State Electricity Commission Acts.
REGULATIONS RELATING TO ELECTRICAL
INSTALLATIONS.

At the Executive Council Chamber, Melbourne,
the eighteenth day of June, 1929.

PRESENT:

His Excellency the Lieutenant-Governor of Victoria.

Sir W. M. McPherson	Mr. Groves
Dr. Argyle	Mr. Macfarlan.
Mr. Cohen	Mr. Beardmore.
Mr. Pennington	

HIS Excellency the Lieutenant-Governor of the State of Victoria, by and with the advice of the Executive Council thereof, doth hereby make the following amendments, to come into force on the first day of August, 1929, to the Regulations which were made under section 17 of the *State Electricity Commission Act 1918*, and section 20 of the *State Electricity Commission Act 1920*, as amended by section 4 of the *State Electricity Commission Act 1921*, and which were approved by the Governor in Council on the twenty-sixth day of October, 1925, and published in the *Government Gazette* of the fourth day of November, 1925, pages 3001 and following, and were amended by Orders of the Governor in Council published in the *Government Gazette* of the twenty-second day of July, 1927, page 2247, the fourteenth day of September, 1927, page 2776, and the twenty-ninth day of August, 1928, page 2341, that is to say:—

That the following be substituted for sub-clauses (i) and (ii) of clause (d) of Regulation 1:—

Service Fuses.

Where placed within a building, service fuses shall in no case be fixed between the roof and ceiling, or in any other position difficult of access.

They shall not be fixed in a position where they are likely to be in close proximity to inflammable gas or material.

Service Fuses with Overhead Service Lines.

Where the supply is given from an overhead service line, unless the service fuses are placed on the nearest distribution pole, they shall be fixed on the outside of the consumer's building or premises as close as possible to the point of attachment of the service line, or, alternatively, at a point inside the premises not more than ten feet from the point of entry.

Service Fuses with Underground Service Cable.

Where the supply is given from an underground service cable, the service fuses, if fixed inside the building, shall be placed not more than ten feet from the point of entry to the building.

Consumer's Mains Protection, and Minimum Size of Cables.

Metal conduit must not be used for the protection of consumer's mains between the point of attachment of the overhead service line, or terminal box of underground service cable, and the service fuse or fuses.

The conductors forming such portions of the consumer's mains shall be supported and run in a manner satisfactory to the Supply Authority, and shall be V.I.R. insulated cables, or other approved cables, supported where not exposed to the weather by insulators, insulating tubes or racks, or enclosed in non-conducting pipes or ducts. Where so exposed, such cables shall be supported only on insulators of the watershed type.

Metal conduit enclosing consumer's mains shall not enter a building through a metal roof where this is otherwise avoidable, but where this mode of entry is unavoidable, the conduits shall be mechanically and electrically separated from the metal roof by some durable non-conducting material. All sections of metal conduits passing through, or in contact with, the metal of verandahs, must be connected to earth by a direct earthing conductor.

All cables used for consumer's mains shall be insulated cables of not less than 600 megohm grade.

Cables used for connecting the service line or underground service cable to the consumer's main switchboard shall be of sufficient capacity, as given by table in Appendix II., to carry the maximum current demand of the installation, but shall in no case be smaller than 7/036 (7/20 S.W.G.)

Except between the point of attachment of an overhead service line, or terminal box of an underground service cable, and the service fuses, if fixed on or within the building, such cables shall be run in steel conduit. Where exposed to the weather, class "B" conduit shall be used, and where supply

is given from an overhead service line, the conduit shall be set downwards at its exposed extremity, and there provided with—

- (1) A suitable bellmouth or other terminal fitting so arranged as to prevent the entry of rain into the conduit.
- (2) A device of durable non-hygroscopic insulating material fitted to the terminal fitting in such a manner that no contact between the conductors and the metal conduit or fitting can result from the abrasion of the insulation of the conductors at that point.

The cables immediately outside the above-mentioned terminal fitting shall be well separated from one another and arranged with effective drip loops.

If the distance between service fuses fitted on the outside of the consumer's building and the point of entry exceed two feet, the consumer's mains between such service fuses and the point of entry shall be fixed on watershed insulators or enclosed in screwed watertight metal conduit set downwards at the end proximate to the service fuses, and provided with a suitable terminal fitting and insulating device as described in the preceding paragraphs (1) and (2). All metal conduit used for protecting consumer's mains shall be efficiently connected to earth.

Provision for Supply Authority's Connexions.

Provision shall be left in the consumer's mains for the insertion by the Supply Authority of its meters, service fuses, or other apparatus, and ample wire shall be left for the Supply Authority to make its connexions at the consumer's terminals. The wiring from underground service cables to service fuses will be fixed by the Supply Authority.

