19. If any person supplied with water by the Trust causes or suffers any pipe, valve, tap, cock, cistern, or other fitting, apparatus, or receptacle to be out of repair, or to be so used or contrived so that the water supplied to him by the Trust is or is likely to be wasted, misused, or unduly consumed, he shall for each offence be liable to a penalty not exceeding Five pounds.

20. Every person supplied with water by the Trust shall keep his service-pipes and fittings, meters, and other apparatus in good repair, and shall be responsible for any loss of water or damage which may be caused by reason of any such service-pipe, fitting, meter, or other apparatus being leaky or otherwise out of repair or broken.

21. The owner or occupier of any tenement supplied with water by the Trust shall, upon receiving notice that his service-pipes, fittings, meter, or apparatus requires repairing, immediately proceed to repair same, and in default of such repairs being effected he shall be liable to a penalty not exceeding Five pounds, and to a further penalty not exceeding Two pounds for each day after receipt of such notice from the Trust that such service-pipe, fitting, meter, or apparatus requires repairing, and the Trust may stop the water from flowing into such premises either by cutting off the service-pipe or otherwise as to the Trust seems fit, until the necessary repairs have been effected, or the Trust may by its employees enter on the premises whereon repairs may be required, and repair or replace or refit and cleanse such of the pipes, fittings, meter, or apparatus as may require to be repaired, replaced, refitted, or cleansed, and the costs, charges, and expenses of so doing shall be paid by the owner or occupier of such premises, and in default of payment, in addition to any penalties incurred, the Trust may recover the amount of such costs, charges, and expenses in any Court of competent jurisdiction as money paid for the owner or occupier, as the case may be, and in such proceedings the Trust may proceed against the owner or occupier individually or as co-defendants.

22. The Trust may by notice intimate to the occupier or owner of any premises using water for domestic or other than domestic purposes that the water supply is to be charged for by measure, and may by such notice require such occupier or owner to provide a suitable meter for measuring the supply within seven days from the date of such notice, and thereupon such occupier or owner shall within the time specified, at his own cost and expense, provide such a meter, and if any person neglects to comply with such notice and provide such meter, such person shall be liable to a penalty not exceeding Five pounds.

The Trust may, in the event of any person neglecting to comply with such notice, or neglecting to provide such meter in the time stated, cut off the supply of water to such premises, and may discontinue the supply until such meter is provided, and such cutting off or cessation of the water supply as aforesaid shall not relieve any person of his liability to pay water rates during such period of cessation of supply.

23. All meters shall be affixed by the proper officer of the Trust, and at the cost and expense of the owner or occupier of the premises affected, and such owner or occupier shall maintain and keep any such meter in good repair and condition. All such meters shall be affixed in such position as the Trust by its proper officers shall determine.

24. The minimum quantity of water to be charged for in cases where water is supplied by measure shall be the quantity the charge for which at Eightpence per 1,000 gallons would be equal to the amount of the assessed rate which would be payable for such premises so supplied if supplied otherwise than by measure.

25. No meter shall be affixed until it has been examined, tested, and approved by the proper officer of the Trust, and if any meter cease registering, or be found to be out of repair or registering inaccurately, the Trust shall, during the time such meter is out of order or undergoing repairs, estimate and charge the water consumed by taking it as equal to the quantity used during the previous quarter, or during the corresponding period of the previous year.

26. No person shall use or permit to be used, or allow or permit to run on any premises the water supplied by the Trust for other than strictly domestic purposes between the hours of 9 o'clock p.m. and 8 o'clock a.m., and any person so offending shall be liable to a penalty not exceeding Five pounds for each offence. Domestic purposes under these Regulations shall not include hosing down or washing horses, motor cars or other vehicles, or the watering of gardens or lawns.

27. Where the Trust supplies water to buildings, tanks, or other places, or to any tenement or premises not valued for municipal rating, the Trust may make such a charge for water so supplied as it may deem reasonable.

28. The minimum annual charge for water supplied shall be One pound.

29. Any person using water supplied by the Trust for irrigation purposes or for the purpose of growing vegetables, lucerne, or other crop or grasses, may be directed by the Trust to install a meter.

30. Where the water supplied by the Trust is used to water trees or gardens which (including all buildings and erections) exceed a quarter of an acre, the Trust may make an extra charge for such excess at the rate of Five shillings per annum for each sixteenth of an acre or part thereof.

