GENERAL REGULATIONS.

Division 1.—Applications for Consents, &c.

Section 1. Application for the Authority's consent to connect with the sewerage system, or to do plumbing and drainage work connected therewith, must be made in writing by the owner of the property to be so connected, or by his authorized agent.

Section 2. Such application shall give the precise location of the property, the name of the owner, and the name of the person employed to do the work, and shall be in the form prescribed by the Authority. For any wilful misrepresentation in such application the owner or authorized agent as aforesaid shall be guilty of an offence against this By-law. No consent given by the Authority shall be deemed to authorize anything not stated in the application, nor to confer or grant the right to lay a drain through any land intervening between the sewer of the Authority and the land proposed to be connected, and every owner or agent applying for the Authority's consent shall satisfy himself as to his legal right to drain through such intervening land, as he shall be solely responsible for any trespass or damage thereon or thereto.

Section 3. Consents to make connexions with the sewerage system will be issued only when the plumbing and draining in the property to be connected is planned to be made in accordance with the rules for plumbing and draining hereinafter prescribed, and after such plan has been inspected and approved of by the responsible officer appointed by the Authority for the purpose, or, in the case of new buildings, when a proper plan of the plumbing and of the drainage of the building into the branch, of which the Authority shall have fixed the position, has been approved of in writing by the Authority. All connexions with drains or sewers, and all plumbing and drainage connexions therewith, shall be made under the direction of the responsible officer of the Authority. Consent will not be given for the performance of any such work except upon condition that no person shall be engaged or employed as a workman in the actual performance of any plumbing or drainage work unless he be the holder of a licence issued by the Authority to do such work. Any person who shall at any time or at any place make up, form, affix, alter, or repair any fitting, pipe, bend, trap, or other thing connected or intended to be connected with the Authority's sewerage system, unless he be the holder of a licence from the Authority authorizing him to do such work, shall be liable to a penalty not exceeding Ten pounds. Any person, whether licensed as aforesaid or not, who shall alter, remove, or in any way interfere with any drain, fitting, pipe, bend, trap, or other thing connected with the Authority's sewerage system, unless the Authority's written consent has been previously issued to do such work at the premises concerned, shall be liable to a penalty not exceeding Ten pounds.

Section 4. Where the sanction, permission, authority, consent, approval, satisfaction, order, direction, opinion, indication, or notice of or from the Authority is necessary, whether specified in writing or otherwise, with regard to any act, matter, or thing mentioned in the By-law, the same may be given by and under the hand of the chairman of the Authority, or of the responsible officer, personally or through an inspecting officer appointed under him, who severally shall be competent to give the same and authorized on behalf of the Authority, to prescribe any conditions attaching thereto, and subject to and in accordance with which only the same shall be deemed to have been given.

Section 5. In any case in which the Authority shall be of the opinion that a compliance with any of the provisions of this By-law would in any particular case be vexatious or be needless in the interest of public health, it shall be lawful for the Authority, by resolution, to dispense with or forbid such compliance in whole or in part as it shall think fit, or to authorize or direct such a modification or alteration of such provisions as shall, in its opinion, most nearly adapt the principle of those provisions to the particular case. It

shall be unlawful to comply with any provision, or part of any provision, of which compliance shall have been forbidden, or to act contrary to or otherwise than as directed by such modification or alteration.

Division 2.—Penalties, Recovery of Cost of Work, &c.

Section 6. Where anything is by this By-law directed to be done, or forbidden to be done, or where any authority is given to the Authority or any of its officers to direct or to forbid anything to be done, and such act so directed to be done remains undone, or such act so forbidden to be done is done, then, and in every such case, the person making default as to the said direction or prohibition respectively shall be guilty of an offence against this By-law.

Section 7. Every person guilty of an offence against this By-law, not otherwise specially provided for by or under the authority hereof, shall be liable for every such offence, besides any costs or expenses which may be incurred in the taking of proceedings against such person guilty of such offence, as well as any costs or expenses which may be incurred in remedying such default, as particularly provided for in this By-law or the Acts, to a penalty not exceeding Ten pounds, and to a further penalty of One pound for each day during which such offence is continued by such person after notice of the offence shall have been given by the Authority to him; and such penalty shall be recoverable, notwithstanding that the Authority may not have chosen to exercise any power given to it by the Acts or by this By-law to remedy such default.

Division 3.—House Drainage Plans—Alterations.

Section 8. Copies of the Authority's plans of individual house drainage will be furnished by the Authority upon application and payment for the same, as follows:—

- (a) Plan of drainage, including surveys, &c., for every house, shop, factory, or other building—a minimum charge of 10s., plus 2s. 6d. for each fitting as specified.
- (b) For the supply of a block plan, where the owner desires to design his own house drainage—a fee of Two shillings and sixpence shall be charged.
- (c) For making or examining any alterations or additions to a plan previously issued or approved of by the Authority—a minimum charge of Five shillings shall be made by the Authority.
- (d) For the examination of owner's plan of drainage—a minimum charge of Seven shillings and sixpence shall be made.
- (e) For the inspection and testing of house connexions—a minimum fee of Twenty shillings, plus a further fee of Two shillings and sixpence for each fixture.
- (f) For all other work, a fee equal to the amount incurred in respect to such work.

Consent for additions and/or amendments to approved plans or to works previously approved will be made only on the application of the owner or his authorized agent.

Division 4.—Maintenance and Defective Work.