That Regulation 9 be amended by substituting—

- (a) in the place of "In three-wire services" the words "Where three-wire services are given."
- (b) in the place of "In three-phase star-connected four-wire services" the words "Where the supply is given by a three-phase four-wire service."

Also, that the words "and that motors exceeding two horse-power must be three-phase only, and must be connected accordingly" be deleted from Regulation 9, and that in lieu thereof the following be inserted:—

"No motor exceeding two horse-power, other than a three-phase motor, shall be installed except with the written sanction of the Supply Authority."

That Regulation 11 be amended by adding at the end thereof:—

"In multi-circuit domestic installations, the service fuse or fuses installed by the Supply Authority may, if fixed at or in the consumer's premises, or on a pole adjacent thereto, and used solely for the one consumer, take the place of the main fuse or fuses referred to in this Regulation."

That Regulation 16 (a) be amended to read as follows:—

Arrangement of Supply Terminals Inside Premises.

Where the pressure between the outer conductors of a multiple wire system exceeds 250 volts, and the three or more wires of the system, or two or more pairs of wires, are brought into premises, the supply for pressure at 250 volts, or lower pressure, shall be given from two or more pairs of terminals, which shall be so arranged as to minimize as far as possible the danger of shock.

The wiring from these terminals, including that behind distribution boards, shall be kept distinct throughout in separate circuits, which may, except in the case of final sub-circuits, be bunched irrespective of their phase or polarity, if enclosed in steel conduits. Final sub-circuits for pressure at 250 volts or lower pressure shall not be bunched with wires of other phases or opposite polarity.

That the following Regulation be substituted for Regulation 25:—

Bathrooms and Situations where an Earth Connexion is Possible.

In bathrooms and other places where an earth connexion is possible, exposed metallic portions of all electrical apparatus shall be efficiently connected to earth. Plugs and bases shall be of mechanically strong insulating material, with socket contacts shielded, and shall be of the three-pin type, with one contact efficiently connected to earth. Plug sockets shall be fixed not less than one foot from the floor, and approved extra heavily insulated circuit flexible cable shall be used for connexion of all portable apparatus.

The covers and knobs of all wall switches which are used to control lighting points, continuous bath-heater elements, and power plugs, shall be made of mechanically strong insulating material. For other purposes, ironclad switches with all exposed metal efficiently earthed may be used. Where flexible drop lights are used, the lamp shall be at least eight feet from the floor. Bayonet-cap lamp-holders used in such situations shall be of the all-insulated pattern, or of such other approved type as precludes the possibility of any external metal portion becoming electrically charged. Edison screw, or similar lamp-holders, shall be of approved pattern.

Electric geysers and bath-heaters shall be permanently connected both to the electric service and to the water service, and a separate earth connecting cable shall be run from them to a suitable earthing point.

That the following Regulation be substituted for Regulation 38:—

Distinguishing Colours of Conductors.

In all installations on consumers' premises, rubber-covered wires and cables shall be coloured by impregnation on their outer surface, so that actives and neutrals are distinguishable—red or other distinctive colour being used for active, and black for neutral wires. In two-wire d.c. systems, red shall be used for positive and black for negative wires.

That the following be added to the end of Regulation 59:—

Wiring under roads, pavements, or tracks shall be executed as follows:—

Cab-tyre sheathed cable, lead-covered V.I.R., or paper-insulated cable, and such other cable as may hereafter be approved, enclosed in galvanized water pipe, shall be used, or, alternatively, steel-armoured lead-covered cable laid directly in the ground, but protected by a slab of durable hardwood timber at least one inch thick, may be used.

Such conductors shall be stranded cables, and shall be laid not less than one foot below footpaths, or two feet below roadways. No cable used for this purpose shall be smaller than 3/036 (3/20 S.W.G.).

That the following paragraphs be added at the end of Regulation 71:—

(m) Except where multiple-way switching is employed, if the position of the operating handle does not indicate whether a switch is on or off, switches shall be supplied with a special indicating device for this purpose.

In the case of tumbler switches, and if they are so erected that the tumbler knob is in the raised position when the switch is off, and in the depressed position when on, such shall be deemed to contain a sufficient indicating device within the meaning of this clause.

(n) Switch covers shall not be held in position by the switch operating knob unless this is spring-fitted so as to prevent the operation of the knob in either direction from releasing the cover.

That Regulation 120 be amended by the substitution of the following definition in place of clause (1):—

"Approved" means approved by the State Electricity Commission of Victoria, or, in the case of work by the officer appointed by the State Electricity Commission of Victoria for the purpose of giving or withholding approval of such work.

And by the insertion of the following definitions after clause (1):—

1. (a) "Consumer's terminals" means the end of the electric conductors situated upon any consumer's premises, and belonging to him, at which the supply of energy is delivered from the service line.

