At the Executive Council Chamber, Melbourne, the twenty-seventh day of August, 1934.

PRESENT:

His Excellency the Governor of Victoria.

Sir Stanley Argyle,
Mr. Allan
Mr. Pennington

Mr. Chandler
Mr. Maltby.

IN pursuance of the powers conferred by the Transport Regulation Acts, His Excellency the Governor of Victoria, by and with the advice of the Executive Council thereof, and upon the recommendation of the Transport Regulation Board, doth hereby make the following Regulations (that is to say):—

Citation.

1. These Regulations may be cited as "Transport Regulations (General Conditions of Licence for Commercial Passenger Vehicles)," and shall apply throughout the State of Victoria to all licences issued in respect of Commercial Passenger Vehicles.

Interpretation.

2. In these Regulations unless inconsistent with the context or subject-matter—

"Examiner" means a person authorized, in writing, by the Board, either generally or in any particular case, to examine commercial passenger vehicles for the purpose of ascertaining their suitability or otherwise for the purposes for which they are used or intended to be used, and of determining whether or not they are in satisfactory mechanical condition.

"Inspector" means an inspector within the meaning of "Transport Regulations (General Regulations—No. 1)."

"Vehicle" means a licensed commercial passenger vehicle.

3. Every licence granted and issued by the Board relating to a vehicle shall be subject to the terms and conditions printed or written thereon, and to the observance of the following Regulations, which shall be deemed to be conditions of every such licence, that is to say:—

(i) The vehicle shall be maintained in all respects in a fit and serviceable condition for the purpose or purposes for which it is used, and in such condition as not to cause danger to any person on or in such vehicle, or to any person or property on or in the vicinity of any highway, and shall comply in all respects with all of the following requirements, and be maintained strictly in accordance therewith in a manner satisfactory to the Board, an inspector, or an examiner. Provided that wherever it is prescribed that a condition is to be established to the satisfaction of an inspector or an examiner, and a difference of opinion arises between such inspector or examiner and any owner, such owner may appeal to the Board against the determination of the inspector or examiner aforesaid, and may produce such technical or other evidence relating thereto as he may desire.

(a) *Chassis*.—The chassis and the body shall be so constructed that the overhang beyond the centre of the rear wheels shall not endanger the stability of the vehicle or the safety of the passengers conveyed thereon.

(b) *Springs*.—Springs must be properly hung, and be of a strength and flexibility satisfactory to the Board, an inspector, or an examiner. Except by the written consent of the Board, the use of cross springs on the vehicle shall not be permitted if such vehicle is licensed to carry more than twelve persons.

(c) *Body*.—The body of the vehicle shall be constructed in a sound and workmanlike manner so as to afford proper protection to passengers under all conditions of weather, and shall be painted, varnished, or otherwise finished, both internally and externally, so as to have a presentable appearance.

(d) *Doors*.—If the vehicle is provided with only one entrance or exit situated in the fore-part of the vehicle, suitable means additional thereto shall be provided in the portion of the body situated at the rear of the centre line of the vehicle to allow passengers ready means of exit in case of emergency. Such emergency provision shall be subject to the approval of the Board, an inspector,

or an examiner. Every means of access to or exit from the vehicle shall have an effective width of not less than twenty-two inches, and be of adequate height.

(e) *Seats*.—On every seat a width of at least sixteen inches measured in a straight line, with a depth of not less than fourteen inches shall be allowed for each passenger, and all seats shall be fit, proper, and convenient for use. When cross or garden seats are used in a vehicle, they shall be at least twenty-six inches clear from the inside back of one seat to the back of the seat in front, so that there shall be comfortable room for the knees of the passengers, and shall be fitted so as to provide a passage-way not less than fifteen inches wide down the centre of the vehicle from front to rear which shall at all times whilst the vehicle is in use be kept clear of any obstruction. When seats are placed lengthwise in the vehicle the width between seat backs shall be not less than fifty-six inches.

(f) *Steps*.—Steps shall be safe and convenient, shall not project beyond the side of the vehicle, and the lowest step shall not be more than sixteen inches, nor less than ten inches, above the ground. When considered necessary by the Board, an inspector, or an examiner, suitable and efficient hand rails or other fittings shall be provided to assist passengers entering or leaving the vehicle.

(g) *Windows*.—The vehicle shall be fitted with glass side windows or screens approved by the Board, an inspector, or an examiner, and at least one-half of the total number of such windows or screens shall be capable of being raised or lowered or otherwise readily opened or closed.

