F. W. MABBOTT,
Clark of the Executive Council.

1. Except with the consent of the Trust, one service pipe only for domestic supply to each tenement shall be permitted, and not more than one house or tenement shall be supplied from a single water service. The Trust may, in special cases, consent to two or more houses or tenements being supplied from one water service, but in such cases the sub-services shall be so arranged that the supply to each house or tenement shall be independent of the supply to the remaining houses, and be controlled by a stop-cock on such service.

2. No private service shall be extended, except with the consent of the Trust.

3. Upon any person giving notice of his desire to lay a pipe to connect with and tap the pipes of the Trust, he shall be informed on behalf of the Trust whether it is or is not desired that such tapping should be made by an officer of the Trust, and if it be so desired, such person shall not tap any such pipe, but shall provide for and bear the cost of all labour and material necessary for such connexion, and for the restoration of the ground to the satisfaction of the local authority, and be liable for the consequences of failure in so doing, and shall pay in advance to the Trust the expense of such tapping, including the stop-cock and ferrule, as follows:—For ½-inch pipe, Seven shillings and sixpence; ¾-inch pipe, Ten shillings; 1-inch pipe, Fifteen shillings. Such tapplings shall not be made except under the supervision of a proper officer of the Trust.

4. All service pipes laid on the ground on private property shall be laid at a depth of not less than 10 inches below the surface. The portions of the service pipe laid along or across any public street, lane, or right-of-way, or where it may be exposed to wheel traffic, shall be laid not less than 24 inches below the surface of the ground.

5. Connexions with the Trust's mains shall (except where otherwise directed) be made with proper stop-cock ferrules to which, for iron mains, a wrought iron quarter bend or a length of not less than 3 feet of lead pipe must be attached. The maximum bore of the service pipe and tapping (except by special permit of the Trust) shall be ½ inch.

6. A high-pressure screw-down stop-cock, properly secured and covered with an approved cast iron top, shall be fixed on each water service between the main and building line.

Materials for Private Streets, &c.

7. Lead piping of the following weights:—

For piping ½-inch diameter, weight 6 lb. per yard;
For piping ¾-inch diameter, weight 9 lb. per yard;
For piping 1-inch diameter, weight 14½ lb. per yard;
For piping 1½-inch diameter, weight 22 lb. per yard;
For piping 2-inch diameter, weight 30 lb. per yard;
and galvanized wrought iron piping of approved quality only will be allowed for external or internal services.

8. The quality of the material required in laying private services shall be as follows:—

- The whole of the pipes, tees, thimbles (excepting those connecting the service pipes and mains), bends, reducing couplings, plugs, and the like, shall be of best galvanized wrought iron.
- All pipes and pieces shall be true in sectional form, straight longitudinally, clear in bore, and properly coated throughout and of equal strength and thickness throughout the entire body of same.
- All ends of pipes, bends, and the like shall be properly and truly threaded, and capable of being properly screwed into thimbles, tees, or fittings.
- The whole of the pipes, tees, bends, cocks, and fittings shall be sound and free from all defects, and of strength to bear with safety the maximum hydrostatic pressure to which they may be subject, and if required by the Trust shall be tested.

9. No person shall use any tap, stop-cock, bib-cock, ball-cock, valve, closet cistern, service box, waste-not regulator, bath tap, or valve or other fitting in connexion with a supply of water of the Trust which is not of the best quality and approved by the Trust.

10. No person shall use any stop or bib cocks which are not screw-down high-pressure cocks made of hard brass or gunmetal, and in every respect of the best quality and workmanship, and approved by the Trust.

11. All connexions between lead and iron pipes shall be made with brass union couplings.

12. All joints connecting lead pipes shall be "wiped joints," and in no case will "bolt" or "copper bit" joints be allowed on water service pipes, either in the interior or on the exterior of any building or tenement, on pain of cancellation of licence of the plumber who by himself or his workman shall break these Regulations.

13. No person, whether licensed as hereinafter set out or not, shall connect any service pipe or branch service pipe with any steam boiler for the purpose of feeding or supplying the same with water without first affixing a self-acting valve

for preventing the pressure of the steam reversing or affecting the dial of the meter, or otherwise affecting the Trust's mains.

14. No person shall use any cistern or tank that is not provided with an equilibrium ball valve, and the overflow pipe shall be laid and fixed in a suitable manner open to inspection, and in a position approved by the Trust.