1. (b) "Service line" means any electric conductor or group of electric conductors through which energy may be supplied, or is intended to be supplied, by the undertakers to a consumer, either from any main or directly from the premises of the undertaker.

Dated this twenty-ninth day of May, 1929.

The common seal of the State Electricity Commission of Victoria was hereunto affixed in the presence of—

(SEAL) JOHN MONASH, Chairman.
F. W. CLEMENTS, Commissioner.
THOMAS R. LYLE, Commissioner.

And the Honorable Frank Groves, His Majesty's Minister in Charge of Electrical Undertakings for the State of Victoria, shall give the necessary directions herein accordingly.

TENDERS FOR THE SERVICE 1929-30, OR AS STATED.

GENERAL STORES.

TENDERS will be received until Eleven o'clock a.m. on Friday, 28th June, 1929, from persons willing to furnish the undermentioned articles, in such quantities as may be ordered by the Victorian Government, for supplies for the twelve months, commencing on 1st July, 1929:—

Schedule No.	Preliminary Deposit.
37. Electric Lamps and Fittings	£5

Security.—Ten per cent. on total amount of tender accepted, except where otherwise specified in the tender form, but in no case will security of less than £5 be received.

Schedules as above, with full particulars, may be obtained from the Secretary to the Tender Board, by whom also the samples will be shown and any information afforded to persons tendering.

If the tenderer is in a position to supply a suitable substitute of Commonwealth production or manufacture in place of the sample at the Tender Board Office he may tender for such substitute under column A in the schedule, but he must submit with his tender a sample of the article offered.

Preference will be given by the Tender Board, provided the quality of the articles offered is satisfactory, and the rates charged are considered reasonable—

- (a) to tenders for articles manufactured within the Commonwealth;
- (b) to tenders for articles manufactured within any other part of the British Empire.

In all cases the country of origin of the articles offered must be stated, and the total cost of each item extended in the columns provided.

Tenders must be accompanied by the preliminary deposit, as shown above, in a bank draft or bank cheque, in favour of the Secretary to the Tender Board. Cheques, Savings Bank deposit books, fixed deposit receipts, State or Commonwealth Treasury bonds or Government debentures, or references to securities on existing contracts will in no case be received or entertained as preliminary deposits. Preliminary deposits will be returned within ten days of acceptance of tenders to unsuccessful tenderers on their application.

The preliminary deposit required with each tender must be enclosed and the amount must be clearly written in and the designation stated, whether bank draft or bank cheque, as the case may be.

Security will be required, either in bank guarantee (bank to be approved by the Tender Board) Victorian or Commonwealth Government debentures, Savings Bank deposit book, or bank deposit receipt in favour of the Secretary to the Tender Board, or cash deposit, as the tenderer may elect.

The security must be completed and contract signed within five days of acceptance of the tender, failing which the contract may be again advertised, or another tender accepted.

The Government will not necessarily accept the lowest or any tender.

In the event of tenderers withdrawing their tenders before notification of acceptance of same, or failing to take up their accepted tenders within the prescribed period after notification of acceptance, the preliminary deposit will be forfeited, and, in addition, they may be disqualified from tendering or holding any future contracts for Government supplies for a period of twelve months, such disqualification to date from the notification of acceptance of tender. It is also stipulated that if a tenderer be a member of a firm and such firm be interested in the contract, then his tender is to be in the name of the firm and not in that of the individual; and that for a breach of this condition the preliminary deposit will be forfeited and the tender declared informal.

Tenders, enclosed in a separate envelope, and having the words "Tender for—" (as the case may be) written thereon, must be deposited in the Tender-box at the Pay Office, Treasury, Melbourne; or, if sent by post, postage must be prepaid, and the tenders addressed to the Chairman of the Tender Board, Pay Office, Treasury, Melbourne, which office they must reach by first post on the date of closing of tenders.

Conditions of Contract are those published under General Stores in the Victoria Government Gazette of 13th February, 1929, pages 848 and 849.

Treasurer.

Melbourne, 21st June, 1929.

A By-law of the Town of Sale, made under sections 197 and 599 of the *Local Government Act* 1915, and numbered twenty-nine, for regulating the supply and distribution of water from waterworks under the management of the Council, and making a rate for water supply purposes.

IN pursuance of the powers conferred by the *Local Government Act* 1915, and of all other powers thereunto them enabling, the Mayor, Councillors, and Burgesses of the Town of Sale order as follows:—

1. The By-laws of the Borough of Sale, respectively numbered 7, 17, and 22, shall be and the same are hereby repealed.

- (e) For every water trough supplied with water by the Council, the sum of Twenty shillings per annum, unless such water be supplied by measurement.
- (f) For every steam boiler supplied with water by the Council, the sum of Twelve shillings and sixpence per annum for each horse-power of such steam boiler.