Section 9. Any drain pipe, soil pipe, trap, water closet, urinal, sink, or other fitting laid, used, or constructed otherwise than in accordance with this By-law, or which shall in the opinion of the Authority be or become bad or of defective quality, shall, upon notice in writing from the Authority to the owner or occupier of the property, be by such owner or occupier removed or repaired in the manner determined and within the time fixed by the Authority; and in case such owner or occupier fails to comply with the requirements of the notice, he shall be liable to prosecution and penalty for an offence against the Acts, or the Authority will, if it thinks fit, remove or repair the said defective fitting and charge such owner or occupier of the premises with the cost so incurred, and will proceed for recovery of the same in a manner provided by the said Acts.

Division 5.—Licences.

Section 10. No person shall tender for or enter into any contract for or undertake any plumbing work relating to sewerage within the Kerang Sewerage District or connected or to be connected with the sewers of the Authority who does not hold either a master plumber's or a working plumber's licence issued by the Authority.

Section 11. No person shall tender for or enter into any contract for or undertake any draining work relating to sewerage within the Kerang Sewerage District, or connected or to be connected to the sewers of the Authority who does not hold either a master plumber's or a working plumber's licence, or a drainer's licence issued by the Authority.

Section 12. No person other than a holder of a working plumber's licence issued by the Authority shall actually do or perform any such plumbing work.

Section 13. No person other than the holder of a working plumber's or a drainer's licence issued by the Authority shall actually do or perform any such draining work.

Section 14. At the discretion of the Authority, a master plumber's licence may be granted to any master plumber or master builder, building contractor, or other person, firm, or corporation who is approved by the Authority, but such licence will only entitle the holder to tender for or enter into contracts for or otherwise undertake plumbing and drainage work under these By-laws, but shall not entitle the holder to personally do any actual plumbing or drainage work under these By-laws.

Section 15. Holders of master plumber's licences not themselves licensed working plumbers or licensed drainers must continuously employ on all and every plumbing work carried out by them under these By-laws licensed working plumbers, and on all and every drainage work, licensed drainers.

Section 16. Working plumber's licences will be issued at the discretion of the Authority to persons who hold and produce to the Authority a certificate of competency issued by the Sanitary Plumbers' Examination Board of Victoria. Such licence will permit the holder to do practical work as a working plumber upon all fittings, appliances, and apparatus connected or to be connected with the sewers of the Authority, subject to and in accordance with the Authority's By-laws and Regulations.

Section 17. Drainer's licences will be issued to any person who shall satisfy the Authority by passing an examination by examiners appointed by them or in such other manner as the Authority from time to time or in any particular case may direct that he has a thorough knowledge of the following subjects:—

Candidates must provide themselves with their own tools and materials, and pay a fee of 10s. for each examination.

Section 24. *Conditions of Discharge.*—No person shall discharge any trade or manufacturing liquid, refuse, or waste into any sewer, unless and until the following conditions are complied with:—

- (a) Application for permission to discharge any such trade wastes shall be made in writing and accompanied by plans and specifications of the work to be done and of the apparatus to be used, and shall include such details concerning the nature of the waste and the quantity and rates of discharge of the proposed effluent as considered necessary by the responsible officer of the Authority.
- (b) The permission of the Authority in writing shall be obtained and an agreement containing a covenant to comply with the By-law and with any further stipulations required by the Authority shall be executed.
- (c) The volume of liquid refuse or waste discharged shall, if ordered, be measured and determined by meter or by some other approved means of measurement. The maximum aggregate daily quantity of effluent which may pass from any trade premises into a sewer, the maximum permissible rate of such discharge, the size and capacity of the drain for conveying such effluent from the trade premises to the sewer, and the hours during which such flow will be permitted, shall be determined by the Authority.
- (d) All such liquid refuse or waste shall be passed through such settling, screening, and/or neutralizing chambers and/or such other appliances and/or otherwise treated as ordered or approved by the Authority to ensure that the resulting effluents shall comply with the conditions of the agreement.
- (e) Every settling, screening, neutralizing, or other chamber, appliance, or apparatus for the treatment of trade wastes in accordance with this By-law shall be cleansed and maintained by the occupier at his own expense and at such intervals as may be considered necessary by the Authority or its responsible officer to ensure the efficient operation of such chamber, appliance, or apparatus, and in no case shall such chamber, appliance, or apparatus be altered without the approval in writing of the Authority first obtained.

Division 10.—Sub-soil Water.

Section 25. The discharge of sub-soil water into sewers shall be prohibited except by permission of, and under conditions approved by, the Authority.

Division 11.—Inspection Tests.

Section 26. *Notice.*—The owner or his authorized agent, or the plumber, drainer, or contractor shall give at least forty-eight hours' notice to the Authority, in writing, of his intention to commence work and of work ready for inspection. All work shall be left uncovered and accessible for examination until inspected and approved. Inspection shall be made within twenty-four hours of the receipt of such notification except when the notification is received on a Saturday, when seventy-two hours shall be allowed.

The contractor carrying out any work shall, within seven days of the completion of such work, file in the office of the Authority, on forms furnished for this purpose, a correct statement of the work done and the cost thereof. Such statement shall be countersigned by the responsible officer of the Authority, and a certificate embodying such statement shall be forwarded to the contractor.

Section 27. *Inspection.*—All drains, wastes, fittings, joints, fixtures, &c., will be inspected by the responsible officer of the Authority to ensure compliance with the By-law and approved plan.

Section 28. *Tests.*—Drains, whether laid by the Authority's workmen or others, must be thoroughly tested in every case before being passed by the Authority's officers. The responsible officer of the Authority may require the application of the water or smoke test, or such other tests as he may order or approve.

Section 29. *Water Test.*—The water test may be applied to the drainage and/or plumbing systems and their fittings in their entirety or in sections. It shall be applied by hermetically sealing all openings below the top of the section to be tested. The system shall then be filled with water to a height of 6 feet above the highest point of the section, or, if considered necessary, to such additional height as the responsible officer may order, and every joint carefully examined for leaks.