15. No person shall construct or use any urinal or water closet fitting not approved by the Trust, nor unless the same be supplied with water from the service pertaining to a tenement through a proper closet cistern or service box fitted with approved waste-preventing apparatus. No person shall fix or use any service pipe which communicates directly or indirectly with the basin or trap or otherwise than with the cistern of a urinal or water closet. Urinals shall be provided with 2-gallon and closets with 3-gallon cisterns.

16. All baths, sinks, lavatory and other basins, closets, and urinals served from the Trust's mains shall be of approved sanitary construction, and mounted to the satisfaction of the Trust.

17. No bath shall be allowed which has a holding capacity when full of more than 100 gallons, except with the permission of the Trust. Overflow pipes to baths will not be permitted, except where the supply is by measure.

18. All water-troughs supplied from the pipes of the Trust shall be of concrete or metal, or be lined with metal, so as to be watertight, and shall have proper and efficient fittings for supplying them automatically, and for preventing overflow.

Licensing of Plumbers.

19. Before any person shall affix any service pipe to any pipe of the Trust, or alter or repair or in any manner interfere with any pipe of the Trust, or any service pipe, cock, or fitting connected with the pipes of the Trust, he shall obtain from the Trust a licence in that behalf to execute such works, and any unlicensed person affixing, altering, repairing, or in any manner interfering with any such pipe, service pipe, cock, meter, or fitting as aforesaid, shall be guilty of an offence.

20. Each such licence shall be for the period ending 31st December next ensuing after the issue thereof, but may be renewed by the Trust at its discretion from time to time in each case to the following 31st December. The Trust shall have power at any time to cancel a licence in the event of the holder thereof performing his work in an unsatisfactory manner, or committing any breach of the Water Acts or of this By-law, and in such matters the Trust shall be sole judge. For each original licence the licensee shall pay to the Trust a fee of One pound, and for each renewal Five shillings.

21. Before such licence shall be granted by the Trust, the person applying for same shall satisfy the Trust that he is a competent plumber, and that he is thoroughly conversant with the provisions of the By-laws of the Trust relating to water supply, and with the Water Acts so far as they apply to town supplies. The Trust may, if it sees fit, refuse to grant such licence.

22. Each licensed plumber shall report to the Trust secretary the completion of any new work, extensions, or repairs in connexion with any service within twenty-four hours of effecting same.

Meters.

23. No hose or pipe shall be attached to any pipe or tap for the purpose of watering ground, or trees, or plants, or washing house walls, or carriages, or horses, or other animals, or for any similar purpose, except the water is charged for by measure.

24. Except by the express permission of the Trust in writing, syphon pumps will not be allowed unless where the water is supplied by measure.

25. No meter shall be affixed until it shall have been examined, tested, and approved by a duly authorized officer of the Trust, and each meter shall be capable of registering at least 1,000,000 gallons, and each $\frac{1}{2}$ -inch, $\frac{3}{4}$ -inch, and 1-inch meter must be capable of registering any flow not less than ten, fifteen, and thirty gallons per hour respectively. Each meter must be fixed with approved galvanized wrought iron bend connexions above ground in a conveniently accessible position and properly protected. Wherever washers are necessary for meter connexion couplings, leather washers shall in all cases be used.

26. If any meter in use ceases registering, or be reported by a duly authorized officer of the Trust as out of repair, or registering inaccurately, the Trust will estimate and charge for the water consumed during the period such meter was not in working order, and until it is repaired and refixed, either by taking an average of the quantity used during a previous period, or on the basis of subsequent consumption after repairing, or the Trust may insert a check meter in the service pipe, and charge upon estimates from the registering thereof. Every meter removed through being out of order must be repaired, adjusted, and submitted for test and refixed with the least possible delay by a licensed plumber employed for this purpose. For any unnecessary delay in refixing the meter, such licensed plumber shall be guilty of an offence.

27. In all cases where an owner or occupier is required by the Trust to install a meter, the cost of such meter and the cost of such alteration, maintenance, or repair of the same as is from time to time necessary or as is required by the Trust to be done, shall be borne by the said owner or occupier.

Waste or Misuse of Water.