- (k) Syphon pumps will not be allowed unless the water is supplied by measure.

3. A supply of water for domestic purposes shall not include a supply of water for livery or carrier's stables, or a supply for any manufacturing purpose, or for irrigation, or for water power, or for fountains, or for any ornamental purpose, and the supply of water for other than domestic purposes solely shall in all cases, save and except such as are hereinafter specially provided for, be by measure. The Council may supply any person with water for domestic, or for domestic and for other than domestic, purposes by measure, at such rates, upon such terms, and subject to such conditions as the Council and the person requiring such supply may agree to adapt.

4. The Council shall from time to time, after pipes have been laid for the supply of any street or part thereof, cause notice to be given in three consecutive numbers of one or more newspapers circulating in the Town of Sale, in the following form, or to the like effect:—

Notice to owners of tenements in _____ street, and the private streets, lanes, courts, and alleys opening thereto.—The main pipe in the said street being laid down, the owners of all tenements situated as above are hereby required, on or before the _____ day of _____ next, to cause a proper pipe and stop-cocks to be laid so as to supply water from the main pipe within such premises.

Town Clerk.

And the owner of each tenement referred to in such notice shall forthwith cause a proper pipe and stop-cocks to be laid so as to convey a supply of water within such tenement; and after four weeks from the last publication of such notice, the owner or occupier of such tenement shall, unless the Council refuse to supply such owner or occupier with water, be liable to pay the rates and charges for the supply of water as directed by this By-law, notwithstanding that no such pipe and stop-cocks be laid and that no such water is used in such tenement.

5. The rates and charges for water, and all sums due to the Council under this By-law, shall be paid by and be recoverable from the owner of the premises, or the occupier or person requiring, receiving, or using the supply of water.

6. Where several houses, or parts of houses in the separate occupation of several persons, are supplied by one common pipe, or where water is supplied to courts, alleys, and right-of-ways by standpipes, the several owners or occupiers of such houses or parts of houses, or of the several houses or parts of houses in every such court, alley, or right-of-way, shall be liable to the payment of the same rates for the supply of water as they would have been liable to if each of such several houses or parts of houses had been supplied with water from the works of the Council by a separate pipe.

7. The said rates and charges shall be payable in advance on the first day of April in each year (except in the case of water supplied by meter or by agreement, which shall be payable at such time or times as may be determined by the Council from time to time), and the first payment shall be made at the time when the owner or occupier shall become liable to pay the rates and charges for the supply of water as hereinbefore mentioned.

8. It shall not be compulsory on the Council to supply, or to continue to supply, any water to any person whomsoever.

9. The Council shall not be liable to any penalty or damages for not supplying water if the want of such supply arises from unavoidable cause or accident.

10. Every person who shall have agreed with the Council for a supply of water by measure shall, at his own expense, provide a meter and keep and maintain the same in good working condition to the satisfaction of the Council, and in the event of any repairs thereto being required, notice, in writing, shall be immediately given by such person to the Council. If any person who has provided any meter as aforesaid shall fail to give the notice hereinbefore mentioned of any repairs required for such meter, he shall forfeit a sum not exceeding Five pounds.

11. If any person who, under the provisions herein contained, ought to provide any meter, neglect or refuse after having been required by the Council so to do, to provide such meter, he shall for every day during which such neglect or refusal continues, forfeit a sum not exceeding One pound.

12. The Council may cause meters to be provided and fixed in any case where they may consider it necessary, at the expense of the consumer, who shall keep and maintain the same in good working order, and the water supplied shall be charged for at the rates and charges hereinbefore mentioned, or by special arrangement as the Council shall determine.

13. No meter shall be affixed unless the dial of the same shall be capable of registering One million gallons, and unless the same is approved in writing by the duly authorized officer of the Council. If any meter should cease registering, or be reported by the Waterworks Inspector as out of repair or registering inaccurately, the Council shall estimate and charge for the water consumed during the period such meter was not in working order, and until it shall have been repaired and refixed, either by taking an average of the quantity used during the previous half-year, or during the corresponding period of the previous year, or the Council may insert a check meter on the service pipe.

14. No person shall remove or alter the position of any meter when fixed without the written consent of the Council.

15. Every meter shall be placed according to the direction of the duly authorized officer of the Council, and so as to be open to inspection at all times, and as far as practicable in a situation where it cannot be affected by frost or injured by any other means, and shall be provided with means of access thereto. A meter shall not be connected with more than one separate and distinct inlet pipe leading from the service pipe or other pipe of the Council unless permitted by a memo., in writing, under the hand of the duly authorized officer of the Council. A meter shall not be continued to be used if it is found, on being tested by the Council's officer, to be inaccurate.

16. If any person refuse or delay to have such meter properly repaired and put in correct working order after having been required by any officer of the Council so to do, the Council may shut off the supply of water from the premises of such person, either by cutting the service pipe or otherwise, until such meter shall have been properly repaired and certified by some officer of the Council as being in proper working order.