Section 30. *Smoke Test*.—The smoke test shall be applied by hermetically sealing all openings into the section to be tested, and forcing into the system thick smoke to a pressure equivalent to 1 inch of water, by means of a smoke test apparatus. Every joint shall then be carefully examined for leaks.

Section 31. *Equipment, &c.*—The equipment, material, power, and labour necessary for the inspection and tests shall be furnished by the contractor, plumber, or drainer.

Section 32. *Defective Work*.—Any drain, pipe, fixture, fitting, &c., which is laid, used, or constructed otherwise than in accordance with this By-law or with the approved plans, or which, in the opinion of the responsible officer of the Authority, is or has become bad or of defective quality or condition, shall, upon notice, in writing, to the owner or occupier of the property, or his authorized agent, be removed and/or repaired by such owner or occupier in the manner determined, and within the time fixed by the Authority. In case the owner or occupier fails to comply with the requirements of that notice he shall be guilty of an offence against this By-law, and the Authority may, if it so think fit, remove and/or repair the defective drain, pipe, fixture, fitting, &c., and charge the said owner or occupier with the cost so incurred, and may proceed for the recovery of the said cost in the manner provided.

Section 33. *Maintenance*.—Every person holding a licence from the Authority who shall execute any work in connexion with sewerage drainage and/or sanitary plumbing shall, when so directed by the Authority, make good at his own expense any defect found within three months of date of completion of any such work due, in the opinion of the Authority, to bad workmanship or defective material.

Division 12.—Materials and Workmanship.

Section 34. *Materials*.—All materials, pipes, bends, junctions, fittings, fixtures, and apparatus shall be of the best of their respective kinds, sound and free from defects, and shall comply with such Australian standard specifications as apply and are accepted by the Authority; otherwise to be approved by the Authority.

Section 35. *Testing*.—All materials, pipes, bends, junctions, fittings, fixtures, and apparatus shall be submitted for examination and/or test, and shall not be placed in position until passed and stamped by the Authority. Such testing of materials shall be paid for by the person submitting same, whether passed or rejected, and shall be done at such time and place, and at such rates, as may from time to time be fixed by the Authority.

Section 36. *Workmanship*.—All work shall be executed in a thorough and workmanlike manner, and to the satisfaction of the Authority.

Section 37. *Precautions*.—Adequate precautions shall be adopted by the person carrying out the work to prevent injury to workmen, property, or public, and the Authority will accept no responsibility for claims for injury arising from the inadequacy of such precautions.

Section 38. *Concrete*.—Concrete, unless otherwise ordered, shall consist of one part Portland cement, two parts clean sharp sand, and four parts hard metal, shingle, or gravel not exceeding $\frac{3}{4}$ -in. gauge, and shall be thoroughly mixed with clean water to such consistency as ordered or approved by the responsible officer of the Authority.

Section 39. *Cement Mortar*.—Cement mortar, unless otherwise ordered, shall consist of one part Portland cement and two parts clean sharp sand, properly mixed with an approved proportion of clean water.

PART 3.

DRAINAGE.

Division 13.—Drainage, General.

Section 40. (1) Every premises shall be separately drained unless a combined drain shall have been ordered or approved by the Authority. Owners desiring to have the drainage of their properties combined must sign a request for a combined drain, and obtain the approval of the Authority. In any case in which it appears to the Authority that any properties may be drained more advantageously in combination than separately the Authority may order that those properties be drained by a combined operation.

(2) In any case where a combined drain serves two or more properties the Authority, with the consent of the owners of the properties served by such combined drain, may take over such combined drain, and thereafter such combined drain shall be and remain a sewer of the Authority.

(3) In every case of a combined drain the Authority will determine, as between the respective owners and occupiers of the properties drained thereby, the proportions in which the cost of such combined drain shall be paid. In every case of the occurrence of an obstruction in a combined drain the Authority will also determine by whom and in what proportion the cost of removing such obstruction shall be paid.

(4) Owners and occupiers of premises are responsible for clearing stoppages in drains within their premises, or between their premises and the sewers into which the branches lead, but must employ only licensed working plumbers or drainers to clear same.

(5) Before a licensed working plumber or drainer commences to clear a stoppage in a drain he must notify the Authority in writing of the time when he intends to clear the stoppage, so that the Authority's proper officer may attend and pass the work in accordance with the provisions of the Act.

Section 41. *Size of Drains*.—Every drain shall be of adequate size for the drainage of the property to be served, in accordance with the requirements of section 84, with a minimum diameter of 4 inches.

Section 42. *Materials*.—All drain pipes, bends, junctions, and fittings used shall be of glazed stoneware, concrete, cast-iron, or other approved material, provided that the responsible officer of the Authority may prohibit the use of any of the above-mentioned where the circumstances or conditions are considered unfavorable.

Section 43. *Cast-iron Pipes*.—Cast-iron drainage pipes and their fittings shall comply with the Australian standard specification, or, in the event of no such standard being in existence, with the standard approved by the Authority for cast-iron water pipes and their fittings of similar diameters.

Section 44. *Interceptor Traps*.—Where directed by the Authority, an interceptor trap shall be fixed in the drain laid from any property to the sewer. Such trap shall be fixed as near as practicable to the boundary, and wherever practicable shall be within the boundaries of the property. The interceptor trap shall be provided with an inspection cap on the sewer side of the trap. If ordered, an approved manhole shall be provided for the trap.

Section 45. *Inspection Chambers*.—All drains shall, wherever considered necessary by the Authority, join in an inspection chamber at least 3 feet long by 2 feet wide, fitted with a closed cover. The portions of the drains crossing the floor of the inspection chamber shall be connected either in a straight line or by curved junctions in the floor of the chamber.