(h) *Ventilation*.—Where, in the opinion of the Board, an inspector, or an examiner, ventilation is necessary, efficient means therefor shall be provided otherwise than by the ordinary windows. Separate small ventilating windows shall be permitted if suitable provision is made for regulating the extent of the opening so as to prevent unnecessary draught.

(i) *Lighting*.—The interior of the vehicle shall be suitably lighted to the satisfaction of the Board, an inspector, or an examiner.

(j) *Noise and Vibration*.—The mechanism and all parts of the vehicle shall be so constructed and maintained that no undue noise or vibration arises while such vehicle is in use. The use of exhaust silencer "cut-outs" is forbidden.

(k) *Fire Extinguishers*.—Suitable and approved appliances for extinguishing fire shall be carried in such a position as to be readily available for use, and shall always be effectively maintained to the satisfaction of the Board, an inspector, or an examiner. If the vehicle is licensed to carry not more than eight passengers it shall be a sufficient compliance with this regulation if two extinguishers of approved type of one pint capacity, or one such extinguisher of one quart capacity is carried. If the vehicle is licensed to carry more than eight passengers two extinguishers of approved type of one quart capacity shall be carried.

(l) *Fuel Tanks*.—Tanks for petrol or other liquid fuel shall be made of suitable material, properly constructed and of a strength sufficient for the requirements of ordinary use, and shall be so placed that any overflow will not fall upon woodwork or accumulate where it might be readily ignited. The filling nozzle of inlet for the petrol or other liquid fuel shall be brought to the outside of the body of the vehicle, and be properly guarded by gauze or other means to limit the possibility of accidental ignition. When a gravity feed fuel system is employed the same shall be provided with a cock and tap readily accessible from the driving seat to enable the supply of petrol to be shut off.

(m) *Fuel*.—No petrol or other volatile liquid fuel shall be placed in the fuel tank whilst any passengers are in the vehicle nor shall the same be carried on the vehicle except in such fuel tank or the fuel supply system with which such vehicle is equipped; save and except in the case of a touring omnibus,

