licensed plumber or drainer commences to clear a stoppage in a drain he must notify the Authority in writing of the time when he intends to clear the stoppage, so that an inspector may attend and pass the work in accordance with the provisions of the Act.

Defective Fittings.

18. Any drain pipe, soil pipe, trap, water-closet, urinal, sink, or other fitting laid, used, or constructed otherwise than in accordance with this By-law, or which shall, in the opinion of the Authority, be or become bad, or of defective quality, shall, upon notice in writing from the Authority to the owner or occupier of the property, be by such owner or occupier removed or repaired in the manner determined, and within the time fixed by the Authority; and in case such owner or occupier fails to comply with the requirements of such notice he shall be liable to prosecution and penalty for an offence against the Act, or the Authority will, if it think fit, remove or repair the said defective fitting and charge such owner or occupier of the premises with the cost so incurred, and will proceed for recovery of the same in manner provided by the said Act.

Quality of Materials.

19. All materials used must be of good quality and free from defects. The work must be executed in a thorough and workmanlike manner, and to the satisfaction of the Authority. No sanitary fitting shall be allowed to be connected to the sewers of the Authority unless it be of a type previously approved by the Authority, or unless special permission has been given by the engineer-in-chief for connexion of such fitting.

The utmost care must be exercised on all house connexion work to insure that only materials which are in accordance with the Authority's By-laws and Regulations are used.

Stoppages in Drains.

20. Owners and occupiers of premises are responsible for clearing stoppages in drains within their premises or between their premises and the sewers into which the branches lead.

Drains.

21. The drainage of each house is to be arranged for separately, unless in cases of properties belonging to the same owner, or where, in the Authority's opinion, special reasons exist for draining by a combined operation.

Owners desiring to have the drainage of their properties combined must sign a request for a combined drain.

Not more than two houses shall be combined, except by the permission of the engineer-in-chief.

When the drainage of more than two properties is combined an inspection chamber must be provided, if shown on plan or ordered.

Boundary traps will only be allowed by permission of the engineer-in-chief. All the drains must, wherever considered necessary by the Authority, join in a manhole at least three feet (3 ft.) long and two feet (2 ft.) wide, fitted with a closed cover. The portions of the drains crossing the floor of the manhole must be in a straight line or by curved junctions in the floor of the manhole. All manholes to be cement rendered (2 parts sand and 1 part cement) to a smooth surface and made watertight.

The manhole must be provided with a closed cover, and special ventilation must also be provided if considered necessary by the engineer-in-chief.

The drains outside of the house or building, or from isolated water-closets, to the street sewer shall be constructed of pipes of approved quality and manufacture.

Cast-iron pipes jointed with lead as is usual in water pipes, or reinforced cement concrete pipes where approved by the engineer-in-chief, or other approved pipes surrounded with at least six inches (6 in.) of Portland cement concrete must be used, such concrete to be composed of 1 part of Portland cement, 2 parts of clean sand, and 4 parts of stone of 1½-inch gauge, or gravel approved by the inspector.

- (a) In yards or places liable to heavy traffic where the cover over the drain is less than 2 ft. 6 in.
- (b) In cases where the construction of drains under buildings is unavoidable.
- (c) Where drains and fittings are to be laid and fixed at a distance of less than 6 feet from any cellar, water tank, or other excavation.
- (d) In soft, bad, waterlogged, or made-up ground.

Pipe Trenches.

22. The trenches for the drains from all properties shall be dug so as to meet the public sewers at the position of the branches and O.B.'s indicated by the Authority. The material from the trench shall be placed so as not to obstruct and so as to cause the least possible inconvenience to the public. Proper barriers and lights must be maintained on the banks of the trenches during the progress of the work, to guard the public against accident. In refilling the trench the earth must be rammed or flooded carefully, so as to keep the pipe in position and avoid settling. No stone shall be used in refilling until there has been a depth of at least 2 feet of earth or gravel placed over the pipe.

Subsoil Drainage.

23. Subsoil drainage connexions to the sewerage system will not be allowed.

Basement and Cellar Drainage.

24. No water-closet or urinal shall be placed in any cellar, basement, room, or apartment unless at least 5 feet of the walls of such cellar, basement, room, or apartment are above the surrounding land. In all cases where it is proposed to place a water-closet or urinal below the level of the surrounding land, plans and sections showing provision for light and ventilation must be lodged with the application for approval of plan under section 133 of the Act.

Where any house shall have its lowest floor, cellar, or basement at a lower level than the sewer of the Authority into which such house would otherwise drain, the owner shall, pending pulling down or alteration of such house, cause the drainage from such lowest floor, cellar, or basement to be raised by means of a siphon, or some other method approved by the Authority, so that it shall discharge into a drain communicating with the sewer of the Authority.

Where, in the opinion of the Authority, a cellar or basement is so situated that it can be drained by gravitation to the Authority's sewers free from any risk of backflow in the event of the sewers becoming surcharged, the Authority may permit such connexion, provided a sluice valve be fixed between the cellar or basement connexion, and the sewer valve to be kept closed as hereinafter mentioned; and provided the owner apply in writing for same, and furnish the Authority with an undertaking that such connexion is made at his risk, and indemnify the Authority against all damage in connexion therewith. In such cases the soffit of the pipe draining the cellar shall at its highest point be at least 1 ft. 6 in. below the cellar or basement at its lowest point.

Sluice valves must be kept closed, and only opened when it is necessary to allow an accumulation of water to drain to sewers. Spindles of sluice valves must be fitted with permanently attached extension rods of sufficient length and diameter to enable the valves to be opened or closed from above the level of the ground floor of building.

Bath Water.

25. Rain-water conductors must not be connected with the sewers.

Stables, &c.

26. All stables, dairies, cow-sheds, and all areas considered by the engineer-in-chief polluted areas must be paved with approved material, graded and drained to the satisfaction of the Authority, and the drain therefrom must be trapped with an approved silt trap connected with the drain inside the boundary line. The joints of stable floors and paved areas connected with the sewers of the Authority must be filled to full depth with either (1) good cement mortar in the proportion of one part of cement to not more than 2½ parts of clean sharp sand, or (2) an admixture of pitch and sand, mixed as directed, or (3) with other jointing material which may be approved by the Authority.

All stables and cow-sheds in actual use must be paved and graded to the satisfaction of the Authority, and connected with the Authority's sewers. The drainage of those not in use must be provided for, but they need not be connected with the sewers while they are unused.

The drainage from stable floors must discharge over an approved silt trap, which must be provided with a top of brickwork or Portland cement concrete, and fitted with a heavy grating.

All stables, dairies, cow-sheds, and areas must be roofed over to the satisfaction of the engineer-in-chief.

Manure Bins.

27. Manure bins must be provided for all stables or cow-yards where the local Council's By-laws demand their construction, or where the locality is closely built on.

All the manure bins must have the inside surfaces rendered with cement mortar, and must be made impervious throughout, and provided with an approved close-fitting cover. Walls of new manure bins must, unless otherwise approved, be at least 9 inches in thickness, built of brickwork laid in cement mortar.

If an outlet pipe be provided for a manure bin, it must be properly connected with the Authority's sewers.

Branches in house drains must be provided in all cases where manure bins exist, for their connexion whenever the Authority shall deem it necessary.

Laying Drains.

28. All drain pipes must be at least 4 inches in diameter, except where otherwise ordered by the Authority, and unless obtained from the Authority's store yard, must be taken to one of the Authority's depôts to be tested by the officer appointed by the Authority, in the machines provided for the purpose.

The cover of the branch on the sewer shall be carefully removed so as not to injure the socket.

The first length of the pipe attached to the branch and O.B. shall be curved and set so as to give a good fall into the sewer, and shall be provided with a cleaning eye.

An inspection opening attached to the drain, inside and within 5 feet of the boundary line or such other distance as may be deemed necessary by the engineer-in-chief, must be provided. A manhole giving access to the inspection opening at the sewer end of the drain to be provided if considered necessary by the engineer-in-chief.