17. If any plumber or other person fix or re-fix any meter upon any premises supplied with water by the Council without having first obtained a certificate from the Council that the said meter has been examined and found in correct working condition, he shall forfeit a sum not exceeding Ten pounds.

18. If any person remove or alter the position of, or in any way interfere with, any meter without giving such notice as aforesaid, he shall for each such offence forfeit a sum not exceeding Twenty pounds over and above the damage which he may be found liable to pay in any action at law at the suit of the Council.

19. Fire-plugs shall not be used except for the purpose of extinguishing fires, unless any other use of them be allowed, in writing, by the Council, and they shall at all times be under control of the officers of the Council.

20. Unless where water is charged for by meter, or unless where specially permitted by this By-law, no cock or tap with any connexion for attaching hose shall be affixed to any service pipe connexion or fitting without the written authority of the Council.

21. Unless where water is charged for by meter, no hose or pipe shall be applied to any pipes or taps or cocks affixed to any service pipe connexion or fitting for the purpose of watering the ground, or trees, or plants, or washing house walls, or vehicles, or animals, or for any similar purpose, without the written authority of the Council.

22. The Council may issue to any occupier of premises within the Town of Sale, subject to the payment of a water rate under this By-law, a garden licence, which shall permit such occupier to use water through a hose for gardening and cultivation purposes on the premises occupied by him or her, and the abutting footpath, between the following hours only, viz., 6 a.m. and 8 a.m., and 6 p.m. and 8 p.m. (except on an outbreak of fire, when use of water under this clause shall cease).

23. The Council may, for any reason which it shall in its absolute discretion deem sufficient, refuse to issue such licence to any such occupier.

24. The fee to be charged for each such garden licence shall be (in addition to the water rate payable in respect of the property) the following amount, viz., Seven shillings and sixpence.

25. Any such licence shall be for a period not exceeding twelve months, and shall, unless previously cancelled by the Council, terminate on the 30th day of September following the date of issue.

26. All such licences shall be subject to any restrictions as to supply of water for gardens which the Council may from time to time find it necessary or expedient to make.

27. Such licence shall be deemed to be the written authority of the Council, as required by section 20 hereof, and as to user between the hours hereinbefore set out, the written authority of the Council as required by section 21 hereof.

28. The Council may at any time for any reason which it in its absolute discretion shall deem sufficient, cancel any such licence, and may thereupon refund to the holder thereof the whole or such portion of the fee paid therefor as it shall deem proper.

29. Any person (excepting where water is supplied by measure, or where watering under the authority of a garden licence issued under section 22 hereof) watering any street or footpath by means of a hose, except under the direction of the officers of the Council, shall be liable to a penalty not exceeding Two pounds for each such offence.

30. Any person receiving water from the Council who shall take or carry away such water from his premises, or who shall allow any person to take or carry away such water, or who shall sell the same to any other person, shall be liable to a penalty not exceeding Five pounds.

31. Any person not having agreed to be supplied with water by the Council who shall take or carry away water from any drinking tap, water-trough, or private or public service pipe, shall be liable to a penalty not exceeding Five pounds.

32. Before any person shall affix any service pipe to any pipe of the Council, or alter, repair, or in any manner interfere with any pipe of the Council, or any service pipe, cock, or fitting connected with the pipes of the Council, he shall obtain from the Council a licence in that behalf to execute such works, and any unlicensed person affixing, altering, repairing, or in any manner interfering with any such pipe, service pipe, cock, or fitting as aforesaid, shall be liable to a penalty not exceeding Ten pounds.

33. Licences to affix and lay on, alter, or repair service pipes to tap mains and sub-mains, and to do and execute generally the plumbing and other work necessary for laying on and maintaining water services, may be granted to persons who shall satisfy the Council of their competency to perform such plumbing and other work upon payment of an annual fee of One pound.

34. It shall not be compulsory on the Council to grant a licence to every or any applicant who shall prove his competency.

35. In all and every case, a licensee shall be responsible for the acts, errors, and omissions of his employees, and the Council shall have the power to cancel the licence of any person at any time.

36. The Council may contract with any owner or occupier of any house, tenement, or land who is entitled to be supplied with water from its works, for the provision and laying of a service pipe from the pipes of the Council to the boundary, or to any other part of such land or tenement abutting upon the street or road in which are laid the pipes of the Council.

37. Any person, whether licensed as aforesaid or not, who shall offend by opening any ground so as to uncover any pipe or pipes the property of the Council without giving two days' notice to the Council of his intention so to do, or who shall in any way tamper with or alter any pipe the property of the Council without the permission, in writing, of the Council being first obtained, or who shall wilfully or carelessly break, injure, or open any lock, cock valve, pipe work, or engine, the property of the Council, shall be liable for each such offence to a penalty not exceeding Twenty pounds.