Section 46. *Inspection Openings*.—Every line of drain shall be provided with an inspection opening—at each junction not provided with an inspection chamber, at each change of direction, at each fixture, and in no case at greater than 30-ft. intervals, and in paved areas these shall, if considered necessary by the responsible officer of the Authority, be brought to the surface and furnished with approved airtight covers. The area of an inspection opening shall be not less than the area of the drain.

Section 47. *Drain Openings Not in Use*.—The ends of all house drains not immediately connected with the plumbing fixtures and all inspection openings shall be securely closed with watertight imperishable materials.

Section 48. *Replacing or Inserting Pipes*.—Where it becomes necessary to remove a pipe to clear a stoppage or to insert a pipe or branch in an existing drain, such pipe so removed shall be replaced by an inspection pipe or inspection junction of the same length by one of the following methods:—

- (a) The top half of the socket of the new pipe and of the existing downstream pipe may be removed, but the bottom half shall in each case be left intact and the joints surrounded with concrete.
- (b) An approved split pipe with double collar surrounded with concrete may be used.
- (c) A length of not less than three pipes may be removed, the centre pipe replaced by an inspection pipe, and the pipes dropped back into place without springing or cutting.

Junctions in existing metal pipes shall not be made unless an approved closure pipe is used in each case. Springing pipes into position shall not be resorted to or allowed.

Division 14.—Basement and Cellar Drainage.

Section 49. *Fixtures*.—No water-closet, urinal, and/or other fixture shall be placed in any cellar or basement, or on any floor below ground level, unless by consent of the Authority, and then only when, in the opinion of the Authority, other provision cannot be made. The owner shall submit such plans and/or other information as the Authority may require, and shall undertake in writing to accept all risk of damage that may occur. If satisfied that the ventilation and lighting provided are in accordance with section 151 or 152 of these By-laws, and all other conditions have been complied with, the Authority may give its consent: provided always that such consent may be revoked by the Authority at any time, and that upon fourteen days' notice of revocation such fixture shall be abolished by the owner.

Section 50. *Risk of Back Flow*.—Where such cellar, basement, or floor below ground level is at such a level as may, in the opinion of the Authority, involve risk of back flow in the event of the sewer becoming overcharged, the sewage from all fixtures therein shall be raised by ejector, syphon, or other approved mechanical appliance to such height as ordered and discharged into the sewer as and where directed.

Section 51. *Seepage Drains*.—In no case shall seepage drains from cellars, basements, or any floor below ground level be discharged into a sewer without the consent of the Authority.

Where such discharge is permitted by the Authority, the seepage shall be raised by ejector, syphon, or other approved mechanical appliance to such height as ordered, and discharged into the sewer as and where directed.

Division 15.—Polluted Areas.

Section 52. *Connexion.*—The Authority may, if it thinks fit, authorize, or require that any of the following places:—namely, stables, cow-sheds, dairies, market places, areas for washing vehicles, and any other polluted place, be connected with the sewers, subject to such conditions as the Authority may impose.

Section 53. *Conditions Governing Connexion.*—No such connexion shall be made unless the following conditions have been complied with:—

- (a) The place to be connected shall, if required, be so roofed as to prevent the entry of rain water from it to the sewers, and in no case shall rain water be permitted to discharge on to such place from adjoining surfaces.
- (b) The place to be connected shall be paved with approved materials and graded to the satisfaction of the responsible officer of the Authority.
- (c) The drain from any such place shall be provided with an approved silt trap with a removable grating and connected with the drain above the interceptor trap where such is used.

Division 16.—Pipe Trenches.

Section 54. The trench for the house drain from any property shall be so dug as to meet the Authority's sewer at the position provided or to be provided for the connexion.

The material from the trench shall be so placed as to cause the least possible obstruction and inconvenience to the public. Proper barriers and lights must be maintained where necessary to guard against accident during the progress of the work.

In refilling the trench selected refilling shall first be deposited around and over the pipe to a depth of 12 inches and carefully consolidated after which the remainder of the trench shall be filled in layers and rammed or flooded, as ordered or approved.

No stone shall be used in refilling until earth or gravel has been placed over the pipe to a depth of 1 foot, or more if directed.

On no account shall any water, sand, earth, &c., be allowed to enter the sewer during the progress of the work.

On completion of refilling the surface shall be restored as nearly as possible to the same condition as it was in before operations were commenced, unless the owner in writing otherwise requires.

Division 17.—Laying Drains, &c.

Section 55. *Position and Line.*—Every drain and every fitting, &c., connected therewith shall be laid and fixed where directed by the responsible officer of the Authority. As far as possible, all drains shall be laid in straight lines; where changes of direction occur they shall be made in manholes, or by a suitably curved pipe with an inspection opening on each straight pipe next adjoining the curve.

Section 56. *Oblique Junctions.*—Where any drain joins another drain the junction shall be made obliquely at an approved angle with the direction of flow of such drain. Right-angled junctions shall not be made.

Section 57. *Connexion to Sewer.*—The position of the Authority's connexion to any premises shall be located prior to the commencement of any drain excavation. The disk stopper at the point of connexion to the sewer shall be carefully removed so as not to injure the socket or allow any debris to enter the sewer.

The first length of the drain at the branch shall be an inspection opening.

Section 58. *Gradients.*—All drains shall be laid on an even grade, and, except by special permission in writing, from the Authority, such gradients shall in no case be less than the following minimum permissible gradients:—

4-in. diameter	1 in 40
6-in. diameter	1 in 60

In cases where the grades of 4-in. and 6-in. drains are steeper than 1 in 10 and 1 in 15, respectively, concrete stops shall be placed as and where directed by the responsible officer of the Authority.