All pipes shall be carefully bedded on the barrel in the solid ground.

Where in the opinion of the Authority it is necessary, cast-iron pipes, or approved reinforced cement concrete pipes, must be used, or stoneware or cement concrete pipes bedded in concrete of dimensions approved by the engineer-in-chief, such concrete to be composed of 1 part of Portland cement, 2 parts of clean sand, and 4 parts of stone of 1½-inch gauge or gravel approved by the inspector.

Unless otherwise directed by the engineer-in-chief, stoneware or unreinforced cement concrete pipes must not be laid less than fourteen (14) inches deep from the surface of the ground to the top of the socket of the pipe. Where this amount of covering cannot be obtained, the stoneware or cement concrete pipes must be entirely surrounded with not less than 6 inches of Portland cement concrete, as previously specified, or the surface of the ground must be raised to the satisfaction of the Authority's inspector.

All stoneware or unreinforced cement concrete pipe drains near roots of trees must be surrounded with not less than 4 inches at all points of cement concrete as previously specified.

Jump-ups, where allowed, must be bedded on and surrounded with 6 inches of Portland cement concrete to full height of drop, unless otherwise ordered by the engineer-in-chief.

The drain pipes shall be laid and jointed by a method approved by the Authority, and on an even grade of not less than 1 in 40 if a 4-inch pipe be used, or of 1 in 60 if a 6-inch pipe be used, unless by special permission of the Authority, in which case special provision must be made for regular and efficient flushing.

As far as possible, all drains shall be laid in straight lines, where changes of direction occur they shall be made either by suitably curved pipes with inspection openings or in manholes. Stoneware or cement concrete pipes may be substituted for cast-iron or reinforced cement concrete drain pipes in every case except where the ground is soft or liable to heavy traffic;

but in all cases where stoneware or cement concrete is substituted for cast iron, the pipes must be entirely surrounded by not less than 6 inches of Portland cement concrete, as previously specified. Notwithstanding as heretofore, cast-iron pipes only to be used under buildings, except where the pipe is laid in the earth or by the special permission of the engineer-in-chief.

All drain pipes carried through walls must have a space of about 3 inches clear left over the pipes.

If a pipe be cut out to clear a stoppage, or if a pipe be broken, it must be replaced by a new inspection opening pipe. The old pipe must not be patched up.

Portland cement concrete rendered to a smooth surface must be used in each of the following cases:—

- (1) Around and under gully basins, the exposed surfaces to be rendered in cement mortar, 2 parts sand, 1 cement.
- (2) Around the top and for 6 inches below the surface of the ground of vent pipe sockets where exposed.
- (3) Around the top and for 6 inches below the surface of the ground of disconnection traps when the surface is exposed.
- (4) Under and around bends rising vertically off oblique branches, and under all drainage traps.

Cement concrete stops to be provided in all cases where the slope of the drain is such that it may be deemed necessary by the engineer-in-chief.

In all cases where concrete is mixed, approved mixing boards to be used.

All cast-iron pipes must be sound, free from holes or cracks, and coated with tar or asphaltum.

The following weights will be accepted as standards for cast-iron drainage pipes:—

- 4 inch diameter, 16 lbs. per lineal foot.
- 5 inch diameter, 20 lbs. per lineal foot.
- 6 inch diameter, 23½ lbs. per lineal foot.

All fittings used in connexion with such pipes shall correspond with them in weight and quality. All junctions must be curved. Right-angled junctions must not be made.

Where outside closet buildings require repairing or removing, the necessary work within the space covered by the closet buildings must be carried out before the water-closet branch is laid; but other portions of the drain may be laid, provided provision be made for effectually testing the closet branch when laid.

Wherever a paved, asphalted, or tar-paved yard or space has been broken in connexion with house drainage, the surface so broken must be restored as nearly as possible to the same condition as it was in previously, unless the owner in writing otherwise requires.

Joints.—Drainage.

29. Cast-iron pipes shall be jointed with gasket and lead, and caulked as to make the joints gas and water tight. The gasket shall not after being caulked into the socket exceed ¾ inch in depth. Wrought-iron pipes shall be screw-jointed with white lead.

All connexions of lead pipes with iron pipes must be made with a brass sleeve or ferrule of the same size as the lead pipe, put in the socket of the branch of the iron pipe, and caulked with lead. The lead pipe must be attached to the sleeve or ferrule by a wiped joint.

Joints of stoneware and cement concrete pipes shall be made with Stamford joints or cement joints; gaskets will not be allowed unless by permission, and in no case will cement or other projection extend from inside the joint.

The ends of all private drains not immediately connected with the plumbing fixtures shall be securely closed with water-tight, imperishable materials. If stoneware or cement concrete, a stoneware, cement concrete, or cast-iron disc must be cemented in; if wrought iron, a plug must be screwed on the end; if cast iron, a cast-iron plug must be caulked in with lead.

Connexions of galvanized sheet-iron vent pipes to cast iron do not require a brass sleeve, unless ordered by the engineer-in-chief.

Vent Pipes.—Drainage.

30. The main drain must be vented at its upper end by a pipe or shaft erected vertically to such a height that the mouth of the pipe or shaft shall be at least 6 feet higher than any window, door, or other opening situated within a distance of 30 feet therefrom.

Branch drains need not be vented if the drainage traps be within 15 feet of the main drain.

When two or more vents are fixed on the same line of drain the diameter of one may be reduced to 3 inches by permission of the engineer-in-chief.

Every vent pipe extending upwards from a soil or drain pipe must be carried to such a height as may be deemed necessary by the Authority, and in any case at least 2 feet above the highest part of the roof or coping, whichever is the higher.

Every vent pipe must be of undiminished size, without return bend, with basket end or duct or indirect cowl as may be ordered, and it must not open near a window, a chimney, or an air-shaft which ventilates living rooms.

All vent pipes in an extension of a main building, when otherwise they would open within 30 feet of the windows, doors, or other openings into the main building or the adjoining building, must be extended to such a height above the roof of the main building as may be deemed necessary by the Authority.

All the main duct or induct vents on house drains shall be of the same diameter as the drains, unless special permission be given to vary their dimensions.

No chimney flue shall be used as a sewer ventilator, or to ventilate any drain, soil, or waste pipe.

All inlets to drains or openings for ventilating shall be efficiently protected by proper gratings of ample area. The aggregate area of the apertures in any grating covering a ventilating opening shall not be less than the sectional area of the pipe or drain to which such grating is fixed. All openings for ventilation made in accordance with this By-law, or upon order of the Authority, shall at all times be kept open and perfectly free from obstruction.

All galvanized sheet-iron vent pipes used to ventilate the drainage system, or used as anti-siphonage pipes to soil or waste pipes from closets, slop sinks, or urinals, must be coated with hot tar or asphaltum inside before erection.

All drainage sheet-iron vent pipes must be double galvanized.

Whenever vent pipes from drains are not more than 8 feet above the offset they will not require staying; if longer they must be stayed with $\frac{1}{4}$ -inch galvanized wrought-iron pipe.

When a galvanized sheet-iron pipe, with or without an offset, is carried up above the brick wall of a building, a galvanized wrought-iron pipe clip shall be used, leaded to the wall near the top wherever possible and bolted against vent pipe. All hand iron clips of vent pipes to brick walls must be fastened with nuts and bolts, leaded in.

A length of 15 feet of straight vent pipe without offset may be fixed without stays.

The minimum height measured from the ground level of all vent pipes to be not less than 18 feet.

There shall be at least one pipe hook or clip to each 6 feet length of vent pipe.

When vent pipes terminate more than 6 feet from chimney openings at the same level, the ordinary rules as to height are to apply; but when the distance is 6 feet and under, the vent pipe must terminate 2 feet below the chimney opening. Vents must, as far as possible, be kept away from chimneys.