31. The Trust may by its officers or servants enter upon any land or tenements at any reasonable time for the purpose of inspecting or repairing any pipe or fittings thereon, or to ascertain if there be a waste of water, and any person who shall wilfully obstruct or interfere with such officer in the execution of his duty shall be liable to a penalty not exceeding Five pounds.

32. The water supplied by the Trust in the above Waterworks District shall be received and consumed under and in accordance with these Regulations, and not otherwise, and should any person so supplied not pay his rates or any lawful charge imposed by the Trust when due, or do or cause or permit to be done anything in contravention of these Regulations, or fail to do anything which under these Regulations ought to be done, or allow any water to run to waste, the Trust may cut off the supply of water from the premises of such person, and may cease to supply such premises or such person with water so long as the cause of complaint remains or is not remedied.

33. In the construction of the By-law the word "person" shall extend to and include a corporation, company, or firm, whether aggregate or sole. The expression "proper officer" shall mean an officer or servant of the Trust authorized to perform any act or to accept service of any notice, or to execute any function on behalf of the Trust, and the word "Trust" shall mean the Swan Hill Waterworks Trust.

34. In every case in which it is necessary to obtain the consent of the Trust before doing any act or commencing any work, such consent must be asked for by notice in writing addressed to the secretary of the Trust and delivered to his office at such length of time as is mentioned in the By-law, and in no case less than two days' notice prior to the time proposed for the doing of such act or the commencement of such work, and such act shall not be done or work be commenced save upon the Trust's consent in writing, and then only subject to and in accordance with such directions or conditions as shall be therein specified.

35. Any person guilty of an offence against these Regulations not otherwise specifically provided for shall be liable on conviction thereof to a penalty not exceeding Five pounds, in addition to being liable to make good any damage or loss sustained by the Trust.

His Excellency the Governor of Victoria.

Mr. Eggleston

Mr. Richardson.

WHEREAS by section 12 of the Scaffolding Inspection Act 1922 (No. 3269), it is enacted that the Governor in Council may make Regulations prescribing standards, varying, or adding to the Regulations in the Schedule to the said Act, and prescribing penalties of not more than ten pounds for any breach of any Regulations as so amended, varied, or added to: And whereas His Excellency the Governor in Council, being satisfied that it is expedient and proper that additional Regulations should be made to give effect to the objects of the said Act, doth by this Order make the following additional Regulations (that is to say):—

LIGHT DUTY SWINGING SCAFFOLDING REGULATIONS.

The following Regulations shall apply to the use of Light Duty Swinging Scaffolding:—

Use.

The use of the light duty swinging scaffolding shall be permissible only where, in the opinion of the inspector, such scaffolding and the framework or building on which it is to be used are suitable for the work contemplated. Permission by the inspector to use this type of scaffolding in no way relieves the builder of any responsibility.

Factors of Safety.

With the exception of overhead construction and attachments to outriggers and of wire cables where the factor of safety shall be at least five (5), each part of the light duty swinging scaffolding shall be of sufficient strength to sustain without failure at least three (3) times the stress induced in that part by the maximum load proposed to be used on the scaffold.

Outriggers.

For the installation of "L" hook. Each outrigger shall consist of two oregon planks, each not less than 6 inches x 2 inches, of a minimum length of 16 feet; they shall be fixed and loaded with a counter weight to the approval of the inspector. At all times when walls or parapets are less than 9 inches thick, and whenever considered necessary by the inspector when walls or parapets are not less than 9 inches thick, each outrigger shall be placed centrally on a plank 9 inches x 2 inches and 5 feet long, perpendicular to which shall be secured by three (3) $\frac{3}{4}$ -in. bolts a 6-in. x 2-in. plank to form an "L" section 9 inches x 8 inches. The vertical leg of the "L" is to bear against the side of the parapet or wall remote from the wire cables supporting the scaffolding.

A suitably shaped packing piece shall be inserted between the outriggers and the plank resting on top of the wall or parapet.

The "L" hook shall be bolted to outriggers by at least one (1) $\frac{3}{4}$ -in. bolt, and shall be held in position by a flexible steel wire at least $\frac{3}{4}$ -in. diameter, which shall in turn be bound to approval to the balance weight.

The steel flexible wire shall be lashed at intervals of not less than 3 feet by approved lashing rope to the outrigger.

The balance weights shall consist of sand or other approved material contained in jute bags fastened to approval to both the steel flexible wire rope and extreme inner end of outrigger.