Section 59. *Depth of Drains.*—Drains of stoneware or concrete pipe, unless bedded in and encased in concrete of not less than 3 inches thickness over any part of the drain, shall be laid at a depth to the socket of the pipe of not less than the following:—

- (a) In public thoroughfares, rights-of-way, or other open spaces subject to vehicular traffic—2 feet.
- (b) In private property not subject to vehicular traffic—1 foot.

No person shall alter the surface over any drain so as to deprive it of the minimum depth of cover specified by the preceding paragraph, unless approved measures are adopted to protect the drain.

Section 60. *Laying Drains.*—All pipes shall be laid to such lines and grades as may be shown on the plans or directed, and, except where otherwise ordered, holes shall be cut in the bottom of the pipe trench to receive the sockets of the pipes, and all the pipes shall be carefully bedded with the barrel on the solid ground.

In the case of rock-bottomed trench, or where directed, the pipes shall be bedded up to the horizontal diameter upon not less than 2 inches thickness of approved sand or other approved material measured from the barrel of the pipe.

In water-charged ground, or where the foundation is bad, or where directed, the drain shall be formed of cast-iron pipes; or, if of stoneware or concrete pipes, they shall be bedded on and encased in concrete as ordered, and, if ordered, supported upon approved timber foundations as directed.

Drops or bends in vertically-inclined drains shall have a concrete support placed under and around as directed.

Division 18.—Drains Under Buildings.

Section 61. Every drain shall, as far as practicable, be so constructed as not to pass under any building. Where a drain does pass under a building it shall, if practicable, be laid in a direct line for the whole distance beneath such building, and shall have approved means of access for rodding outside the walls of the building, and also, if directed, beneath the building. The pipes used shall be of stoneware or concrete, surrounded by not less than 4 inches of concrete or 3 inches of cement mortar, or of cast-iron.

In any case in which pipes pass through or under walls, approved provision shall be made to prevent injury to the pipes by settlement, and, in outer walls, to prevent the ingress of vermin.

Division 19.—Joints, Drainage.

Section 62. *Stoneware and Cement Pipes.*—Joints of stoneware and cement pipes shall be filled in solidly with cement mortar neatly splayed off, or with other approved material. After each joint is made the interior of the joint shall be wiped clear of surplus mortar before the next pipe is laid.

Section 63. *Cast-iron Pipes.*—All joints in cast-iron pipes must be stemmed with approved gaskets and so filled and caulked with lead or other approved material as to make them gas and water tight.

All connexions between stoneware or concrete pipes and cast-iron pipes shall be made as for joints in stoneware or concrete pipes.

Division 20.—Drainage Ventilation.

Section 64. *Vents on Main House Drain.*—The main drain shall be ventilated at its upper end by a pipe ventilator erected vertically, and such ventilator may be a soil pipe.

If the drain is provided with an interceptor trap there shall be in addition a ventilator connected to the interceptor trap shaft.

In such cases there shall, wherever practicable, be a difference in height of not less than 6 feet between the tops of the vents at the upper and lower ends of the drains respectively.

Section 65. *Vents on Branch Drains.*—Branch drains need not be vented if the drainage traps are within 20 feet from the main house drain, measured along the line of pipes, including the drop, if any, from the centre line of the main drain to the centre of the outlet side of the water seal of the drainage trap, unless otherwise ordered by the Authority, in which case they must be vented as directed.

Section 66. *Height of Vents.*—Every vent pipe extending upwards from a soil or drain pipe shall be carried not less than 6 feet higher than any window or door within a distance of 30 feet thereof, and in any case at least 18 feet above ground level and 6 feet above the level of the eaves or coping, or to such additional height as may be necessary to prevent effectually the escape of foul air into any building within the vicinity.

Where the vent pipe extends into a gable of the building it shall further be carried at least 2 feet above the point of intersection with the roof.

Such pipes shall, where necessary, be provided with sufficient clips or stays to support them effectively.

Section 67. *Chimneys.*—No chimney shall be used as a ventilator to any drain, soil, or waste pipe.

Section 68. *Vents Near Chimneys.*—Vents must, as far as possible, be kept away from chimneys and ventilating air shafts. Where a ventilator pipe terminates 6 feet or more from a chimney opening or ventilating air shaft, the requirements of section 66 shall apply, but where the distance is less than 6 feet the vent pipe shall, unless otherwise ordered, terminate not less than 2 feet below the top of such chimney or air shaft.

Section 69. *Vents Adjoining High Buildings.*—In any case in which a building is erected next to a previously existing building of less elevation, and any windows of the new building are located within 30 feet of any existing vent stack on the lower building, the owner of such new building shall defray the cost of or shall himself make such alterations to the vents of the previously existing building as necessary to conform with section 66.

The owner of the lower or existing building shall make such alterations upon the receipt of money, or security therefor sufficient for the purpose, from the owner of the new or higher building, or shall permit at the election of the owner of the new or higher building, the making of such alteration by the owner of such new or higher building.

Section 70. *Size of Drainage Vents.*—Drainage vent pipes shall, unless otherwise ordered, be of not less than 4 inches diameter in the case of educt vents and not less than 3 inches diameter in the case of induct vents, with the provision that where more than one educt vent is provided the vent on the longest line of drain shall be of not less than 4 inches diameter and all others of not less than 3 inches diameter; but in no case shall a drainage vent be of smaller diameter than necessary to comply with the requirements of section 85.

Unless otherwise ordered or approved every such vent pipe shall be without return bend and provided with basket end or educt or induct cowls as directed.