When it is not possible to carry a vent pipe above the parapet or ridge, the pipe must be carried up as high as it will stand without staying, provided it is 30 feet from a window or door. When it is at a less distance than this it must be carried up 6 feet higher than any window or door opening within a radius of 30 feet of the vent pipe, and have sufficient stays to support it.

Wooden blocks for vent pipes will not be allowed on walls; when used on posts they must be of redgum or jarrah.

Traps.—Drainage.

31. Traps of three (3) classes shall be used:—

- (a) "Traps" for intercepting gases only, to be of round section and self-cleansing form, but not so easy as to empty by momentum or suction.
- (b) "Silt Traps" for intercepting both gases and solids, to have slightly tapering sides, flat bottom, and rounded, not sharp angles; and provided with trays fitted with handles for catching and removing solids.
- (c) "Grease Traps" for solidifying and collecting grease or other semi-fluid matter liable to foul the pipes, to be of such form as may from time to time be approved. "Triple Interceptor Traps" for collecting oil.

The term "gully" is applied to traps (a) and (b) in cases where they are used externally, and fitted with dished tops and gratings. In such case the dish must be in one piece with the trap, or jointed thereto spigot and socket, and the depth of the dish from the top to the grating must not be less than 6 inches, and the grating must be removable.

The term "disconnector" is applied to traps in cases where provision has to be made for inlet ventilation to the pipe or pipes discharging therein.

All traps must have a water-seal of at least half the diameter of the outlet pipe, but in no case of less than $2\frac{1}{2}$ inches.

Unless a slop sink be fixed inside the building a gully trap must be provided in the yard of every house, placed as near as possible to the kitchen door, with a tap placed over it at a height of about 2 feet, except in cases where the owner desires the tap to be placed higher.

Gully trap basins and tops of silt traps must be surrounded with brickwork or concrete neatly rendered inside and on top with cement mortar. The internal diameter of brickwork around gully traps measured from face of cement rendering must not be less than 15 inches, and must be neatly rounded to meet the gully top. The walls at rear of gully and silt traps, if of brick or stone, must be cement rendered to height of tap; if traps abut against a wooden wall, a sheet galvanized iron apron must be fixed.

The top of all traps must be at least 6 inches above the surface of the surrounding ground.

Gratings to gully traps must not be less than $6\frac{1}{4}$ inches over all, and the gratings to all disconnector traps to be convex in section, with openings of suitable outlet capacity.

All gratings must be fixed down in an approved manner with bitumen or wedges of lead.

When the connecting drain is considerably deeper than the depth at which the private drain will be required to be laid to provide for existing or future cellar drainage, the private drain, instead of being connected directly to the connecting drain, may, if approved, be connected to a jump-up or vertical extension from the same.

Water Supply.

32. All water-closets and other plumbing fixtures must be provided with a sufficient supply of water for flushing purposes to keep them at all times in a proper and cleanly condition. All water pipes to be laid in the ground unless by permission of the engineer-in-chief.

Every owner of property who shall desire, or who shall have been ordered by the Authority to provide sanitary appliances for his property, and to connect the same with the sewers of the Authority, must, prior to or at the commencement of the work of making such connexion, provide piping approved by the Authority for the conveyance of water, and cause the same to be joined to the most convenient water supply main, or, with the permission of the Authority, to some pipe already joined thereto, which piping must be of capacity sufficient to supply all sanitary fittings on the premises freely and continuously and convey to the flushing cistern of each water closet upon the property enough water to fill cistern within five minutes, and he shall cause such piping to be connected with such cistern prior to the completion of the work.

No water service pipe shall be laid to supply any sanitary fitting in any property in the drainage area unless such fitting be connected with the sewers of the Authority; or unless the special permission of the Authority in writing shall have been previously given to lay on such water supply.

The piping to convey a supply of water to the tenement for sanitary uses shall not, for the purpose of obtaining such supply, be joined to the piping which conveys water to another tenement for general purposes.

Where a house is supplied through meter an allowance of 5,000 gallons will be made in cases where the branches to closet services are taken off on the service side of the meter.

Water supply pipes to storage tanks for internal closets must be $\frac{1}{2}$ inch diameter for tanks of up to 20 gallons, and $\frac{3}{4}$ inch for tanks of larger size, and be provided with high pressure ball-taps, except where the height of the storage tank is not sufficient to allow of high pressure ball-taps being used, when low pressure ball-taps may, with the consent of the engineer-in-chief, be used.

Outlets from storage tanks must not be less than $\frac{3}{4}$ inch when supplying one or two cisterns, and 1 inch for three to six cisterns. Whenever a larger number than six cisterns is fixed, the size of the outlet must be increased. The overflow from storage tanks must be $\frac{1}{4}$ inches in diameter, and a stop-tap must be fixed on the rising supply pipe to tank.

Where any deviation from these provisions is desired, in special circumstances, an application in writing (in addition to the plumber's notice) must be made, and must distinctly state the reasons why such deviation is required, and pending the consent of the Authority the work must not be undertaken.

In all water-closets a piece of lead pipe not less than 12 inches in length must be used between the flushing cistern and the supply pipe unless allowed to be dispensed with by the engineer-in-chief after special application.

Plumbing Rules.—General.

33. Separate internal wastes shall be provided for each of the following classes of polluted waters, except by permission of the engineer-in-chief, in the cases of those mentioned in paragraph (1) hereunder:—

- (1) Dirty water from baths, pantry, and china closet sinks, lavatories, and wash-troughs, and other waters with a small proportion of soap and dirt.
- (2) Greasy water from kitchen and scullery sinks where grease traps are required.
- (3) Soil water from closets, and other water containing faecal matter, and urinal water from housemaids' slop sinks and public and private urinals.

Each of these separate waste pipes, except those specified in class (3) must be connected with the drains through a gully or disconnector trap, unless by permission of the engineer-in-chief.

No waste pipe shall be laid in the ground outside any building unless by special permission.

No material shall be used within the building for soil, vent, or waste pipes other than wrought or cast-iron pipes with securely screwed or leaded joints, or lead pipes with wiped joints. Cement or putty joints, or tin or sheet-iron pipes, whether galvanized or not, shall not be used.

In all cases the upward extension from the soil pipe for ventilation must pass in as direct a manner as possible above, and if necessary, through the roof.

The following are the minimum sizes of soil, waste, and vent pipes, and weights of lead, soil, waste and vent pipes, which must be used throughout, unless otherwise specially ordered by the superintending officer:—

Fitting.	Diameter of Waste Pipe.	Minimum Weight of Lead Waste Pipe.	Diameter of Vent Pipe.	Minimum Weight of Lead Vent Pipe.
	inches.	lbs.	inches.	lbs.
One Wash Basin ...	1½ to 1¾	6	1½	6
Row of Wash Basins ...	1½ to 2	6	1½	6
Wash Basin Overflow ...	1½ to 1¾	6	—	—
One Bath ...	2	6	1½	6
Combined Waste for Baths ...	2 to 3	6	2 to 2½	6
Bath Overflows ...	1½ to 2	6	—	—
Wash Tub ...	2	6	1½	6
Set of Tubs ...	2	6	1½ to 2	6
Kitchen Sink ...	2	6	2	6
Pantry Sink ...	2	6	2	6
Slop Sink ...	3 to 3½	7	2 to 2½	7
One Urinal ...	1½	7	1½	7
Row of Urinals ...	2	7	1½ to 2	7
Soil Pipes ...	4	7	2 to 3	7

All cast-iron pipes must be sound, free from holes and cracks, and coated with Dr. Angus Smith's solution, tar, or asphaltum.

The following weights will be accepted standards:—

- 2 inches diameter, 5½ lbs. per lineal foot.
- 3 inches diameter, 8 lbs. per lineal foot.
- 4 inches diameter, 13½ lbs. per lineal foot.

All wrought-iron pipes must be of approved standard weight and quality, and galvanized or coated to the satisfaction of the Authority.

All fittings used in connexion with such pipes shall correspond with them in weight and quality. All junctions must be curved; right-angled junctions must not be made.