The occupier (if any), and if none the owner, shall in every instance in which any damage shall be caused by reason of such service pipes being leaky, or otherwise out of repair or broken, be liable to a penalty not exceeding Five pounds, and in the event of continuing the offence to a further penalty not exceeding Two pounds for each day such offence is continued after notice thereof from the Council.

43. 44. To prevent overflow, all water-troughs and cisterns must be fitted with approved self-acting taps, which shall be at all times maintained in good working order.

48. The officers of the Council may at all reasonable hours enter any house, tenement, or land to, through, or into which water is supplied by the Council, in order to inspect the meters, instruments, pipes, and apparatus for measuring, conveyance, reception, or storage of water, or for the purpose of ascertaining the quantity of water supplied or consumed, or examining if there be any waste or misuse of such water; and if any person hinders any such officer from entering or making such inspection or examination, the Council may turn off the water supplied by it from such house or other premises, and cease to supply the same with water until such inspection shall have been permitted and effected.

50. The following regulations shall be observed by all persons in connexion with the laying of services, &c.:-

1. The whole of the pipes, tees, bends, &c., shall be sound and free from all defects, and all ends of pipes, bends, &c., shall be properly threaded and capable of being screwed into thimbles, tees, &c. On surrender of licence to the Council, the Five pounds deposit, if not forfeited, shall be refunded.

4. No private services whatsoever shall be laid or extensions made by any licensed person unless he has ascertained at the Council's office that the person for whom such work is intended has received the consent of the proper officers of the Council to have such work executed.

5. Within twenty-four hours after the completion of each service, the licensed person by whom such service shall have been laid shall report at the office of the Council the completion of such service.

6. If at any time any such licensed person wilfully acts contrary to any of the provisions of this By-law, either by himself or his workmen, or refuses to communicate any needful and proper information required of him in regard to any work connected with the works of the Council done by him or his workmen, or under his superintendence or upon his responsibility, his name may be erased by the Council from their list of licensed plumbers.

7. Each licensed person shall be held solely responsible to the Council for such service pipes being laid and completed by him or his workmen in a sound, workmanlike, and durable manner, and maintained in that condition (sound and water-tight) for a period of three months after such service pipe has been completed.

8. Each licensed person shall be held responsible to the Council for any injury occasioned by him or his workmen to the streets, mains, or other property of the Town, or to private services already laid and connected with the Council's water supply, and full compensation for such injury, including cost of all repairs necessitated thereby, shall be paid by such licensed person to the Council within twenty-four hours of the time such injury was occasioned. REGULATIONS RELATING TO ELECTRICAL
INSTALLATIONS.

At the Executive Council Chamber, Melbourne,

PRESENT:

His Excellency the Lieutenant-Governor of Victoria.

Sir W. M. McPherson
Dr. Argyle
Mr. Cohen
Mr. Pennington

Mr. Groves
Mr. Macfarlan
Mr. Beardmore.

HIS Excellency the Lieutenant-Governor of the State of Victoria, by and with the advice of the Executive Council thereof, doth hereby make the following amendments, to come into force on the first day of August, 1929, to the Regulations which were made under section 17 of the *State Electricity Commission Act 1918*, and section 20 of the *State Electricity Commission Act 1920*, as amended by section 4 of the *State Electricity Commission Act 1921*, and which were approved by the Governor in Council on the twenty-sixth day of October, 1925, and published in the *Government Gazette* of the fourth day of November, 1925, pages 3001 and following, and were amended by Orders of the Governor in Council published in the *Government Gazettes* of the twenty-second day of July, 1927, page 2247, the fourteenth day of September, 1927, page 2776, and the twenty-ninth day of August, 1928, page 2341, that is to say:—

That the following be substituted for sub-clauses (i) and (ii) of clause (d) of Regulation 1:—

Service Fuses.

Where placed within a building, service fuses shall in no case be fixed between the roof and ceiling, or in any other position difficult of access.

They shall not be fixed in a position where they are likely to be in close proximity to inflammable gas or material.

Service Fuses with Overhead Service Lines.

Where the supply is given from an overhead service line, unless the service fuses are placed on the nearest distribution pole, they shall be fixed on the outside of the consumer's building or premises as close as possible to the point of attachment of the service line, or, alternatively, at a point inside the premises not more than ten feet from the point of entry.

Service Fuses with Underground Service Cable.

Where the supply is given from an underground service cable, the service fuses, if fixed inside the building, shall be placed not more than ten feet from the point of entry to the building.

Consumer's Mains Protection, and Minimum Size of Cables.

Metal conduit must not be used for the protection of consumer's mains between the point of attachment of the overhead service line, or terminal box of underground service cable, and the service fuse or fuses.