- when a reserve supply of petrol, not exceeding four gallons, may be carried outside the body of the vehicle in two containers of suitable kind, the capacity of each of which shall not exceed two gallons.
- (n) *Exhaust Pipes.*—The exhaust pipe and connections therewith shall be fixed and maintained in such a position that oil or any vaporizable or inflammable substance is not likely to be dropped upon it, and so that, as far as practicable, exhaust vapours shall not enter the vehicle.
- (o) *Wiring.*—All wires carrying electric current shall be properly insulated and protected from injury, and so placed as not to be a source of danger.
- (p) *Heat.*—Effective means shall be adopted for preventing the heat of the motor, generator, or exhaust pipe connections from injuriously affecting any parts of the vehicle, or causing discomfort to passengers.
- (q) *Signals.*—When required by the Board, an inspector, or an examiner, the vehicle shall be fitted with means approved by the Board of enabling passengers to signal to the driver or the conductor.
- (r) *Warning Horns.*—The horn or other means of giving warning of its approach required by the Motor Car Acts to be carried on the vehicle shall be fixed within easy reach of the driver whilst he is using his seat.
- (s) *Tyres.*—The use of any tyres other than pneumatic tyres is prohibited, and all tyres shall be of a type or kind satisfactory to the Board, an inspector, or an examiner, and shall at all times be maintained in such condition as to be free from any defect which might in any way cause damage to the surface of the road, or danger to persons on or in the vehicle, or on or in the vicinity of the highway.
- (t) *Brakes.*—The vehicle shall be fitted with a braking system which shall consist of a service brake operated by a pedal, and there shall be fitted to the vehicle a second brake for the purpose of emergency and/or holding the vehicle stationary under all conditions and such second brake shall be operated by a hand lever, and the braking equipment shall be so constructed that when one brake is applied independently, notwithstanding that the other brake is defective, the brake so applied shall be, in the opinion of the Board, an inspector, or an examiner, effective for stopping the vehicle within a reasonable distance and the emergency brake shall also be capable of holding the vehicle stationary if the driver quits his seat. When hydraulic or air brakes are employed there shall also be a brake mechanically operated by other means.
- (u) *Steering Gear.*—The steering wheel shall not be fitted upon the left or rear side of the vehicle. The steering arms and connections thereof shall be of ample strength and, as far as possible, protected from damage. Such steering arms shall be unpainted, and kept in a clean condition, so that any defect which may develop may be readily detected upon visual inspection. Where reverse ball joints are incorporated in the steering system a safety cover or guard of sufficient strength shall be provided to prevent the accidental dropping of an arm.
- (v) *Nuts and Bolts.*—All brake and steering connections secured with bolts or pins must have such bolts threaded and fitted with nuts, which shall be locked and pinned. All other parts of the vehicle connected by bolts or studs and nuts which may be subject to severe vibration shall be fastened by lock nuts, castellated nuts and pins, or by nuts and springs or lock nut washers approved by the Board to prevent their working loose.
- (w) *Tail Shaft.*—The tail shaft of the vehicle shall be provided with a safety strap or housing, so that the forward end of the tail shaft, if detached from its normal position, cannot fall to the ground.
- (x) *Advertisements.*—No advertising matter of any description shall be permitted to be displayed on the outside of any vehicle, except that indicating the route and destination of such vehicle and the number of passengers which such vehicle is licensed to carry.
- (ii) No alteration in the construction or mechanical equipment of the vehicle shall be made without the written authority of the Board.
- (iii) No trailer shall be used in connection with the vehicle upon any public highway unless a certificate has been issued by the Board authorizing such trailer to be attached to such vehicle.
- (iv) Except with the written consent of the Board, the vehicle shall not be used for the conveyance of goods other than the personal luggage of passengers then being carried thereon, nor for the carriage of passengers, except for hire and reward at separate and distinct fares for each passenger.
- (v) The vehicle shall not be driven by any person who is not in possession of a certificate issued by the Board authorizing him to drive a commercial passenger vehicle.
- (vi) If there is endorsed on the licence relating to the vehicle the words "quarterly examinations required" it shall then be obligatory upon the holder of the licence relating to the vehicle, at the end of three calendar months from the date of issue of such licence, and at the end of every period of three calendar months thereafter, to present such vehicle to an examiner for examination at such time and place as the Board, by notice in writing, either generally or in any particular case, determines. Such vehicle shall not be used for the purposes set out in the licence relating thereto unless and until there is obtained and forwarded to the Secretary to the Board a certificate of fitness in the form, or to the effect of the form, contained in the first schedule hereto, which shall be effective for the next ensuing period of three calendar months and no longer.
- (vii) The provisions of section 39 of the *Transport Regulation Act 1933*, relating to the limitation of hours of driving, and of any determination of a Wages Board or Court of Industrial Appeals under the *Factories and Shops Acts*, or of any award of the Commonwealth Court of Conciliation and Arbitration, or of any industrial agreement entered into under the provisions of any Commonwealth Act relating to the wages to be paid to and the conditions of labour of drivers of such vehicles, shall be duly observed in relation to the vehicle.
- (viii) A time-book in the form, or to the effect of the form, contained in the first schedule hereto, or a combination of time-books to the like effect shall be kept in respect of the vehicle, and the hours at which the driver or drivers and other persons employed on such vehicle commence and end work on any day, and also the periods for which such driver, or drivers, and other persons cease work for the purpose of rest and refreshment shall be entered therein from day to day by the driver or drivers or other persons aforesaid. At the end of each week the amount of wages paid in each case in respect of that week shall also be recorded therein in the place provided for that purpose.
- (ix) When the vehicle is driven by the owner thereof a time-book as aforesaid shall be kept by such owner, who shall enter therein from day to day the times and places at which he commenced and finished work on any day, and also the periods during which he ceased work for the purposes of rest and refreshment.
- (x) Where the vehicle is being driven on a journey of more than twenty-five miles from the place of business of the owner, or from the place from which such vehicle usually operates, a time-card in the form, or to the effect of the form, contained in the first schedule hereto, or a combination of time-cards to the like effect, shall be carried by the driver or any person employed on such vehicle during such journey, and such driver or other person shall enter thereon the times and places at which work are respectively commenced and ended by the persons employed in connection with such journey, together with the periods during which they ceased work for the purposes of rest and refreshment. Each such time-card shall be made available for examination by an inspector at any time or times during the journey, on the completion of which the same shall be handed to the owner, or some person on his behalf, who shall transcribe the records therein appearing to the time-book referred to in Regulation No. (viii) hereof. All time-cards aforesaid shall be retained in the possession of the owner of the vehicle, and be available for inspection at any reasonable time or times during a period of six months next ensuing upon the completion of the journey to which they refer.

- (xi) Where the vehicle is operating on a route or routes, or in an area situate in any such case partly in Victoria and partly in another State, correct and complete records of the hours worked by any driver or drivers, or other person or persons, employed on such vehicle, and the wages paid thereto during the time such vehicle was operating both inside and outside the State of Victoria shall be made on the time-card, and transcribed to the time-book as aforesaid.