Section 71. *Materials, &c.*—Drainage vent pipes situated wholly outside of buildings shall be of cast-iron, galvanized wrought iron, double galvanized sheet iron, or other approved material above ground, and of stoneware or concrete beneath the surface of the ground. Galvanized sheet-iron vent pipes shall not be less gauge than 20 for 3-in. and 4-in. diameter pipes and 18 for 6-in. pipes, and where ordered the first 6 feet above ground shall be of cast-iron or other approved material. Drainage vent pipes inside a building shall, unless otherwise approved, be of cast-iron or of galvanized wrought iron. The circumferential joints of galvanized sheet iron vent pipes shall be riveted and soldered.

Section 72. *Gratings.*—Openings for ventilation shall be effectively protected by approved gratings of ample area. The aggregate area of apertures in any such grating shall not be less than the sectional area of the pipe or drain to which such grating is fixed. Every opening for ventilation shall at all times be kept perfectly free from obstruction.

Section 73. *Pipe Clips, &c.*—There shall be at least one pipe clip to each 6-ft. length of vent pipe.

For cast-iron or wrought-iron pipe approved coated wrought-iron clips and for galvanized sheet iron pipe 1½-in. x 14-gauge galvanized band iron clips shall be provided. Wherever it is necessary to fix pipes clear of the wall approved extension clips shall be used.

Clips in the case of cast-iron pipes must be placed tight up against the bead or underside of collar.

Section 74. *Attachment to Walls.*—Where a galvanized sheet iron pipe, with or without offset, is carried up above the brick wall of a building, a galvanized wrought-iron clip must be used, leaded into the wall near the top wherever possible and bolted against the vent pipe.

All band iron clips of vent pipes to brick walls shall be fastened with nuts and bolts, leaded in, or by means of T-headed bolts passed through the brick joints and turned at right angles to the joints.

Section 75. *Supporting Vents.*—Wherever a vent pipe with offset is not more than 12 feet long above such offset it need not be stayed; if longer, it shall be stayed as directed with ½-in. galvanized wrought-iron piping.

An unsupported length of 15 feet above highest clip of straight vent pipe without offset will be permitted.

Section 76. *Induct Vents.*—Every induct vent shall be securely supported in an approved manner.

Division 21.—*Drainage Traps.*

Section 77. *Trapping of Inlets.*—Every inlet to any drain other than inlets provided for ventilation in accordance with the By-law shall be provided with an approved trap. No inlets to any drain connecting directly with a sewer shall be constructed within a building other than such inlets necessary for the apparatus of any water-closet, urinal, or housemaid's slop sink.

Section 78. *Classes of Traps.*—Four classes of traps shall be used—

- (a) "Traps" for intercepting gases only, to be of round section and self-cleansing form, but not such as to be empty by momentum or suction.
- (b) "Silt traps" for intercepting both gases and solids, to have slightly tapered sides, flat bottom, and rounded angles, and provided with approved means for catching and removing solids.
- (c) "Grease traps" for solidifying and collecting grease or other semi-fluid matter liable to foul the pipes, to be of such form as approved.
- (d) "Oil traps" for collecting all kinds of oil and to be of such form as approved.

The term "yard gully" is applied to traps (a) in cases where they are used externally and fitted with dished tops and gratings.

Section 79. *Water Seal.*—Every drainage trap must have a water seal not less than 2 inches in depth.

Section 80. *Provision of Yard Gullies.*—A yard gully must, wherever practicable, be provided in the yard of every property as near as practicable to the kitchen or back door, with a trap

placed over it at a height of not less than 2 feet. No yard gully shall be situated within a building. Where it is not practicable to provide a yard gully, a slop sink must be provided within the building.

Section 81. *Details of Yard Gullies.*—Yard gullies shall be fitted with dished tops and gratings, the dished top being in one piece with the trap or jointed thereto spigot and faucet, or as otherwise approved.

The depth of the dished top to the grating must be not less than 6 inches, and the grating must be so fixed as to be removable with reasonable facility.

Section 82. *Kerbing, &c., to Yard Gullies.*—Yard gully basins and the dished tops of silt traps must be so surrounded with an approved impervious kerbing as to prevent the access of surface water to the drains, and, if directed, the wall at the rear of the gully or silt trap, if of brick or stone, must be cement rendered to the height of the top over same, and if of wood the wall must be provided with an approved galvanized sheet iron apron.

PART 4.

PIPE CAPACITIES.

Division 22.—*Capacities of Soil, Waste, Drain, and Vent Pipes.*

except private residences, which shall have a minimum capacity of 30 gallons.

Unless otherwise directed by the Authority, the storage tanks may be placed in the water-closet apartment itself, on the roof over a flat or gutter, or in an accessible place between the ceiling and the roof, in which latter case a safe of galvanized iron, lead, or other approved impervious material, with overflow, shall be fixed under the storage tank.

Section 162. *Venting Closet Pans.*—Unless otherwise directed or permitted, every closet pan on an upstairs floor shall discharge into a soil-ventilator pipe, except that any closet pan on a floor which is not more than 8 feet in height from the ground surface level may be ventilated by an anti-syphonage vent only, in accordance with the requirements of sections 85 and 108, and discharge into a soil pipe without extension as a ventilator pipe; provided that no fixtures at a lower level are connected to such soil pipe.

Any closet pan where ordered, and, also, unless otherwise directed, every internal closet pan which is more than 4 feet from a fully vented soil pipe drain as measured horizontally between the centre of soil pipe and centre of pan, shall be ventilated by an anti-syphonage vent in accordance with the requirements of section 85 sufficiently close to prevent syphonage, and in no case more than 18 inches from the trap. Notwithstanding the above, all "S" trap pans must be provided with anti-syphonage vents.

Section 163. *Grouped External Closets.*—Where there are more than three external water-closet pans grouped on the ground floor or in the yard of any premises special provision must be made to prevent syphonage.