28. No person supplied with water by the Trust shall permit or suffer the same to run to waste.

29. No person receiving water from the Trust shall, without the written permission of the Trust, take or carry away such water, or shall sell the same to any other person.

30. No person not having agreed to be supplied by the Trust shall take or carry away water from the premises of any other person so supplied, or from any drinking tap, trough, or private or public service pipe.

31. No person other than an employee of the municipal council shall, without the written permission of the Trust, water streets or thoroughfares by means of hydrant or hose attached to fire-plugs.

32. The water supply of all public parks and gardens shall be exclusively under the control and direction of the officers of the Trust, and no person, unless duly authorized, shall turn on the water or otherwise interfere with such water supply.

33. Water for other than domestic purposes is to be used only at such times as may be determined by the Trust.

34. During the months of January, February, March, and December in each year no person may use a hose or pipe for the purpose of watering any lawn, garden, or other ground or trees or plants, between the hours of 9 o'clock a.m. and 6 o'clock p.m., unless by the express permission of the Trust, which may be withdrawn by the Trust at its discretion at any time without notice.

35. If in the opinion of the Trust or a responsible officer thereof any of the pipes or fittings in or about any premises supplied with water are altered, or erected, or permitted to fall into such a state of disrepair as to allow or to be liable to allow water to unnecessarily run to waste, the Trust may, with or without notice as it deems fit, discontinue the supply to the premises until such pipes or fittings have been altered or repaired or otherwise rectified to the satisfaction of the Trust, and until the consumer has paid to the Trust such amount as may be demanded by it for expenses incurred by it in disconnecting or discontinuing the supply.

Miscellaneous.

36. If in the opinion of the Trust the quantity of water available is at any time insufficient or liable to be insufficient to meet all ordinary requirements, the Trust may, by notice published in a newspaper circulating in the neighbourhood, or by printed posters placed in prominent positions within the Trust District, restrict the hours during which water may be drawn or used for any particular purpose or purposes. The Trust may, without notice, discontinue the supply of water to any person found using water in a manner or at a time which the Trust has prohibited as aforesaid.

37. Nothing herein contained shall render the Trust liable to any damages for not supplying any or sufficient water for the requirements of any consumer if the failure to supply arises from unusual drought or other unavoidable cause or accident.

38. In every case in which it is necessary to obtain the consent of the Trust before doing any act or commencing any work, such consent must be asked for by notice in writing addressed to the Secretary of the Trust, and delivered at his office, of such length as is mentioned in the Acts or in this By-law, and in no case less than two days prior to the time proposed for the doing of such act or the commencement of such work, and such notice must clearly state the act proposed to be done or work to be commenced, and such act shall not be done or work be commenced save upon the Trust's consent in writing, and then only subject to and in accordance with such directions or conditions as shall be therein specified. Such consent may be given by and under the hand of the chairman of the Trust, the secretary, or the engineer, who severally shall be competent to give the Trust's consent, and on behalf of the Trust to prescribe any directions or conditions attaching thereto, and subject to and in accordance with which only such consent shall be deemed to have been given. The giver of every such consent shall notify the same to the next following meeting of the Trust for confirmation.

39. In the construction of this By-law the word "person" shall be deemed to extend to and include a corporation, whether aggregate or sole, and the meaning which in the Water Act is assigned to any word shall be the meaning of the same word where occurring in this By-law unless inconsistent with the subject-matter or context.

40. Any person who does, or causes to be done, anything in contravention of this By-law, or fails to do anything which under this By-law ought to be done, shall be guilty of an offence, and for every such offence the offender shall, upon conviction, be liable to a penalty not exceeding Five pounds, and in the case of a continuing offence to a further penalty not exceeding Five pounds for every day after notice of the offence from the Trust.

- (10) Film when not actually in use shall be kept wholly enclosed in incombustible cases or boxes.
- (11) A metal receptacle for carbon ends that may be removed from the arc lamp shall be provided and so constructed as to prevent heated carbon from coming into contact with any inflammable material.

A copy of such notice shall be retained by the operator and be produced on demand to any authorized officer of the Department of Public Health.

13. The operator shall make himself familiar with the fire-extinguishing appliances required to be provided in the cabin, and in the event of fire occurring at any time in any apparatus specified as aforesaid and under the charge of such licensed operator, or in the cabin or re-winding room, it shall be the duty of the operator to as far as practicable bring under control and extinguish such fire.