Where lead pipe is used for waste or vent pipes, such pipes must not be lighter than of 6-lb. lead; but where, in the opinion of the engineer-in-chief, a heavier weight may be required, such heavier weight as the engineer-in-chief shall desire must be used.

No cast-iron pipe laid in the ground shall be less than the standard weights given in this By-law, but for cast-iron soil, waste, and vent pipes in other positions, and for glass enamelled pipes, the following modifications of the By-law will be allowed, viz.:—

- Cast-iron soil and waste pipes, minimum thickness, ¼ inch.
- Cast-iron ventilation pipes, 2 inches, 3 inches, and 4 inches diameter, minimum thickness, 3-16th inch.

Glass enamelled pipe, if not under heavy pressure, may be 3-16th inch in thickness, without coating, for 3 or 4 inch soil or waste pipes. Glass enamelled pipes shall be measured without enamel.

All soil pipes shall be at least 4 inches in diameter. Where lead, cast-iron, wrought-iron, soil, waste, or vent pipes are fixed outside a wall for upstairs fittings, the cast-iron, lead, or wrought-iron pipes must be carried up above the level of the highest fitting attached to the pipe.

Sufficient inspection and cleaning eyes must be provided in such positions on cast or wrought iron or lead wastes as to be easy of access for proper cleansing of every part or portion of these wastes.

Where inspection openings are provided to cast-iron soil and waste pipes, preference must be given to insertion cloth washers before red lead and the inspection openings must have a flange at least ¾ inch wide.

The soil, waste, and vent pipes, and traps must, where practicable, be exposed to view at all times, for ready inspection, and for convenience of repairing. When unavoidably placed within partitions or recesses of walls, soils, waste, or vent pipes must be covered with woodwork so fastened with screws as to be readily removable.

The arrangements of soil and waste pipes must be as direct as possible.

The following are the minimum gradients to be adopted:—

Size of Pipes.	Gradients.	Sizes of Pipes.	Gradients.
6 in.	1 in 60	1½ in.	1 in 15
4 in.	1 in 40	1¼ in.	1 in 12
3 in.	1 in 30	1 in.	1 in 10
2 in.	1 in 20	¾ in.	1 in 10

No variation will be allowed except by permission of the engineer-in-chief.

The area of openings in gratings to any waste must not be less than will fully charge the waste pipe to which it is attached; and must be in accordance with the Authority's standard drawings.

A main waste pipe into which lavatories, baths, or sinks discharge must be at least two inches (2 in.) in diameter.

External vent pipes of galvanized sheet-iron must be of not less gauge than the following:—

- Diameter—
- 1½ in., 2 in., and 2½ in., 22-gauge galvanized iron.
- 3 in. and 4 in., 20-gauge galvanized iron.
- 6 in., 18-gauge galvanized iron.

Vent pipes, if inside a building, must in all cases be of cast or wrought iron or lead. Grooved or riveted double galvanized iron vent pipes may be used where they are entirely outside a building, and these must be connected with the traps or waste pipes with brass ferrules, or other joints approved by the engineer-in-chief.

The various vent pipes may be branched into a soil or waste pipe of the same class above the level of the highest fixture. They may be combined by branching together those which serve several traps of the same class.

Vent pipes must always have a continuous slope, to avoid collecting water by condensation.

Vent pipes shall not be used as waste or soil pipes.

Galvanized sheet-iron vent pipes may be used inside stables or open sheds in place of cast-iron pipes, except where liable to blows from vehicles or other external damage.

In all cases where the vertical slack of soil pipe provides for closets 4 feet or more above ground level, a short length of pipe, with inspection opening cover close to the ground, clamped to a flange on the pipe with bolts, must be fixed. All vertical soil pipes branched into a horizontal soil pipe must do so at an angle of 45 degrees, unless by special permission.

Lead pipes must not be used under ground floors where they are inaccessible or in the soil. In such places cast or wrought-iron must be used.

Anti-syphonage vent pipes of fittings discharging into gully or disconnector traps must be carried above the eaves of the building, unless special permission to the contrary be granted by the engineer-in-chief. These vent pipes must be branched to the waste as near as possible to the trap.

Where an additional vent branch is required to a galvanized sheet-iron vent pipe already fixed, a brass saddle piece bolted and soldered to the existing vent must be used.

Waste pipes from disconnected fittings need not be ventilated unless they exceed 12 feet inclined, or 18 feet vertical, in length (or their equivalent), and branch wastes to such fittings, if connected with the ventilated main waste, provided there be no other fittings attached to the line of waste, may be 6 feet in length without being ventilated, unless syphonage occurs in a trap, in which case a vent pipe must be supplied to the waste of that trap. Sink waste pipes need not be ventilated unless they exceed 10 feet inclined, or 12 feet vertical in length (or their equivalent), unless syphonage occurs in a trap, in which case a vent pipe must be fixed close to the trap.

Concealed standing wastes are not allowed.

Spacing of lead tacks must be arranged as nearly as possible thus:—

- 4-in. vertical lead pipes, 2 ft. 6 in. centres.
- 4-in. horizontal lead pipes, 2-ft. centres.
- Less than 4-in. vertical lead pipes, 3-ft. centres.
- Less than 4-in. horizontal pipes, 2 ft. 3 in. centres.

One pair of tacks fixed opposite is sufficient for leadflush pipes for cisterns with lugs; in other cases an extra tack must be fixed as near to the cistern as possible.

Where water might otherwise percolate to the floor, baths, troughs, and the like fittings must be flashed with sheet lead of not less than four pounds per square foot, or other approved material. All flashings must be turned up walls at least 4 inches, properly secured, and made watertight. This provision shall not apply to the sinks which are specially provided for under clause 41 of this By-law.

Whenever a fitting is abolished, the soil, waste, vent, and water supply pipes to such fitting must be removed, or if allowed by the Authority to remain, the ends of pipes must be sealed with water-tight, imperishable materials. Wrought-iron pipe must be sealed with screwed plug; a cast-iron pipe must have cast-iron plug caulked in with lead; lead pipe must have end securely closed with properly wiped joint; stoneware or cement concrete pipe must have a disc cemented in.

Joints.—Plumbing.

34. All connexions of lead waste and vent pipes shall be made by means of wiped joints.

All connexions of galvanized sheet-iron pipes to cast-iron pipes shall be made with molten lead, and be lightly caulked.

Brass sockets or sleeves must be used in connecting galvanized sheet-iron to wrought-iron pipes, and proper brass sleeves must be used in connecting galvanized sheet-iron pipes to lead pipes. Sheet-iron pipes must not be soldered to lead pipes.

In connecting galvanized wrought-iron waste pipes, the ends of the pipes must be butted by means of short sockets of a minimum length of 1½ inches, and the pipes must be sufficiently threaded to allow of the butting being done, and all burrs must be removed before the pipes are fitted.

The flushing pipe from cistern to water-closet must be connected by a lead cap-piece with red lead packing.

Vent pipes must be connected to the vent horn of the water-closet trap by a lead cap-piece with red lead packing.

Trapping Fittings.

35. Every water-closet, urinal, lavatory, slop or other sink, bath, and wash trough, or set of wash troughs, must be separately and effectively trapped.

Traps must be placed as near to the fittings as possible, and in no case shall a trap be more than 2 feet from a fitting, unless specially allowed by the engineer-in-chief.

In the event of trap syphoning, it must be prevented by a special pipe connected to the waste pipe at a point not less than 3 nor more than 12 inches from the highest part of the trap, and on that side of the water seal which is nearest to the soil or waste pipe.

All lead traps must be of 7 lbs. drawn lead.

All traps must have a water seal of at least half the diameter of the outlet pipe, but in no case of less than 2½ inches.

The P form of traps, with wastes above floors, and with joints visible and accessible all round, must be used in all internal fittings where possible.

The S form of traps, with wastes under floors, shall only be used by special permission. Where used, facilities for periodical inspection must be provided.