The conductors forming such portions of the consumer's mains shall be supported and run in a manner satisfactory to the Supply Authority, and shall be V.I.R. insulated cables, or other approved cables, supported where not exposed to the weather by insulators, insulating tubes or racks, or enclosed in non-conducting pipes or ducts. Where so exposed, such cables shall be supported only on insulators of the watershed type.

Metal conduit enclosing consumer's mains shall not enter a building through a metal roof where this is otherwise avoidable; but where this mode of entry is unavoidable, the conduits shall be mechanically and electrically separated from the metal roof by some durable non-conducting material. All sections of metal conduits passing through, or in contact with, the metal of verandahs, must be connected to earth by a direct earthing conductor.

All cables used for consumer's mains shall be insulated cables or not less than 600 megohm grade.

Cables used for connecting the service line or underground service cable to the consumer's main switchboard, shall be of sufficient capacity, as given by table in Appendix II., to carry the maximum current demand of the installation, but shall in no case be smaller than 7/036 (7/20 S.W.G.)

Except between the point of attachment of an overhead service line, or terminal box of an underground service cable; and the service fuses, if fixed on or within the building, such cables shall be run in steel conduit. Where exposed to the weather, class "B" conduit shall be used, and where supply

is given from an overhead service line, the conduit shall be set downwards at its exposed extremity, and there provided with—

- (1) A suitable bellmouth or other terminal fitting so arranged as to prevent the entry of rain into the conduit.
- (2) A device of durable non-hygroscopic insulating material fitted to the terminal fitting in such a manner that no contact between the conductors and the metal conduit or fitting can result from the abrasion of the insulation of the conductors at that point.

The cables immediately outside the above-mentioned terminal fitting shall be well separated from one another and arranged with effective drip loops.

If the distance between service fuses fitted on the outside of the consumer's building and the point of entry exceed two feet, the consumer's mains between such service fuses and the point of entry shall be fixed on watershed insulators or enclosed in screwed watertight metal conduit set downwards at the end proximate to the service fuses, and provided with a suitable terminal fitting and insulating device as described in the preceding paragraphs (1) and (2). All metal conduit used for protecting consumer's mains shall be efficiently connected to earth.

Provision for Supply Authority's Connexions.

Provision shall be left in the consumer's mains for the insertion by the Supply Authority of its meters, service fuses, or other apparatus, and ample wire shall be left for the Supply Authority to make its connexions at the consumer's terminals. The wiring from underground service cables to service fuses will be fixed by the Supply Authority.

That Regulation 9 be amended by substituting—

- (a) in the place of "In three-wire services" the words "Where three-wire services are given."
- (b) in the place of "In three-phase star-connected four-wire services" the words "Where the supply is given by a three-phase four-wire service."

Also, that the words "and that motors exceeding two horse-power must be three-phase only, and must be connected accordingly" be deleted from Regulation 9, and that in lieu thereof the following be inserted:—

"No motor exceeding two horse-power, other than a three-phase motor, shall be installed except with the written sanction of the Supply Authority."

That Regulation 11 be amended by adding at the end thereof:—

"In multi-circuit domestic installations, the service fuse or fuses installed by the Supply Authority may, if fixed at or in the consumer's premises, or on a pole adjacent thereto, and used solely for the one consumer, take the place of the main fuse or fuses referred to in this Regulation."

That Regulation 16 (a) be amended to read as follows:—

Arrangement of Supply Terminals Inside Premises.

Where the pressure between the outer conductors of a multiple wire system exceeds 250 volts, and the three or more wires of the system, or two or more pairs of wires, are brought into premises, the supply for pressure at 250 volts, or lower pressure, shall be given from two or more pairs of terminals, which shall be so arranged as to minimize as far as possible the danger of shock.

The wiring from these terminals, including that behind distribution boards, shall be kept distinct throughout in separate circuits, which may, except in the case of final sub-circuits, be bunched irrespective of their phase or polarity, if enclosed in steel conduits. Final sub-circuits for pressure at 250 volts or lower pressure shall not be bunched with wires of other phases or opposite polarity.

That the following Regulation be substituted for Regulation 25:—

Bathrooms and Situations where an Earth Connexion is Possible.

In bathrooms and other places where an earth connexion is possible, exposed metallic portions of all electrical apparatus, shall be efficiently connected to earth. Plugs and bases shall be of mechanically strong insulating material, with socket contacts shielded, and shall be of the three-pin type, with one contact efficiently connected to earth. Plug sockets shall be fixed not less than one foot from the floor, and approved extra heavily insulated circular flexible cable shall be used for connexion of all portable apparatus.