Division 31.—Urinals and Flushing Apparatus.

Section 164. *Urinals, General.*—Every urinal on premises licensed for the sale of fermented or spirituous liquors, and on premises used as a factory, workshop, work place, manufactory, shop, office, or school where persons of the male sex are employed or in attendance, shall be of such size as the Authority requires. Provided that when the number of persons of the male sex does not exceed ten, a urinal need not be fixed if the closet has a pedestal pan with a hinged tip-up weighted seat.

Section 165. *Internal Urinals.*—The positions, approaches, arrangement of lighting, ventilation, &c., for internal urinals shall comply as nearly as possible with the provisions as to internal water-closets.

Section 166. *Details of Construction, &c.*—Except by special permission, only round-backed stall type urinals of approved impervious material shall be used. The soil pipes shall be of lead, stoneware, or glass, enamelled or coated cast-iron, or other approved material, shall be kept as short and free from bends as possible, and shall be trapped. Inspection openings shall be provided on soil pipes as directed, with clamped covers. The urinals shall be provided with approved flushing apparatus, and a hose tap shall be provided in a suitable position for hosing down.

Section 167. *Treatment of Floors.*—The floor in front of a urinal shall be covered with approved impervious material for a width of not less than 2 feet, or, if raised above floor level of urinal apartment, not less than 1 ft. 6 in., and graded to drain to urinal.

Impervious Materials.—The following materials will be considered impervious:—

- (a) For urinals: glazed fire clay or salt glazed stoneware.
- (b) For floors in front of urinals: Glazed tiles set in cement mortar (composed of equal parts of cement and sand), concrete 6 inches thick rendered with ½-in. thick cement mortar, slate, marble or asphaltum.

Section 168. *Flushing Apparatus.*—Pull and chain flushing cisterns or other approved apparatus operated by hand shall be fixed on all urinals except where automatic flushing cisterns are permitted or directed by the Authority.

Section 169. *Flushing Cisterns.*—The discharge from a cistern shall be equal to 1 gallon for each urinal stall, except where otherwise allowed by the Authority, but in no case shall larger than a 3-gallon cistern be used.

The height of a cistern shall, unless otherwise allowed by special permission, be at least 8 feet from the floor to the top of the cistern. The cistern shall be so fixed that the ball tap is accessible.

A separate stop tap shall be provided for each urinal cistern.

Section 170. *Flush Pipes.*—Flush pipes for urinals shall be of brass or copper with gunmetal fittings, and shall have a minimum diameter of 1¼ inches, except that flush pipes for automatic flushing cisterns generally shall not exceed—

- for 1-gallon cistern, ¾-in. internal diameter,
 - for 2-gallon cistern, 1-in. internal diameter,
 - for 3-gallon cistern, 1½-in. internal diameter,
- with branches as directed by the responsible officer of the Authority.

Division 32.—Housemaids' Slop Sinks.

Section 171. *General.*—Housemaids' slop sinks shall be made in one piece of approved impervious material and provided with approved flushing apparatus of 2-gallon capacity.

Section 172. *Ventilation, Light, &c.*—Housemaids' slop sinks shall be so placed and ventilated as to comply with the requirements for water-closets as set out in sections 151 (a), (b), and (c), and 162.

Section 173. *Bibcock over Slop Sink*.—A bibcock shall be fixed directly over a housemaids' slop sink, and at least 18 inches above such sink.

Division 33.—Wash Troughs.

Section 174. *General*.—Wash troughs shall be of approved pattern and material, securely fixed and graded to outlet pipe, fitted with brass strainer sunk to level of bottom of trough.

Section 175. *Support for Lead Waste Pipe*.—Where the distance between outlets on troughs exceeds 21 inches and lead waste pipe is used, the pipe shall be supported either by a lead tack wiped on the top of the pipe or by a wooden block screwed to the bottom of the trough and clamped to the pipe.

Section 176. *Troughs Abutting Against Brick Wash Copers*.—Wherever the end of a wash trough abuts against the brickwork of a wash copper the space between the end of trough and the brickwork shall be filled with approved waterproof material.

Division 34.—Sinks, Baths, Showers, and Lavatory Basins.

Section 177. *Sinks*.—All new sinks shall be fixed on brackets and traps and wastes left readily accessible.

Section 178. *Galvanized Sheet-iron Baths*.—The bottoms of galvanized sheet iron baths shall be effectively supported. Such baths shall not be enclosed. Longitudinal joints in the bottoms of baths shall not be permitted.

Section 179. *Bath Traps*.—Where a bath trap is fixed on the outside of a wall it shall in no case be more than 3 feet from the outlet of the bath, unless by special permission of the Authority.

Section 180. *Showers*.—All showers on the ground floor shall be provided with a 4-in. stoneware or concrete trap, fitted with brass grating. All showers above the ground floor shall be provided with drainage in accordance with the requirements for baths.

The floors of shower compartments shall be well graded to the trapped outlet and shall be constructed of not less than 4 inches of concrete, trowelled smooth or covered with tiles set in cement mortar, or of other approved impervious materials, or if constructed of timber shall be covered with enamelled cast-iron, approved non-corrosive sheet metal or other approved material turned up at the edges and flashed in accordance with the requirements of section 89.

The walls of shower compartments shall be constructed of brickwork or concrete, cement rendered to a smooth finish or covered with tiles set in cement mortar or of other approved impervious materials, or if constructed of timber shall be lined with approved non-corrosive sheet metal or other approved impervious material and with impervious joints.

Section 181. *Venting of Lavatory Basins*.—All lavatory basins, placed singly, shall be provided with anti-syphonage vents, except where the length of waste pipe does not exceed 4 feet, measured from crown of trap to outlet and of waste pipe and syphonage does not occur.