In detached closets and urinals, approved S forms in earthenware, with joints visible and accessible all round, may be used.

All closet pans must be provided with a vent horn attached to the trap.

All fittings inside of main building, and also in buildings directly attached to a main building with doors or windows opening directly into living rooms, work rooms, or kitchens, must be trapped.

Baths, lavatories, and clean water sinks may remain untrapped when fixed under any of the following conditions, provided the length of the waste pipe does not exceed 3 feet, and wash-troughs may remain untrapped provided the waste pipe measured from the centre of the furthest inlet to the end of the outlet does not exceed 6 feet:—

- (1) In an apartment not forming part of the main building and entered only from an open verandah, but having no opening communicating directly with the main building; or
- (2) In an outbuilding not used as a living room or for cooking, and not connected directly by openings with the main building.

Grease Traps.

36. Every grease trap shall be fixed outside the premises, wherever possible, and (if not portable) must be of stoneware or cement concrete, and attached directly to the drain or disconnector trap.

The size of grease traps in ordinary cases must be as nearly as possible the following, viz.:—Portable copper, 21 inches in length; stoneware or cement concrete, 27 inches in length; or otherwise as ordered by the engineer-in-chief.

Wherever a copper grease trap is used inside a building, it must be fitted so as to be easily movable.

The size of grease trap discharge pipes, except in special cases, must not be less than 3 inches for copper, and 4 inches for stoneware or cement concrete.

All large grease traps which are built in brick or slate must be constructed according to the Authority's drawings and specifications, and must have provision made for inlet and outlet ventilation.

Sinks in all such places as food-packing houses, butchers' shops, lard-rendering establishments, hotels, restaurants, boarding-houses, and laundries, and wherever ordered by the engineer-in-chief, shall be provided with suitable approved grease traps.

Water-closets and Lavatories.

37. The area of any external water-closet must not be less than 13½ square feet, with a minimum internal dimension of 3 feet inside measurements. The minimum heights to be not less than 6 feet at back and 7 feet at front measured from the floor to the top of wall plate. The floors of all water-closets must be constructed of concrete, tiles, or other approved impervious and non-absorbent material. Seats must be either flap or hinged tip-up. The area of any internal water-closet must not be less than 15 square feet, with a minimum internal dimension of 3 feet inside measurements, except by permission of the engineer-in-chief.

Every internal water-closet shall be constructed in such a position that one of its sides at least shall be an external wall which shall abut immediately upon the street, or upon a yard, or garden, or open space of not less than 100 square feet of superficial area, measured horizontally at a point below the floor of such closet. Such water-closet shall not be constructed so that it is entered directly from any room used for the purpose of human habitation, or for the manufacture, preparation, or storing of food for man, or used as a factory, workshop, or work place. Such water-closet shall be constructed so that on any side on which it would abut on a room intended for human habitation, or use for the manufacture, preparation, or storage of food for man, or used as a factory, workshop or work place, it shall be enclosed by an air-tight partition of brick or other approved material, extending the entire height from floor to ceiling. Such water-closet apartment must be entered only from a well-lighted and well-ventilated hall, passage, lobby, or staircase; or, if proposed to be fixed in or adjoining a room used for the purpose of human habitation, or as a factory, workshop, or work place, must be cut off from such room, factory, workshop, or work place by a separate enclosure adjoining the closet apartment. Such enclosure must have a floor area of at least 20 square feet per

closet, and must be enclosed on all sides with air-tight partitions extending from floor to ceiling, or ceiled over with an air-tight ceiling at an approved height from floor. Such halls, passage, lobby, staircase, or enclosure must be provided with a window having an area of at least 2 square feet, opening directly into the external air. If such method of lighting enclosure be impracticable, other methods of naturally lighting same must be provided. Such water-closet apartment must be provided with a window of such dimensions that an area of at least 2 square feet, exclusive of frame, shall open directly into the external air. In addition to a window, such water-closet apartment, and such hall, passage, lobby, staircase, or enclosure must be provided with independent, adequate means of constant inlet and outlet ventilation, by means of air-bricks built in external wall of such water-closet apartment, hall, passage, lobby, staircase, or enclosure, or by combination of an air-brick, and an air-shaft, louvred openings, or by some other effectual method or appliance for ventilation. The effective area provided for outlet ventilation of each water-closet apartment, hall, passage, lobby, staircase, or enclosure must not be less than 27 square inches, and where the level of the floor of closet is lower than the outside surface of the ground, exhaust ventilation must be provided by means of a tube at least 6 inches in diameter, carried up through roof and furnished with cowl.

The water-closets shall be furnished with a basin of non-absorbent material of such shape, capacity, and mode of construction as to receive and contain a sufficient quantity of water, and to allow all filth which may from time to time be deposited in such basin to fall free of the sides thereof, and direct into the water received and contained in the basin. To prevent fouling of pan, the closet seat openings must not be larger than 10½ inches x 9 inches, and seats with holes so large as to cause fouling of the pan must not be used. Pans must measure at least 12 inches between the lower edge of the front and back faces of flushing rims. Water-closet seats must be provided with approved buffers to prevent damage to the pan, and an approved buffer clip must be fixed to the flush pipe at a suitable height from the pan.

Closet pans and fittings thereto must be entirely open to inspection without any enclosure.

A suitable apparatus must be provided for the effective application of water to the basin of the water-closet, and for the effective flushing and cleansing of such basin, and for the prompt and effective removal therefrom of any solid or liquid filth which may from time to time be deposited therein.

Every closet pan shall be furnished with a separate flushing cistern or other apparatus approved by the Authority, of at least 2½ gallons capacity, which shall be so constructed, fitted, and placed as to admit of the supply of water for use in such closet pan without any direct communication with any service pipe upon the premises.

The flush pipe from such cistern shall in no case be less than 1½ inches internal diameter, and shall be fitted as straight as possible under the circumstances. The bottom of every such cistern shall be at least 5 feet above the closet seat, but in cases where this distance cannot be obtained in existing buildings without structural alteration, 4 feet will be allowed, but the internal diameter of the down pipe must then be 1½ inches. Every cistern must be fixed so that the ball-tap shall be accessible. Cisterns of all closets must have a separate stop-tap to each. Cistern boards must be in one piece, not less than 10 inches deep and 1½ inches thick.

All water-closets inside a main building must be vented either by a soil vent pipe, or, if considered necessary by the engineer-in-chief, by back venting the trap at a point near the crown of the trap where directed.

In every case where there is more than one closet on an upstairs floor, provision must be made for ventilating in an approved manner to prevent syphoning, and so as to have a current of air continually passing through the soil pipes.

Where there are more than three closets on the ground floor, special provision must be made to prevent syphoning.

Where the branch from the closet to the main soil pipe is not more than 3 feet in length, and such closet is the only one attached to the soil pipe, the branch may be allowed to remain without any further ventilating.

Internal water-closets must be provided with storage tanks capable of holding 6 gallons of water for each occupant of the building. These tanks may be of 22-gauge galvanized sheet iron, or 24-gauge corrugated iron. The storage tanks may be placed in the closet room itself, on the roof over a flat or gutter, or in an accessible place between the ceiling and the roof, in which latter case a galvanized sheet-iron or lead safe, with overflow, must be fixed under the storage tank, unless the owner in writing otherwise requires. If the owner desires not to provide storage tanks, he must make a request in writing accepting all responsibility in the matter.

In wooden closet buildings the base to be constructed or repaired according to the Authority's drawings and specifications. Such closets must be made rigid, and not attached to fences.

On tiled floors the pan to be secured to approved wooden plugs fixed in the floor. On concrete floors the pan to be secured by cast-lead dowels. In each case the pan must be bedded on cement mortar and neatly pointed up. External closet doors to be saw-toothed on top, and a space of 3 inches left between bottom of door and floor, or other approved means of ventilation provided.

In hotels and lodging-houses one water-closet must be provided for every ten lodgers the house can accommodate, placed in suitable positions for males and females separately; and in hotels urinal conveniences must also be provided for the public frequenting the premises. In all other cases water-closets must be provided where required, and in accordance with orders issued by the Authority.