The "L" hook shall consist of a wrought-iron or mild steel solid forging of approved design, and shall have a cross section of dimensions not less than $2\frac{1}{2}$ inches x $\frac{3}{4}$ inch. Each end of the hook shall be turned to form a complete eye. To the eye resting on top of the outrigger shall be attached the steel wire rope passing round the balance weight. The other eye of the "L" hook shall be attached by means of an improved shackle and bolts to the vertical steel wire rope supporting the machine.

Outriggers shall be spaced not more than 13 ft. 6 in. apart, and shall not project more than 2 feet from the point of support. Additional provision for chocks or chafing pieces shall be made as determined by the inspector.

Shackles.

Shackles shall consist of wrought-iron or mild steel not less than $1\frac{1}{2}$ inches x $\frac{3}{4}$ inch in cross section, and shall be of approved design. Not less than $\frac{3}{4}$ inch of metal shall be provided between side of shackle and nearest edge of bolt hole, nor less than $\frac{3}{4}$ inch of metal between the top or bottom of shackle and nearest edge of bolt hole.

Top and bottom bolts shall be not less than $\frac{3}{4}$ inch diameter.

Wire Cable.

Only flexible steel wire cables shall be used on the scaffolding, and shall have a breaking strength of not less than five (5) times the load to be put on them, and shall be at least $\frac{3}{4}$ -in. diameter of a brand approved by the inspector, and no cable shall be of a greater length than 100 feet. All spliced eyes shall be round thimbles and have not less than three full tucks.

All wire cables shall be kept in good condition and examined by the builder once every fourteen days.

When any cable shows signs of bunching, stranding, excessive wear, or breaking, it shall be at once discarded.

All wire cables shall be secured to winch drums and shackles to the satisfaction of the inspector.

Stirrups.

Stirrups shall be composed of wrought-iron or mild steel forgings with minimum dimensions of $1\frac{1}{2}$ inches x $\frac{3}{4}$ inch, bent to approved shape, to support side or longitudinal timbers carrying platform and secured to machine supports by two bolts, each not less than $\frac{3}{4}$ -in. diameter, spaced and secured to approval of inspector. All forgings to be solid; no welding of any description will be allowed.

Platform.

Platform shall be in one length, not exceeding 19 ft. 6 in. in length, and shall consist of side timbers composed of not less than 4 inches x 2 inches oregon. After nuts have been tightened up, ends of ties shall be burred so that nuts cannot be removed.

Ties shall be placed at both ends, and at least four other places between, evenly spaced. The recess in side timbers for housing the rungs shall not extend more than $\frac{3}{4}$ inch on either side of centre line of side timbers.

The platform shall consist of four planks of oregon, to be each not less than 6 inches x $\frac{3}{4}$ inch, in single pieces of full length of platform to rest on rungs and secured thereto to approval of the inspector.

The platform shall be secured to the stirrups to the approval of the inspector, and shall not project more than 3 feet beyond the stirrup nor less than 2 feet.

Where the platform is less than 19 ft. 6 in. in length the live load shall be carried between the machines and not on those portions of the platform projecting beyond the machines. All ties between scaffolding and structure to prevent movement of the platform shall be fixed to the approval of the inspector.

Machines.

Before any winch is used in connexion with any scaffolding light duty work, it shall be submitted for the approval of the inspector.

Machines shall be placed vertically below outriggers, and shall be spaced not more than 13 ft. 6 in. apart.

All pawls shall be provided with efficient locks to prevent pawls inadvertently getting out of engagement. All handles shall be kept in position with nuts, proper pins, or collars. On the outside and at each end of the platform a guard rail shall be affixed not less than 3 feet high and composed of timber of approved size, but not less than $2\frac{3}{4}$ inches x $1\frac{1}{2}$ inches, and fixed with suitable supports to the approval of the inspector.

On the outside and at each end of the platform a fender board shall be affixed, composed of timber of approved size, but not less than 4 inches x 1 inch.

A wire mesh netting shall also be affixed to the platform between the guard rail and fender board to the approval of the inspector.

No bolts shall be less than $\frac{3}{4}$ inch in diameter.

When not actually in use lowering or raising the platform the handle of the machine shall rest against the crossbar at the top of the winch, so that both pawls are in action at the same time when work is proceeding on the platform.

All overhead and other protection to workmen deemed necessary by the inspector shall be provided and fixed to his satisfaction.

No persons, other than those specifically empowered by their employer to do so, shall operate the machine.

Not more than two men shall work on the platform at any one time.