The covers and knobs of all wall switches which are used to control lighting points, continuous bath-heater elements, and power plugs, shall be made of mechanically strong insulating material. For other purposes, ironclad switches with all exposed metal efficiently earthed may be used. Where flexible drop lights are used, the lamp shall be at least eight feet from the floor. Bayonet-cap lamp-holders used in such situations shall be of the all-insulated pattern, or of such other approved type as precludes the possibility of any external metal portion becoming electrically charged. Edison screw, or similar lamp-holders, shall be of approved pattern.

Electric geysers and bath-heaters shall be permanently connected both to the electric service and to the water service, and a separate earth connecting cable shall be run from them to a suitable earthing point.

That the following Regulation be substituted for Regulation 38:—

Distinguishing Colours of Conductors.

In all installations on consumers' premises, rubber-covered wires and cables shall be coloured by impregnation on their outer surface, so that actives and neutrals are distinguishable and other distinctive colour being used for active, and black for neutral wires. In two-wire d.c. systems, red shall be used for positive and black for negative wires.

That the following be added to the end of Regulation 59:—

Wiring under roads, pavements, or tracks shall be executed as follows:—

Cab-tyre sheathed cable, lead-covered V.I.R., or paper-insulated cable, and such other cable as may hereafter be approved, enclosed in galvanized water pipe, shall be used, or, alternatively, steel-armoured lead-covered cable laid directly in the ground, but protected by a slab of durable hardwood timber at least one inch thick, may be used.

Such conductors shall be stranded cables, and shall be laid not less than one foot below footpaths, or two feet below roadways. No cable used for this purpose shall be smaller than 3/036 (3/20 S.W.G.).

That the following paragraphs be added at the end of Regulation 71:—

(m) Except where multiple-way switching is employed, if the position of the operating handle does not indicate whether a switch is on or off, switches shall be supplied with a special indicating device for this purpose.

In the case of tumbler switches, and if they are so erected that the tumbler knob is in the raised position when the switch is off, and in the depressed position when on, such shall be deemed to contain a sufficient indicating device within the meaning of this clause.

(n) Switch covers shall not be held in position by the switch operating knob unless this is spring-fitted so as to prevent the operation of the knob in either direction from releasing the cover.

That Regulation 120 be amended by the substitution of the following definition in place of clause (1):—

"Approved" means approved by the State Electricity Commission of Victoria, or, in the case of work by the officer appointed by the State Electricity Commission of Victoria for the purpose of giving or withholding approval of such work.

And by the insertion of the following additional definitions after clause (1):—

1. (a) "Consumer's terminals" means the ends of the electric conductors situated upon any consumer's premises, and belonging to him, at which the supply of energy is delivered from the service line.

1. (b) "Service line" means any electric conductor or group of electric conductors through which energy may be supplied, or is intended to be supplied, by the undertakers to a consumer, either from any main or directly from the premises of the undertaker.

Dated this twenty-ninth day of May, 1929.

The common seal of the State Electricity Commission of Victoria was hereunto affixed in the presence of—

THE "VICTORIA GOVERNMENT GAZETTE."

SUBSCRIPTIONS.—The Subscription, including Postage, is £1 10s. 4d. per annum, or 7s. 7d. per quarter, payable in advance.

Subscriptions are required to commence and terminate with a month.

A lesser period than three months cannot be subscribed for. Subscribers do not receive the Acts of Parliament with the *Gazette*.

ADVERTISEMENTS are charged at the rate of EIGHTPENCE per line throughout.

The title (£5 Reward, Dissolution of Partnership, &c.) forms one or more lines, as a heading.

On an average, eleven words make a line, but for the description of a brand consisting of more than one letter, &c., placed perpendicularly, thus B, each additional letter under B, the first is charged as a line.

Every signature must likewise be counted as a line.

The final words of a paragraph, though only portion of a line, must be counted as one line.

Signatures (in particular) and proper names must be written very plainly in the text; ONE SIDE ONLY of each slip of paper should be WRITTEN UPON.

ALL COMMUNICATIONS should be addressed to "The Government Printer, Melbourne."

ALL DOCUMENTS illegibly written will be returned unpublished, and, where brands occur unprovided for by the ordinary letters of the alphabet, a worded explanatory description must be furnished.

THE GOVERNMENT GAZETTE is published on WEDNESDAY EVENING in each week, and Notices for insertion will be received by the Government Printer at or before TWO p.m. at ordinary rates, and late advertisements between TWO p.m. and FIVE p.m., at double rates, on the day preceding the day of publication:

Single copies of the GOVERNMENT GAZETTE are Sixpence, posted Sevenpence, each.

No GAZETTES prior to January, 1908, in stock.

* * ALL PAYMENTS ARE REQUIRED IN ADVANCE. Remittances should be made by postal note, money order, or draft in favour of the Government Printer. Advertisements unaccompanied by a remittance sufficient to cover the cost of insertion will be returned unpublished.