A pedestal pan must be used wherever combined water-closet, housemaids' slop sink, and internal urinals are required, and in such case must be provided with hinged tip-up seat. A lead safe of suitable area must be fixed under the pan.

Urinals.

38. Internal cradle urinals will only be allowed by permission of the engineer-in-chief, and, where permitted, they must be small, free from projecting ornament, and of non-absorbent material. The waste pipes shall be of pottery ware, lead, or glass enamelled, or coated cast iron, and be kept as short and free from bends as possible. The waste pipes must be trapped, and discharge direct into the drain or soil pipe, except where special permission is given to do otherwise. The urinals must be provided with approved flushing apparatus.

The floors under urinals must be covered with non-absorbent material. The floors of the urinals must be tiled or paved with a fall towards a drain against the wall. The walls behind, and screens between urinals, must be of a non-absorbent material, and of approved height. The screens must also be free from the floor for a portion of the width of the division, must project at least 1½ feet, and be of not less than 2 feet apart. Approved forms of stall urinals will be allowed.

The following materials will be considered impervious:—

- (1) For Urinal Walls.—Slate, white or brown porcelain, enamelled fireclay or stoneware, salt-glazed stoneware, and enamelled cast iron.
- (2) For Floors.—Glazed tiles, Portland cement mortar composed of equal parts of sand and cement, slate, and marble.

Urinals inside a building must only be fixed in well-lighted and well-ventilated rooms having at least one external wall, and separated from any other portion or portions of building by a well-lighted and well-ventilated passage or air chamber.

The positions, approaches, arrangement of lighting, ventilation, &c., for internal urinals must comply as nearly as possible with this By-law as to internal closets.

In outside urinals, where a floor or urinal disconnecting trap is used, the waste pipe from a single urinal must discharge direct into the drain or soil pipe.

Outside urinals may discharge into open channels leading to disconnector traps without further trap.

Open channels must not be provided for urinals inside main buildings, except where approved by the engineer-in-chief, and where there is ample ventilation and light. Wherever inside urinals are provided the traps must be fitted with ventilating pipes having an internal diameter of not less than 1½ inches.

Urinal wastes must be connected directly to the drain if no soil pipe is convenient, and must be trapped and vented in an approved manner.

Wherever urinals are provided with wastes and traps, and drippings may become a nuisance, provision must be made to prevent the nuisance by one of the following methods:—

- (a) By a urinal floor trap, with the floor graded to the trap where the floor is tiled or cemented.
- (b) By a suitable sunken tray, trapped and connected with the waste, where the floor is covered with lead.

In either case suitable provision must be made for retaining the seal of the floor trap, and for flushing the surface of the tray.

A separate trap must be provided to each urinal basin.

Urinal Cisterns.

39. Flush pipes for cisterns generally must not exceed—

- | | |
|-------------------------------------|-------------------------------------------------------|
| 1-gallon cistern, 2-inch diameter | } With branches as directed by the engineer-in-chief. |
| 2½-gallon cistern, 1½-inch diameter | |
| 3-gallon cistern, 1½-inch diameter | |

The height of cisterns must, except by special permission, be at least 6 ft. 6 in. from the floor to the bottom of the cistern. The cistern must be so fixed that the ball-tap shall be accessible.

Pull and chain flushing cisterns, or other approved apparatus operated by hand, must be fixed on all urinals.

The discharge must be equal to one gallon for each urinal stall, except where otherwise allowed by the engineer-in-chief.

In a combination of two urinals, one two-gallon cistern may be allowed.

A separate stop-tap must be provided for each urinal cistern. Where the sparge pipe system of flushing urinals is adopted, such sparge pipes must be of brass or copper, with gun-metal fittings.

Flush pipes connecting urinal cisterns to spreaders must be of brass or copper tube, and connected to the brass union coupling attached to the cistern with a brass reducing socket screwed to the coupling.

Housemaids' Slop Sinks.

40. Slop sinks must be of approved material, and be provided with approved flushing arrangements.

The waste pipes from slop sinks must be branched into a soil pipe, or connected directly and independently to the drain. Draw-off taps must not be used directly over slop sinks, unless at least 18 inches above the sink.

A slop sink must be treated in the same way as a closet.

All insanitary slop sinks must be abolished.

Only approved pedestal slop sinks will be allowed.

Kitchen and Scullery Sinks and Troughs.

41. Unless where otherwise specially approved, kitchen and scullery sinks and wash-troughs must discharge into the open air over a gully trap or into a disconnector trap. The trap, main, and branch waste pipes must not be less than 2 inches in diameter.

The brass strainer must be sunk to the level of the trough. The grating openings must be of ample size to fill the waste pipe full bore.

Where sinks and draining boards thereto abut against walls or partitions of living rooms, they must, except by special permission, have suitable lead flashing of not less than 5 lbs. lead carried up the walls not less than 4 inches, and securely fastened and made water-tight. All sinks must be fixed on brackets, and the space between floor and the under portion of sink must be entirely open, without any enclosure.

Where the distance between the outlets of troughs exceeds 21 inches centres, and lead pipe is used, the pipe must be supported either by a lead tack wiped on the top of the pipe, or by wooden blocks screwed to the bottom of the trough and clamped to the pipe. The pipe passing through the troughs must have a lead flange wiped on.

Wherever the end of a wash-trough abuts against the brickwork of washing copper, the space between the end of trough and the brickwork must be made thoroughly water-tight.

The use of unlined wooden boxes as kitchen or scullery sinks is prohibited. Before their connexion with the Authority's sewers will be permitted, wooden boxes must be lined inside with sheet lead weighing not less than 6 lbs. per square foot, or with sheet copper weighing not less than 1½ lbs. per square foot.

Baths and Lavatories.

42. The waste pipe from a bath or set of lavatories must be at least 2 inches diameter, properly trapped, and provided with a 1½-inch vent pipe for the bath, and 1-inch vent pipe for the lavatory. The waste pipe must be carried separately to the open air, and delivered over a gully trap or into a disconnector trap.

The waste pipe and trap from a single lavatory must be at least 1½ inches in diameter, and the area of the grating must be sufficient for the water to effectually scour the waste pipe. The waste pipe must be as short as possible, and discharge over a gully trap or into disconnector trap.

From two to six lavatories must have at least 1½-inch combined waste pipe; and from seven to twelve, a 2-inch waste.

In all internal lavatories, where syphoning occurs, separate trap ventilation must be provided. In ranges of lavatories in external buildings or rooms isolated from the main building, the waste may be ventilated by single pipe at its upper end.

Tip-up basins will not be allowed.

Where it is necessary to fix new wastes to galvanized iron baths, the bottoms of which are unsupported, efficient supports for the baths must be provided before the wastes are fixed.

Where a bath trap is fixed on the outside of a wall, it must in no case be more than 2 feet from outlet of bath, unless with special permission of the engineer-in-chief.

Where pedestal baths are to be fixed, and it is not desired to flush them, they must be fixed with a space of at least 6 inches clear of walls.

Safes, Overflows, &c.

43. Unless where otherwise allowed by the engineer-in-chief, every safe under a water-closet, urinal, lavatory, bath, refrigerator, sink, or other fixture, must be drained by special pipe not directly connected with any waste pipe, soil pipe, drain, or sewer. It must be provided at the outlet, into the open air, with flap valves of brass or other approved metal.

All lead safes must be laid with sheet-lead not less than 5 lbs. per square foot, and where the whole floor is not laid with lead, the safe to extend 12 inches beyond the sides, and 15 inches beyond the front of the pan, measured from the outside of the basin, and shall extend back to and 3 inches up the wall and overflashed if necessary.

In the cases of baths, sinks, and lavatory basins, the lead to extend 6 inches beyond the ends or sides, measured from the extreme edge of the fitting, and to be carried back to and up the wall as for closets.