In ranges of lavatory basins ventilation by means of a single vent pipe at the upper end of the range will be permitted, provided that the vent and main waste pipe are sufficiently large to prevent syphonage.

Section 182. *Tip-up Basins*.—Tip-up lavatory basins shall not be permitted.

Division 35.—Safes and Overflows.

Section 183. *Safes, Where Directed*.—Safes of lead or other approved impervious material shall be fitted under housemaids' slop sinks and internal water-closets, and in such other positions as directed.

Section 184. *Lead Safes in Water-closets*.—All lead safes shall be laid with sheet lead weighing not less than 5 lb. per square foot, and where the whole floor is not covered with lead the safe shall extend 12 inches beyond the sides and 15 inches beyond the front of the pan, measured from the outside of the basin, and shall extend back to and 3 inches up the wall and over flashed, if directed. The roll of such safe shall be 2 inches wide and $\frac{1}{2}$ inch high.

Section 185. *Safe Overflows*.—Unless otherwise permitted, every safe shall be drained by a separate 2-in. diameter pipe, provided at the inlet with a brass grating and at the outlet into the open air with a flap valve of brass or other approved metal, and shall not connect with any waste pipe, soil pipe, drain, or sewer.

Section 186. *Cistern Overflows*.—Every cistern supplied with water shall, unless otherwise approved, have an overflow pipe of adequate size, discharging in a position where it will not cause damage, but where it will act as a warning pipe. On ground floors where cisterns are fixed over impervious floors graded to drain outside of the room the overflow may discharge on to such floors, provided no damage is likely to arise therefrom.

Section 187. *Discharges From Overflows*.—Overflows may discharge into the open air above ground floor level only when the discharge will not cause any inconvenience or nuisance. In all other cases the pipes must be brought to the ground surface or be arranged to discharge where they will not prove a source of annoyance or inconvenience.

Section 188. *Existing Floors*.—Where necessary, in the opinion of the responsible officer of the Authority, every existing floor under a fixture shall be regraded and a proper waste pipe and, if directed, a flap valve fixed.

Division 36.—Existing Fixtures.

Section 189. All existing fixtures, fittings, and appliances not in accordance with this By-law which the owner may desire to retain unaltered, and which, in the opinion of the Authority, will be inoffensive, may at the distinct request in writing of the owner only remain unaltered until such time as the Authority shall otherwise order. Existing fixtures, fittings, and appliances which, in the opinion of the Authority, are offensive shall be removed at once.

PART 6.

WATER SUPPLY.

Section 190. *Supply of Water to Fixtures*.—All water-closets and other plumbing fixtures shall be provided with a sufficient supply of water for flushing purposes to keep them at all times in proper and cleanly conditions.

Every owner of property who desires, or has been ordered by the Authority, to provide sanitary appliances for his own property, and to connect his property with the sewers of the Authority, shall before or at the commencement of the work of making such connexion, provide piping approved of by the Authority for the conveyance of water, and shall cause the piping to be joined at the most convenient water supply main, or, with the permission of the Authority, to some pipe already joined to the main. Such piping shall be of capacity sufficient to supply all sanitary fittings on the property freely and continuously, and convey to the flushing cistern, flushing tank, or other flushing apparatus of each water-closet on the property enough water to fill the same at a rate of not less than 1 gallon per minute, and the owner shall cause such piping to be connected with the cistern before the completion of the work.

The water supply to any fixture shall be so arranged that there shall be an actual physical discontinuity between the water stored or used in any such fixture and that in the water service pipe.

Section 191. *Material, Condition, Capacity, &c., of Water Supply Piping*.—The entire length of the water supply piping from its connexion with the water supply main to the water-closet flushing cistern or other fixture shall be such as is, in the opinion of the Authority, suitable in regard to material, condition, and capacity to convey a sufficiency of water for the sanitary requirements of the particular tenement.

The owner shall keep the piping from becoming, whether by reason of corrosion or other cause, of insufficient capacity to fill the flushing cistern, storage tank, or other flushing apparatus at the rate of not less than 1 gallon per minute.

Section 192. *Fixtures Not Connected With Sewers*.—No water service pipe shall be laid to supply any fixture in any property in any sewerage area unless such fixture is connected with the sewers of the Authority, or unless special permission in writing has been previously given to lay such service pipe.

Section 193. *Storage Tanks*.—Water supply pipes to storage tanks for internal closets shall be of not less than $\frac{1}{2}$ -in. diameter and be provided with stop taps and high-pressure ball valves, except where the elevation of the storage tank is not sufficient to allow of high-pressure ball valves being used. In such cases the permission of the Authority shall be obtained to fix low-pressure ball valves where the head of the water supply of the storage tank to the flushing cistern is less than 20 feet, a low-pressure ball valve shall be provided to the cistern.

Outlets from storage tanks shall not be less than $\frac{1}{2}$ inch for one or two cisterns, and 1 inch for three to six cisterns.

Wherever a larger number than six cisterns is fixed, the size of the outlet shall be proportionally increased. The overflow from a storage tank shall be $1\frac{1}{2}$ inches in diameter, and a stop tap shall be fixed on the rising supply pipe to the tank.

Full way gate valves shall be provided between storage tank and flushing apparatus.

Section 194. *Supply Pipe Connexion With Flushing Cistern*.—In all water-closets, where directed, a piece of lead or copper pipe not less than 12 inches in length shall be used between the flushing cistern and the supply pipe.

The foregoing By-law was made and passed by the Kerang Sewerage Authority at a special meeting held on the 17th day of June, 1936, and confirmed at a subsequent special meeting of the authority held on the 19th day of August, 1936.