Pipes draining safes may discharge into the open air only when the discharge will not cause any inconvenience or nuisance. In all other cases the pipes must be brought to the ground surface, or be arranged to discharge where they will not prove a source of annoyance or inconvenience.

Pipes for bath safes must be of 2 inches diameter, and those from closet and urinal safes must be of 1½ inches or 1 inch, as directed.

A brass grating must be fixed to the inlet of each safe pipe.

No steam exhaust, blow-off, or drip pipe shall be connected with the drain or sewer, or with any soil or waste pipe. Such pipes must discharge into the rain-water channels.

On special application of the owner, lead safes already in position may be retained only under the conditions stipulated for existing fittings.

Lead safes for slop sinks to be laid the same as for closets.

It shall be compulsory to fix a lead safe or other impervious material under a bath or basin on an upstairs floor, unless the owner in writing otherwise requires.

Existing bath floors must be regraded if necessary in the opinion of the Authority's inspecting officer, and a proper waste pipe and flap valve must be fixed.

On ground floors where cisterns are fixed over concrete or tiled floors graded to drain outside of the room, the overflow may discharge on to them, provided no damage is likely to arise therefrom.

Overflows from cisterns, wherever possible, must be taken through external walls, and must discharge inside the owner's property, but in exceptional cases permission may be given to discharge into a slop sink, or other fitting, or on to a lead safe, which has a drainage pipe attached.

Existing Fittings.

44. Existing fittings and appliances which are offensive must be removed at once, and all fittings not in accordance with this By-law may only be allowed to remain at the distinct request of the owner, and must be removed at any time the Authority so orders.

Gratings.

45. The entrance to exit pipes to all fixtures, except water-closets, shall be furnished with suitable permanently attached gratings.

Consent, Sanction, &c., of the Authority.

46. Where the sanction, permission, authority, consent, approval, satisfaction, order, direction, opinion, indication, or notice of or from the Authority is necessary, whether special, in writing, or otherwise, with regard to any Act, matter, or thing mentioned in this By-law, the same may be given by and under the hand of the chairman of the Authority, or of the engineer-in-chief, personally, or through an inspecting officer appointed under him, who severally shall be competent to give the same, and authorized on behalf of the Authority, to prescribe any conditions attaching thereto, and subject to and in accordance with which only the same shall be deemed to have been given.

Power of Exemption.

47. In any case in which the Authority shall be of opinion, owing to the configuration of the ground or the distance, height, or character of adjoining buildings or for any other reason (whether similar in character to the instances above given or not) that a compliance with any of the foregoing provisions of this By-law would in the particular case be vexatious or needless in the interests of public health or the Authority or injurious to the public health, it shall be lawful for the Authority by resolution to dispense with or forbid such compliance in whole or in part as it shall think fit or to authorize or direct such a modification or alteration of such provisions as shall in its opinion most nearly adapt the principle of such provision to such particular case. It shall be unlawful to comply with any provision or part thereof compliance whereof shall have been forbidden as aforesaid or to act contrary to or otherwise than as directed by such modification or alteration as aforesaid.

Offences and Penalties.

48. Where anything is by this By-law directed to be done, or forbidden to be done, or where any authority is given to the Authority or any of its officers to direct or to forbid anything to be done, and such act so directed to be done remains undone, or such act so forbidden to be done is done, then, and in every such case, the person making default as to said direction or prohibition respectively, shall be guilty of an offence against this By-law.

Every person guilty of an offence against this By-law, not otherwise specially provided for by or under the authority hereof, shall be liable for every such offence, beside any costs or expenses which may be incurred in the taking of proceedings against such person guilty of such offence, as well as any costs or expenses which may be incurred in remedying such default, as particularly provided for in this By-law or the Act, to a penalty not exceeding Ten pounds, and to a further penalty of One pound for each day during which such offence is continued by such person, after notice of the offence shall have been given by the Authority to him, and such penalty shall be recoverable, notwithstanding that the Authority may not have chosen to exercise any power given to it by the Act, or by this By-law to remedy such default.

Interpretation.

49. In the construction of this By-law the meaning which, in the Act, is assigned to any word shall be the meaning of the same word where occurring in this By-law, unless inconsistent with the subject-matter or context.

The foregoing By-law was made and passed by the Ballarat Sewerage Authority on the 13th day of December, 1923, and was confirmed on the 17th day of January, 1924. In witness whereof the common seal of the said Authority was affixed hereto in the presence of—

REGULATIONS UNDER THE TOURISTS RESORTS ACT 1922 (No. 3238).

At the Executive Council Chamber, Melbourne, the twenty-fifth day of March, 1924.

PRESENT:

His Excellency the Governor of Victoria.	
Mr. Lawson	Mr. Gordon
Dr. Argyle	Mr. Brawn
Mr. Oman	Mr. McGregor
Mr. Eggleston	Mr. Groves
Mr. Cohen	Mr. Beardmore.

WHEREAS by section 8 (c) of the *Tourists Resorts Act* 1922, it is enacted that the Governor in Council may make Regulations in respect of all matters which are required or permitted to be prescribed, or which are necessary or convenient to be prescribed, for carrying out or giving effect to the said Act:

Now, therefore, His Excellency the Governor in Council of the State of Victoria, by and with the advice of the Executive Council thereof, doth, for the purpose of fixing the allowance to be paid to the Chairman of the Tourists Resorts Committee appointed under the said Act, and travelling expenses to be paid to the members of the said Committee, make the Regulations following, that is to say:—

That the Chairman shall for his services as a member of the Committee be entitled to receive an attendance fee of One guinea (£1 1s.) for each meeting of the Committee at which he attends and to a similar fee for each day when absent from his place of residence making inspections or otherwise engaged in business connected with the administration of the Tourists Resorts Act.

TRAVELLING ALLOWANCES AND EXPENSES.

That every member of the Committee (other than members employed in the Public Service) shall, when travelling expenses are incurred, be entitled to receive and be paid One pound (£1) per day as a travelling allowance for personal expenses, and shall in addition thereto be re-imbursed the actual cost of transit.

These Regulations to be in lieu of those approved of by His Excellency the Governor in Council on 4th December, 1923, and published in the *Government Gazette* of 5th December, 1923.

And the Honorable Henry Isaac Cohen, His Majesty's Commissioner of Public Works for the State of Victoria, shall give the necessary directions herein accordingly.

ORDER APPROVING OF A DEVIATION FROM A DEVELOPMENTAL ROAD IN THE SHIRE OF NEWHAM AND WOODEND.

WHEREAS the Country Roads Board constituted under the *Country Roads Act 1915* (No. 2635) has represented to His Excellency the Governor in Council that it appears to it desirable that the deviation hereinafter referred to from the existing Campaspe road in the Shire of Newham and Woodend (declared to be a developmental road under the Developmental Roads Act which declaration was confirmed by the Order in Council published in the *Government Gazette* of the 20th October, 1921, on page 3540) should be made by the said Board; And whereas the said Board in accordance with the requirements of section 19 of the said first cited Act has caused to be prepared a map plan marked A and B respectively and an estimate showing the points between which and on and through what land the said deviation is proposed to be made and the cost of acquiring the land and constructing the said deviation: And whereas on an inspection of the said map and plans and a consideration of the said estimate His Excellency the Governor in Council is satisfied that there are funds legally available for acquiring the land and constructing the said deviation: Now therefore be it known by this present Order that His Excellency the Governor of the State of Victoria with the advice of the Executive Council thereof doth hereby approve of the said road being made, that is to say:—

All that piece of land in the Parish of Woodend and being a roadway one chain or more in width, the western boundary of which commences at a point on the northern boundary of allotment 108r of the said parish, distant 90 deg. 0 min. 465.4 links from the north-western angle of the said allotment; thence south-westerly through that allotment to the south-western angle thereof; thence south-westerly along the existing Government road to a point on the south-eastern boundary of allotment 108u of the said parish; thence generally south-westerly through the allotment last named to a point on the south-eastern boundary thereof, distant 47 deg. 15 min. 212.2 links from the south-western angle of the said allotment 108r.

NOTE.—The route of the portion of the roadway above described is more particularly delineated and shown coloured red on survey plans numbered 1516 and 1517, lodged in the office of the Country Roads Board.

ORDER APPROVING OF A DEVIATION FROM A MAIN ROAD IN THE SHIRE OF BERWICK.

WHEREAS the Country Roads Board constituted under the *Country Roads Act 1915* (No. 2635) has represented to His Excellency the Governor in Council that it appears to it desirable that the deviation hereinafter referred to from the existing Koo-wee-rup—Pakenham—Woori Yallock road in the Shire of Berwick (declared to be a main road under the said Act which declaration was confirmed by the Order in Council published in the *Government Gazette* of the 14th January, 1914, on page 91) should be made by the said Board: And whereas the said Board in accordance with the requirements of section 19 of the said cited Act has caused to be prepared a map plan and estimate showing the points between which and on and through what land the said deviation is proposed to be made and the cost of acquiring the land and constructing the said deviation: And whereas on an inspection of the said map and plan and a consideration of the said estimate His Excellency the Governor in Council is satisfied that there are funds legally available for acquiring the land and constructing the said deviation: Now therefore be it known by this present Order that His Excellency the Governor of the State of Victoria with the advice of the Executive Council thereof doth hereby approve of the said road being made, that is to say:—

All that piece of land in allotment B, Parish of Gembrook, the boundaries of which are as follow:—Commencing at an angle in the north-eastern boundary of the said allotment

formed by the intersection of lines bearing 119 deg. 24 min. and 156 deg. 6 min.; thence by lines bearing respectively 156 deg. 6 min. 550 links, 140 deg. 15 min. 265.4 links, 190 deg. 39 min. 109.6 links, 338 deg. 41½ min. 175.7 links, 325 deg. 43½ min. 807.6 links, 362 deg. 47½ min. 558 links, 322 deg. 9½ min. 409 links, 57 deg. 29 min. 50.7 links, 147 deg. 59 min. 375 links, and 119 deg. 24 min. 716 links to the point of commencement, which said piece of land is particularly delineated and shown coloured red on survey plan No. 1346 lodged in the office of the Country Roads Board.

And the Honorable H. J. Cohen, His Majesty's Commissioner of Public Works, for the State of Victoria, shall give the necessary directions herein accordingly.

F. W. MABBOTT,

MALLEE LANDS AVAILABLE FOR APPLICATION UNDER SELECTION PURCHASE LEASE, SECTION 198, LAND ACT 1915, IN THE PARISH OF WYMLET.

THE land is situated from 10 to 16 miles west and north-west of Kiamal (on the Ouyen-Mildura railway line, and from 9 to 16 miles north and north-east of Walpeup (on the Ouyen-Murrayville railway line).

The land is available for general selection, but no person who has not reached the age of eighteen is eligible to apply.

Applications (with uncancelled Victorian duty stamp of 5s. or postal note for the same amount, affixed) must be made on the usual form, and delivered or forwarded by post to any local Land Office or to the Under-Secretary for Lands, Lands Department, Melbourne, on or before 30th April, 1924.

Applicants may apply for one or more allotments on one application form.

Applicants will be hereafter notified as to the date and place of hearing of their applications by Local Land Board.

The land will be granted under selection purchase lease, and at the end of six years, if the residence, cultivation, improvements, and all other conditions have been complied with, the lease will be indorsed under the seal of the Board of Land and Works to the effect that such conditions have been complied with, and at any time within the remaining period of 14 or 34 years, as the case may be, a Crown Grant will be issued on payment of the full amount of the purchase money.

The survey fee ranges from £12 10s. to £15 per allotment. A deposit of £5 will be accepted on account of survey fee, the balance to be paid with half-yearly rents in equal half-yearly instalments during the first six years of the lease.

In accordance with section 16, Land Act 1920, provision for water storage must be made on the land to the extent of approximately 4 cubic yards per acre within two years from date of lease.

The lease will contain (*inter alia*) conditions to the effect as follows:—

That substantial and permanent improvements shall be made on the land. If in the third class, to the value of Five shillings per acre before the end of the third year from the date of the lease, and the balance of Five shillings per acre before the end of the sixth year of the lease. If in the fourth class, improvements to the value of Two shillings and sixpence per acre must be made on the land before the end of the third year from the date of the lease, and the balance of Two shillings and sixpence per acre before the end of the sixth year of the lease.

That the lessee shall go into residence on the land within twelve months after the date of the lease, and shall reside for at least three years and nine months on, or within 5 miles of, the land during the first six years of the term of the lease, and shall also clear and cultivate at least one-fourth of his allotment within two years from the date of the lease.

That the lessee shall not transfer, assign, mortgage, or sublet or part with the possession, or grant the use of the whole or any part of the allotment during the first six years of the term of the lease, and that after the first six years of the term of the lease the lessee shall not sell, transfer, assign, mortgage, or sublet the whole or any part of the allotment unless and until the lease has been indorsed under the seal of the Board to the effect that all the conditions and covenants of the lease during the first six years thereof have been complied with.

That a special condition shall be inserted in the lease providing that the land referred to therein shall at all times be maintained and used for the purpose of residence or agriculture and grazing, and that no person will be permitted to subsequently acquire or hold, or have an interest in any area in the Mallee country in excess of that quantity of land as set out in section 20 of the Land Act 1921.

That the lessee or grantee or owner shall preserve the timber on, or plant an area of not less than three per cent. of the total extent of his holding. (N.B.—Along the exposed boundary lines, viz., the western and southern, would be preferable.)

The value per acre on each allotment set out in the Schedule hereto includes loading for Water Supply and Road purposes.

Plans can be obtained at the Inquiry Office, Lands Department, Melbourne, and at Lands Offices, St. Arnaud, Bendigo, and Horsham.

Intending applicants may obtain warrants from any Land Officer authorizing the issue of a railway ticket at half fares for the purpose of inspecting the land.

ALBERT J. MULLETT,
Government Printer.

2nd April, 1924.

THE "VICTORIA GOVERNMENT GAZETTE."

SUBSCRIPTIONS.—The Subscription, including Postage, is £1 10s. 4d. per annum, or 7s. 7d. per quarter, payable in advance.

Subscriptions are required to commence and terminate with a month.

A lesser period than three months cannot be subscribed for. Subscribers do not receive the Acts of Parliament with the Gazette.

ADVERTISEMENTS are charged at the rate of EIGHTPENCE per line throughout.

The title (£5 Reward, Dissolution of Partnership, &c.) forms one or more lines, as a heading.

On an average, eleven words make a line, but for the description of a brand consisting of more than one letter, &c., placed perpendicularly, thus B, each additional letter under

the first is charged as a line.

All communications should be addressed to "The Government Printer, Melbourne."

Every signature must likewise be counted as a line.

The final words of a paragraph, though only portion of a line, must be counted as one line.

Signatures (in particular) and proper names must be written very plainly in the text, ONE SIDE ONLY of each slip of paper should be WRITTEN UPON.

ALL DOCUMENTS illegibly written will be returned unpublished, and, where brands occur unprovided for by the ordinary letters of the alphabet, a worded explanatory description must be furnished.

THE GOVERNMENT GAZETTE is published on WEDNESDAY EVENING in each week, and Notices for insertion will be received by the Government Printer at or before TWO p.m. at ordinary rates, and late advertisements between TWO p.m. and FIVE p.m. at double rates, on the day preceding the day of publication.

Single Copies of the GOVERNMENT GAZETTE are Sixpence, posted, Sevenpence, each.

No GAZETTES prior to January, 1908, in stock.

ALL PAYMENTS ARE REQUIRED IN ADVANCE. Remittances should be made by postal note, money order, or draft in favour of the Government Printer. Advertisements unaccompanied by a remittance sufficient to cover the cost of insertion will be returned unpublished.
